K: I'm calling you to get you to start drafting a statement about Turkey I can make at the press conference. And the point that should be made is it should not be done only in the Greek-Turkish context, it should be done in context of the essential requirements of the relationship to Turkey for Western security, and that this relationship exists not as a favor to Turkey, but to because it has always been judged in the entire post-war period. That the security of Turkey was in the interest not only of the Mediterranean, but of all of Europe and of the Atlantic area. And for us now to give this up is a disaster for which Congress will be held fully responsible before history and the American people. Secondly, in addition it doesn't help the Greeks. Thirdly, you can state some principles which we will try to pursue in bringing about a Greek-Turkish solution. You can say we did not approve of all of the actions of Turkey. We know Turkey has to make concessions, but this is not the way to do it. Can you draft something?

S: I will indeed. Yes, yes. But also just let me revert to the other thing that I'm in really quite overwhelmed, and extremely....

K: No, no, you did an outstanding job and you're doing me a favor by going there.

K: ..I don't think it has fully penetrated the Department or I don't know why it should not that I am looking for an excuse to abstain from the charter. I am not looking for a victory there. I am not looking for getting Rabasa's brains bashed in.

I: I realize that .

K: I see nothing in the cables that Percy and Schwbel have any such interest.

I: I thought you said in the meeting the other morning that if two or three Europeans...

K: Yes, but look Bob it is one of those things where the Department has twisted my instructions. I would have liked to abstain but it is too late. They have now brow-beaten enough Europeans to vote with them. I suppose you are telling me that they have now got somebody.

I: I saw in the cables last night they had about six or seven.

K: That is not what I wanted but we now have to go with it. Please instruct these people or I will fire somebody today. I want Rabasa to feel that we are cooperating with him.

I: All right.

K: From Percy's triumphant account of me of his behavior yesterday he was beating Rabasa's brains in.

I: I see. I suppose Rabasa feels that way.

K: I have not talked to him. I know Schwbel and I know Percy. Percy does not give a damn about this limited charter. He does not care what went before or what will follow after. I will talk to Bill about that. At a minimum I don't want to jeopardize our relations with the Mexicans.

P: Good morning.

K: How are you?

P: Fine. I just wondered if you knew that Echeverria will be up at the U.N. on Wednesday in connection with the charter.

K: No, I didn't.

P: It's highly confidential. I have good resources inside the Mexican delegation, but he'll probably be there. I do not detect in the Mexican delegation the negative attitude that Rabasa expressed to Scali that he thinks this is very serious. I think this will simmer and cool off very quickly. I have expressed to the delegation that we intend within time to have a charter that will be meaningful. Scali's speech was not aimed at the charter. I've had a good response from the Mexican delegation to the tone of that speech.

K: I know Echeverria well. I think the reaction will be very unpleasant. That has been his pet.

P: Their feeling as Rabasa expressed it to Scali, is that the Mexican people will be outraged at this. I can't believe that. I can understand Echeverria and there's no question of their disapproval.

K: This depends in part on how they -- on what the Mexican government says and the Mexican public's reaction.

P: I'm more convinced then ever we simply could not have acceded to the pressure.

K: We voted that way so we obviously agreed with it.

P: I wish I could have pulled something together but there was no way without total capitulation on our part. We even made a few changes on the floor in order to get New Zealand and Australia which helped a little bit.

K: Not at all. This is confidential, but I want to have everything clear. We are putting together that response that I mentioned to you and we thought, all things considered, it would help Esenbel the quicker the better. The problem is the Turks have made the condition that the Turkish Aid cutoff must be terminated and we have been talking to the Turkish Foreign Minister and he is willing to go ahead tomorrow if we can send him the conference report and he has been given to understand that this will be accepted by Congress.

B: I think you can say that because we are putting the finishing touches on a press statement and when it is ready I will send it down to your office.

K: Good. It won't embarrass you if I authorize Esenbel to say that this conference report will be accepted by Congress?

B: It won't me. What about you Paul?

K: Because then we can get Denktash and Clerides tomorrow by 5:00 Nicosia time, or at least establish contact.

S: The only reason I have apprehensions about him saying that publicly is that this could appear to undercut Bitsios and leave him standing naked in the rain.

K: Bitsios is waiting for the call.

S: Can't Esenbel say that this conference has made this report, at least on the Turkish Aid question he understands there is a move to accept it.

B: In a certain sense you would be protected if you tell him you don't control Congress, it's an independent operation. But Sarbanes, Brademas and Rosenthal.....

K: That we can tell him but his problem is they have taken an NSC decision not to negotiate while there is a cutoff in effect. Congress wil act tomorrow and get the talks started on Thursday. P: There is a limitation in the PL-480 -- $250 million in commodities. We had worked out some language that could give us more flexibility. Conte caught it and now we may be caught. Here is what we suggest and I apologize for coming to you. I told Murphy of the AID agency that you are getting ready to buy rice and to buy all of it. Have the pipeline completely dry when you come before my Committee in January so I can rework this language and get you more money for Cambodia. They need to dry up the pipeline. I insisted on buying 100,000 tons of rice. They are not moving. They need to spend it all. I want to be able to say Mr. Conte we have no money left and we will have to give additional money. You know I mentioned to you the PL-480. Are you getting on top of it?

K: I am taking steps.

P: I will not worry you again for six months. I am your friend. If you can get through to AID to buy 100,000 tons of rice to dry up the pipeline. Then I will be able to get more money for you in Jan. Otherwise I am stuck.

K: I will do my best.

P: Happy holidays.

K: Thank you Mr. Chairman.

J: It makes me unhappy. It is sort of speculating. They have it as a quote in the NY Times.

K: They ask me if I am going to leave. I say I have no compulsion to stay.

J: I wish you had said a flat no. You have an enormous job to do for country and the President. You should say that you have no time to think of such things.

K: Good idea.

J: Your answer feeds speculation.

K: O.K.

J: I have invited about 100 high-powered people to the dinner you are doing for me. These people have a million things to do. My acceptances are 80.

K: What's wrong with the other 20.

J: All right, I will forgive you for that statement.

K: I understand your point and I will keep i t in mind. I have always thought that my best strategy was to leave the impression that I don't give a damn.

J: I don't agree. I think you are so involved in such monumental events that one has to have a sense of mission. You would never hear Churchill say that and that is what you are.

K: I appreciate your saying that. I appreciate your advice in addition to the compliment.

J: Right now it is the hinge of fate. I think it is that serious.

K: Frankly, that is what is keeping me here.

J: I know that.

K: But I have always felt that for me to leave that implication is very dangerous.

J: I think the implication you have to leave is one of absolute dedication and you have to have the backing of the Preisdent and rule out this nonsensical speculation. You are there and going to be there and do the job. There is no one in the country who could do it better and you are needed more than ever.

K: I think there is no problem with the President.

J: I think that is the way to do it considering the organization of the American government.

K: You think it desirable that it come from here.

J: You take it up where he leaves off. Why the discussion. I am here on the job and I have enormous responsibility. Why get diverted on the speculation of what might -appen.

K: I have no trouble with that. My problem is that I thought it best not to leave the impression that I am clingking to the job.

J: That impression is made more by your uncertainty than by the philosophy that you are needed and wanted in the job.

K: I understand your point. It would be best to say it is not my decision to make. As long as I can be of service I will stay.

J: Right. You are just too busy and too much involved to speculate in that way.

K: Good point. I agree.

J: The other thing I want to suggest is that I am anxious to see you. It does not have to be tomorrow but I am deeply worried about certain situations that I see developing.

K: Do you want to have lunch on Thursday.

J: I am going to Acapulco and I will be back on the 6th.

K: What is a Paulist Father.

TK: A Catholic sect -- a respectsble group pf priest. He called me this afternoon and said the Catholic-Irish broadcasters are doing a year-end program and would like a radio tap just asking you the question what is your vision of peace. I figured if you did it on Monday, perhaps you would have no objection of answering that question on peace. Perhaps something about a minute long.

K: Let me think about that.

K: This is on background.

B: Did you have a nice holiday.

K: It rained all the time.

B: The reason I'm calling, I met today with the Russians who was talking about a number of things and the interesting one is the Middle East. He was saying the Americans are ____.

K: You will write that?

B: No, I'm not writing anything until I find if it's true.

K: What do you mean?

B: Let me tell you. I said as far as _____.

K: Why don't you ask Dinitz how the Israelis feel.

B: I'm really interested in the American policy. I think I understand it.

K: If we want to impose a settlement, we don't need the Soviets.

B: Would it last without the Soviets?

K: Yes. If we are willing to have 67 borders, then we can do all of this.

B: He said with some alternatives.

K: This goes back to Rogers. All of this was part of the Rogers negotiations.

B: At the time of Rogers negoations they refused to go along with the Russians formulation.

K: That was no a significant problem. The suicide and self destruction of American (liberals).

B: What I'm trying to find out are they going on and ____and want to talk peace in the Middle East.

K: They are always willing to talk peace anytime they want. They've been prepared to open that since 1969. There's nothing new in this.

B: There's a new situation now.

K: When we get ready to propose a settlement, we will be happy to do it with the Russians. None of this is for quotation. The Russians can manage themselves into a position of being good guys be a rejection by Americans.

B: I'm tryin not to use my intuition.

K: They are not banging at our door. The fact is, this has been part of the negotiations ever since 1969.

B: Hasn't the situation changed since that time? With the war in Israel. I'm just asking you. Isn't that what we're doing. Are we at the end of the line?

K: I don't believe we're at the end of the line. I believe that to force Israel back suddenly might leave it in a situation like Czechlovakia.

B: To do it suddenly.

K: To do it maybe at all. This I don't want to face now. Will you look at all guaranteees in the last 40 years and tell me which have really worked. The only guarantee that can help Israeli is an American guarantee.

B: Would it hurt to have both.

K: It might. It might give the Soviets -- the Soviets have never made a concrete proposal to us.

B: We don't believe it would be useful.

K: At this time.

B: Does that really mean after the next (Sinai) thing.

K: If there is a next Sinai thing.

B: Do you see yourself having to go there?

*

K: I'll have to make up my mind in the next few days. I have no immediate plans. I don't have any plans right now but that could change. Nor am I making any plans.

B: By the way, I'm very disappointed that you would choose Bill Moyers over me.

K: That's been arranged over me.

B: I'm hurt and insulted.

K: That's ___.

B: I have to check one other thing with you. A story we're running. They want to know if there's an offensive comment on this. (Reads story)

K: We have tried to make clear all the ___ between the U.S. and Soviet Governments.

B: Have they told you the 1972 things is null and void.

K: No. They told us and our questions about it and we're discussing it. I cannot go into a confidential exchange.

B: You don't want to make a statement.

K: No.

B: You sound tired.

K: I'm fine.

B: You don't enjoy talking to me.

K: I enjoy talking to you but to have to come back to Washington and to all this nitpicking.

B: If someone tells you they are _____.

K: You have to ___it and does it sound plausible.

B: It sounds like ___.

K: To get a settlement?

*

B: No, that they want to get into negotiations. The reason I called you, no one really knows what exchange there are between you and the Russians on certain issues. You are the authority on it

K: They barely told us more than what they told you.

B: They say that they want withdrawl on the 67 borders.

K: If you look at it. What does it mean the U.S. has to guarantee it and ___.

B: They are capable of lying to us.

K: There are a lot of things involved.

B: We didn't question them on that. You don't know a thing without an analysis in the aftermath of the oil embargo.

K: We don't want to bring about a situation that breaks the back of Israel in the ___of bringing a final settlement in months. In the long run, we are prepared to talk to the Russians about a settlement.

B: Don't the Israelis realize they have to get back to something that looks close to 67.

K: This is not something I want to talk about.

B: For a different ___in the current situation.

K: The situation is being complicated by [redacted] like GeorgeBall. B6

B: He's saying things because he's____. Sadat talked about 3 months.

K: After that it will still be a gestation ~~peri~~ period of many months before you can talk about war.

B: You really think so?

K: Yes.

B: Even if we have some movement it will put it off further?

K: Probably.

B: How much time do you think we have?

D: Tomorrow there is a government meeting and he asked me to phone you. That's why I am disturbing you. He is not pressing to have the meeting held at the time we orgiinally planned...the 8th, 10, or 9th. It could be said the internal situation on the other hand and the time for clarifying more business. In addition...and I do not want ~~kx~~ you to feel he is pressing for the visit or trying to delay it. He will abide by whatever you decide. I would like to know before tomorrow mornings visit. He would postpone the visit to the JAA but he does not want to leave it hanging. I told him we are trying to look for the best way. What your apprehensions are and if he came, it is this meaning.

K: What do you want to hear from me? Whether he should come?

D: Yes.

K: I think that they better leave it open or I will have a ~~kxxk~~ lot of explaining to do in Egypt.

D: You think he should come?

K: No. I think he should leave it open and make the decision during the week.

D: In one or a few days we will get a picture here.

K: Yes.

D: Ok. I will tell him this. But he should leave in tact his plans with the JAA.

K: Yes. At least until Monday or Tuesday. We want to have a chance to tell the Egyptians he isn't coming.

D: Ok. So I can say to him that he should say to the government tomorrow that no change has taken place. If there is a change they will inform him. Then we will have to have a special cabinet meeting.

K: Can't they give him the authority to come and leave it open?

D: Probably. It will also involve for him changing plans of the JAA.

K: I would be delighted to see him if we can then keep the discussions out of the newspapers. From my point of view it would be good if he came.

D: Oh, it would.

K: Yes. Then it would show some motion.

D: I will tell him leave it open and give us until Monday or Tuesday until a final answer.

K: It is impossible to do business with your government. Then they will leak out that we will not let him come.

D: No, he will not report to the Cabinet.

K: Ok.

D: I think that would be the best. I am not playing games with you.

K: Well, I frankly don't see how this thing...you know what I tell you I can see what the Soviets and Egyptians are ~~ge~~ doing. Every report we get is that relations are stalmated. If I weren't here, it would have blown long ago. There are ten cables a day coming in here of the presures that are building up. You don't move, the Egyptians don't move.

D: What are we holding?

K: You are holding nothing Shimca. I have tried to explain it to you.

D: Mr. Secretary, you want us to come to you ~~with~~ now with a proposal we are prepared to evacuate....

K: No. You draft it. Somebody has to draft it.

D: We will not draft or accept such a proposal for the return~~to~~ s the Egyptians are prepared to give us. It is possible we can move further but not on the Fahmy line.

K: I also just read an interview with Dobrynin and Goldman. It just ~~is~~ isn't possible to be stalmated.

*

D: It wasn't...

K: What Dobrynin told Goldman.

D: I thought what Goldman told Bdbrynin. I don't think we are stalmating the situation. You had a private talk with Rabin, you had one with Allon.

K: What is maddening to me I dare not tell anything to your government because it would leak.

D: Maybe you should come to the Middle East again.

K: Then what?

D: To find k out the positions of the governments and go back to Washington and formulate positions there.

K: Let me think about that. Well, come here maybe at 5:00 p.m. tomorrow.

D: Where?

K: I will call you tomorrow.

K: Could you give me the text of the entire exchange of notes that should take place with him and give it to me before I see him. What is your judgment on what is going on in the Soviet Union?

S: I am beginning to think there is a succession problem going on as well.

K: In the sense that Brezhnev is on the way out?

S: It is probably a longish process and it may be he's getting telescoped a little bit. So that these various issues may be -- we may now be moving into a period of delay and procrastination and not taking alot of risks and gambles so that for them on this issue we are just talking about simply a delay in the finesse. Maybe the simplest and controversial in terms of debate.

K: I will tell you from my own point of view--I wouldn't mind it if the Soviets got a little tough. It would bring a security to our operation.

K: Hello. I just talked to [redacted] and they will agree tomorrow to start political talks. They would appreciate it very much if Clerides would say privately to Denktash that political conclusions will be put before a five power conference. Not for guarantees but you know just for discussion. Now I think that should be achieveable.

H: He would say this privately on the side in the meeting.

K: That's right. [redacted]

H: Are they going to insist on that before they.

K: Well, he was vague about that. I had the impression no.

H: And it wouldn't be a prior condition in other words.

K: Well, but I don't see why Clerides can't say that. When we can go tell the Greeks now that they've agreed not to insist on the guarantee thing but they want as a face saving formula, some statement of Clerides that any conclusions will be also discussed in a five power context.

H: Do we have to tell that to them before because that might just make the Greeks back up if we indicate to them in advance that they're -- that this is a requirement.

K: How are we going to get it done?

H: You didn't say.....

K: But look, how are we going to get it done if I told them I'm going to try to get Clerides to say this.

H: I see. We can go to Clerides -- I think if we could leave the Greeks out of it because I'm afraid they'll be looking for something to say well, that's the same thing as raising the guarantee issue. Because it says that they'll be a five power meeting. [redacted]

K: He says they think Clerides has already said it.

H: In other words, he interrprets his formula that way. Because I don't recall that his formula was specifically an international.

A: I would not do anything with the Egyptians without first talking to the Israelis. Can we put some thoughts to Allon which will ~~be~~ not be thought as a position?

K: I doubt it. But I would like to see what they would be. You should all stop talking to the press.

A: I have ~~be~~ not talked to the press at all Mr. Secretary.

K: No one dealing with Egyptian matters should talk to the press.

A: I agree. I do not know who it could be. We have been very careful about it. I have had my people in and really laid down the law to them. I do not think we are going to get Sadat to come forward with anything more. What we have gives us something to start with.

K: What have we got? Opening the Suez Canal, they gave us last year.

A: ~~That~~ The fact is there is really ~~precious~~ precious little short of the final peace commitment Israel wants that we have left. That is one of the problems. The asymetry of giving up territory. The intangibility of the things Israel wants which are reversible.

A: I am not sure that he, I think he really is pretty well hooked on the idea.

K: I will not let myself get dragged by Hal Saunders with one of his theoretical exercises. What I need is a fulcrum on which to stand. I will be glad to look at your papers. I will not send some thing to Cairo that they can publish in Al Ahram.

A: I would not suggest we do anything until we have this talk with Allon.

K: Allon will not have the slighted authority.

A: Who do we get something from first?

K: The Israelis will take the position that they made a proposal. The Egyptians have not.

A: When you look back over the history of the last negotiation, the Egyptians did not make any proposal either.

K: I will be interested to see what you have.

A: I think we will have to begin to put something more concrete. I would certainly do it with the Israelis. Get them to understand we ~~xx~~ are up against a mental block with the Egyptians. It is basically the kind of ideas we had with the last Allon visit. With some refinement. Have we had anything from the Israelis at all?

*

K: No but I do not want anything because they will immediately leak it. We want an agreement in principal they are willing to give up the oil fields. Let me see what your paper will look like.

A: The commitment in the message of no leaks on the Egyptian side with I think they will hold something.

K: They will until they have nothing. I am not giving them any more papers than I have already.

A: We are aiming to give you something by Thursday so you have something over the weekend.

K: I think what we should do is ask Eilts to come back. And let me get an assessment from him before Allon comes. He does us no good there right now. I want him back. You send him a message tomorrow morning...I want him home for consultation. He should call Fahmy and Sadat that he is going home for consultation.

A: I will give you something to look at in the morning.

K: Don't try to change my mind. I want to talk to Eilts.

A: I think the Egyptians are on the razor's edge.

K: Roy, if it is going to blow, let it blow. I am not going to be everybody's whipping boy. I will not hold still for unreasonable demands indefinitely. Somebody is going to move now. How can it hurt to bring Eilts back for consultation?

A: No. I just wanted to reflect on it overnight.

K: You reflect on it and send a cable tomorrow morning.

A: The positions are not all that unreasonable. They ought to be marriageable.

K: That's true.

A: I think basically there is a Sadat position we can do something with. How do we get it made more concrete for is the problem.

K: My problem is I see no sense putting myself in the position of

*

K: being the whipping boy. I want to see some concrete result and I need to get some assessment from Eilts. I will give you overnight to give me any dissenting view you have. Tomorrow morning I want a cable to him. At the same time he should tell Fahmy a meeting in Paris could be organized. It would require the cooperation of the French Government. Our relations with the French Government are good enough to make that perfectly feasible.

A: I have to say in all honesty we could not keep it secret. The fact that you went there could certainly be...

K: I could go there for some other reason.

A: I think it is a high risk problem.

K: I have an existence in this world too. I am not the errand boy of Arabs and Jews.

A: No, no I fully agree we have to play it so that we do not get in that position.

K: Either Sadat is strong enought to make a proposal or he is not. I am going to communicate a plan to Sadat. The only way I would do it is orally through Eilts. You must totally dissassociate yourself of the idea that I will put it on paper.

A: I see no problem.

K: Why don't you draft omething. He is to tell Fahmy we can probably arrange a secret visit to Paris. My visit to Europe will be known. I am scared to death to formulate something.

A: I am aware of the problem.

K: In January last year I knew exactly what I was doing. I knew what Sadat's requirements were. I do not believe I should go out there and put myself in the position of getting it down. I have yet to see an idea worth a goddamn coming through the diplomatic channels. Write down your paper. I will look at it. I want Eilts back. I want to tell Eilts what I want Fahmy to know. I could go out perhaps on February 10 after we have had a preliminary meeting. I want that tomorrow morning. If you have a dissenting view, but that on a separate paper. I want your ideas on such a plan. I need that primarily for Eilts and Allon.

A: It is already in draft. END.

K: I'm determined to go to war no matter what you say.

G: I haven't said anything.

K: You've been good, for a story that takes the cake.

G: I gather the Egyptians had a press conference today.

K: In Egypt.

G: Yes. I have a brief summary of it that they are joining the chorus. It's one of the feverish things that have swept the area. I'm looking for it on my desk. I can't find it, as usual. Oh, here it is. No, that isn't it. Anyway, their Information Minister deplores your statement and not in understated terms, I gather.

K: The Foreign Minister?

G: No, their Information Minister. Here it is. Secretary Kissinger stated allegations to the possibility of military action against oil producing countries and has embarrassed the government of Sadat. The Information Minister today called Kissinger's statement unnecessary, untimely and not serving the American-Arab relationship and peace in the area. The Egyptians have refused an offer of a second stage of Israeli withdrawal. That's the latest on that one.

K: OK.

G: I was calling because I have been intrigued by your comment in Business Week on the relationship with Congress. I spoke to some people and I'm trying to get some idea of what you really would like to chance in relation with the two branches.

K: I don't want to change anything between the two branches. This is not for quotation. As Congress takes a more active role in foreign policy, it is imperative we work out something. They prefer a tacticle decision on foreign policy to be made in Congress. It's a question of separation of power. You take the trade act, there is not a day that goes by a country does not call attention to discriminatory actions. I have a list of all the restrictions that have been put on ~~the~~ certain countries which covers 11 pages.

G: I didn't realize that it was that much. I knew the major ones were Turkey, Chile, Cambodia.

K: Turkey, Chile, Cambodia, Vietnam with respect to PL 480 -- the restrictions on PL 480. Within each there are additional restrictions.

G: And the Russians have a whole slew of things.

K: There's a great danger that the restrictions with the Russians are going to bring about a situation where there is no benefit for Jewish emigration. No restrictions of economic aid to the Soviets because they'll be getting it from the Europeans and the Japanese. We'll be losing leverage.

G: Yes. Have you made any changes. Have you talked to Dobrynin at all. Have they cleared that?

K: It's not clear to me.

G: What are your intentions to meet with new members of Congress.

K: I'll meet with them next week.

G: And the leadership next week too?

K: Probably.

G: And you're going to spread it around?

K: Not in an aggressive way. I'm willing to work out full means of consultation.

G: You want to avoid writing into a specific detailed instruction on these countries.

K: Yes. It's too blunt an instrument and tends to be irreconcilable.

G: On aid to Cambodia, there's a mood in Congress to disassociate from Indochina.

K: I have to separate two things. Policy differences -- I disagree with those who want to disassociate from Indochina. That is an issue that has to be fought out in normal political terms.

*

G: To separate that from tactical problems such as a limit on the number of people in Cambodia.

K: And on these restrictions -- when you put restrictions on the Soviet Union, you're being discriminatory, the sort of problems we have with the trade bill and OPIC restrictions.

G: Are you going to make any speeches on this.

K: I'm thinking about it.

G: You're not the first Secretary of State who had this problem.

K: No, but it's more acute now.

G: In the past, Dulles actually had a lot of problems with legislation.

K: There are two possibilities. Prices and policy which will be ____ and problems of legislation.

G: I see. That's the other thing. Have you had a call from Congressman Hebert to attend the committee?

K: Ho.

G: There is some story kicking around here.

K: What purpose?

G: Comments about oil and use of force.

K: Sometimes I think the whole world is crazy. If you read what I said, it's the absolute minimum of what could be said.

G: I think what happened, it happened to come out against the Tucker article.

K: I never even talked to Tucker. You behave with great restraint. I have no complaint.

G: I understand. My feeling is this will just simmer away.

*

K: And it's done us a lot of good among the Arabs.

G: Really.

K: What the basic problem is, the moderates will be able to tell the ~~xxxxxxxx~~ radicals they don't think it's such a problem. To put emphasis on that, this isn't the only way to go. The fact that Egypt doesn't mean it will be helpful to Egyptian policy.

G: Right. One last thing. The Israelis already are starting in ~~xxxx~~ on the Allon visit, that it won't be helpful unless you go to the Middle East, ~~x~~ nothing can be accomplished. Is it a ploy to avoid facing the issue or what.

K: I can't come to the Middle East right now until we get a little further along.

G: They have to do something.

K: Yes.

G: Good. Thank you very much.

H: Parker has the cable, in fact it is probably on your desk, I hope. We have done it in the form of a message to Nicosia using Weikman to avoid Makarios and we recommend that we not take any credit with the Greeks til after it works -- because Denktash has been fighting Clerides on this point. So if Weikman asks Clerides to do this and we have been in touch with Esenbel..

K: I would like to let Bitsios...

H: We will know if it succeeds in 24 hours. Bitsios is in Bulgaria and we can get a message to him there.

K: They will meet tomorrow.

H: We don't think he can be helpful in persuading Clerides.

K: I want to let Bitsios know there is a chance of movement.

H: We can take credit with Bitsios after the fact, if we get him involved before the fact, he can be unhelpful. Bitsios has been telling us each time they ask him to take the credit..this is close to what he said... we think Weikman can do it. We have trouble getting to Clerides because that means we haven't gone to Makarios, his boss. But I think Weikman can do it. I think you ought to look at the cable.

K: I have it. Ok.

K: Hello, Mr. Foreign Minister.

E: How are you?

K: I am fine. You know, I suppose, we have a lot of people listening in. I suppose you know what I am calling about.

E: Yes. I think it is all right as Macomber told you that privately Clerides should say to him that any agreement they may reach on political matters should be discussed and approved finally by the conference. That I should say that to him.

K: But why do we have to settle that issue now?

E: I think it is not an issue. He already said he accepted assistance of the Conference. The agreement -- the political agreement cannot be finalized unless it is approved by the Conference. That is the attitude of the Turkish side.

K: I understand that. No one is asking you to give up that attitude. All we are saying is that that attitude -- it is making -- it is a perfectly academic question until there is an agreement. I have told you what our point of view is.

E: Mr. Secretary, it is all right in principle. Guarantees is another subject. They exist but if necessary that can be adopted. That is another matter. The political subject -- any agreement to be reached should be finally approved by the five parties in the confference.

K: Let me look into it. I will call you back.

E: Tomorrow they will start the discussions. I already talked with Denktash. It is all right. It is all right. He said he will discuss also political matters.

K: That is a very good attitude. I will do my best on that other matter.

K: I will give Macomber some specific ideas. If we make some progress during January we are quite confident we can handle the legislation.

E: Do you need a joint resolution or something? As it now stands that February deadline is February 5. In the meantime I believe you need some action.

K: We have already signed the determination that Turkey is now eligible.

A: I don't think so.

A: And the press is now commenting, which they weren't the past few days. I think you made a very good point to Fahmy.

K: We could tell Fahmy we understand he has problems but we have problems too. There has to be some cooperation on their part. I don't know how to interpret their reference..their reaction to let Eilts see Sadat.

A: I only see it as his wanting to get his licks in first. He explained it in terms of Sadat's humor.

K: I see no possibility of moving the matter forward. On this basis, do you?

A: Thank you.

K: Don't you think?

A: I don't know if you want to be that strong. I denied the other story yesterday.

K: We were going through a WSAG meeting which is a contingency meeting and they were listing a lot of possibilities.

A: I would rather just dismiss it completely and deny it without say a malicious lie. I ~~xx~~ may call attention to it.

K: Just frankly deny it.

A: OK.

K: Could you call Abe Rosenthal of the New York Times and ask him what's the sense of playing on the front page a story which is totally malicious and which is based on no evidence at all.

K: With our facility.

S: Okay.

K: And, he is of course pushing his, too.

S: Of course. The big one.

K: That's right. And he is now screaming for ten to twelve billion.

S: That's right.

K: Well, what I told him is all the Government has agreed to up to now is three billion. That gives you a little maneuvering room.

S: Good.

K: So you can go -- you know so you don't even have to go to five today if you don't want to.

S: Well, we will see what evolves and what the attitudes of this thing . . .

K: I know. I just want you to know -- I didn't give him five, I just said three is all that we got a concensus on. But it is not in concrete, I said.

S: That's just super.

K: And I am just very convinced that we shouldn't give too much ground quickly.

S: Well, as I said, I not only want an agreement in principle but I want the specifics of principle spelled out.

K: Exactly! We can get the quotas, we can get -- there is one thing that Enders told me this morning that I didn't know: that in one of our preliminary jogs we say that it is up to --that it is up to each country whether they will make their contribution even after they have signed up. Now, . . .

S: How they will do it, that's what people are arguing about.

K: How they will do it is different. But that they must do it, I think must -- it must be obligatory!

F: Mr. Secretary, I'm sorry to bother you after that session but for a couple of questions that are up in the air that I think are important. You seemed to be pretty careful in saying that concerning the overall affect of this on detente in relations generally that you had no official communications from them or notes. Were you saying that there might be something that was done unofficially or privately.

K: No, no, no. We actually said we have no evidence yet. Don't read the tea leaves that carefully.

F: Well, you know, I have to do something to earn my keep. You don't think then, you don't expect any pressures anywhere or any deterioration?

K: Well, look, off-the-record now for your guidance, what I think is this: It is perfectly possible that the Soviet Union has every intention to maintain the detente, which I think they do. In every crises, however, what is the restraint on them? What can we say if you are not moderate, we will do what? We will get mad?

F: Um-humm.

K: We will use military force? So there are fewer leverages on them.

F: Yeah.

K: That's a fact of life.

F: Did this thing catch you by surprise? I know you said -- your public statements and all that -- but I continued all through this to have an impression that things were going to work out and so I have to say that I was surprised by this.

K: Ken, a lot of people think you can keep -- we are talking on deep background.

F: Okay.

K: Well, I was not surprised when the ExIm Bank [hit]. I think we could have carried the Jackson-Vanik with a big ExIm facility.

F: Uh-huh. What is next? A little unclear. You're going to go to the Hill and ask for their advice. Do you expect that there will be any restoration?

K: I'm not in favor of a quick restoration. We have to let this thing simmer now for a bit.

F: How long is a bit?

K: I don't know.

F: End of '75, do you think?

K: I just don't know.

F: Yeah.

K: I was not surprised in the last three weeks. I was fairly sure it would happen.

F: Okay.

K: When I exchanged the letters, I thought we might just barely make it. But I wasn't much in favor of them.

F: You weren't apparently able to convince the people on the Hill of this. They just didn't believe your warnings on this sort of thing? Or was there any kind of attempt to --

K: Ken, off-the-record, you look at the record, Jackson was running around the country saying Kissinger told me it couldn't be done but it could be done.

F: Have you talked to Senator Jackson about this since it happened, since Friday?

K: I've had somebody -- I've had Sonnenfeldt talk to him.

F: What was his reaction?

K: Nothing particular. I don't want to get this into a fight between Jackson and me.

F: Yeah. Well, you may already have one.

K: Why? Has he said something?

F: No, he hasn't yet. But I wouldn't be surprised if he did though. You know he is going to have to blame it on somebody. He won't take the blame in a Presidential year -- the one coming up.

K: (laughter) Ken, between you and me, it's not easy to blame this one on me.

[redacted] Henry, by the way, you were very good last night. You were very nice to do that for Jack by the way.

[redacted] But I tell you it is still a very, very nice thing to take that night off. I think it was just a damn nice thing. Let's leave it on that basis.

K: Well, aren't you nice.

[redacted] They got me on the plane as I was coming from Chicago and I called McCloskey to hear that. And of course this doesn't surprise me one bit.

K: Well, you know we were going to announce it on Thursday but that [redacted] Harold Scott leaked it out.

[redacted] Well, anyway I tell you what I've done. You remember -- I've sensed this. I only hope that it's not just more than this particular issue I hope for the sake of the country.

K: Well, you know it's going to be tough on the Jews is it is.

[redacted] I mean, I hope it's not your whole policy. I remember what you mentioned last night.

K: Yeah, but I warned everybody.

[redacted] Yeah. Look, I completely agree. I've warned everybody you can drive too hard a bargain. You've heard me say that. In any event, what I've done -- I've called quite a few people and I just told them they better keep their shirts on right now until this thing settles out. Because you know we are going to have some hot heads around. But I want the responsible leadership just to sit still and see where you're going because I don't know what your program is or what you have in mind.

K: Well, I think that they should. You know, I think really that the Jewish Community ought to keep quiet now. I have given a very concillatory statement. I said the Administration shared the objectives of those who pushed the Jackson Amendment. We differed only as to methods and we don't want to look into the past. We are willing to work with them for the future.

[redacted] (contd) because I've been in theinside counsel and I've taken the same position my own self about you drive too hard a bargain. But where we are now, you can't put the eggs back in the shell right now. The thing to do right now is this -- remember when I was in to see you a few days ago, I mentioned to you that this Import/Export thing, which is a key element in this thing, we may have to take a look at. I don't know. I don't know whether you know. You probably know more. I don't know what your program or what you have in mind, but I think you ought to share it with me -- at the right time -- so I know how to behave on this thing. B6

K: You mean, on the Middle East?

[redacted] No, on the Soviet thing. B6

K: Well, I think I will have to let it sit for a while.

[redacted] Yeah. Let it settle down. B6

K: Yeah. I don't think we can do anything else.

[redacted] Yeah. Well, I hope this doesn't affect the rest of your whole policy, that's the most important. B6

K: Well, that's what I hope.

[redacted] That's right. Well, Henry, I've sensed this. I had this feeling last Sunday. I told some of the people around the country. It's a funny thing, on Friday I had to say it to them but I sensed the problem. When you told me that day that you thought there was a 50-50 chance, I read you pretty loud and clear. B6

K: Yeah. Well, that's what I figured.

[redacted] What's that? B6

K: That's what I tried to figure.

[redacted] Well, when you said 50-50, I meant the odds were against it. B6

K: Of course.

[redacted] Now you know I understand you by this. You've been pretty well on record. Now we're going to have a little screaming from people. Let's just be calm about this. But the Leadership, I've already been on the phone all evening long. B6

*

[redacted]/Secy Kissinger 3 B6

K: Terrific.

[redacted] And I just want them to calm down. We've got another problem, I don't know how this affects even the Mid East, but you've got these meetings in a couple of days. I'm going to be in town -- I want to come in town, I want to try to get together before I leave the country. Next week some day. B6

K: Well, good. I would like to talk to you early next week or maybe even at the end of this week.

[redacted] Yeah, I thin k it is important. Because I have my own feeling and I think my own intuition tells me a few things about this thing. I would like to give you the benefit of my own input for whatever it's worth. B6

K: Right. Well, let's try to get together at the end of this week.

[redacted] All right. We'll do that. And we'll keep in touch on this thing but I just wanted to tell you I've already been on the horn on this thing. B6

K: Good.

[redacted] There will be some screaming. We've got to let some people ventilate some feelings but as far as Leadership is concerned, I'm not so much concerned, but we will have some ventilation. Just relax and we'll just keep the lid on and see what's happening. B6

K: I agree. Many thanks.

[redacted] B6

[redacted] Because I don't know how you're going to keep up this -- you know, your own nerves. You've got to be a strong character in this next year. This is going to be a real tough one. I really have great sympathy and understanding for what you're going to go through this coming year. B6

K: Well, [redacted] we're counting on you. B6

K: I really would warn that if the Congress trys to be too specific in describing the Vladivostok agreement, they will blow that up too.

M: We certainly don't want that. I am concerned that if this thing flops around the Democrats will coalese on it and make it very tough. We have a chance to get them all on the team. I think there is a further asset in it for you in that this is a time in which you are reaching out to the Congress and working with the Congress and this is an example of the Senate giving advice in the Constitutional sense.

K: I welcome ~~the~~ it except it should not be construed as giving advice on how to get additional concessions from the Russians.

M: Absolutely. If the formal language suits you, we can work on it. I do not know how many will complain but we can work with some.

K: Let me check with Hyland what the latest word is.

M: Let me know on that.

K: You will have to tomorrow.

M: Before I go to the Middle East.

TED KOPPEL
Sec Kissinger
January 15, 1975
9:45 a.m.

TK: How are you?

K: O.K. Ted, as someone who has been in your house perhaps I can take some liberty. By what tortured logic can this thing be a setback for me as you seem to have said on television last night? For two years we have warned and fought against it. Everything we predicted has come to pass.

TK: I said you had been predicting this but a setback in relations withthe Soviets.

K: It is a bad setback but it is what we predicted. It doesn't help the people. There are fewer Jews coming out. The Europeans are now going to get the credit and become more independent with the Soviets.

TK: I don't know what you saw are heard.

K: Bob McCloskey said he heard you say"it was a bad setback for Henry Kissinger." It is a bad setback for the US. We have fought against this Goddamn thing. I did not want to turn it into--what I said publicly yesterday was to give Congress a chance for some reasonable dialogue. I did not see any sense in getting into a shouting match with Jackson. But those of you...

TK: In a sense what I said was a bad setback and I was using you and the entire cause of Soviet detente interchangeably. I did make the point and I am sorry Bob did not hear it. I did make the point in half a dozen spots I made yesterday that you had in fact been predicting this for many months that if we put too much pressure publicly on the Soviets on their internal problems it could come unraveled.

K: I was against the exchange of letters. Perhaps it would have worked if everyone had shut-up. Even after Vladivostok it was said that this proves that Kissinger said with respect to immigration what would not work.

TK: Do you think Congress has now learned its lesson?

K: We are not talking for attribution.

TK: No. [redacted] I will not be in today. I am interested in your assessment--if you think it is going to come down to a knockdown-drag-out fight in which you and Congress will be eventually blaming each other in public B6

K: I will use this as a lesson for both sides. We have not put out anything. When people say that the thing failed because of us

then I have to say something. But we are not going to take the initiative ~~MR~~ with the Congress. We are not going to start casting stones but I think it should be a very sobering lesson. You know as well as I do that even though the Soviets say detente will continue and even though they intend to have it continue in any crisis we have now lost the leverage.

TK: Do you have any particular areas for example the Middle East, Viet-Nam where they will try adventurism?

K: Not yet but there are two problems. Will they try adventurism, I think not. Can they be dragged by events into a 5% sharper line on every issue, I think, yes. Accumulative effect of this will be very bad. How will it effect the economic relationship?

TK: I heard on the radio this morning some US companies say to the best of its knowledge its trade relations remains unimpaired.

K: There is one aspect where communism has been proved forever wrong namely that businessmen understand their own interests. Most are screaming idiots. How will they know if relations are impaired. This is just the beginning.

TK: True.

K: What has been lost is not what has been achieved, but it is the future -- expansion that would have been possible. And the leverage has been lost.

TK: What do you think -- was the $300 million the straw that broke the camel's back.

K: Off the record -- what broke the camel's back was they were -- what broke it was the Jackson announcement at the White House which we did not quite understand he was doing. The claims that were made afterwards that the Soviets were pushovers if you were only tough enough and above all the Ex-Im restrictions.

TK: In the final analysis the $300 million

K: Plus the claims

TK: What if it had been for a larger amount?

K: If it had been no amount there were two chances out of three they would have swallowed their pride. Two aspects on the restrictions -- they were the only country singled out for a ceiling and second, that the ceiling was rediculous.

TK: Your basic action now is to do nothing now but to sit back and wait.

K: Thre is nothing we can do. I don't think it a good idea now to go to Congress and say how about a billion and go back to the Soviets and say will you take a billion;that teaches them to kick us in the teeth.

TK: If you don't go back and too much time elapses you are coming up on the Brezhnev visit and it might be difficult for him to come.

K: We will have to see what happens now.

TK: I wish you good luck.

M: Hi. Mr. Secretary, I have been up and down the line on this interview matter and I regret to say it won't be physically possible to have even one of the cuts re- inserted. So what I am going to do -- I am making a protest to Hartford Gunn, the President of the Organization, and his lawyers somewhere between London and Bonn or Paris and Bonn and when I get him, do the same thing. The physical situation is that it has been fed out through this video-tape process already so it is in New York and overseas. So what I am going to do is release the entire transcript and call attention to what has been edited for the broadcast and call the press here and tell them that we were not consulted on the changes.

K: Can you make sure this gets in to -- at least to the press.

K: As well as I can I do not know what that means.

G: Last time you said you would not want to meet out there until you narrowed the gap. Did this happen this week?

G: I can really do that. We have had extensive talks and I hope they will lead somewhere. I do not make any predictions at this point.

G: He left the impression, with how many of my colleagues I do not know, he had not really substantively changed the Israeli position but I had notes the Egyptians were ready to____. I asked him what his position was based on. He said he thought the Egyptians might be more amenable. Which to me looked like putting the best face on a situtation he could not control.

K: It is probably somewhere between what you said and he said.

G: What do you do now? You send Eilts back. Is the ball in Sadat/s court?

K: I do not like let it develop that way. There is nothing he can accept or reject.

G: All the Israelis are saying is lets start talks without any preconditions. Is that a fair estimate, that they don't really want to talk or give away their position yet?

K: They had many reasons, part of which is public opinion.

G: He said they would not give up any strategic positions. He avoided timing, he avoided maps with you just to give the impression he was very forthcoming and if the Egyptians were forthcoming, the talks would have their own momentum. He said you did not set a time.

R: The National Cotton Council has been in touch with me several weeks now concerning a situation developing with regard to future contracts with the sale of cotton in the Far East, particularly Taiwan and Korea. ~~XMXX~~ This is the normal way of selling cotton. They sell it for delivery some months ahead and then at the time delivery is about to be expected, a letter of credit is issued and delivery is made. Last year everyone was eager to do it because they are able to buy the cotton at a price and then the price went way up. This year quite the opposite happened. It was bought at a price and then the price went down. This year they are not issuing letters of credit and are not taking delivery. The American cotton merchants are really holding the bag. The implications for the future are very bad. It is like breaking a contract because you upset the hold pattern of trade.

K: If this is not fully in my shop enough of it is that I can get the right people working on it.

B: It could very well be a summit.

K: It could.

B: I am told this immigration thing has been settled to the point of being -- I think the language it registered in the formulation in the Basket III would seem to take some of the sting out of the abrogation of the trade agreement.

K: Not really. Those are two separate problems.

B: But the formulation as I understand it...

K: In the CSCE there is a specific provision none of this can contravene domestic laws, etc.

B: In other words you don't think the Russians can say we are going to do it in this way so we don't have to do it ~~x~~the other way.

K: I would be amazed.

B: Anyway the people I talked to today really just in passing, I was not searching this out, seem to be quite optimistic about having resolved 7 of the 10 principles in the first Basket then having registered quite a lot of language in the third basket and felt that we are going to have a hell of a lot of negotiating between now and March and in another session later in the spring. S: I have never mentioned that.

K: I know that [redacted] Brown ~~xxxxx~~ mentioned it in Cyprus and now Holton is mentioning it and Brademas has already rejected it. B6

S: Oh good God.

K: And there isn't a snowball's chance in hell of our getting the 20,000.

S: Of course not and of course ~~XXXXXXXX~~ Brown, when he said that, he was talking in general terms. He was trying to get a feel.

K: Why try to get a feel which is total idiocy. If he had said 2,000 and worked it up, there would have been a chance.

S: I don't know. I did not realize that Holton was doing this. I have been in touch with McCloskey about my contacts with Brademas.

K: Will you get him under control?

S: Yes, right away. You have probably seen the Esenbel interview in the Post this morning. It is not helpful at all.

K: I agree.

S: I will tell him to lay off figures completely. I have never mentioned anything to Brademas, I agree with you.

K: 20,000 is so outlandish. Supposing Brademas had said to Brown we will accept it?

S: We would never have been able to deliver it.

L: I think the speech will be fine in the sense that the basic message is one of hope -- that we are beginning to master our problems, for example in the energy crisis. This is important although it is not structured properly at the moment. You have broken the back of an important event. There is a lot of work to be done in terms of ~~xxxxxxxxxxx~~ structure and elegance.

K: Do you really think this?

L: Yes. You are saying we have to rally together. We have done it before and we can do it again. In the example of energy, we have done it and we will do it again. I think this will come across with the congressional thing. I think this is important.

K: On the Congressional thing -- what do you think about putting back some of these things I took out -- that we should not consider foreign aid a favor.

L: I think the congressional thing lacks specifity. I have not gotten into that section in terms of specific changes. In reading it quickly it looks like it loses a little specifity.

K: When are you going to have it done?

L: This is all I have been doing. It takes me a lot of time. I will keep feeding it to you. You are concerned with the first part.

K: Yes. I want to get your over-all assessment to guide me in my editing.

R: I gave it to Larry.

K: But apparently Kuhn has not ever had a positive answer. Did you talk to him last week. Did you tell him to go ahead.

R: No. I told him we would get back to him.

R: Good morning, Henry.

K: Scotty, I don't know whether -- how to handle this problem but I really feel that [redacted] is going beyond the bounds of fairness. B6
Every day practically -- in every column -- he has an article, not criticizing my views but criticizing my integrity.

R: Yep.

K: On the basis of totally misleading evidence. After all, I am the person who brought about a doubling of food aid. Now, of course, you can prove that this had profound machiavellian motives but the much more rational explanation is that I believe we have to prove the need for interdependence. I believe that we have to give additional aid to Vietnam, not because I want to prove that I was right all along and love to kill people but because I really believe that to let a government -- country go, on which in reliance on our promises made certain undertakings for peace, would be irresponsible. Now I am not calling him a traitor when he has a different view. I recognize that serious people can have different views and I'm not asking him to moderate his conclusions but I seriously wonder whether it is possible that -- I mean, the figures he has got are partially wrong; his presentation is much more _____ by any account. We have tried to take account of the Congressional prescription. The reason we haven't announced the new level of food yet is because I have people on the Hill now dealing with Humphrey and Hatfield to work out an allocation that Congress goes along with. So we're not doing anything behind anybody's back. Egypt is a most seriously affected country by any definition -- by the UN definition. But I don't want to debate his point because people have differed on that.

R: Well, you can't debate the point with him. This is a little bit like the original problem we had with Bill Fulbright with that analogy. But anyway it's become a personal thing. I was talking to Winston Lord's wife at that little dinner for Allister Duncan (?), and she was trying to make the same point.

K: Is Allister in town?

R: Well, Allister has come over here to the Woodward Wilson School. He's going to do a serious book on American Foreign Policy since . . .

K: Well, I'm anxious to --

R: I'm sure he'll be after you soon. He has just arrived and he's living in Henry Brandon's old house on Rodman Street.

K: Well, really, I don't ask obviously for your support. It's the constant attacks on the moral standing that I think affect the whole tone of our public discussions.

R: Well, as you know, I don't believe in feuds and I think this has to be talked out between you and [redacted] I really do. It's becoming a source of some gossip within the town of the times -- you know he's shouting and roaring at you every time he sits down at his typewriter. So that the only thing I can well imagine you're saying: Well, the hell with it, why should I talk to him. He's going to cut me up and suggest that I'm not a manner of honor. B6

K: It's not a question -- I don't really think he's doing me a hell of a lot of damage with this sort of thing.

R: Well, he's not doing you any good. I don't know what it is, you know, aside from the normal period of idle sniping that we're going through at the present time. There is some of this stuff in the academic community, as you know.

K: No question.

R: And I think living in Cambridge there all the time that some of your old colleagues sit around, partly out of jealousy and partly out of vanity, thinking how much better ideas they've got.

K: Yeah, but I think it's a separate problem. If they call me an idiot, I won't like it but I can't complain about that. But if they call me a liar, a cheat, and a war monger, I think it contributes to a type of public debate which isn't doing anybody any good.

R: I agree. You want me to try to talk to him about it? Do you want to get together with him?

K: Do you think that makes any sense?

R: Yes, I do.

K: Or is he just going to say that this is a way of trying to co-opt him?

*

R: Oh, sure, I'm sure he will. But that doesn't -- You can be big enough to take a risk on that. You've got plenty of capital.

K: Well, if you think --

R: Let me think about it.

K: Think about it. If you would suggest it, I would certainly take it very seriously.

K: Yeah.

B: He said he wanted to come down here. He said I've got four or five questions and he ticked off these questions. I said: we don't have the answers to them because we just haven't gotten together here. He said: I would like to talk to you folks in Agriculture and in State and in AID and any place else. So I am having a luncheon this noon over here with Chuck Robinson in and Tom Enders and Roy Maury and I've asked Julius Katz to come but he's sick and Jim Frank is coming and I'm having 3 or 4 of my people in to discuss some of these things. Now I think we need to move ahead, Henry, on three or four things. This committee was set up back here with you as Chairman after the World Food Conference to resolve some of these things and I was Associate Chairman -- or whatever it is, I don't know. I think we need to move ahead here to name the U.S. delegate to the World Food Conference. Now would you like to have Chuck Robinson do that or how do you feel on that?

K: Well, I am afraid we almost -- that will make it very tough here.

E: Also, I think they will discuss it - a Cyprus peace proposal -- you understand?

K: Yeah.

E: In other words, all the Turks that are in the ~~north~~ south should be able to come north and an equal number will be accepted in the Turkish _____.

So we are working on that too.

K: OK. Well, I really feel as much as can be done before February 5th, really, because we won't have any bases and we would like to remove it then substantially permanently. So then you don't have this issue every six weeks.

E: Yes, yes. I am going to have a debate, you know. They are asking for a general debate on the situation. So I am thinking this is _____ here too.

K: Yeah. Now look, I know your attitude and I hope you know mine.

E: Yeah.

K: And you know that I am speaking to you as a friend.

E: Yes. Well, we will do our best. But you know where is the main difficulty. It's the airport and the question of principle. We are going to cover the airport. And we want a joint thing to do it. This is the perfect position. But the other side say no, not the teams, but the UN should be the governing body. But this is the main difference. Now if you can help on that I think we can solve the rest.

K: How about the UN as well as the parties?

E: Well, I don't know. They haven't talked all that. They say that if this is going to go federation then why don't you start now for the good will of the country.

K: Well let me talk to my colleagues ~~in~~ and see what they think.

E: Yes, all right.

K: Good, I will be in touch with you.

E: Yes, be sure.

K: Nice to talk to you. Bye.

E: Goodbye.

K: I just saw something that the Athens radio claims that the Greek Government reports a proposal by me for concessions in the Agean in return for concessions in Cyprus and they allegedly got that from Eagleton. Is that conceivable.

S: I don't think it is conceivable at all.

K: Can we deny that.

S: Absolutely. The greek press has gone mad on this. You saw the thing about your role in the talks, which we have denied. I don't know what they are trying to do. And they have gone public on this ICJ thing.

K: They have?

S: There is a message in from Kubisch in which Bitsios is grateful for your action on the meeting in Ankara.

K: What did he say?

S: It was sort of double talk on the phone -- and they said they would get together later. Talked about the idea of a meeting and sites, but he would think it over. This is ridiculous and I think we might suggest that we put something out immediately.

K: Will you do that.

S: I will indeed.

K: And will you call in the Greek Ambassador and tell him that this is impossible to have to deny what didn't happen.

S: We mentioned this again when he saw Sisco this morning. -- about the rejection of the Turks and he said his government didn't believe that at all.

K: Did we get a report on today's meeting.

S: Only the press announcement so far -- but not the background. They talked about the constitutional process, airports and Famagusta. But we don't have the inside story. I sent upstairs an account of my talk with Humphrey.

K: How was it?

S: He said two things. One is if there is no there is more chance of getting an extension. If you can get one or two things, the airport and something on Turkey. I think that would be the ___. P: Yesterday I went up to Rhode Island. I was summoned there by the Fishermen. On January 15 the lobster pots were destroyed by a fleet of 70 Soviet fishing trawlers. These people are shaken up over it. They're bankrupt. Their pots are gone. We did take this matter up with a Commander Schowengerdt who is connected to the Coast Guard and assigned to the State Department. I understand these people have to bring some kind of proof and get their affidavits together. We were assured by this Commander that he consulted with the Counselor for Fisheries Affairs of the Russian Embassy. His name is _____. I understand he was going to cable Moscow and recommend that the fleet be removed. I have two questions. First, these people are asking for some kind of help until the claims are settled. Though, I doubt if you have authority to do anything about this in your shop. Secondly, the question is how long will it take to resolve these claims and what will the State Department do to justify these claims; how agressive will they be.

K: Let me call you tomorrow. I'll look into it this afternoon. If we have any legal claims, I promise you we will be aggressive . Let me find out what the leagl position is and second y, I will have no hesitation, seeing that you are involved, to call the Soviets and make this a political matter.

K: What I called you about is somewhat out of date now. I called you this morning about that remark you made as I was walking out about Joe Kraft's comments.

L: Yes.

K: Since one's honor is one of the few things one can take out of here, I thought it was somewhat out of line but secondly, what examples can you cite that you have been told an untruth in the field of foreign policy since I have been here.

L: I don't have a sort of catalogue of examples and it was said more in jest than anything else. We were half jesting as we were leaving. I have no case or dossier to make. I think what Joe would have in mind and myself would be the whole history of the Viet-Nam thing and the experience of the Cambodian thing.

K: First, when I speak of a crisis of authority, I am not saying the congress is to blame. We are talking about a condition that affects the whole Western world, however we got to it. There were certainly grave abuses on the part of the Executive but the conditions we are facing now it makes no difference who originated it. Nor is it one of Congressional abuse. It is a problem of how you can establish a relationship in which you can't have foreign policy without authority. It cannot be done and how can we rescue that under present conditions.

L: I think it is the whole Watergate catharsis myself, Where everyone is much more skeptical than they once were. They hark back in their mind and what they believed that the evidence was at the time of that situation. And I think it relates basically to V-N and I think that is what we have. While I sense the fact this is a condition that you have to deal with, that we have to deal with, but I think it is a part....

K: I genuinely believe that the press too -- we are in such a different situation now as a country. This constant hacking away really will have a tendency to make it difficult to rescue things.

L: I is my feeling that it is less so now.

K: I am not complaining about anything you have written.

It is my sense that we are getting a better footing. Don't you sense that? I don't know. It is my sense that things are settling down abit. Not that it wouldn't be desired. I think there is some sense of perspective.

K: I think things are settling down a bit between the press and the Executive. I think things are getting more complicated between the Executive and the Congress--not in terms of attitudes. The personal relationships are excellent but both sides have to work out a way where Congress can get involved without legislating every involvement. I don't know what the solution is.

L: My feeling is that the solution will work itself out. My respect for Congress'ability to do very much is limited even in an obstructive way. I knowyour experience has been different. Over the years that I have been here in this town Congress makes these breast beating noises periodically and then accepts the rationale for whatever we are trying to do. I don't know whether it is true or not. [illegible]

K: Certainly, in all of my contacts with the Congress, despite some of the reports it has really been very constructive and I have not noticed either antagonism or obstructionism. All of this is of course personal.

L: I understand. About Sparkman-- how is it going to work. You had a good relationship with Fulbright.

K: Peter, I cannot tell yet. Everyone tells me it is going to be easier with Sparkman than Fulbright. First of all I did not find it that tough with him. He is a very thoughtful man. I cannot get a grip on how it is going to be.

L: Too soon.

K: He is not as interested in the day-to-day stuff as Fulbright was.

L: Right.. Just curious. I will watch it but I was curious in this early going how you sensed it..

K: The relationship is good but I cannot really judge yet how he is going to exercise his function as Chairman.

L: You have the problem of keeping him awake.

K: Art did you ever make a protest to the Sweds about their Foreign Minister.

H: In both places.

K: How, tough or...

H: Very tough.

K: What is your definition of very tough?

H: That the remarks were unacceptable, we quoted him parts of his speech and also Robert did the same thing in Stockholm talking directly to Anderson.

K: What was their reply?

H: I just heard about Roberts. I haven't heard what he was told. The fellow here said he'd report it back. But he said we thought it was very unfortunate, we were getting into the whole same kind of problem that we got into last year where they were making comments specifically about us and our actions, their statements were not in any way balanced, they didn't say anything about what was going on in the North and subsequently with the fellow here -- we got into a discussion with him. He brought his Asian expert in and we had some people from EA.

K: What do you mean you had some people from EA. When do we owe an explanation to the Sweds?

H: It's not an explanation but when they got to talking about it it's quite clear they have not the slightest idea what's going on in the South. All their information is about the North.

K: It is not our duty -- when one of these sobs attacks us to wail all over him and bring in Asian experts to determine the facts. Even if the facts are true they have no right to say that.

H: But it was not in the sense of wailing all over them. We were just telling him he didn't know anything about the situation.

H: The protest was very tough.

K: And then you started explaining why he was wrong. That is a totally wrong way of proceeding with all respect

H: Well. Okay.

K: Seriously. And the next time they step out of line it needs to be called in with a sharp protest and dismissed.

K: Do you think you'll hear tomorrow from Esenbel?

H: I hope so. In any case I think tomorrow we better go firm up with Bitsios. And also we may -- I've asked my people to work on a message for Bitsios anyway. We're a little bit concerned about a report from Bill Crawford that Makarios may be ready to make a speech and I think we ought to try to head it off through Bitsios.

K: I've seen that and also that we're going to have an explosion in ~~Nic~~ Nicosia if we get concessions.

H: Yes, but I think his way -- Bill's suggestion is to how we deal with this are good ones.

K: Until we become too dangerous to fool with it .

H: I'm off to meet Mr. Wilson.

K: I just think that if we may just sit it out for a bit and let people come to us.

H: When they've tried their way.

K: Particularly if the Congress cuts off aid.

H: That may be. I'm worried -- I don't know why we haven't gotten a whimper out of Turkey as to what they may be ~~xxx~~ planning. They must have thought this whole thing through and they must have planned some steps. I can't believe they're just going to sit back. The only think I've heard even ~~xx~~ suggested is they're going to come present us a bill for our facilities.

K: You mean their counter-move. Can you try the Agency to see what they have to say and will you get together whatever intelligence reports we have on that subject plus the Libyan contacts and other contacts they may have.

H: I didn't know this morning. You recall that about three weeks ago Khadafi was there.

Dick Valleriani/Secy Kissinger
6:32 p.m., January 29, 1975

K: Dick, I wanted to make one comment to you about some of your observations this morning of deliberate deceptions.

V: No, I didn't say deliberate deceptions.

K: Well, at any rate, deceptions -- deliberate or not. I hope if we deceive, it's deliberate.

V: Laughts. I [didn't] use the word "deceit" either.

K: Well, that's the impression that was left. But the point I want to make is, you know, we have an obligation to be as candid as possible but I think the press has an obligation to give the benefit of the doubt. Let me give you exactly what the facts were which we had on Saturday. On Saturday we had the Embassy being partly set on fire.

V: Um-humm.

K: And that was by an unorganized mob. We had information that the EOKA-B and other even more radical groups were going to come in from Limassol on Monday. I then warned the governments of both Greece and Nicosia that if any American were hurt, I'd pull out our personnel. I wanted to make this public. Our people convinced me that: One, this would make it a test of manhood with the Greeks and they couldn't intervene. Secondly, that those radical elements who are violently anti-American to begin with might then have a high incentive to kill an American because that would get us out and would throw the whole situation into their hands. And for these rasons, I was urged and it seemed to me that in the interest of saving lives we would say nothing about warnings on that Saturday.

V: Um-humm.

K: In other words, there -- And as soon as the march on Monday was over, we confirmed what had been done. Now that does not seem to me an unreasonable proposition nor a secret way of proceeding. It seems to me inherent in the situation.

V: Well, Mr. Secretary, I agree that it is not unreasonable but we are in a situation where the questions are asked directly to the spokesman and the answer comes back the other way around.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 13 JAN 2003 200102979

K: Well, the spokesman at that particular time didn't -- the warning actually was made after the spokesman talked to the press. But we would have had to make a new announcement. There were two waves of information we received. One very early in the morning and then one around noon. So the warning was actually extended in the early afternoon and we would have had to call you all back to give you new information.

V: Um-humm.

K: And that would have had the consequences ~~ek~~ that we considered unfortunate. So when the spokesman made the information, he was telling the literal truth and there was no other plan at that moment. At that time, we didn't know yet of the new demonstration being planned for Monday.

V: My impression --What I used were relatively minor examples. But I think the way that they reflect the mood that exists there now --

K: Yeah, but what I would like to point out is that maybe the mood has a certain _____ tendency to it.

V: Um-humm.

K: And that everybody has to accept that this is a very complex situation sometimes in which with the best intentions in the world one cannot inevitably give -- I forget what the second example was.

V: Well, the point I was trying to make was that when the information in both cases involved the communication with a foreign government, in both cases the foreign government in effect made public what had happened and we were in a position of the American people hearing what had happened from foreign governments and not from our own government.

K: Well, in the second case -- now, I know what it was -- in the second case, that was not a policy decision. I don't know why that wasn't made public. I just don't remember -- that was certainly not a deliberate deception. It may have been just a screw-up because we had no reason in the world not to make it public.

V: Well, no, I'm sorry you read that as deliberate deception . . .

K: But, you know, when you read the cumulative stuff that is being put out and it compounds the which is in any case going to kill us if it keeps up. Of lack of confidence, everyone trying to deceive everybody and I wouldn't bother if I thought you were -- if this had been

K: (cont'd) malicious, if I didn't think you were basically fair, I wouldn't bother you with this. What I was trying to convey to you is that serious people are trying to do this thing, not for the sake of keeping anything from the public but in the case of the Cyprus situation in order to save lives and in the second case, it was just a screw-up. I was never conscious of the fact that it had been denied that there was a protest. So I really will have to check back on that to find out what happened.

V: Yeah. Well, let me tell you, frankly, you know, I do try to be fair.

K: You are fair.

V: And there was a correspondents meeting last Friday to deal with the problem of some of the briefings were getting stricken from the record or something -- I forget what it was all about. But some of the people brought up other business and --

K: And I'm taking seriously what was said then and I think you will see --

V: Well, I want to explain to you one thing that came up seperately was -- somebody in the meeting said why don't we form a committee that ended up being called the "More Forthrightness Committee." I mean, there was a general feeling that there ought to be more information. I'm often affected with that same --

K: Yeah, but you people also ought to realize -- I can understand the competitive pressures on you but you ought to realize the pressures that exist on people like myself. And it isn't always lack of forthrightness. You take the Middle East situation, that thing is hanging by a hair. I cannot for the sake of getting a few headlines compound what the Israelis are already doing and the Egyptians by adding my five cents to every day's news. Some of these situations are just inherently very sizey (?) and complicated. Now on some of your other comments, I agree with you -- not some of the comments that were made at that meeting. I understand the restiveness. You are going to have more backgrounders of Assistant Secretaries. I will have more regular press conferences.

V: Well, I think that's basically it. There is a feeling that the information is just a little too tightly held and that people are reluctant to talk because of an overall policy. I mean, that kind of backgrounding is really essential to our understanding of a negotiation.

K: That part of -- I had a long talk with McCloskey and a lot of your comments I thought were well taken. And I hope you will see that we will try to respond to those. So I'm not saying all your complaints were

K: (cont'd) unjustified. But it's the complaints that contribute to the mood of a general malaise, that's the problem.

V: Yeah. Well, thank you very much for calling.

K: I ..... considered that what you did was in any way malicious.

V: Well, I can assure you that I . . . .

K: No, no, I know that. Look, I really know that.

V: Yeah.

K: Okay, Dick.

V: Thank you.

K: Bye.

K: Yes.

R: Could have done a great deal better. I do not think we lost the game today. It was Senator Jackson and Senator Stone of Florida took a most demogogic stance.

K: How was Jackson?

R: He was running for President. Everyone is concerned about how you reconcile the idea that prices are too high and you raise them higher. This was what they asked. Why do we impose import fees and taxes to riase them.

K: What is the answer?

R: It is we have to in the long run develop a stable solution to bring prices down and eliminate the _____ we must decrease our reliance on imported oil. That ultimately will bring the price down. It is an aspect of the President's program that has not been understood and not presented as clearly as I think it must be if it is to be successful. It is the key issue. It permeated the entire discussion today.

M: What a shame you are still in the office.

K: I have got tow ork on an energy speech. Now that the Post has realized that we don't need conversation, I think somebody has to speak out why our national and international programs are connected.

M: That is one aspect of the problem. The other one is Scotty Reston's cblumn. You are Scotty's friend. I was going to call Scotty. I was going to tell him that was exactly the kind of thing you needed. I think that needs to be said.

K: On the Arab/Israeli problem -- that was a very good column. Maybe I should call him.

M: You should and I will talk to him too.

K: Bob, what I also want to ask you today is this. It is a twofold problem. One is that I genuinely believe that if we do not get some more discipline out of the Congress, we are not going to have a foreign policy left in the next six months. Yet we have been preaching for them to cut the god damned thing. Now, I am going to the Middle East and they are going to cancel the President's authority on tax. There is no Democratic program.

M: I agre there isn't.

K: And now they are cutting off aid to Turkey. Who is the victor in this? Makarios. He is not our friend, and ecen if he was, what can he do for us.

M: Those [redacted] liberal Greeks. It will help Papandreaus and Makarios. B6

K: One other reason I called you this morning is the editorial in the Washington Post. It is a bad thing, what is happneing and it is basically the fault of the Administration because Kissinger is too devious and secretive. That is just putting oil on the past flames. I have met with congressional groups 110 times in 16 months. The only thing I have kept from them is the Gromyko letter -- for which there was good reason. I asked if Gromyko would publish this and he said no, we don't

UNITED STATES DEPARTMENT OF STATE

K: publish secret communications. When the letter was received I was on a trip. Then we decided we would give it to Congress anyway. By the time I got back, Congress was out. By the time Congress was in session, the President was on his Far East trip. After that we were in the middle of the Vladivostok outcry. Then we decided I would incoroporate the substance of that letter, as my views, without mentioning the Gromyko letter in my testimony at the Senate Finance Committee . We thought we could avoid having another blowout of our detente policy.

M: I will talk to them and see what I can do. It is almost impossible for Congress to have a program. [redacted] is so very weak. B6

K: But, Bob, we discussed my own position a few weeks ago. You know damn well from my point of view I have nothing to gain by fighting this battle. From a long-range point of view, what they dismantle now we will pay for three or four years from now.

M: What about Caraminlis? I didn't mention to you -- some of the Turkish Ministers gave the US here...

K: Turkey is going to go sharp left.

M: Caraminlis is going to pay a heavier price than we.

K: You couldn't be more right. The real victim is Caramanlis.

M: Can't he....

K: No. I have tried it and he has explained it to me. If he does anything, it will be sent back to Papandreaus and it will look like he is getting too close... If you want to do it, that's fine.

M: But how are you going to get help. ?

K: That isn't why I am calling, but if you want to....When the Chinese see the US pushing that country aside, they have to conclude that we have gone mad; that we are not reliable. It is vitally going to affect our China policy. When I met with with Mao and Chou they do a survey of the political situation. That Turkey aid cutoff is one of the worst thjngs we have done. For the Post to say that I am at fault or the Administration -- that M: is unfair. Do you think I could have done anything.

M: No, not a damn thing. It is the rest of us who need to get to work. Papendreaus and all of his associates, there are alot of them in this country.

*

K: Look, Bob, ~~xxxx~~ a stalemate helps in that order -- Papandreaus, Makarios and the Turks. The Turks wouldn't mind a stalemate. They will get one third of Cyprus.

M: If the Turks go left; they don't have a government there now; they very well could go left.

K: What advice -- ~~x~~ what can I do about that Washington Post? Itis really contributing to this. I need help with it.

M: I will try to do something. I can't do anything except try to avoid another article from coming out in two days.

K: On the Hill, I don't know what can be done.

M: Price is a pretty good guy. What is going to happen to the aid.

K: I had the Greek congressmen in yesterday. They are over a barrel. They don't know what to do.

M: Let me talk to the Post editorial ....When do you leave?

K: A week from today .

M: The most we can do at present -- well, I don't think we can swing a pro-Kissinger policy.

K: I know now what you went through in 1967.

M: It is still going on. There is nothing you can do that is right.

K: Particularly when you are succeeding. They knock one prop~~x~~ after another out from under you. First the Soviets, then Latin America, the Vietnam issue and now Turkey.

M: I don' think you are as weak as you think you are. I am circling around these embassies and other people. You have a tremendous reputation -- support and respect from around the world.

K: I am strong around the world and I hafe a high public opinion in this country.

M: I wouldn't worry about your own personal opinion. I don't think you are weak in Congress.

*

K: It is the foreign policy of the United States. The Congress doesn't have anys upport for anything. I would gladly give up my personal reputation if it could save the foreign policy. I have to be a lion tamer on the Middle East. If I look weak....

M

M: You dontt look weak to the Arabs or the Israelis. The Israelis are suicidal and Sadat doesn't have too much maneuvering room.

K: What they will make out of it is the agreement.

M: I would suggest you put Turkey out of your mind. I'll see what I can do. But it will not erupt immediately and the Middle East could.

K: BUt it will be long-lasting.

K: On that circular to Macomber and Kubisch, you are leaving no time -- not a second -- for me to see the Belgian Foreign Minister or Prime Minister and I must see them.

H: You have time in the middle of the day. We don't know if we are going to get the two of them together. We have got a possible time on Sunday and breakfast with Esenbel and a meeting later in the morning -

K: There is practically no time on that schedule. I have a meeting with Bitsios at 10:30 and that will last until noon and at one I am hosting a lunch --

H: If we get them both together -- you don't have to leave until 5 in the afternoon.

K: All I am saying is there is no time on that schedule and you had better see there will be some time. At sometime I will have to call on the Belgian officials. That has to be redone -- we are sending them back.

H: OK

K: But Bill there have been three newsmen who have come here. They say Treasury is totally opposed to a floor price and Enders put something over.

S: I have not told that to any one.

K: No. But could we both stick to the same statement here?

S: Yes. Of course.

K: No, but can we just stick to the statements in the speech?

S: There may be variations of those. We have no trouble with it. The question is how do you keep this goddamn bureaucracy quiet here?

K: I have prohibited Enders from putting anything else out on ceilings or investments here.

S: Enders was adamant we ought to fix investments here and how to have a foreign policy investment.

K: We will put an end to it here. Let's stick together on the statement.

S: Exactly.

B6

[redacted] Henry, good of you to call me. B6

K: I have to run to a congressional meeting, but I wanted to return your call.

[redacted] Thank you. I just wanted to tell you that following this trip to the Middle East, I came back with some very strong impressions -- I met with Javits -- I think there has to be a whole different mood in the American community here which I think may be effective in bringing some pressure to bear on the Israelis. The Israelis came through very badly of all the countries -- B6

K: Really

[redacted] The only ones who appeared inflexible-- B6

K: Well Headley Donovan told me that and I was going to call you to check with you. That's why I wanted to give you my impression because I was terribly disappointed--they just came through as the only country that wasn't reasonable, that wasn't forthcoming and they are obviously paranoid--had a terrible impression on the group.
It was almost disastrous. I told that to Rabin and other s there. I told that to Dinitz since I've been back. And it means if people go over there and come back carrying this impression it's going to make it that much harder. I think to a .....they felt that while the Arabs seemed to be reasonable and willing to compromise the Israeli was stiff necked and hardnosed

K: And Donovan said extremely arrogant

[redacted] I don't--they were more arrogant than the others, the point which was so disturbing was that one, everyone we met was military--stupid arrangement--e verybody from Rabin to Allon to Dayan--even Barlev they brought in on commerce, secondly, almost as thought they want to assure the group that this was a good investment, they had to prove how tough they can be. Don't worry we can knock them off--and we hit one General in the Golan Heights--pearl handled revolvers were standing there telling us they had 1200 Syrian tanks, we've got 600 of them , months of preparation was the best they can do, that is the best they can do, if they come on again we'll knock em out--So Haskell said to them, what are you afraid of , they said we're afraid of the Russians. The whole feeling was we can handle ourselves, don't worry about it, gives us the weapons we'll do the job--no sense of what Israel is about--no sense of what kind of a nation it is going to be, very very unfortunate. And I felt ...presentation. And I'm going to saythis B6

I'm going down the weekend to see the Board of Governors of the American Jewish committee and I 'm going to tell them that we here in the United States have to recognize that Israel has to know it is a new day. They have to do two things: the leaders are different than at the 1940 group of Arab leaders--I don't know whether we ca believe them or not--but my God what came through was a very impressive group of people who spoke of peace and seemed to be flexible and quite moderate and secondly, I think you've got to tell them the situationin the US is diffefent. There is no longer any automatic endorsement.

B6

K: [redacted] if you can help get this across before I get there

B6

[redacted] I' m going to--That's why I just didn't want to trouble youx, I was going to do it anyway, but I want you to know that I'm convinced it is terribly important. I'm going to meet with 150 Jewish leaders down there this weekend.

K: I can tell you as Jews they should want it, because it's the only way to save Israel.

B6

[redacted] I'm convinced of it now, Henry. Your role, I don't know if Headley told you this, but he should have--is quite clear that what --wherever we went, Henry Kissinger-----, and if you'll forgive me, I'm goin g to also tell them for Crhist sake, recognize that you've got a stake in this guy--you back him to the hilt and--

K: ...don't cut me up--

B6

[redacted] I'm going to get into that. Ribicoff and Javits fully agree that this had to be said -- and we talked how to devise a strategy so we can begin to really counter some of the extreme Jewish ...in this country who can be terribly difficult to be--

K: I don't know if you saw the Safire article-

B6

[redacted] if you'll forgive me--what the hell does he--why would he do this?

K: He's blaming me for the wire tap

B6

[redacted] That s what I wondered--that's a rotten thing to do.

K: To me he was one of 20 speechwriters--if he had thought about it for 5 minutes there is only one man who had an interest in wiretapping him

B6

[redacted] It was a mobscene piece--I felt he so degraded himself by it.

K: I must run because I have to get to themeeting.

B6

[redacted] I just want you to know I'll be in there pitching. K:Many thanks.

He was contacted by a lot of second echelon who indicated that they were interested in my visiting Cuba. Frankly, I think their interest is that they know of my friendship for Ford. I have sent absolutely nothing back and said I would check it out.

M: Hello, Mr. Secretary, this is Bill Macomber.

K: How are you?

M: Fine. Esenbel is with me and we have no indication of this. The For. Min. has checked with Gen. Sancar and the Prime Minister and the President and all of them flately deny that there will be anything likt this tomorrow.

K: Bill, I am very grateful to you.

M: We are keeping a very close eye and for the country to do this it has to get rived up.

K: We have what are alledged to be very reliable reports and this is why I called Esenbel to begin with. People are beginning to crank up the Security Countil meetings. I have written Esenbel a personal letter today.

M: It has come in.

K:: The personal one.

M: About dates. It has just arrived. It is 1:00 in the morning here. I have told him the general contents.

K: It is to make him understand that we understand his problems and that we will really be in a very difficult position if there is no restraint on the Turkish side.

M: He is right here. He would like to talk to you.

E: Hello, Mr. Secretary.

K: I appreciate the care with which you are going into this problems.

E: I talked with everyone I could talk to. The highest people and they all said I could deny it.

K: All right. I will call the President and tell him that.

E: We woke the Chief of the General Staff and I had the Prime Minister talk to the President.

K: I appreciate it very much.

E: You should understand that we are facing, certainly myself, very heavy pressure here. It is building up. The people are getting very much offended. You understand the psychology of it.

K: You are a proud people and I understand this. I am going to be out of the country for 10 days and the Congress is going to be out of the city for 10 days. When we come back and when the Congress comes back I will devote myself fulltime to this problem.

E: Yes. You understand for me to meet you I have to have a reason.

K: ~~You understand for me to meet you I have to have a reason.~~ I understand and I will do my best and if you will be patient as long as you possibly can, I think we can use this period to come up with a stronger relationship and then to move the Cyprus issue forward.

E: Even you know better. If you ~~will~~ feel that you can give something you can come here on your trip. You can stop here but then I think it would be proper for you to be able to say something.

K: I will plan to do it in connection with my March 6 trip.

E: I can ~~anytime~~ meet you anytime anywhere later on when you think you are ready to give something to me.

K: I understand. If in the meantime you keep the status quo; you don't do anything.

E: I can tell you there is no truth to it.

K: All right. ~~Many~~ Many thanks. We will be in close touch. We will keep you informed of any talks we have with the Greeks.

E: Yes. Please do.

K: There will be nothing behind your back. Any rumors you hear -- what you don't hear from me is not true.

E: Thank you and good night.

K: I called you the other day because I understand the Passman Committee is going to work at this aid to Cambodia.

C: We xxx will work at the aid as far as authorized -- any more than that they will have to go through the Authorization Committee.

K: I think they are working out something by which they will let you add it.

C: I thought we were limited to the $200 million for the military and $177 million for economic -- $377 -- that is all we had before unless the Authorization Committee reports a somewhat --

K: That they will do, but what I wanted to tell you is that I think the foreign policy impact of our not doing this would be quite serious -- of the Congress not going along with our request.

C: With the -- over 2 1/2 million ?

K: That's right

C: Let me give it a hard look.

K: I know what the public mood is and I know what it is in Massachusetts -- and what the mood will be

C: They don't want even the $377 million.

K: And what their mood will be if they see Communist troops markhing into Phnom Pehh -- that that is guaranteed to happen by April 15 if they don't get the money.

C: We will take it up right after we get back -- the $200 million and the $177 million -- unless the Foreign Affairs Committee does something. On that I have asked that they appropriate the full amount -- $177 million for economic, -- if the Foreign Affairs Committee moves that and goes higher, we will take a hard look.

K: I would appreciate it.

C: Get a little relaxation this week.

K: In the Middle East? I am going to have a great time.

C: We need you. Take care.

R: I thought I ought to cheer him up.

K: When they start ~~xxxxxx~~ leaking that they are good, then something has happened to the Department.

R: I do not see why they should not leak they are ~~xxxxx~~ good because its the truth.

K: I was very pleased with it. I think it is well - deserved.

R: We talked about guarantees a long time ago and you were privately wondering and sympathetic but now you are talking about ~~xhex~~ it vaguely in public.

K: There is so much truth about how a settlement can be assured and I thought we better get some of the problems out in the open.

R: I agree. I can say the obvious. It seems the risks are greater without than with.

K: You will not get an agreement without guarantees. For your understanding, the Russians always say to us we are for a ~~xx~~ settlement with all effective guarantees. And I asked Gromyko what he meant. He was just floored by the question. I said why don't we think about this and get in touch with each other. What multi-lateral guarantees can be achieved and what unilateral guarantees we would want to consider.

R: If you go back to what you have already promised with them and they have promised to us, I would have thought you would get a multilateral guarantee if you believe in it.

K: I do not believe in it. I do not think they have thought about it. I think they meant their signature on the document. And that would be totally inadequate.

R: Do you think you have the votes ~~xx~~ at some point for a treaty guarantee in the Sean te?

K: I am not longer so sure of where we stand with the Congress. A year ago I would have said yes.

R: I am puzzled by it. It seems to me there is no way 130 million Arabs are going to reconcile themselves to the permanence of that State and those boundaries unless they understand we would not tolerate their violation of either. What theme do you think is the sensible theme to strike in the conscience of the country and in relation to your trip?

K: On my trip the issue isn't Geneva. It is under what conditions Geneva should be, should it be the only course open, for maximum pressure on the U.S. Secondly, whatever happens now sooner or later the issue of a final settlement will have to be fixed.

R: Are you clear in your mind about what guarantees should figure in it?

K: An outsider cannot provide all the guarantees. I am not clear in my mind just what the security guarantees are but I am going to find out.

R: What did you find on this trip? Anything that surprised you?

K: I think it is our last chance at a moderate evolution there. If we go to Geneva under conditions of failure, it means the radicals will dominate the scene. If we go there under conditions of success, the moderates will dominate.

R: Geneva has to ratify and not solve.

K: To ratify the next step. As between Egypt and Israel there is a good chance. Whether the Arabs context will permit Egypt to move is another thing.

R: What did you find in Syria?

K: We are talking off the record now.

R: Yes, of course.

K: This is so totally beyond the capacity of the Israelix structure now, we will have to work around it.

Mr. Reston - 3.

R: Abba Eban was in for lunch today and he said before they could get down to any reasonable solution they would have to go to a referendum the way Wilson did.

K: Even on the Egyptian side?

R: No, he was talking about the Israeli domestic weakness in the government.

K: For a final settlement I agree.

R: I think he was saying even to get out of the ____ and to give up the oil wells it was very hard xxxx for his governm nt to deal with it.

K: If that's that case, there is no time for a referendum.

R: He feels out of things these days.

K: I think that's right.

K: Hello.

S: Hello, Henry. Certain Soviet sources have conveyed this to me and I want to pass on to you -- I'm sure the sources are good -- that their Trade Committee and their Central Committee are holding meetings and there will be some important meetings next week during which the people in Moscow are advocating that the Soviets make a command decision not to make any -- as they put it -- any of its resources available for trade dealings with the United States; that they are doing so well with this $7 billion or so aid from Western Europe that they will simply make a decision not to leave any leeway for future trade with the United States and that the Ambassador here and others who have a sort of more pro-America view are all hoping that they will leave themselves an out or some flexibility in the hope that something can be done on the Ex-Im Bank aspect at the least. I wanted them to know that you had said this morning -- you had expressed a hope that something can be done to give more flexibility in Import/Export Bank the next time around.

K: Yeah.

S: That's as far as I thought I should go. But they want something optimistic to pass on to those Central Committee guys.

K: Yeah.

S: For the future.

S: Now that's why they got the word to me. I think they also hope that our private trade people like Kendall, Murphy and someone they mention as Scott would be a little bit more public and more aggressive in urging trade with the Soviet Union. S: Yeah, I know.

K: Don't you?

S: Yeah. You have that impression. I think the leadership are not sympathetic to this grossly discriminatory attitude towards the Soviets but the rank and file -- the bank (or back) benchers have got them by the testicles.

K: Hello.

JK: Welcome back.

K: Joe, how are you?

JK: I'm very well. How are You?

K: Joe, I want you to know that several press people said that you were my conscience.

JK: My God, you're in trouble.

K: No, theres something in that. I wanted to -- you had a column the other day about the oil policy and what -- while I don't want to debate the conclusion, on the assumption that you believe me when I issue to statements of fact -- I think you ought to reconsider some of your sources. For your information, never -- I've checked every conceivable record -- never did Defense propose to tie the arms sales to an embargo -- to promise not to engage in an embargo. And -- I'm not going to debate it because frankly, the reason why I'm ~~XXXXXXX~~ moderately for these sales and for getting as many hooks into Saudi Arabia as possible, is so that in case of an embargo we have something to cut off to them. So as far as my policy is concerned I want these things -- you know without making it explicit -- as something that we would start in case there were an embargo. Secondly, again just for your information -- while I'm for these sales, I was not the chief energizing factor. I was more a benevolent tolerance. I wasn't pushing it particularly.

JK: Why would the view of attaching conditions to the sales ...

K: I would on the whole think its a mistake to attach conditions but I would at the same time make it very clear to the Saudis on an informal basis what we would do if there were an embargo so de facto conditions I'm in favor of. My whole strategy is to make it as costly as possible for them to have another embargo.

JK: I think so. Yes.

K: The same incidentally with that Pan American deal. We went along with it but we were far from the pushing agency. It was far down the road before State was ever asked. And again I don't want to give you the wrong impression. We were sort of moderately for it but we weren't pushing it.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 23 JAN 2003 200102979

JK: I understand. I understand the factual punch you're making that I'm in error in saying that State was pushing for this as part of the be nice policy and.

K: There is no be nice policy. I am opposed to having a political and economic confrontation with Iran because I do not believe it will get oil prices down or because what it would take to get them down -- the amount by which they would get down that way wouldn't be worth the political and economic cause. I'm strongly in favor of creating the objective conditions that will get them down and we are well underway to doing that.

JK: Part of those objective conditions are interdependent.

K: But that's to be able to get tough in a real sense. No, no. I didn't think it was a nasty column.

JK It wasn't meant to be. Look, I appreciate your taking the trouble to do this. And look, can I ask another question. Can I have a free question.

K: Yes.

JK: I, at least in my own mind, have the sense that any guarantee is something that sort of is not for now. That it's...

K: Not for now, you're correct.

JK: I see okay.

K: Look, the reason is this. Basically, say mentally his view was this. The Soviets have been fooling a lot of people by saying they're in favor of new -- the existence of Israel with the best possible guarantees. Then you ask the Soviets what they mean by guarantees. They haven't got a clue in their head. So I thought I'd better get the issue on the table so that they cannot substitute guarantees for security. Or at least that we know what they're talking about.

JK: In any case, it's not within the present disengagement.

K: No, this is for a final settlement.

JK: Right which I take it is not... I mean I had the impression just from reading things coming out of Cairo and Jerusalem that you really did very well. / After Egypt and Israel we did well. Whether it is quite
K:
enought to succeed even between then is not yet clear. For the reason that Rabin is no Golda Meir.

JK:" Yes.

K: You know, if there were a person there that could beat those recalcitrants into line, it would work in Israel. But I don't know whether Rabin has that sort of strenght. But then what is not clear to me is whether Syria can line up enough Arabs to keep the Egyptians from moving.

JK: Yes. I must say, whenever I hear people talk about that there are alternatives that we ought to go to Geneva. That strikes me as being about the cheapest talking point I know. That is not a serious argumne t and.

K: And it's usually made by people who are for Israel. Its what with Geneva with all the Arabs united and frustrated it's the worst outcome for Israel.

JK: The common denominator of the people that make it is that they are in opposition. Whether they are in Israel, here or...

K: Yes. I think the Israeli Government fully understands this.

JK: Well, I thought the statement Gore made yesterday or the day before was very encouraging.

K: I think in those two countries... Egypt and Israel...we moved to a level of understanding which gives us a chance.

JK: Let me. I'd like to come in and chat sometime if you have some time and I will call Larry and try to arrange it.

K: Do you want to have breakfast tomorrow morning?

JK: Perfect.

RELEASED IN FULL

K: Hello. How are you?

C: I'm fine. Do you get any sleep at all.

K: It was a hectic trip.

C: I'll bet you.

K: Chris, I wanted to talk to you about an idea I had discussed with Sparkman yesterday. I would be prepared -- and he thought it might be a good idea -- to send up once a week somebody from the Department McCloskey, or if it's a special case anyone else. To bring some of the cables, maybe of particular interest to you and to Sparkman. Just for your own background information so that -- I can't leave it with the staff but it would give the Chairman and ranking member an opportunity at least to see some of the things that we are working on and then if you have any particular questions we can get you additional information.

C: I think that would be good Henry. There is a little precedent for it being developed now in relation to the CIA.

K: I thought it might be a way by which -- I mean I'll continue to do regular briefings but those obviously are my distillation of events and this would give you an opportunity to see some of the action.

C: I should think we ought to be able to work out something that would be very helpful and I certainly appreciate your initiative here. We have John and I haven't yet talked about the CIA thing. There has been a question or two raised about the adequacy in respect of other members and whether there was some -- we could develop up in this -- but this is our problem -- within the committee which we could apprise our colleagues on the committee of things of consequence so that they could go down in this case -- in the Case of the CIA -- to the CIA who also keeps the documents and see themselves about anything that is of unusual character. The point of course is that it's one hell of a responsibility to get information that you can't transmit to collegaues. Because it means you have to make the appraisal yourself as to its importance and all that.

K: I think that Frank Church's committee will have to consider this. This doesn't help you now because I frankly. We haven't approved any covert operations since these additional briefing requirements because. Frankly, when so many people have to be briefed its getting very dangerous.

C: I'm not complaining about this at all. My only point is when we work this thing out in a way we take advantage of your very generous suggestion but also not compromise us or the committee.

K: On the stuff that I'm showing you. I'm much less concerned about it then I would on covert operations. And if their is any member that shows any particular interest at any one particular aspect I would approach that with the attitude of being cooperative.

C: I am sure you would. Let me talk to John about it. I'm ~~grea~~X grateful to you and I appreciate your calling.

K: Most of the time they won't be things -- take the Greek Turkish negotiations. You probably wouldn't want to brief the other members about every nuance of a detail but I'd have no objection if you -- it would be up to you really how you wanted to handle it. This is not in the same category as covert operations.

C: We also would want you to understand certainly what we're doing in that way too. Let me talk to John and we'll be back to you.

K: Good to talk to you.

K: How are you?

R: I am sorry I am troubling you because I was in town Thursday and Friday and I ran across a piece of information which may or may not be known to you, but my reflection tells me it may be the best ~~xxx~~ route to save Southeast Asia.

I had lunch with A CIA economist and we discussed a piece in the London Times which George Carver gave me. The companies that have been working on oil in Vietnam have been very closemouthed until recently about what they found. Now they are anxious about security and are revealing they have a find about the size of the find in Indonesia. My reaction first was, this is the first -- if this can be developed, this is the first basis I could see that would make sense out of getting this 3-year aid cutoff to make sense, because ~~xxxx~~ the oil would not be forthcoming for five years. If they are working on it it would provide an exchange the way the British are handling the North Sea oil. This is the scenario that might tip the bill in the Congress. First, make sure the story is correct and that you get it published in a creditable way. They tell me the Washington Post is backing the aid thing and it may be if you could reliably get a full story with the cooperation of the companies -- a very solid, creditable lead would be necessary. My thought was that President Ford should go to the Congress at the critical moment and make a speech that would be solid in its own way -- to make his case in Vietnam in solid, strategic terms, and go back to Roosevelt and point out as President in his own way considered this a critical area. -- to talk on the oil thing not as an excuse to hold on but to make creditable that three years would do it. You may be way ahead of me --

K: I appreciate it and it is one of the great tragedies of our time what we are doing to Vietnam.

R: I agree and it would be a bad thing for this great country on the eve of its 200th anniversary to commit the most sordid act of policy in its history. You are carrying the heat of the day --

K: I am getting the 7th year show of the Administration. We all get into the same situation. All the bastards are after me.

R: Don't let them get you down. You have got to try to see this Middle East thing through. Give them the best fight you can on Southeast Asia and among other things, try to hold the whole OECD

K: You are going to regret that --

G: Why?

K: The Nat Davis editorial.

G: I have talked to McCloskey about it. So we have had one exchange of views.

K: Let me add my own outrage to it. What did Nat Davis do? If you guys want to have...if you want qualifications, name me 5 FSO's better qualified. Here is a man who was in the Peace Corps where he traveled around Africa; he has taught at Howard University, has been a minister in a Black church. Here is a man with deep compassion for the Blacks. [redacted] I want some major direction. B6

G: ...had a meeting today. Our feeling was just expressed in that editorial. We weren't suggesting a precedent or that there was something particularly terrible about him.

K: But then why should he be the victim?

G: You think he is the right guy?

K: If we don't pay enough attention to Africa...You look over my appointments and find me one case where I have not killed myself to put the best man in the job. I thought so highly of him that it was between him and Sisco for Under Secretary for Political Affairs and if Sisco had gone to accept a University Presidency, I would have made Davis that. I made him Director General of the Foreign Service instead. [redacted] B6
[redacted] If I had wanted the Department...had nothing to do with South Africa. [redacted] B6
[redacted]

G: You think, in other words, there is nothing...

K: How did this thing start. Congressman Diggs went to Zaire and got all these people all jacked up.

UNITED STATES DEPARTMENT OF STATE

G: The Africa situation, you mean.

K: Yes. What did Davis do in Chile, for God sakes.

G: We don't know -- alot of things happened.

K: What do you want him to do? Everything that happened in Chile was approved in Washington. Everything in Chile was started under JFK.... we have been carrying this for ten years. Why should an Ambassador believe it was something...I say that an Ambassador...it stands to reason that Chile, which was a very special case, that a man who was in Chile, not initiated it, that he isn't being put into Africa in order to destabilize.

G: ...you don't have to believe that.

K: But what did poor Davis do? Does that mean he can never get another post?

G: No, I wouldn't think so.

K: Exactly what was done wrong in Chile. Has anyone ever analyzed that. What exactly was wrong in Chile. You had a government that was... we kept the free press and the opposite parties arrived. That failed and that is why a military (gov't) moved.

G: One doesn't have to be sentimental about the Africa situation but you don't see what Davis represents to them. Anything that...

K: I picked the best man for that job that I had around here. If I had wanted to....I could have one of the ten guys that would have been adorred by the Black Caucas and would not have done a damn thing. I have a rigid policy of putting the best man in. I have been wanting Davis as an Assistant Secretary since I brought him back.

G: McCloskey thought it would bring him through.

K: I may not fill the post. I say it is McCarthyism. At least when [redacted] was crossed off it was for views he held. He is attacked for having been Ambassador to Chile on that basis. On that basis, no Ambassador feels presently he can get another post. What we are saying in Africa is not what he represents to the Africans. It is our sickness expressed abroad. B6

G: We thought that it was not unreasonable for them to be disturbed. We mean someone they considered sympathetic by someone they regard as an agent. I do not mean a CIA agent, but an agent of something different.

K: Why would I want to put a man who is not sympathetic to them. What rational reason should a Secretary of State have to do that.

G: The Secretary might not realize how this thing would be received there.

K: You know this building. If you don't want policy to be carried out, there are lots of...It isn't hard to have second-raters to fill a job.

G: From their viewpoint it is something they fen as policy..

K: But don't you think it is unbelievable for a foreign country to tell us whom to appoint in our government. If I did that to Chad, there would be an outcry. What have they got against him? If he is a destabilizer, he will be one anyplace. If we don't go through with it now, we couldn't send him anyplace except Denmark. Where can we send him. Every government will feel it has to prove itself. He certainly can't go anywhere in the underdeveloped world.

G: I don't know whether that is possible. I don't think this means that he is limited to some minor..

K: Like what. He can't go to Eastern Europe because he had trouble in ~~Belgrade.~~ Sofia. So you confine him to Western Europe.

G: Asia.

K: I have no intention of yielding on this anyway. There is going to be a monstrous brawl if this is pursued. I believe in defending my associates, contrary to the CIA.

G: What do you mean by that?

K: Nothing.

G: I bet. Do you expect it to shape into --

K: I don't see how a liberal newspaper could do this. If you want Africa policy reviewed, that is fine and proper. It is not our strongest suit.

G: But anybody nominated for an office, I think, if he is not automatically confirmed..

K: This is witchhunting. There is certainly every right to look into his role, his qualifications. They are extraordinary...

G: We shall perhaps look at him again.

K: Here is a man who was in the Peace Corps, who volunteered to go to Guatemala after our Ambassador was shot, who served in Chile, served on the NSC Staff. Served as Director General of the Foreign Service, has an active civil rights record, has a predilection for the Black people, taught at Howard University. He has done volunteer work in a Negro church, he was an activist in trying to get a Black minister in his own church and failed in this effort. For such a man to be attacked on the grounds of not being interested in Africa is an outrage.

G: What do the Africans say?

K: I have felt that it was not proper for FSO's to become political activists to capitalize on any political mood. I will make it public on Monday. It will be put out on Monday.

G: Do the Africans, are the Africans aware of all these aspects?

K: I don't think so. At least I have never told them.

G: It says something, but I am not sure it grows from their anxieties...

K: Ah, baloney, with all due respect. Do you think we would put in somebody...It is an exportation of our malaise -- that everybody can take a whack..the move was lead by Algeria, one of our friends.

G: All of them over there don't feel the same way.

K: No, but when you have such a weak executive authority as we are developing now - - and each country has a premium in kicking the U.S. around, why not do it?

G: Have you talked to any of them or has anyone tried to find anything authentic in theiranxieties?

K: I don't believe there are any anxieties; I think this is demogogery but never heard of it until Diggs appeared in Zaire. Naturally when an American Negro goes around saying it, why wouldn't the Africans do it? I think it is McCarthyism.

G: I am not sure I really agree with that.

K: It never looks like that at the time. People can assassinate...

G: I think it does. It did then and there are certain aspects of Watergate, but I don't think..

K: What are they saying. That he was in Chile and that the odious practice of political destabilization is being carried to Africa. Destabilization was never used by a Government official. It was an invention of Cy Hearsh. Colby says he never said it. What exactly was done in Chile while Davis was there? Newspapers that were being used by the Communists -- TV and radio stations were being supported by us. If you don't do it a dictatorship is established.

G: We oppose it in some places.

K: We oppose it selectively. All right.

G: I think that it is not necessarily McCarthyism... I can imagine appointments that would be offensive to people who might be qualified in some ways who raise a specter for say the host nation that makes their appointment.

K: Absolutely. If you send him as Ambassador to that country. They then have a right to complain. That isn't the case. This is an American appointment.

G: That strikes me as the harder part of it, and we tried to take account --

K: Why shouldn't he be given a chance. He is responsible to me, not them.

G: That is clear, but --

K: If we see an expert in political warfare -- if we send someone from the intelligence community, I can understand it. But this is a Foreign Service Officer. It would be like saying he can never get another job because he was in the position of carrying out orders. He is a do-gooder. He was deputy to Sargeant Shriver.

G: The Peace Corps thing probably reinforces it in their view. The Peace Corps...

K: I thought I was picking somebody with a broad view, with a special interest in the Blacks, not one of these limited Africanists who cannot fit it into foreign policy.

G: Not Soapy Williams?

K: I respect Wayne Fredericks. I am talking about the recent six years. Soapy Williams was good. He showed interest. Wayne Fredericks is the one I like.

G: Was he? I don't even know what happened to him.

K: He is in foundation work. Ok, Meg, I have made my point. I have never called the NYT. They slandered Davis six weeks ago.

G: We will bring it up again.

K: Between you and me, I am not that wild about him. I think he is a distinguished FSO, so this is not one of my cronies I am defending.

G: We will check it out.

K: I just don't want these FSO's getting into the habit of doing their job politically.

In addition to everything else, let me say that on foreign policy, your editorial policy on the whole, you are entitled to an occasional aberration.

G:....letter from Joe. He is in Jerusalem.

K: Has he been in Syria yet?

G: I talked to him on the phone. It is a better connection than you get to New York. He said that he had some sort of commitment there but he was hoping to wait and let it take place. And Marilyn is there.

K: Assad gave me his firm (word) to see him and he is my special favorite.

G: He is probably going there in a few days. Marilyn is over there somewhere.

I was going to raise it with you and the President and then you had to leave and I felt it would be wrong for me to raise with the President a position where I didn't agree with you.

K: You are a noble man. You really are. I am serious.

M: I mean you would get mad at me, if I did that.

K: But that isn't why you didn't do it. You didn't do it out of fairness.

M: I did it out of prudence, Henry.

K: Oh, come on, what can I -- my being mad would not always deter you.

M: Not always, yeah. I also had assumed you had made up your mind. That was another thing.

K: Yeah.

M: I thought if it really were open I would have pursued it. Well, look, yes, I will do this. I have got about five phone calls to return and I will do this. Can I quickly say to you -- I got back here, never having really had a personal word from the woman for two years, I got back here and got a long letter from her.

K: Really.

M: And, if you don't mind I am going to send it down to you. It will take you a minute to read.

K: I would love to read it.

M; It is a very complex letter sort of saying listen I like you all -- you know -- I never said any of those things, which in fact she said.

K: Look, Pat, as far as we are concerned, if you can have any influence with the Indians, [redacted] B6 here, to cool them a bit. If they turn this into a monumental confrontation.

M: Only they can lose.

K: Then there is going to be one.

M: Yeah.

K: But if they played it in low-key, this thing will drop like a stone.

M: Right.

K: It cannot be in our interest to start pouring arms into Pakistan. Pakistan doesn't have enough cash anyhow.

M: I will call Kaul and give him my view on this. Yes, I will. What did Saxbe do?

K: Oh, Saxbe made a statement -- you know, for his own sake we told him to delay his arrival for a few days and to get sick so that he would not arrive on the exact day that we resume arms aid. So he has announced that he is not sick, that he disagreed with the decision.

M: I will leave you with your ambassadors. Listen, one other thing, I would never have called ~~XXXXXX~~ you about this, but I have a huge article coming out in Commentary entitled, "The United States in Opposition." It argues that we have in a parliamentary sense that what we have to do with the third world is go into opposition. After thirty years we have not been doing so.

K: I would love to see it.

M; Commentary is all excited and they are giving a press conference on Wednesday and I will send it to you because I came aways with no one thing more clear in my mind -- or at least no one thing I wanted to say more than this particular . . .

K: Could I have it in the next few days because I am drafting a speech on Latin America and I wanted to say a few words about third world relationships.

M: I will get it in the mail to you this moment. Who do I send something to that gets to you?

K: Eagleburger.

M: To Larry. Okay. Uh, and I would -- some of the fellows around you might read it. If you approve of it, it means you have got to do things in terms of who you send to the UN and who you send to these forums -- different from what we have done for thirty years. I think if we don't we end up -- at some point at the last General Assembly we had a floating block of the United States _____ in the Dominican Republic. Well, you know my thoughts. Maybe you will just . . .

K: NO, I will read it and the quicker you can get it to me the better I like it.

[Missed first part -- some humorous discussion about [redacted] B6

K: . . . in which military power of course does not matter anymore. But even political and economic power are being depreciated. All that matters now is the intransigent merit of ideas.

K: He ought to try that on Mobuto.

M: Wow! I think you ought to come back to Cambridge, that's what we think.

M: Well, what can I do for you, Henry?

K: Well, could you get together a group that develops a strategy of how we behave in the United Nations on this issue. I'm serious. And the political side I can handle.

M: Um-humm.

K: But what do we do on economic and social side; what is the strategy; how do we act? I fully agree we have to start harassing and we have to make it tough as these reports wind their way through.

M: And we have to -- If you would take my view, an opposition just doesn't come in and say don't do that; do this.

M: All right.

K: But then, you know, you know the State Department. You've got to draft instructions: What is it we tell people to do?

M: That's right. Otherwise, it just doesn't happen.

M: And I've told them you would not in effect.

K: I said it publicly yesterday.

M: You know, Henry Kissinger's word . . given a call for conference type or when the Minister of External Affairs is serious. He knows what those words mean when he says: We will in no circumstances participate in an arms race; we will do nothing to change the strategic balance.

Klein: Well, the TIMES is reporting that the leadership there in the Senate is now considering giving the President to reinstate aid.

K: Hello.

R: Hello Henry.

K: Scotty, how are you?

R: Alright. Sorry I missed you the other night. I thank you for...

K: Well we loved having your wife there and I'm very fond of Dick.

R: Well, he can run through a hard time and _____.

K: He's a very honorable man.

R: Yes, he's a fine young guy. I'm trying to think through this next trip. You're going off on Wednesday, aren't you?

K: Wednesday, yes.

R: I'm trying to put it in some kind of perspective of the long struggle. How do you see it? What's the nut question here?

K: Well the nut question is really it will determine the mood, the philosophy and the framework of the final settlement. There has been a lot of discussion whether this would be an alternative. That isn't the issue, the issue is whether we can get the Soviets to come along in a moderate approach. I think if we succeed we have a fair chance. Because that will be the only approach that's ever worked. And it's also the way we can get into Geneva under the best possible conditions. I really think it's the future of moderation in the Arab world will depend importantly on whether I succeed.

R: And how do you estimate that and who are the key figures?

K: Well the chance of the negotiation as such, I don't want to sound like Eliot Richardson putting odds on contingencies, but I think the negotiation itself is slightly better than 50-50 between Egypt and Israel. Then the problem is, you know if we could also move on the Syrian front then the odds would be pretty good. But since this may be difficult the odds are a little more complicated.

UNITED STATES DEPARTMENT OF STATE

R: The odds are against on the Syrian front?

K: The odds are against on the Syrian front in the same timeframe as on the Egyptian front. Not permanently.

R: The Israeli front, you think....

K: Looks better in the leadership and totally uncertain in the Cabinet and Parliament. But with them it is a very grave event with the Jewish community doesn't always understand because if it fails some members of the American Jewish community think if it fails there will be a massive crisis in Geneva with Europe, Japan, Russia and the Arabs all uniting to better rapid progress.

R: You can have a real smash-up unless you go there with a real vacious for settlement....

K: And with the moderate Arabs having achieved something.

R: Has Sadat got the influence really to bring the rest of them along or not?

K: That's the $64.00 question. I don't think he knows the answer.

You write all of this on your own.

R: Oh sure, I just want a little guidance as to what is the sensible position to take at this particular moment.

K: But anything you can say to the Israelis about going to the American Jewish community that this is a grave matter along the lines of your previous....

R: Yeah.

K: Cause it really is for them.

R: Of course it is. They're really up against it. What I don't understand, however, is, taking the other side of it for a moment, why would they be satisfied to leave the passes and the oil field? If the only thing they get out of it is some vague ...

K: They'll get more out of it.

R: They've got to have something in writing, don't they?

K: Oh yeah, they'll get something in writing.

R: What does that amount to? What _____ do we want? What would....

K: Well, I can't go into that, Scotty, but I think in that direction we made progress on the last trip. What is in writing will not be as important as the intangibles. But it will be significant. But the difficulty is to make people understand that what we are negotiating about now is the process and not a condition. But there will be a document, they're not being asked to withdraw unconditionally.

R: Well that can only go back to the rating of 214338, can't it?

K: That willl certainly be part of it.

R: ... and internationally guaranteed borders. Have we resolved the guarantee problem within our own government?

K: No, but we're thinking about it very hard.

R: How is the situation on the Hill. Has that calmed down a bit?

K: It calmed down but it's very weird, Scotty, because I think that you can have a superb dialogue right now and not know what it means. In the old days you could talk to Russell and BDirksen and Benners, and they could tell you exactly what would happen. Now you take Turkish aid -- I have the impression that in a secret ballot, 5 out of 6 would vote for removing the cut-off. In fact, I've yet to meet a Congressional group other than those who sponsored it, bthat isn't highly uneasy about it, but there's nobody who you can really talk to who can get it from here to there.

R: Yeah, we're fresh out of Sam Rayburns and Lyndon Johnsons.

K: That's right. And it's especially difficult in the House.

R: It's this democracy, you see.

K: But Scotty, if you look at, over the years, one would have to say that the odds of this leading to executive predominance are very high, cause right now you have a Congress that's a little bit out of control, and the non-elected President. But you get yourself a President who has just wbeen elected against a Congress where the leaders have structured totally _____ and the odds would have to be with the President.

R: Oh, sure. Well, from what I read the immediate thing is it's going to go back this way anyway and with all the distractions and ambiguities of the questions before us, it's just hard to get a pilemont of any kind really, to get a lead.

K: And to get a lead to act consecutively.

R: Well, maybe in the parliamentary system where you got the whip and the government goes down maybe you could do it, but you can't do it under our system.

K: No. If it really keeps going like this it will be more like the Third and Fourth Republic.

R: I see Mr. Roth has retired you.

K: Who?

R: Tom Roth, of the Sun Times.

K: Has retired me?

R: Yeah, he's got you resigning.

K: Oh, gee, I just wish I could go on a trip once with a little permanence.

R: Well, as a matter of fact, I think that is one of the points that ought to be made -- get off this guy's back, at least during this session.

K: Scotty, I have talked more seriously to you about this subject than to anyone else and you know my views and they haven't changed since you and I have had lunch, and there's nothing current on this.

R: Well there better hadn't been cause our country needs you.

K: Thank you.

R: Well, good luck. I won't see you before you go. How long do you think you'll be away?

K: I have no idea. It could be up to three weeks.

K: How are you?

D: Very well, Sir. I say very well, but actually I have a cold. Go ahead.

K: Well, Bill Colby told me about his conversation with you, and I don't want to tell you what to do. I just wanted you to know that a decision, whether to go ahead, whether to cancel, has not been made and that we would very much like to have the option to continue, in light of the fact that there is some information there that would be uniquely valuable to have.

D: I'm making a note on that.

K: What we have to do is to keep watching this over the next months, and then see what the recommendation will be.

D: Let me tell you precisely what my situation is personally. I'm reporting this to New York, is the reason I'm taking notes. Yesterday after that conversation I sent a memorandum to the _____ in New York about it because the ultimate decision on what we will do will be made there. That memorandum has been taken under advisement. I have been this morning in touch with them, talking to them, they asking my judgment of it. I have not yet had a meeting of the people here concerned, but I'm going to do that in just a few minutes. I've got an office full of foreign military officers who are here studying. I've been chatting with them this morning so I've been busy but I can assure you that this is being given very serious consideration. We're glad to have your opinion. We appreciate your advice and I hope we can be free to call you back and discuss it further if any of our people have the need to do so.

K: Absolutely, but I just wanted you to know what the White House position on it was, so that you could take that into account, too.

I kept your package to the Middle East $100 million --$250 million and the $324 million 500--well there is a $300 million and a $40 million for the relocation of Soviet refugees. You got your package complete, just like you want it. Not one ....up. Did you know that?

K: No, but I'm very pleased to hear it.

P: Every penny and if you want to jot this down, I know you are very busy, but this is damn important to you because you are going out there--here is what is in for Israel--$324 million for economic aid; $300 million military aid; $100 million of it grant. $40 million for the relocation of Soviet refugees. K: I think it is self-evident that we would have a reassessment in the light of a new situation in the Middle East. ~~Ax~~ You know, normally we are accused of not reassessing policy in light of changing circumstances.

F: Ok. The aim would be I gather to try to prevent another impasse. How did that work in regard to the Arabs and the Israelis?

K: Is he my opposition?

B: I am kidding. He was giving that old debate of who struck John. It is very sad.

K: Its sad. Its a tragedy.

B: The step-by-step thing cannot be stopped.

K: What x do you mean?

B: It has to go on. You need an American initiative.

K: I did not call you to discuss politics.

B: Some day we need a blow-by-blow of your negotiations. I have tried to get k something from your staff.

K: It is fruitless. Because they used to say about Roman historians that the major thing is to understand the historical truth. This thing is getting obfiscated. Give the literal truth will make it very complicated. For newsmen it is complex because there was some very skillful manuevering to make sure the blame wouldn't go one way or another. I think you all have the essential story. That goddamn lead of your Monday story...foreign policy in a shambles--is that what you had to do?

B: Yes.

K: Thanks.

B: We all wrote the same stories. Had you meant us to write stories like that?

K: No.

B: When I blew up at you I was asking if Israel was being evenhanded. I wonder if you saw through.

K: I thought the stories would come out somewhat more evenhanded. The briefings we gave are essentially correct.

B: These are the proposals that leave out little shadings. The Egyptians said they wanted to move some forces into the passes.

K: The Egyptians, the Israelis have the Egyptians over a barrel. The Egyptians have to prove they were not willing to sell out.

B: I am glad I cut that out of my story.

K: Do you see what I mean?

B: Yes.

K: The Egyptians were willing to let the Israelis stay in the passes if they could get to the other end of the passes.

B: When did they make that offer?

K: At various stages. The Egyptians now are in one hell of a fix. Because for the Ameridan audience they should look forthcoming.

B: The Israelis are in a fix too. When are we going to Geneva?

K: Listen, goddamnit Marilyn. I made one human gesture to you. I have no idea.

B: Just for my personal information, I want to take a trip.

P. Hi, Henry.

K: Pete.

P: How are you?

K: Fine. One who has the Greeks and Jews against him cannot be all wrong.

P: That is what I keep saying. I wanted to express my friendship and support and see if there is anything I can do to help you during what I ~~must~~ know must be an extraordinary time for you. I have been trying to think what we on the outside could do. Instead of good ~~politi~~ politics to attack you, it may be bad politics to attack you and maybe if there is someway, some of us could help on the substance side.

K: I have a group of people coming in on Monday. Could you come?

P: When?

K: At 4:00.

P: Maybe I can.

K: Then you and I perhaps could talk half an hour before or after.

P: All right. A couple of thoughts for size. One, thought I have is the desirability of perhaps adding a bipartisan quality to this -- as you rethink whatever your strategy is going to be -- maybe a group that could be seen as helping you get support on the Hill but might be a group that is a little more public and a little more visible and one that is totally off the record. There are a very small number of guys in this country who have a certain amount of credibility and I try to think who I am talking about. I know you and George have your problems from time to time.

K: Ball?

P: Yes, but he has the great advantage of...

K: Personally, I like George and he has constantly been the agressor with me. Why do you think he is ?

P: I think I will be having a long talk with him this weekend. He has been in Egypt. George, I think, carries a lot of weight in this country. Elliott I guess. Cy has a pretty good constiuency.

Some are not my favorites but I have been trying to think

of the people who might come up with some ideas and that could be helpful with the Congress and public with you at this time. On this Russian business, I guess you must be having a hell of a time with what you do with them when you get to Geneva. I have been trying to figure how we could turn this Jewish lobby around and accellerate some of this economic and trade side. Must be smart enought to know they are going to be isolated over there.

K: I doubt it.

P: I am wondering how you are feeling. Do you think there is anything that we on the outside could do to help you.

K: Pet, we have to pull this country together or we will have a total collapse of our foreign policy. Come Monday at 4:00 and let's talk about it.

P: I think I can do it. Think about what you would like us to do. On the thing we did on energy, if the right people are asking you can get quiet a lot of support in this country and I have a feeling that Washington has this self-destructive inbred thing going on. When I get out of Washington I find a lot more support for you than I do in Washington and I am not so sure we cannot get a lot of people across the country mobilized to support you in a fairly tangible way.

K: If you could do that, I think it is needed for the continuity of our foreign policy and if people would stop thinking in very short terms they would realize that it would be advisible for an inherrent administration to inherit a (good) foreign policy.

P: I don't think they would want the world in flames. Would you react at all in thinking of getting a group together.

K: Very well.

P: Some of the people I think of you might disagree with me. The kind of people who have tended to be thought of as being more right than wrong. For example, I know you and Mac ~~getxa~~ meet a lot. He tells me you do on energy etc. Mac may not be right for what I am thinking of because he is identified with mistakes -- if you follow me -- ~~xhexexappxopxiake~~ whether appropriately or not. I am just calling you to see if I can perhaps help you on getting a trade thing through or what ever you want. I have great compassion for both you and the country at this point.

K: I appreciate this very much, Pete and I will see you on Monday.

P: O.K. Incidentally, are you and Nancy inclined at all to come down and have a good time. We were going to give you a party and have some fun.

K: We are inclined. I will look at my schedule and see if I can come.

K: How are you.

EK: Very well. I wanted you to know I watched your news conference and found it very impressive. You msut be exhausted.

K: Thank you. It was a hectic trip.

EK: I can imagine.

K: And you know it is a little sad when you see what is likely to happen.

EK: I left a message yesterday.

K: I didn't get it. What was it.

EK: Last night on WETA -- our public broadcasting station there -- I had Amb. Martin, Walt Rostow and Pete McCloskey and Tony Lake for an hour.

K: [redacted] Tony Lake is making a project out of working for me ~~for 6 months~~ five years ago. B6

EK: I was disappointed in him. I had hoped he would come on strong and would hold up his end of the debate.

K: Does he know what his end of the debate is.

EK: I think an avowed dove, isn't he?

K: Sort of.

EK: Martin was what one might expect. He felt very deeply -- I am not sure he comes across so well on television and Rostow was ~~very~~ very rastovian. Pete McCloskey was very good. He.is good on television.

K: I think we all have to look at Vietn-Nam now again.

EK: He did not seem to know where he stood. I asked him where he stood and he said he was confused. On the one hand he thinks further aid should be given but the three year plan that Martin briefly outlined on the program was more than Congress could be expected to appropriate.

K: Yes.

EK: I thought it went very well. I wondered if you had had any further thoughts given -- we are doing a cover this week on you. You will be the subject of the cover which comes out next Tuesday and will be done by the cartoonist John Kunar (sp).

K: In other words, I will be bleeding all over.

EK: Almost. I hope this is in strictest confidence.

K: Nothing I can do except complain to Kay Graham.

EK: It is a representation of you as Gulliver being tied down by the Congress, by the Archbishop Makarioses of the world.

K: That's not too bad.

EK: And the North Vietnamese.

K: That doesn't sound unfriendly.

EK: It isn't. I think if you have been reading what we do we have not been unfriendly. I read Time this week and I think the editorial Time story was --

K: I did not read it.

EK: It said it is time to get out of VN. Enought of shit stuff. Sort of a negative reaction.

K: The problem in Viet-nam -- I don't know whether it would have worked in the Middle East this time under any conditions but it is sort of scary when sitting there with Asad saying why is Sadat making concession whe you are going to let Israeli go. I said we are not. He said you let Cambodia, V-Nm, Turkey, now perhaps Portugal -- maybe that is different. That is one side but on the other side you can read the Israeli newspapers and see what they have been saying. Right now, the issue for me has nothing to do with Viet-Nam but has to do with the fact that the American authority to preserve the peace in the world is declining. If it declines too much, we will live in a very dangerous environment and the real problem is I would settle for anything that would get the national debate off our back.

EK: I will ask you again.

K: I know, I guess it is the TV think.

EK: Yes.

K: I have it very much in mind. I have two obligations -- one to Barbara Walters and another one for three years to Bill Buckley which I unwisely gave and I have to fulfill. How late in the year can I do yours. Would May still work for you.

EK: It would work. Let me tell you what I have in mind. There are two approaches. One, I origianlly broached ~~you~~ with you. The more personal approach. I am not certain at this point that that is thebest approach for you. Do you want it on a policy level or personal level. If personaly, I don't think they would conflict with any prior commitments since Barbara Walters thing would be a 20 minute thing on the morning program. This would be an hour on PBS. As I said originally more of a ~~person-to-person~~ person-to-person thing. On ther other hand, if you prefer to do more of a tour of the horizon, I can understand you have these prior commitments and I suppose that is as good a time as any.

K: Now that I am back for a while, I will get in touch with you again or you bug me.

EK: I will bug you.

Jim, no, no, believe me , I didn't think you were aiming these remarks at me and I really think that you and I are perhaps among the few who understand the nature of what's happening to our country right now.

K: Look, if the prestige of the US were high and if our assurances meant anything, it would have worked.

S: Right, the damn thingis tragic.

K: Jim, if there is some way we can get out the fact that there hasn't been much fighting and that this collapse has really been caused by us---

S: The only reason, I haven't done so, to this point, is to say that there hasn't been that much fighting--kind of puts the tail on the incompetency of that retrograde operation Thieu started.

K: Yeh, but the retrograde operation in itself was a panic--

S: Oh, quite right, quite right. We will--that is the line I've been taking and I shall continue to take it.
As you know, I did that last week, I think some time or other--some briefing.

K: I think it would be helpfub.

S: If you look at that aircraft situation -- when Thieu looked at his inability to get mobility forces into Damytuet (sp?) which has never been taken and it is the main juncture--once Damytuet fell they couldn't use their highway down through the highlands. And naturally, he paniced. Now the handling of that withdrawal--

K: Oh, its been a disaster. Disaster. But you can see how he came to the conclusion his execution was a disaster.

S: Q Well, that's right, but in addition to that, when he didn't consult with anyone--well, some of those fellows over at State have this notion that don't just stand there, do something and I don't mind that as long as what we are doing is going to be effective.

K: Jim, we don't want--the exit from Vietnam shooting its fleeing refugees--that is the conclusive argument there

S: Right, well take a good hard look tomorrow at that MSC boat--we may try that as a test case--

K: The what?

S: The commercial boat that we are talking about putting in there

*

K: Are you against that?

S: I'm worried about it because once again, you get the US involved in a token operation and can turn into a very questionable outcome.

K: That boat won't put in before we hear from Truong

S: Right, I will make sure we don't move it until we hear from Truong

K: Arthur Burns said two leading Jews called him today and said I was an anti-Semi.

F: No one has ever called me. I have never heard that.

K: I don't much care but the only hope that now exists for the Jewish Community is to show a little bit if discipline. I am talking to my friend now -- I don't have to convince you.

F: Did you meet with a group of professors today.

K: Yes.

F: One of my good friends called and said that he wanted to meet with me.

K: Stoessenger, Weisel, Kampelman and Morganthau. I didn't complain about the Israeli Govt. I just explained where we are now.

F: [redacted] is a hardliner and you just cannot talk with him. B6

K: He was not all that hardline today.

F: I will have a report for you tonight because your having mentioned [redacted] I know probably why he called me. I will find out what the reaction is when I see you. B6

K: Maybe I should not see any G-D intellectuals. They always blab it all over the Jewish Community.

F: Why would I not hear about these things.

K: I tell them about 1/100th of what I tell you.

F: I hope so. Where would be the best place to meet -- State or White House.

K: State Department.

F: I will meet you at 3:00 and Miller will come in at 3:30.

*

K: What does he want?

F: Nothing. Just the President (of the Community). I told him ~~xxxxxxxx~~ about the foreign policy speech and he was worrited. Tell him when he comes in not to worry. He has been very supportive.

K: Yes.

F: A little bit of politics.

K: Of course. I will of course do it.

F: I will get in there early and he can meet me later.

K: Could somebody slow down Simcha a little bit. He is totally misconceiving the problem. He thinks it is a public relations problem.

F: Until I go overseas, I can't get involved. I had to do this today. I had my friend Irving Bernstein speak to the UJ Group in NY. They asked why I was going over. They said me or the Chairman of the Bosrd has to go over.

K: When will you be back.

F: Probably on Saturday or Sunday.

K: You call me the minute you get back. I will see you tomorrow. Thanks, Max.

K: Who took the initiative.

S: They did. Not the whole Community -- a half dozen people.

K: Who are they?

S: Bookbiner and Tannenwald who are both reasonable. I think they will take a few more with them. They asked me about a week ago. I did not think of checking with you. I can handle them.

K: O.K. I am basically opposed to it. I think we should show great aloofness right now.

S: I will handle myself accordingly. I am not going to be particularly forthcoming and rather than making a presentation, I will let them ask questions.

K: Make absolutely clear where the fault lies.

S: I am. First, we cannot play it straight down the middle. They will murder us.

K: Right. That Israeli cable today was an insult.

S: I have not gotten over that. I will make it clear. These 3 or 4 guys on the whole are pretty reasonable.

K: What did you think of the meeting this afternoon.

S: I thought it was great. I wish I thought they carried more weight but they don't, of course, and our big problem is in my mind which remains ~~xkx~~ quite unresolved. How do we cope with this damned public relations problem if these guys step up the space over the next 3 or 4 weeks. They had a good editorial this morning. I suggest you meet with the Post and the Board of the NY Times. We have to get at them. We cannot let these people get in this field all alone.

K: I agree. I hink I should do both.

S: If you would not object, I would like to attend both and listen.

K: I will do that.

S: Now with Demiril in, we shold start on what we should do. I think Tyler is the right man as far as the Cyprus problem is concerned. He is not the right man in terms of the Hill. A counter suggestion -- I think you should let Hartman or Buffum. I detect, for your on background and between us -- a little sensitiv ty on the part of Hartman, and if I were the Assist Sec, I would not want another Assistant Sec in my area.

K: The reason I cannot accept someone with high visibility is that I don't want the compromise to be that Kissinger having screwed it up was rescued by Bob Murphy.

S: I know that. My suggestion is to send Hartman. Keep it in hous If I had time, I would ask you to send me. I have enough to worry about with you on the Middle East. I think this is our number one priority. ~~xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx~~

K: I think the Israels are beginning to get scared. I called Arthur Burns last night and Simcha was there and bled all over me. He indicated the cable was misread. He said they cannot cave but they are looking for some way to get out of it.

K: One thing we have to do is, I am getting more attracted with the idea of coming forward ~~with~~ with a final proposal and seein what can be done on that.

S: On the final settlement.

K: Yes on the final settlement. My worry is that in an interim settlement, we will spill so much blood they will say we did it for you and we will be forever responsible ~~for~~ for it. Have you seen the Wallach column. Israeli diplomats told him they were dumbfounded by my departure. They had just made a new proposal and the Egyptians rejected it out of hand.

K: Hank, how are you?

T: Fine thanks. I need some guidance. It occurs to me that we in the media have all missed the most important point of the double review that is under way in all of the meetings, etc. -- Vientma, Middle East under review. You have a policy of containment which no longer applies -- or we had one.

K: Just a minute. Don't say it no longer applies. I don't accept that.

T: Certainly, in its manifestations it does not apply.

K: Yes.

T: The Nixon Doctrine is somewhat eroded as it applies to SEA. The larger point we have been missing is that the review that is underway may produce a policy line which will fill in those gaps, give us a new basis so that other countries will have a better perception of what we can be expected to do in a given xxxxxxxx set of circumstances. I am changing my language because of what you said about containment. It seems to me that what we need to do is something that people have some basis of how we are going to behave and provide a partial basis of containment.xxxxxxx

K: Absolutely. We have to articulate some conception of the national _____ so that others can relate to it.

T: I suppose this will be articulated in the President's speech to the Congress.

K: I would like to work closely with this group. Having gone through this horror of Vietnam, I think we should do the Middle East on a bipartisan basis. I had the sense of the meeting the other day that we might have disagreements on tactics as we go down this road...

B: What I suggested in this memorandum is that I would be glad to mobilize support for a statement that the President might make. Have it orchestrated so it would come immediately afterwards if that was decided to be a useful line of policy to pursue. It is spelled out in detail and you should have it for your eyes only.

K: If agreeable to you, I will read the memorandum and then have lunch with me alone and we will talk about that and the situation in general. I will arrange that in the next few weeks. R: Thought you were in California.

K: No, but I am on the way.

R: I thought it was a fascinating meeting and I want to say again we would like to do anything we possible can to support you. I had lunch with Pete and he has been working on George and he feels that there is a good chance. I think it was a very wise thing. How did that get out to the press?

K: I think Geroge must have told it to the press.

R: Pete thought it had been released by the State Department...

K: Absolutely not.

R: Do you think it was hurtful.

K: A number of Jewish people attacked me by having collected an anti-Semetic group but I sort of -- you know they are in a state of hysteria.

R: On that score I had a visit from this fellow Sherer who is the economic minister of the consulate here. His govt he said had instructed him to see me and the purpose of the visit was to say we are in the same boat but the Anti-Defamation League is pushing to make a statement about the Chase. He wanted to know if we had any suggestions. Implication is if we did not change our mind they would be forced to come out with a statement supporting the anti-Defamation League attacking us which they would hate to do. Within 15 minutes of the time that he left, the office of two Israeli news services telephoned to say they knew he had been there and did we have any word indicating that we had changed our position.

K: They are tough.

R: I think we will get more pressure there. What I did not get a chance to tell you the other day after my quick trip to Europe is that I had a very interesting conversation with a French Foreign Min. Chirac whom I had known before. I told him of my trip to the Middle East and mentioned the trip to Irag and it turns out that Khaddam Houssein is a close ~~friend~~ of his and comes to Paris ~~frequently~~ frequently and usualy has a meal with Chirac. Chirac felt that perhaps he could be helpful in pursuing things if you wanted to and would be happy to do so.

K: ~~Chirac~~ Who is this?

R: Chirac -- Khaddam Houssein.

K: In Iraq?

R: Yes.

K; That is an interesting idea.

R: I thought you s-ould know about this. If you remember from the memo I sent you, he made it clear that the key to open his door was an arrangement -- was pulling off the Iranians. I don't know that you did it but in any case they seem to be off and therefore I would have to assume that he would be very much more receptive then he was when I saw him to a further advance and it seems that Chirac could be an interesting intermediary and would be extremely flattered if you wanted to use him.

K: I must see him on one of my trips throu Paris.

R: I thought it worth putting the thought into your mind. Chirac I thought ~~was~~ seemed to think he was quite friendly.

K: I would like to ~~see~~ meet him anyway.

R: And you have not.

K: No.

R: I wanted to tell you and to see you before too long.

K: That would be nice.

R: I assure you you have many friends.

K: You have been marvelous.

R: Don't get discouraged even though I understand why you might be. I thought Reston's article was a well balanced one.

K: A little too optimistic.

H: Good. Well that's nice. Kosygin has asked to see me but of course I want to see Brezhnev.

K: Yes. Well, I've urged it on him.

H: That's wonderful.

K: Now what I would urge when you talk to them is to tell them the extraordinary importance of restraint on their part in these next months.

H: On what subjects?

K: You know, in the Middle East and elsewhere.

H: Yes. The Middle East I think I know all about and I'm also using their influence with Syria and the Palestinians.

K: And also the great importance in my view of concluding the SALT Agreement.

H: That would be a farce if that wasn't done.

K: That's right.

H: I thought also, unless you agree, you know they worked with us when I was involved in '68. The embassy helped alot when we got into trouble with the North Vietnamese that I hope they'd use their influence on the North Vietnamese to do things. One, to -- on retaliations and the other thing on quieting down on Cranston?

K: Yes.

H: Now the -- I don't know they have fight for 30 years whether they can cool off but they can create a lot of trouble in Thailand and elsewhere if they want to where as if they consolidated their position and Indochina why they've got a very tidy situation that they can influence it -- they can have an influence in the world. Don't you agree?

K: Oh yes. If it's achieved. And I think it will be achieved.

H: Yes. Well, there is nothing particularly.....

K: No, those are the major subjects.

H: Of course the Middle Eaast is the most.... By the way when are you going to Geneva? Have you made up your mind?

K: No, but within the next two months?

H: Well, that's what Brezhnev was keen about and I certainly can talk about the fact that we look forward to -- now they have responsibility as co-chairman they'll do what they did when we working on Laos.

K: We're in a real hot swig in foreign policy right now. I hope you give us some credit in your newspaper.

B: I'm not mentioning that. I don't want to bring that up. I wanted to worry about my -- I've got three guys in Saigon who concern me and worry me and the evacuation of whom is obviously important to me. They seem to doubt the implementability of the evacuation plans and I am worried about whether you are satisfied that --

K: Well, now what are you talking about -- Americans or Vietnamese?

B: I was talking about both. Now I'm talking exclusively about Americans. I mean, I would love to make arrangements and I know that there are plenty of efforts, and I'm sure you've been involved in them, to get the Vietnamese employees out. Now I'm worried about the Americans themselves. Do you feel that the evacuation plans are okay?

K: Look, the evacuation plan -- this you cannot use.

B: I'm not using it at all.

K: Our problem with evacuation is to do it in such a way that we don't trigger: one, total panic, and two, anti-American riots.

B: Yeah.

K: This might then prevent anybody from getting out. So I can't give you -- I think the evacuation plans are okay. And then between you and me, we've got an Ambassador there who is maybe losing his cool.

B: Well, I think he is. And I've known that Ambassador for 25 years.

K: And so we are going to watch that situation. I'm not so worried about getting the American s out unless the thing goes to pieces in a way that's going to be a total disaster.

B: Yeah.

K: What worries me is, you know, there are hundreds of thousands of South Vietnamese towards whom we must make at least a show of trying to save their lives. And those plans -- that's tough.

B: Yeah. But I talked to Don Oberdorfer this morning and he is a responsible, cool man --

K: Where is he?

B: He's in Saigon. He says that the current evacuation plans require 12-18 hours notice and no opposition.

K: Well, let me put it this way, whatever isn't in shape by tomorrow night will be in shape by then.

B: Okay.

K: I mean, we're going to reduce that readiness considerably.

B: You're going to reduce it 12-18 hours?

K: Well, I haven't got the exact figures here but I can assure you it's one of the things -- you know, unless the thing goes in 24 hours . .

B: In the next 24 hours?

K: Yeah. I think we'll -- by the weekend we'll have the evacuation plans in good order and we will be reducing people to a point so that it will become more manageable.

B: Okay.

K: And now, Ben, I have to rely on you --

B: Yeah.

K: Not to print any of this.

B: Yeah. Absolutely. Okay?

K: Okay.

B: Don was particularly worried about Graham Martin and saying that he's back in '68 and he would rather go down with the ship than anything else. You're aware of that?

K: I hadn't heard anything you said.

H: The question was put to me what would happen if the aid request came up and I said I doubt if they'd get as much as they were asking for, number one. I said, number two, I thought it greatly depended upon how movement there was between Israel and Egypt. That there wasn't any deterioration of support in the Congress, as yet, but that I thought the Congress was expecting that there would be some movement intterms of the bilateral relations between Israel and Egypt.

K: Look, you can be sure that no one is thinking of cutting off Israel...

H: We know that.

K: That isn't the issue. The issue is how we can get this thing from, you know, on top of all the agony we now had, if the Middle East blows sky high, you know this town won't be worth living in. And there's a good chance we could have a Middle East war by the end of this year if we don't get ahold of it.

H: Yes, I think that's a possibility. My own feeling, and I told you this, I think, once before, is that I think that there is such a thing as just a kind of a settling period, and time, of course you have to be used, but I think that some time is on your side in this thing.

K: Well we've got until about the end of July. You know, we don't need a decision in the next week or two.

K: But that would create a furor in Lima, wouldn't it?

R: It would I am almost sure.

K: I just ~~don't~~ don't see how I can be traveling around -- supposing Saigon collapses while I am out of the country? Is there something where I can leave on Wednesday and be back Sunday night?

R: I think -- no doubt we are going to have to at least drop one country to do that.

K: Then we will have to drop countries. Is that going to be a disaster?

R: I think the best thing is to drop both countries.

K: Well then can we drop both.

R: Yeah, we will prepare your schedule.

K: What do you think.

R: I think it will be tough but I think it is tolerable if you announce . . .

K: And I will come back later.

R: Yeah.

K: And then I can take a trip through the Andes sometime.

R: That's a fall back position.

K: Look. He claims -- I checked it after our talk -- that he together with his, with all the military people there, felt he couldn't do it.

S: That's just plain flat wrong. Any advice he's getting from Tyler and from Palmer is just to the contrary which is get moving. And he is in this position in which he wants to go out in a great wave of glory of helicopters to descend upon Phnom penh. That's just a hairy operation -- while he's got the fixed-wing aircraft he ought to be loading people on.

K: But Jim it is now dark. As I understand it by daylight they're going to be ready to move so... As I understand it there is no further disagreement.

S: If he wants to stay on he ought to load. Is he prepared to go out?

K: He's prepared to go out tomorrow.

S: Okay. His feeling is he can't get to Pochentong so we have to bring him the choppers.

K: That's his judgment.

S: Yes. But that was his judgment yesterday too. Pochentong was open all day. Okay.

S: He has been getting continued advise to the contrary but be that as it may. Now on Martain. Martin is doing a splendid job. He reduced the number of Americans by 570 yesterday. The way he did that was to fly out a few dependents and shift many of the so-called Americans to the role of aliens.

H: Dean's specific words to me were if you want to save lives, we'll do it with helicopters. If not -- it is dangerous -- we can't get to the airport. The airport is under fire. They lost another airplane there last night. They had a few people killed yesterday they're only 2 miles from the airport. Phil if you want to save lives, do it this way. I said John, you've got the hand on the throttle. You do it your way. Now he did get some airplanes in last night. Yesterday with supplies and gotthem out but it's not the same thing as assembling 100's of people, taking them to the airport across town, putting them on the airplanes and taking off. Dean believes this is the safest, cleanest way.

K: I'm backing you ... look the sob just wants to be able to say two things. That he was pushing evacuation if anything goes wrong it's our fault. I'm behind you.

Otherwise the Khmer Rouge --he'd have to come back with the Khmer Rouge. I -- that's indirect. That's what his man is saying. The door is open. The Cambodians know about it and I've told Dean to go ahead with Eaglepull. Not to hold up.

K: You know, if we had a sane Secretary of Defense I'd hold up on Eaglepull.

H: I think very frankly that we can't. It's too dangerous now. They're very very close in. K: What are we doing on this Prepcon? What are the issues?

Katz: The issues are that we are trying to maintain a link with energy and keep it an energy conference. We have agreed to include raw materials and some technology, if energy related issues are kept in the forefront. The Seven subordinate energy and want to talk exclusively about technology and raw materials. The Europeans have been out in the front and we are playing a lowkey role. We have been proposing some formulations to break the deadlock, but other than that the Europeans are in front. They are talking about a new international economic order, for instance, Venezuela says we have the strength and you must do what we want. The Japanese and Europeans might want to break it up.

K: What do you think is going to happen?

Katz: I think they are likely to find some kind of formulation. The Venezuelans have found something in Paris which removes the link; the link we proposed on energy-related materials. They have removed that, but have given energy a more prominent role. If not, they will adjourn and leave it to the French to reconvene.

K: O.K.

Katz: It is not an interesting proposition to us at this point. We could be doing the same things in the UN.

K: I am sorry to bother you. There are two things that I need to talk to you about and I was wondering if you could spare me ten minutes in the afternoon. We are going to do a story -- and one is the Newsday thing.

HAK: Is that going to be a big affair:

K: I am hoping not and that is one thing I would like to talk to you about and the other is Cambodia. Have you heard the latest report?

HAK: No.

K: The airport has fallen and the remains of the government is asking to negotiate a settlement -- it is in effect a surrender.

HAK: Well, it is almost impossible today for me becaus e I have to work on my speech.

K: Where are you speaking?

HAK: At ASNE tomorrow.

K: What is that?

HAK: The Society of Newspaper Editors.

K: Are you going to make a major address.

HAK: I hope so. I am working on it as if I were.

K: Can you slip me in for five minutes? Let me speak to you now for about five minutes. There is nothing that we can do at this point.

HAK: Nothing that I can think of.

K: Does it look to you as though Sihanouk will come back.

HAK: I wouldn't bet on that.

K: That would be a disaster if he doesn't.

HAK: That's right.

K: Where do we go? What if anything can we do? Are you active in any fashion?

HAK: We tried to get Sihanouk back last week. It is not easily explained.

K: What you are saying is there is nothing. Are you in touch with the Chinese are the Russians?

HAK: It is a great recommendation of Scotty's but what the hell could the Russians do?

K: I saw Scotty's ~~ex~~ piece, but what about the Chinese

HAK: What could they do? We have been in touch.

K: Have they been cooperative?

HAK: I don't think they could get him back. I think he may come back but he may be a figurehead.

K; On this other business -- we were going to do a story tonight from up at Capitol Hill and....

HAK: On the Newsday?

K: On Newsday. I think it will be delayed but do you think tomorrow will be any better?

HAK: Hopefully. Look, if I get a minute around 4:00...

~~Good~~,
K: Good, but if not, then tomorrow moening.

~~HKX~~:HAK: On this basis, there will be no letter that will not be considered this way. Look at the records -- what the hell are people talking about?

K: If it is any comfort, I have been talking this to ____ on Capitol Hill. He sees no movement in that direction.

HAK: I do'nt give a damn about the call for resignation. The call for resignation is separate from this charge that there was a secret agreement .

K: But that is what triggered it.

*

HAK: And that is what I think of as McCarthyism.

K: Ok. If you get a chance tomorrow I would like to talk to you about it.

HAK: Alright.

Chancellor Kreisky
Sec. Kissinger
11:45 a.m.
April 17, 1975

K: Hello, Mr. Chancellor.

BK: How are you?

K: All right. Sorry we couldn't meet on this visit.

BK: I am not to leave for some hours.

K: Fine. I appreciated your friendly reference to me in your speech yesterday.

BK: There were a lot of discussions in the Council. I said frankly what I believe. I believe in the step-by-step policy. I have had a lot of talks with some of my Arab friends from Egypt and other countries. I think you have to continue. They are very realistic.

K: I will continue but you know some of our friends in Israel don't make it easy.

BK: Yes. I know that. The International Sec. of the Israeli Labor Party is coming in tomorrow. He will come and talk with me.

K: They will proeuce in my judgment a complete disaster for themselves. Don't you think?

BK: Absolutely. But now the younger generation is irritated about all that and they are sending man (to see me). It is very curious. The day after he arrives Jalud (sp) will arrive. I would have been very happy if there had been an opportunity to see you.

K: I suggested that you might come to Washington.

BK: Yes, but it was already impossible.

K: I understand.

BK: I thought perhaps by accident you might be coming to NY.

K: There was no chance. I have to spend most of my waking hours testifying before the Congress. If there is a chance, I am thinking of meeting Gromyko sometime over the next 6 weeks -- maybe in Vienna and then maybe we might have a change, of course subject to approval of your government.

BK: Of course. What I want to say, is do you know the formula that has been presented to me by one of the more outstanding

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 29 JAN 2003 200102979

people in the Arab countries -- land released for peace should not be used for war. Have you heard that formula.

K: I had not heard that particular formula. Which means what?

BK: There should be an obligation -- someone said a possible formula for Egypt and the Israelis to discuss.

K: You mean the demilitarization of most of Sinai.

BK: Yes.

K: What do you think? That would mean the 67 borders.

BK: As a process. My view is that -- my idea is I don't like to be a mediator because I say a mediator has to represent power and arms. I think this man who is the Internatonal Sec. of the Labor Party will be very frank with me. I think they have a very bad conscience now as far as you are concerned. Some of the younger generation -- they have an extremely bad conscience. I will find out what they really think.

K: How could I find out what you find out?

BK: I can phone you.

K: Would you do that?

BK: Yes. If you give me some direct line, I can inform you.

K: Call me at 632-9630.

BK: There are other things I would prefer to tell you next. There is a lot of effort now. Most on the Israeli side to find new possibilities to contact the Arabs.

K: One thing you should get across to the Israelis is what they did in March at the end of my mission is not a minor matter and has forced us into a consideration of ~~xx~~ overall solutions which we would have preferred to defer.

BK: Yes, yes. I think they are now understanding that. They did not immediately. Now they are ~~xx~~ more aware of that than before.

K: Because we cannot possibly -- you understand this. We cannot possible finance a stalmate without taking a position.

BK: Of course.

K: It is diplomatically -- from a domestic point of view we could not justify it.

BK: What do you think about this change in the government of Hegazi.

K: I don't think it will effect the foreign policy very much at all.

BK: Hegazi is not a friend of Sadat's.

K: I am more interested in the fact that the Commander of the Air Force was made Vice Preisdent.

BK: The Min. of interior (unaudible).

K: In my mine there is no question that Sadat genuinely wants peace.

BK: He is highly interested in continuation. Because I invited these people from Israel only because I know that Egypt would be friendly to them and (unaudible).

K: Of course there are some people in Israel among whom you are nearly as unpopular as I am.

BK: The problem is it is a terribly weak government. Very curious -- you see when I was in North Africa there is only one man who has a certain popularity -- in a negative sense -- Dayan.

K: True. The same with Sadat. They all think they can deal with Dayan.

BK: Only a top young man can be tough.

K: I don't think it is so silly. Unfortunately right now he is not in so strong a position in Israel.

BK: Israel could change from one day to another. I think they are working hard to get Dayan to replace Rabin. I will know more tomorrow and if there is anything interesting.

K: If you call me you will probably call me on Saturday. On Sunday call me through the White House.

BK: I will wait until Monday because I will have a long talk with Jalund. I will do it on Monday.

K: Good. I look forward to seeing you soon.

BK: Good-bye.

K: What would you think if we went to Italy?

S: We will solve a lot of problems.

K: If we saw the Pope and the Italian Government and said it was because of the President's concern for the southern flank of NATO.

S: If he goes to Spain the Italian thing would fit very well. The German thing would really cause some problems with the Italian Government and the Spanish.

K: If he came back from Spain to Germany?

S: The problem is the with the Spain thing, Sunday is a good day to be there. Otherwise he would have to go back to Germany. If he went to Germany first he would be arriving in Spain on Sunday.

K: Right.

S: If he went to Berlin first....

K: That would be hysterical. If he goes to Germany.....

S: Right.

K: Then I go to Berlin.

S: Yes and with those other meetings.....

K: Right.

S: In the case of the Italians, he would have to go after the weekend. He can't go to see the Pope on Sunday.

K: He could go to Italy on Monday and spend.....

S: And see the Pope.

K: Right. (Shalam) is a problem too.

S: Whenever that is decided.....

K: It is decided. I had to cancel my Latin American trip. I just don't think I can go now.

S: It makes good sense to stay. However, I don't know what you can do on VietNam, but things could move.....

K: The whole thing could collapse.

S: Have you talked to our other friends?

K: We got a message off yesterday. It was being conveyed to Hanoi that we wouldn't take any pre-emptive action. We got rid of Theiu.

S: I can't figure out how it happened.

K: Martin called on him and was to prepare him for the possibility of resigning. I never told him that we wanted him to resign right away. Martin didn't tell him that we wanted him to stay as long as possible. Did you hear that Martin said he didn't receive full instructions?

S: I don't think we can get any Vietnamese out now.....

K: Theiu was our card to get the Vietnamese out.

S: I think you can get a few hundred out maybe.

K: We will be lucky if we can get the Americans out.

S: Their negotiations will have that as a pre-condition.

K: Have what as a pre-condition?

S: That we won't abscond with thousands of Vietnamese. Any negotiator that is acceptable to the Vietcong wouldn't permit the Vietnamese to leave in large numbers.

K: I agree.

S: I will have an itinerary for you tomorrow.

K: O.K. Let's talk about it tomorrow.

TK: Henry, how are you?

K: O.K. I am fine. Not lacking in actions right now. A real hot strike too. I called you last night to give you a little advance warning of what might be happening and to tell you I have asked Dean Brown here to keep in close touch wit you on the Refugee evacuation problem and before he does any other consulting on the Hill to talk to you first to get your advice if you are willing to do that.

TK: Fine.

K: Our problem is to prevent panic at the other end and we have an Ambassador there who might like to go out like Chinese Gordon but I cannot say that publicly. I have to keep supporting him.

TK: I will be more than delighted. We have been following with Habib on the general movement of people.

K: I need help on Congressional authority on parol authority.

TK: Right. I was terribly hopeful that we might be able to see what kind of initiatives could be taken to try and see if we can get protections of the population there.

K: That is strictly for you -- that is what we are working on now. We have some other countries involved. We have to weigh this again -- the fact of panic starting spontaneously.

TK: I think it very important that as much restraint as possible is made in talking about a blood bath. I am sure there are going to be some tough situations but I think the more it is talked about the more therer might be. Obviously you have to gear up because of the possibility but as much restraint as possible should be used in talking against blood bath. I am hopeful they can do something. I just called Waldheim last week and also Jackson who is heading up the UN on the refugees and Waldheim has a personal plea to get help.

K: I thought, when you said Jackson, you meant my expert on immigration.

TK: Oh, no.

K: Get another amendment passed.

TK: I do hope that something -- there is a tremendous -- as you can gather --- concern of the massive movement.

K: Almost no possiblity of massive movement unless there is cooperation by the other side. We really owe it to 15 years of effort to get some of the key people out.

TK: I think that is right.

K: And if we can get controlled conditions maybe more. If we can get controlled conditions that will be very ~~xxxxxx~~ obvious and there will be time for consultation. We are not going in with a division or two and pull them out.

TK: Is ~~thexexaz~~ there talk about that being declared a free city.

K: We are now waiting some possible moves and we are in touch. How it is to be done, we have not begun to work out. We have not got the principle established yet. That is what we are trying to do.

TK: Is this real significant with Thieu going out.

K: I think it will lead to a negotiation.

TK: Not just window dressing.

K: I don't think so. Incidentally, this is strictly a private conversation.

TK: I understand. O.K. Thanks very much.

S: Of course.

K: We have been in touch with the Soviets about an orderly transfer and ceasefire. This was before Thieu had resigned. [redacted] resigned 48 hours before we wanted him to. One of the Soviet's replies was they were interceding in Hanoi and we should not do anything precipitous. We thought it would strengthen their case in Hanoi if we went forward with that move that Brown had mentioned . . . B6

S: Okay, but as a signal I am not . . . . It's obvious that we have considerable power but we are restricted in employing it. There are other reasons for moving that battalion up to . . . .

K: As long as it was going to be moved . . . . We don't have to say anything. We should just move it and say nothing.

S: I think that division at Okinawa deserves some re-enforcement at this time. Aside from any signaling . . . . As a signal is what I am concerned about in Southeast Asia. We have signaled many times before and given the circumstances we have not been able to do anything when our bluff is called.

K: In the case of the Tonkin Gulf I think we all agreed it would not be done.

HAK: But that would be a big story.

K: It would have. I haven't heard it anywhere else. I don't know if they got it confused. But the key element is clear if you don't want me to lose the lunch you better stay in office.

HAK: They've got [redacted] to realize -- there is a distinct groundswell going up. [redacted] They have to see if they can -- how they can get me from hero to a villian in twelve months.

K: You just have to bring off the Middle East and you will be back in their good graces.

HAK: I wish we could do some thing with a minimum of dignity. Everyone is [redacted] covering their ass right now. Our problem is we want to get Americansout in a way that won't spark a panic. We've got it down to the 1500 range.

K: Do you plan to get them all out? I know up on the Hill you made a very passionate plea -- calling it x unreasonable that we are keeping them there as hostages.

HAK: It depends on what you're trying to achieve. The discussion is to get them out before they are jeopardized and that we are trying to do. We;re also trying to save some South Vietnamese. You can't just leave everybody there.

K: When you talked about South Vietnam -- at one point you were talking about 200, 000 people.

HAK: That is the minimum list of those that we g can put together. I doubt if we can get that number.

K: Do you have a realistic count. Can you give me some idea of a time frame. How much time do you think we have?

HAK: That depends on the efforts the North Vietnamese are willing to make.

HAK: How about [redacted]? Koppel recommends him. B6

K: It wouldn't be the first name that would come to mind.

HAK: Do you know him?

K: Not in the same way I know [redacted] I don't think he is in the same class as the others. He is very bright maybe too much so, and up with the current times. B6

HAK: To defend my views in the next year will be a nightmare.

K: I am thinking of people who are solid, mature and fixed in their views on foreign policy that go back to WWII. Someone like [redacted] strikes me as a solid person. B6

HAK: I will turn to this problem later. I was waiting to see whether I could here from you in the next few days.

K: These are good men and I would put them high up. I talked to him and he said to me something almost like what you are saying, does he know me, and could we deal with oneanother. The most important thing is for you to understand and sympathize with his ideas I said. He also asked whether you had ever considered him and would you talk to him before you made any decision. My judgment is that he is first class.

HAK: What he needs is confidence in American foreign policy. We must rebuild confidence in ourselves.

K: It is going to be as you say; a tough job. I must say there will be more difficulty with Israel and the Middle East than elsewhere.

HAK: With I, Henry Kissinger, or with the United States?

K: The U.S. and President Ford. Some of the things he said on Monday have raised hackles all over the country. I have had 10 calls today on this.

HAK: Do they think I put him up to that?

K: No. It was posed in terms of a general war. If the President can say on television that the Prime Minister of Israeli might not be welcome here then they are worried.

HAK: There is a real problem. All these stories that I was saying one thing for publication and saying another privately miss two essential points. I was trying to make a deal which you understood, but which the immediate merits of the negotiation did not bear out, and the long term consequences is what we were driving at.

K: There are difficulties.

HAK: I am worried about what will happen through the logic of events. What decisions does an American president make when given problems we are faced with.

K: Part of your problem is that you must get someone to Israel that can talk to the Israelis. [redacted] B6

HAK: He is getting better.

K: I like him but he isn't the guy.

HAK: The Jewish community has to understand that their methods are not good. The Israelis must understand that this is a complex problem. Israel's margin of error is small, so small that they can't take chances.

K: Right. I am going to see a number of Israelis tonight.

HAK: Again, Marvin, it doesn't help them to fortify their self-righteousness. They need to understand that they must face the trends in this country.

K: Do you see any evidence of errosion within the Congress?

HAK: Yes. No question an almost total errosion when you come to military action. On the money, it is really the least of Israel's problems.

K: Well.....

HAK: If I conceived a Middle East war without American presence, then I see a disaster for Israel. I don't see the Congressional base for that, do you?

K: No I really don't. South Korea will be a problem, and then Israel.

HAK: That is right.

K: If there is anything I can do let me know.

HAK: (Laughter). Thanks, Marvin. You have been a good friend.

K: I have just gotten one of Martin's backchannels to me. He wants to slow down the evacuation because it is such a mess in Guam.

B: He can't do that. Even if Clark and Guam are overwhelmed. We have 12,000 at Clark and more at Guam.

K: Don't put these figures out.

B: I haven't. There are thousands more on the way.

K: I thought he was bluffing me. That means we have gotten 25,000 or more out.

B: Right. Say, Martin hasn't answered the telegram we sent asking for his feelings and what the high risk options are, etc., yet. It is near panic at the airport and they have no control over the situation, especially the issuing of certificates. What appears to be happening is that Americans are walking down to the planes with their Vietnamese friends and saying get on. 15 to 20% of the people have no papers and there is no proof that they are high risk at all.

K: What can we do?

B: Nothing. Martin can't control the situation, because he can't be at the airport.

K: Can't anyone?

B: There are people who are trying to at the airport, but it is difficult. Everybody is taking care of friends, maybe they are sorting them some how. But it is close to chaos. There is also a difficulty with California. I talked to Jerry a couple of days ago.

K: Is he against it?

B: No, but the Federal Government hasn't done anything for California and with their high unemployment etc., he is saying it will be difficult. His impression is that we want to dump Vietnamese on them. It is a political problem. I have Weinburger set to call him today and talk to him. we can let volunteer agencies move them on. I have talked to the airlines and asked them if we can have free passages on planes because there is no money within the U.S. to move them.

K: Yes. It is a nightmare.

B: It is not going to come out very nicely. One of the things I wanted to say in the WSAG is how many people do we want to get out?

K: How many do you think?

B: 5 to 10 thousand more. If we could move them from Saigon to _____, we could alleviate a lot of pressure.

K: Let me think about it.

B: O.K. Also think about Hawaii or the possibility of moving them now directly to the States. We will talk about it.

K: O.K.

B: Defense has got to cooperate. Weinburger is calling Schlesinger and telling him to give the Army a good name for once by letting them take an active part in the refugee movement. They are bucking us again. We need to let people use military basis as the next staging area to let the volunteer agencies have time to pick them up. It should work just like the Hungary thing.

K: In looking over the briefing today, Anderson can get into more trouble then anyone I know. He ___ that Martin may have delivered an ultimatum from the Viet Cong that Thieu had 48 hours to resign. That isn't(done). That's just absolutely ___.

M: I see that Martin has made something ____. I'm now getting the transcrip. He should : have hit it harder.

K: He didn't hit it at all. He got about 4 questions . It started out as a report than he gave him an ultimatum from Viet Cong. It says, it is a rather unusual role for an American Ambassador to deliver an ultimatum from an adversary. Anderson said, I am not confirming or denying he has delivered any ultimatum.

M: I have it in front of me now.

K: And then it goes on and on and on.

M: I remember he raised that question with me.

K: He raised the question of diplomatic initiatives. He didn't raise the question of an ultimatum. He said he left the impression that something is going on.

M: There's something in Newsweek about Martin passing a message to Thieu.

K: I didn't focus on the fact there was a message from the Viet Cong.

M: Neither did I.

K: If he had said it was a message from the Viet Cong, I would have told him to deny it.

M: I'll remonstrate it with him.

K: Can we straightened it out?

M: Yes.

K: Have we heard from the Egyptians about approaching the Austrians tomorrow?

S: We have a cable which I just received but I haven't read it yet. encourage an approach to Austrian Government April 30 but because of problems with his Ambassador in Vienna will do so in Cairo. He also agrees to simultaneous announcement May 2. We will use our draft text exclusive of language about Middle East situation. Just plug the strings about the and expects it will invoke critical Arab and Soviet reactions. He wondered why we want to make the announcement so soon. We must be more than a _____ There must not be another Nixon-Sadat type communique which aroused such great expectations and brought few results. The Ministerial(?) will be more useful to the USG than to Egypt. For Egypt concrete results are needed if Sadat's image at home and the Middle East area is not to suffer. If arms and interim agreement out we use economic help is the only potential significant elements that express concern that under Secretary's upcoming visit is only fact-finding and consultative.

K: Well, what the hell. Do we have to announce it this early.

S: I wouldn't think so from our point of view unless you have some

S: No, he raised it. He raised it because he was talking about the Ballet coming at the end of May and he said oh my God that will interfere because on the 20th and 21st we've all got to be you know where. Are those the dates you have in mind? I wasn't sure whether it was the 19th and 20th or 20th and 21st.

K: Hello.

F: Hello Mr. Secretary. Ken Fried here. I just -- just as I was coming over to pick up the phone we moved a bulletin saying that President Minh has announced an unconditional surrender to the VC.

K: Is it true?

F: Well, it's from Saigon where we've still got our reporters. "We are here to hand over to you the power in order to avoid bloodshed." That's a direct quote Minh said in a radio speech addressing himself to the VC ordered the Saigon Army to stop firing and remain in place. Is that the way it was supposed to go?

K: Well, you know we didn't have that clear. No, that was not my expectation. Well, by Monday that's the way it was supposed to go. Yes.

F: By next Monday.

K: Yes. No, by this. No we didn't have that detailed of a scenario. By Monday. This is all background. By Sunday night Monday morning it was clear to me that this is the way the Communists were forcing it to go.

F: So there was no understanding but you expected it.

K: No, no. I expected late last week that there would be some form of negotiations.

F: As was indicated. So this does catch you a little bit by surprise.

K: No. Sunday night -- not because of an understanding -- but simply because of the way things were developing.

F: Okay. What I wanted to talk to you about mostly was more future stuff. As I say this thing just moved on the wire five minutes ago. I was interested in what I thought was kind of an ambivalent approach you took to dealing with DeBerry's question. I think the first question here in the news conference. I had assumed we would come out with some kind of strong statement about trying to redevelop American strength of policy in the area and I wondered if I could some kind of focus on what you expect.

K: No, we expect to do that but I just didn't think this was the occasion for a great policy procouncement. You mean for Asia?

F: Yes.

K: No, we will develop a strong policy.

F: Is this going to begin immediately at countries like Thailand and the philippines.....

K: Thailand I think is in a special situation but the Philippines and certainly Indonesia.

F: How about China? What kind of role are they going to play?

K: We'll maintain our relationship.

F: I dont hear much enthusiasm there.

K: No, I think we have to develop. What the press generally does with China is to assume that something spectatcular has to go on at any one minute.

F: That makes for headlines

K: I know, but if you analyze the problem simply from maintaining the existing relationships we are getting the leverage we want.

F: When do you say your're going to try to develop this strong policy in Avia on this. Without any apparent agreement by Congress to maintain any military presence in the area of any major part, how will this work. How will it develop?

K: I beg your pardon?

F: Well, I get the/Congress is still _____ when talking to some of these people about any kind of major American presence for a lack of a better word in South Asia and Asia generally. And ....

K: I've been up till 3:30 in the morning why don't we discuss that some other time.

F: Okay. I've been up too. So we're both tired. Okay. I dont want to keep you up in longer and I know you've got more important things to do.

H: Hello, Mr. Secretary. My feeling is -- I was just talking to Defense -- that the later you can issue a statement, the better, rather than issuing it before the evacuation starts or even at the beginning of it. Official confirmation it's going on will get a different kind of play out there than the kind of rumors and news reports that are now being used. It seems to me -- the news reports are already carrying it's going to take place. All that we need now is this kind of a statement say about toward the end of the actual lift. There are about 3,000 Vietnamese out at that airport right now.

K: Yeah.

H: And there could be a mad scramble for additonal ones to get on. Who knows what's going to happen out there. And I think it would be better to hold off on this sort of thing until you are a little way into the operation.

K: And I would say "tactical aircraft."

H: Well, that's another one we cut out of it deliberately because if we put that in, then you've just given away what's overhead. They might even know what's overhead if we don't tell them.

TK: Oh Henry, how are you?

K: Ted, how are you? I just wanted to tell you what's going on -- we are evacuating all Americans from Saigon. There was shelling during the night their time at Tan Son Nhut -- which was end of the afternoon yesterday here in Tan Son Nhut airport --we tried to operate out of Tan Son Nhut and we have about 8,000 high-risk Vietnamese there, but panic developed on the field and all the runways were closed, see we moved as many people as we could to the DAO compound and into the embassy and we have been operating out of there during our night, their ~~dyx~~ day. Now they are still operating--it is dark there now --we have evacuated about 45,000 people up to now, there has been no opposition. And we expect to continue this evacuation for the next two hours; after that there will be no Americans that we know of left in Saigon. That will end the Vietnamese evacuation, also, except for whoever gets out by boat.

TK: Yeh.

K: So, that is the end of that chapter.

TK" What was the problem with Minh--they couldn't--did it just take too long to get the--or did they just refuse to negotiate with him.

K: Well, we thought we had something set with the Russians that included a political process, but apparently, the North Vietnamese were prepared to only let us evacuate without interference and they just wanted him in a position of total impotence. Now I suppose now they will start negotiating with him and I think there will be a sort of a government setup--a tripartite government which they will control.

TK: What is your reading, Henry, of have we had any kind of flexibility in terms of the resources to try and bring the monies that have been appropriated--can any of those funds be used to in terms of the coalition government or -- security people and that sort of thing.

K: Well, I have the impression, I saw a breakdown of it, and I had the impression that something near $100 million might be available. And we could continue in Cambodia, but right now in Cambodia they seem to be engaging in mass executions--they don't respond to any approaches.

TK: Is that right.

K: You know, the UN and the ICIC have approached them and we informally told the UN that we would be sympathic, but they are even kicking out the French. In Cambodia, it is pretty bloody right now.

TK: Is it?

K: Yeh. But in principle we are open-minded on that subject. And then for your information, we established contact with the PRG in Paris so they know how to talk to us.

TK: Yeh.

K: We just thought it was too dangerous to keep some American sitting in Saigon in a situation that for a while noboby might control.

TK: Yeh, yeh. I think you are absolutely right.

K: We then might turn out to be hostages. If we do give relief, it w should be a free act.

TK: Yeh, that's right. Okay, well I appreciate it. Very much. I was disturbed by that story about the relationship of the UN over the weekend. It was in the toast.

K: I had lunch with Waldheim--on Friday and we have been in touch with Sir Robert Jackson and I don't think there is any problem in principle with the UN. I'll look at the story, I don't know ~~whether it is correct~~ what exactly it said.

TK: I had just called last week about Ambassador Brown--getting them out by.....

K: And I told Brown to be in touch with you before he did anything on this subject.

TK : We had--the day Habib came up -- but it was on the committee but they indicated Executive Privilege on it and it was a thing that was unfortunate is I didn't know until that morning that they had all the interviews with the--the day before, and I talked to him subsequently and he--and I think we got it in line now. He has met with the voluntary agencies--

K: He met with them on Saturday.

S: You asked me my judgment on whether you should go on the TV program. My judgment is that you should. This is as a friend and not as NCB. Obviously, we would like to have you all to ourselves. If they are doing a program about you and [redacted] you do not appear they will say we asked him to come on and he refused. You are a good spokesman. You will have an opportunity to see what is on the program beforehand. This will give you a chance to put things into perspective. One sugestion -- one thing you should say among the things that you will say and coming from you it will add a note of reality.

K: All criticism is anti-semitism.

S: After this you might decide not to be Jewish. When you were superman the buildup was too great. You are the same guy as then. You have said you cannot forever walk the tight rope. All you did then and all you did now is the very best job that you can do. Some things work out well and some times they don't. You get the feeling that the incredible praise for you then was inaccurate then, as perhaps it is inaccurate now about your failures. You get over to people you know a very clear notion of your very own self-appraisal. That is why it is inaccurate. The image is that of a guy who rode very high. Who is very temperamental and cannot brook criticism. That is not the guy that I have seen. If you can be a little philosophical -- you always knew when you were riding high ...

K: Which happens to be true.

S: I know. It would be healthy for those [redacted] commenting on public affairs to be saying you were a tremendous superman and then six months later you are not. Neither is accurate. The only thing you can do is to do the best job you can. Say, I have worked as hard as I can. I will continue to do so. Some mention of what you have tuilt in the Department. Some of the young people. It tends to take it away from a little one man show criticism.

K: Which is also untrue. That I said on the Barbara Walters show.

S: I heard you say that. I think there is no harm in doing that.

K: I will see you this Thursday.

S: I guess some got it and some didn't as to what the President calls his economic policy group so I got it to the rest of them this morning.

K: But I do object, Bill, to this idea that the economic policy board as a body goes over my speeches. You know I don't mind them going over it individually.

S: That's what they are doing. I just gave it out to them and they're going to get their individual -- really it only the people who are involved I think are Dunlop and Greenspan, Simon and Lynn. That's all that's involved.

K: Well, Agriculture but we've cleared with them. But physically the only section that could be even remotely controversial is raw materials. [redacted]

S: I that that would be the the one -- the energy one I understand you -- has been cleared with Zarb so....

S: Yes.

K: We are trying to get debate away from a real evaluation of American foreign policy. What the hell are we trying in abstract to do concretely? So I'm giving a speech tonight and saying glory and this is what we have to do in the political field. And I'm giving a speech tomorrow in Kansas City in which I just wanted to give the outlines of the economic field.

S: Let me tell you. I think its a very good speech.

K: I don't even think its a very good speech.

S: I think considering the constraints let me put it that way. But all we are doing right now is.....

K: That's okay. You don't have any objection to the substance yourself?

S: No. The substance is good. The only problem I have with it is you know we have this overall economic review and some of these questions were sort of still being debated. Now if these -- which I don't think he's come down on anything.... That settles the debate.

K: It doesn't really settle the debate. The only advance we are making in raw materials is that we're saying we're willing to talk about it.

S: I read it that way if everybody else does why we'll be set.

K: Look, we're going to have to do one hell of alot more than that before the year is up.

S: Yes. That's where the great debate will be I agree with that.

K: That I don't intend to settle with that speech but it's absolutely irrational for us to say oil prices must not be high but everything else must be low.

S: I suppose as customers that we'd like to keep everything low that we can though we realize there are other complications.

K: You know the best way to do that is to get it into a debate in which we control the forum. We don't have to settle that in the speech.

S: That's the point and as long as ... As soon as I have the comments in from these four people I will get them to you.

K: If you're just clearing it that's what I want you to do.

S: We are right now clearing it.

K: Terrific. You know we've been trying to reach you and you were out of town.

S: No, I've been talking to people. I understand. I got the speech last night and went over it last night.

S: Yeah, as far as I'm concerned, that's dead. There's no point to it. See, we've done the telephone calls.

K: Yeah, but the one to Whitehouse, I would add that fact to it because it will reassure the Thais.

S: To the Thai one.

K: That is right. Why not a circular -- where are you?

S: I'm at home right now. I just walked in the house.

K: Well, why not a circular message to the posts to bring them up to date.

S: All right. That's fine. We can do that. As far as the Thais are concerned, they're not so interested in whether we got the boat and the Americans, they're interested in making sure the Marines don't go back to --

K: That we can also tell them. But the major thing the Thais want to know is that it worked.

I was going to recommend to you that you take the offensive and take the initiative because the one kind of criticism we would face here is if you guys had waited another hour or two, you know, and all that sort of thing. That's what we will hear here so I was going to recommend to you get out and get our side of the story that these guys have had three days to respond. But

S: UP.

K: AP. Freeport. Well, we both know it is baloney.

S: Henry, looks the Thais are jumping all around and this fella Masters out there is heading a panic. Now, my judgment is it would be desirable for us to ~~xxxxx~~ show that in a moment of crisis - you know we don't care that much what all the nonsense is from the host government. I am not sure that won't have some therapeutic affect in Portugal, the X Azores, and so on. I am not sure that we ought to hop around to make them happy again. We ought to

For one thing he refused to announce that downed chopper out there. Now just because he didn't want to be associated with these combat(?) activities. Now that is an aberation for an Ambassador. It may have been justified in these circumstances, but his telegrams that I have seen are kind of on the panicky side. He seems to think that Thai/U.S. relations doesn't need(?) consideration. Anyway,

K: Jim, I am - personally have to run to a luncheon I am giving for the Shah.

S: Right.

And those God damn press people - it was the first time I felt my gorge rising. Now they really were frustrated that the United States was being humiliated.

K: Oh, yes they wanted us to leave (lose?).

S: And all these questions about the Marines being pinned down on the beach. Just dreadful. There was a pin down you know, but that was this crash crew. They were isolated at another part of the Island. We got them out too. But that was the only pin down.

D: 2:30.

K: There's no hurry about it?

D: No, except the Prime Minister is making a speech at 7:30 this evening Israel time.

K: Is that speech relevant to your answer.

D: What I understand he's going to say is the Egyptian counterproposal did not meet -- it's not acceptable to us. That is the gist of the answer... It's more along the lines you suggested to us.

K: Is it really necessary to turn it into a test of manhood.

D: I'm just reporting to you what he said.

D: I'll talk right now to the Prime Minister and we'll aim it for 2:30.

Kraft: I didn't mean to say anything nasty. I am delighted that you read it. I was calling with a suggestion which may be inappropriate but I think it would be helpful to put forward. I think you have the step-by-step back together again. I think that Rabin and Sadat have to remain prominent this time. The only part that couldn't be done again is the shuttle. You should get another mediator so that those two are heightened rather than overshadowed. I was going to say that it might be useful for you to nominate someone now.

K: The reason is that...?

Kraft: The reasons are because it will take some time, and secondly because I think you need someone who will push them forward and not overshadow them. There are alot of different reasons. It ought to be somebody who can afford to fail.

K: It is not an inappropriate suggestion. I am going to try moving... The way we have to proceed is to rely less on obvious negotiations and the decision cannot be made until we can see how close we can get them and at that point I can decide what to do.

Kraft: With respect to the leaks it would be good for you to have somebody you can trust. That was all I meant to say.

S: Hi, Henry

K: Hi, Bill.

S: Henry, a couple of things. A fellow who is a friend of one of my senior people over here, Steven _____, has ~~been~~ told us the following. He has been in touch with the Chief of Staff of Equador Government--if that is what they are called. Equador would like a senior official in the United States Government, outside the State Department to discuss supposedly this government .... they want to pull out of OPEC, they want to make sure they are able to sell their oil, if they did pull out of OPEC and they would like to discuss a potential deal with the United States and then pull out of OPEC. He also mentioned in passing that he thuught that Venezuela might want to do the same thing.

K: I don't believe it--

S: I don't believe that either. I just mentioned that --

K: From whom did you get this--

S: This came from a fellow whose name I don't remember--Roberto somebody of Cuban national who is a businessman in this country, now and--

K: It could be trap

S: Sure , it could be. We can either A, forget it B we could say, all right and not involve you and you say, all right, Simon you go talk to em and let's see what kind of a story he tells us.

K: But I don't think you should see him either. I think -- I don't think it should be at the Cabinet level, now who is it that they want to send--

S: They want to send the Chief of Staff--General sombody in Equador

K: Let me talk to Bill Rogers about it, he's a good man and see what he thinks--he knows these people

S: Okay, I will do nothing until hear from you--this is similar to the last request we got where people say we don't want to talk to State

because what we've got to do is lay the groundwork for this--

K: When was the last request, I don't remember that.

S: Oh it was another country, but I've forgotten which one right now. But I passed it along to you--actually I sent you a memo on that, but I decided not to memo this one.

K: Okay, well let me check with --

S: Next thing did you do anything on the Schmidt thing while you were over there--

K: I mentioned it to him, but it was sort of at the tailend of a conversation, but I can take it up again, in fact what I wanted to do was to discuss it--mention it to Genscher or to Sheel when he comes here and let them talk to Schmidt or I'll call Schmidt.

S: You just use your own good judgment on this

K: No, I think it's a good idea--I think in fact it's necessary.

S: I did too, I thought it was an outstanding Idea.

E: Well, I think that given the fact that there is an Executive Order saying that Simon does both these and the way he conducts those meetings and the way they are stacked against us, I don't think we want to make that a basis for doing business.

K: No, but I think we should be there then we can't complain.

SF 184

RELEASED IN FULL

K: Hello, how are you Mr. Anderson?

A: Fine. You have been very busy and it is wonderful that you have a moment. I have some documents that tell of a conversation that you had with Jobert -- my pronunciation is bad.

K: With who?

A: The French Foreign Minister.

K: Jobert.

A: Jobert.

K: Yeah.

A: This -- well, I will read you portions of it. The meeting began with Kissinger briefing Jobert on the Middle East trip he had just completed. This goes back to -- this meeting occurred on December 19, 1973.

K: Yeah.

A: Jobert then raised the oil problem and made two points. First, Jobert could not understand the American Government's attitude toward the Shah of Iran. It was clear, he said, that the Shah was going to push for another major oil price increase by exploiting the current embargo, induce shortage and yet the United States acted as if it considered the Shah to be a friendly country with a same interest. Jobert told Kissinger to be careful, calling attention to the $22 - $23 a barrel auction prices that the American independent oil companies have recently paid. Jobert warned the Secretary of State that these artificial prices would be used as a pretext to justify higher overall OPEC prices. Second, Jobert told Kissinger that the French Government agreed with the US Government about the need for oil consumer cooperation. Such cooperation, he said, should be kept within the OECD framework, that is creating a new multilateral framework for oil would not bring additional leverage but it would only appear confrontational to the producers. Kissinger however seemed to -- Kissinger however underestimated the economics and overestimated the Middle East political problem in the terms of time sensitivity according to Jobert. Oil prices were more immediately vital to the French. So they were more central(?) oriented than conflict oriented. Does this conversation sound accurate? This is a Government paper.

K: I just -- you know, I just can't remember that. I would have to check my records. And, you know, I would caution against drawing too sweeping conclusions from it because Jobert was not particularly our friend. And

he was working to undermine us all over the Middle East at that time. Uh, I am talking to you off the record incidentally.

A: Sure. Well, the paper goes on to suggest -- and this is why it struck me as completely different than anything that I had heard before -- it goes on to say that the French wanted to hold the line against the oil prices. Their subsequent action was a reaction to our failure to do so.

K: That's total nonsense. We have been resisting the oil prices -- the oil price increased consistently and the French refuse to cooperate with us in the International Energy Agency and made a whole series of separate deals.

A: Well, there is even a charge here that they offered to join us in military intervention.

K: Oh, that is totally -- that is totally -- that, I know, is total nonsense.

A: I will read it exactly the way it said: they raised the issue of joint US military action -- just raised the issue -- references to this French proposal were made at the Embassy level and were reflected in the cable traffic. I don't have the cable traffic -- what I have is a summary of it that comes from the State Department or from people in the State Department.

K: Well, look, Mr. Anderson, it is a very, very complicated issue.

A: I am sure that it is and . . .

K: I have read some of your columns on the Shah and it's -- it depends on a lot of assumptions, like you crack the oil cartel by means of the Shah or whether you keep the Shah off the oil cartel as much as you can for other reasons. Uh, and these are complicated questions of judgment but this conversation, even if possibly would turn out to be true, which I can't confirm -- I'll have to look to see whether I can find a copy of this memo or an equivalent of it. Because you know, some of it sounds plausible to me.

A: This call is because I wanted you to know exactly what I've got. This information was made available to the Senate Foreign Relations Committee and my sources are over there.

K: But by whom?

A: Uh . . .

K: Basically the French position -- I mean, if the French offered consumer cooperation there was always some sort of a gimmick to it.

A: I see.

K: So I would have to know what exactly they offered because I am sure I will be able to explain to you that it had no practical significance because whenever we try to tie them down to something specific they absolutely refuse. And at a time when we were facing an embargo for us to take on the Shah who was our only supplier of oil in that area was not the most intelligent thing to do.

A: Senator Church has contended privately according to the sources -- this isn't in the papers but I talked to the people up there -- he has contended that it has been a one-way street with the Shah, that we have done -- we have gone along with the price increases and we are paying these exhorbetent prices and he doesn't do anything for us. We give him arms, we give him . . .

K: Yeah, but why would we do that now, Mr. Anderson, I mean . . .

A: Because of the geopolitics, I would think.

K: Well the geopolitics are not irrelevant and it's not irrelevant to have one country that won't join an embargo and that might be available in case of a Middle East conflict but that is not the only consideration. I will be glad sometime to explain our oil strategy to you and I think at least you will understand what we are trying to do. You can disagree with it after I have done that.

A: I would like to do that.

K: But it is not -- you know, this town is sick right now. There are a lot of people in the whole mosaic and I speak to you frankly because I know you are a decent man who uses whatever information he gets as fairly as you know how or you wouldn't be calling me.

A: I try. And I . . .

K: No, no, ...

A: And if I am wrong it is not because I didn't try.

K: No, no, I know that. But you know -- a lot of people -- it is easy in a mosaic way -- where you have hundreds of conversations in a six month period. To pick out one and give it a little twist and hoist it on even a serious newspapwr man who may not know all the details of what was going on.

A: Uh . . .

K: You look at December 1973, you didn't have a single disengagement agreement

yet there was a high possibility that the Middle East war would blow up again. We were under an embargo from all of the OPEC countries -- ah, the Arab countries, we had the Europeans trying to make special deals. We didn't even have to be kidding of a structure of a consumer cooperation. You have to look at our strategy in the light of that period.

A: I agree. It must be kept in context.

K: And not wanting to add Iran to the embargoing countries is not the worst -- is not a senseless judgment.

A: Uh-huh.

K: At that time. Now at the present time it is a more -- there are other complications which I will be glad to explain to you sometime.

A: Well, I think that I see part of it but I would be delighted at your convenience to get a briefing and . . .

K: Well, why don't you come in next week sometime for a half hour.

A: If I may I would like to.

K: And I'll just explain to you -- because that is perfectly above board what we are trying to do.

A: Uh-huh. Now, if I use anything from this at all can I use the -- because there is this outright statement about military - joint military action.

K: That I just . . .

A: Can I ~~XXXXXX~~ quote you as saying that is total nonsense if I decide?

K: You can quote me as saying that is total nonsense.

A: And the rest I don't quote you at all on.

K: Right.

A: Okay, wonderful, and I would love to come over next week.

K: Thank you.

D: Mr. Secretary.

K: Where are you?

D: I'm in Cincinnati, Ohio. I'm getting an honorary degree from the _____ College.

K: Under what name, Dean?

D: Yeah. [Laughs] That's right.

K: Look, what I wanted to call you about was two things. One, you may or may not believe this but I am making a major effort to create the best possible atmosphere for the visit.

D: I appreciate it.

K: As your various leakers on the Congressional Committees will without question report to you.

D: No, they haven't reported to me yet. But I believe you, I don't need them to report.

K: But I really would urge that your people just keep their mouths shut now for three or four days. Why did Yigal have to say today that he warned against my coming out there because the last time I suffered from misconceptions about the position of the parties?

D: I did not see this.

K: Well, he did. Now, that of course will force me -- or could force me into saying that it wasn't I who suffered from misconceptions. And I don't think that will do anybody any good.

D: I did not see it. Where was it? In the press or was it in a cable?

K: It was on the ticker. On Jerusalem domestic radio.

D: I think what Yigal probably meant to say is that he didn't want you to come before there is a --

K: I don't ask him to tell me to come. I just ask him to keep quiet.

D: I understand. But he didn't mean . . . I'm sure. I'm sorry if it came out like this. I know that it's not -- I'm sure that what he

UNITED STATES DEPARTMENT OF STATE

D: (cont'd) intended to say is that this time we should have a more concrete -- like you say, a more concrete --

K: The second point is I read in Gwertzman's article today that I put to Israel a two-year proposition. Now there is no possible way any of my people could have done this because they don't know any -- nor have I put a proposition to you. I tried to give you an estimate.

D: Mr. Secretary, I did not speak to Gwertzman or to any living person about our meeting.

K: Well, did he talk to that person who has communications?

D: No, no; not in any seance either. Gwertzman and before him -- what's his name -- Kalb and others have been broadcasting various years for two or three days already. He has in fact yesterday before I even came from the office, Kalb broadcast from American officials three to five years. I asked Shalev to call Eagleburger and tell Eagleburger that these broadcasts have been going on now for several days and again yesterday and I did not want you in any way to think that there was influence by anything that I said because I said nothing.

K: Well, you know five years is absolutely inconceivable.

D: I mean, I could not call Bernie Kalb or Marvin Kalb and say to him: Five years are inconceivable but we will settle for one or two or three or four.

K: The way you are going, to settle for one and call it having outsmarted Kissinger.

D: No, Mr. Secretary. [Laughter] We will not. We will not settle for one and we would not call that we outsmarted Kissinger.

K: Because Kissinger wouldn't give you even one.

D: . . . Dr. Kissinger is after the Egyptians . . .

K: I'm glad you caught on to that.

D: Well, you see, it takes me time but -- Were you able to get the President to change his position on those three items?

K: No, but I really think we can do it. I did talk to him about it. I really think it's a soluble problem.

D: But it's important that he should know that it should be done before. Before even the meeting when he meets on Sunday with the Cabinet. But that's just my gut feeling.

K: Well, let me think what --

D: He definitely should not take [at least] the words that Yigal said. I mean, it could have been an unfortunate phrase but the Prime Minister made a good statement last night. I hope that you saw it.

K: As a friend, I'll tell you: Maybe he should be a columnist somewhere.

D: [Laughter]

K: There is no requirement for a daily statement.

D: [Laughter] I am Jewish so I can't agree with you more.

K: He is not under contract.

D: I gave yesterday my first interview in two years since I am in town to the Evening Star.

K: That's the third thing I wanted to tell you. I read it and I read it to the President -- which is more important to you -- and he commented favorably on it.

D: I thought I was trying to, you know, to stay -- I'm happy that he did -- because I was trying to stay within --

K: No, he commented favorably.

D: Well, I'm very happy.

K: Okay, now, if you keep your wild men under some sort of discipline.

D: Yeah. Then you cancome with some good news over the weekend.

K: No, that I doubt. I really doubt it. And I really think --

D: I really don't think you're making that great an effort because if you would, you would succeed. I really mean it.

K: No, I made a great effort once before.

D: On this?

K: In September.

D: Oh, for the -- Believe me, you have no reason to regret it. Believe me, I know that you think that because we got arms or so you say sometimes to the press in briefings that we became spoofnaked and so on.

K: Never have I said this.

D: Well, there was an inference that Israel got what she wants and wasn't fulfilling their part of the deal. But I think that the important thing is that the fact that we got arms then prevented a war from breaking this summer. I think this is of great importance. And precipitated this possible _____ negotiation. You have never gone wrong with us, Mr. Secretary, even if sometimes we are difficult, we are --

K: Impossible.

D: Impossible, we are never impossible. By the way, Sadat gave a beautiful peace-loving speech across the Canal.

K: I didn't see it. You mean, that sarcastically?

D: Yeah, I do. I do. He said that every occupied piece of land will have to be liberated by force, that opening of the Canal makes it easier for him to start war and things like this. So --

K: I haven't read it yet. We shall also point it out to him.

D: Well, I'm just thinking that Ghorbal probably gets less --

K: I don't deal with Ghorbal.

D: You don't miss a thing I can tell you. [Laughs]

K: There are months when I don't see him.

D: But, I mean, the point about Yigal. . .

K: But I could easily move you to the position of Ghorbal. Then you'll never get a phone call.

D: Oh, I love your phone calls. It's the content I'm arguing with, Mr. Secretary.

K: Come on, Simcha, now. Now, what are the plans for -- I'm going to meet Rabin at the airport.

D: Yeah.

K: And then what is your suggestion?

D: I understand that there is a meeting at 10 o'clock the following day with the President.

K: Right.

D: Do you think that you two should have breakfast together before?

K: What is your thinking?

D: I definitely favor a meeting of some sort or another -- breakfast or no breakfast -- between you and him before the meeting.

K: Well, when is he leaving Israel?

D: He is going to be in Washington -- he is arriving in New York --

K: I know.

D: 2 o'clock in the afternoon.

K: So he'll be very tired when he gets here.

D: I think it would be advisable to have a breakfast meeting rather than a meeting that night.

K: All right. I'll see whether -- I'll do an hour. He's staying at Blair House?

D: He's staying at Blair House.

K: Okay.

D: All right, Mr. Secretary.

K: Why don't you tentatively schedule that for 8 o'clock.

D: Okay. Okay, I willtell him this. Okay, I appreciate it and I appreciate what you are doing to get the thing removed psychologically before his coming.

K: I am -- If you see my statements to the press, I think you will find that I use every opportunity to speak of a constructive Israeli

K: (cont'd) atmosphere so there is no evidence on the formal level.

D: [Laughs] You are never able to conclude a sentence about Israel which is complimentary to them.

K: Come on, Simcha, you have not done badly with me.

D: I personally think --

K: Nor has Israel.

D: No, I think that we haven't done badly with you. And I say it all the time but I think, as I told you yesterday, that something happened to you in the last few months.

K: That's right. I've become anti-Semitic.

K: Hello.

S: Hi, Henry.

K: Hi, Jim, how are you?

S: Okay. I don't know if you have seen # FY 76 MAP proposal but I think your fellows at State are not representing what I have always taken to be your views on this. The biggest problem you know is Cambodia has fallen. The question is whether the aid request the President submitted earlier should be cut back concurrently. Our people have urged that we go with the original request of $848 million. I am not sure that we can get away with that. They have left out a number of programs. They cut Turkey to $70 million.

K: From what $80 million?

S: We had suggested $85 million, I think. And Greece. . . And Portugal is not uh . . . .

K: Portugal, I would like to think about. But my instinct is to back your preference on MAP.

S: State's view is that Congress is expecting a major reduction because of Cambodia. But we had starved the rest of the program because of Cambodia. State's position is we can go back later for a supplemental. I don't think we will get this until September and if we go for a supplemental it will go down the drain for the fiscal year. I think we should ask for whatever we need and cut insurance at the outset. I have always been more conservative on this than you have been.

K: I agree with you. I don't see how we can give MAP to Greece and not Turkey. I would like to look at Portugal. But I would look at the high side. Where is it now?

S: All over to the OMB and OMB is siding with State against DOD. Somebody leaked all of this to Gelb. I don't know if you . . .

K: I give a damn about it. If they give opposition to Defense on MAP I am going to raise hell about it. I did not personally review it.

S: I don't know if you want to raise hell about it but I think you would want to look hard at the numbers. As you know, I have never been a Korean aid booster but State's figure is $74 million and our figure is $125 million.

K: I am on your side.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H MILLER
DATE/CASE ID: 24 MAR 2004 200102979

S: So I don't know if you want to raise hell but you should look . . .

K: I can't see $74 million on Korea. They know my views on Korea.

S: Take a look at the Gelb article. You will get a feel of the bureaucratic fighting that is -- has been going on. In order to get down to the lower number, State has advocated that we drop out the Middle East package until the reassessment is completed. So, there is nothing in the State package for Jordan and we have $148 million for Jordan.

K: Is there anything in for Israel?

S: I . . .

K: But Israel doesn't get MAP.

S: Right. But then that's foreign policy problems once you get beyond Korea and Turkey.

K: I don't know how they could drop Jordan. I will talk to these maniacs and hopefully I will get them into line -- I will get them into line unless they can give me reasonable explanations for what they are doing.

S: OMB has taken over State's position and urged that we drop $400 million.

K: They can't take over State's position if State changes its position. Let me review this and can I call you tomorrow?

S: Sure.

K: Let me give you _____ of the meeting. The President was extremely tough and said that he was inclined to go for an overall settlement and to make an American proposal and the Israelis could come up with an idea of their own.

S: That's not a bad position, is it?

K: No. Rabin went into a long explanation which proved why a final settlement was not possible. On the Golan he would not tell us what he wants. He indicated he was not willing to do too much. That's the gist of it.

S: What's the purpose of his trip.

K: That's the question. He said they would not leave the passes. Whatever else you can say about the passes -- there can be no question that we thought they had to get out of the passes and never did they say at all that it was militarily impossible. It was left that we would meet for breakfast tomorrow and then we would meet with the President. When do you see him?

S: Tomorrow.

K: I thought you were seeing him this afternoon.

S: I was supposed to but we thought it would be better to wait until we got the tone.

S: I don't know if Bob McCloskey got to you.....

K: It is absurd. There is no possibility whatsoever. There is no conceivable development.

S: Well, obviously I haven't written it yet. I don't think anyone has written it. I got my information from a fellow from another outfit.

K: He will be proved to be totally wrong.

S: Do you have a second to go beyond that? About next month -- are we likely to be going?

K: There is a chance. What I said at the press conference today -- we will know by the end of the month whether we are close enough to go.

S: It wasn't clear to me. You were saying that Rabin doesn't speak completely for the government and that he has to go back and report. In some ways you are moving ahead but in other ways you are picking your way carefully. I know there is alot to be done.

K: It is somewhere in between. We are not there yet. It is correct that we are further ahead than before the trip started. This is just for guidance you understand.

S: Very good. Thank you very much.

K: Hello.

S: Henry.

K: Jim, I just wanted to give you a readout of what went on this morning. He was a little more flexible today but more in terms of concepts than in terms of very concrete proposals. He said he was going to try to work out some arrangement on the basis that would come closer to the Egyptian position. But it was not a firm proposal. We in the meantime will explore that with the Egyptians. It will give us about two weeks before we know if there is a chance. On the access of oil fields I think we could make a compromise. On the Syrian side his only proposal is to let them narrow the disengagement zone of limited armaments (?). That's where we stand. I would urge you not to give any ground at your meeting with him.

S: No. Uh, the only area that I have come up with is the pricing policy but that is not a matter of concern to you.

K: That's not a policy decision.

S: It is a carryout of a law which requires us to give full cost. They define full cost in different ways from how we define full cost. (He mentioned something about increase cost of tanks, which I didn't hear.)

K: He mentioned something like that.

S: One thing, our position is dictated by legislation.

K: I think it is important that we all keep the same level of coolness. We were polite but distant.

S: That's easy. I thought -- uh, the position that he is taking is intellectually understandable but that does us no good.

K: We can't pay $2 billion a year to undermine our position in Western Europe (?) In fairness to him, I have to say the talks today were better than the talks yesterday. He at least grappled with the fact that something had to be done without committing himself.

S: How did your press conference go?

K: I only had ten minutes -- fifteen minutes. I only covered the talks. I tried to keep it vague, slightly positive.

K: I am working on my speech, so is it very important that....

G: Can I tell you briefly what I have been thinking about. I had lunch with Chuck Robinson...

K: He tdd me.

G: It looks like a viable idea providing you think through and have some opinion on what will happen in Saudi Arabia. There are two advantages to this . One is the assurance it gives for an embargo and I can't find any ____ on it. The other is an OPEC price break vehicle. This can be done only if you can maintain chronic export production world wide over consumption. And the problem I have with the strategy is the way it has to be done to get Iran over ____.

K: That is what we are doing.

G: But you have to have pressure on Saudi Arabia. The amount of oil we import would be displaced. We would get more from Iran but less elsewhere -- if we are to pressure OPEC it has to come out of Saudi Arabia, Venezuela, or Nicaragua. -- some of these big areas. It doesn't work on the Canadian thing. If they cut back on their exports to the U. S. that will reduce their imports to Montreal from largely the Persian Gulf. What we have been getting from Canada was transhipments. We ought to get one million barrels.....that represents about one million barrels into Montreal... as they cut back on shipments to the US , that cuts back on their Persian Gulf imports, so Canada is a transhipment point for the United States. The concern I have is, prior to moving on this, the superior strategy.

K: But can't moving on this give us an option. If nothing else , it will give us an option to keep open this strategy. If we wait til we get this government signed on to a strategy.....

G: I am not talking about the government. I am talking about you. I want to suggest want alternatives foreign policy has got with respect to this. I would like to indicate what happens after you do this.

G: It is not an Interagency thing. That won't do in order to make this work. I am referring to the fact that in order to make this work it is not only an issue of what you do with Iran, but also what you do with Saudi Arabia and I want to indicate what happens in these alternatives.

K: That I am anxious to do. That we can do in the next few days.

G: There are a number of technical problems about how we can do this. They are soluable but technical. It is not easy but I am trying to think of ways to do it and I think it can be done.

K: It would give us an option. It would give us protection against an embargo.

G: That is certain.

K: And a crack at the OPEC cartel.

G: It has worked effectively and if it works there, it could punch a hole in the operation.

K: Particularly if the Saudis react emotionally.

G: I would suppose that I want to indicate that you cannot immediately make a deal with Saudi Arabia or get to Iran because that would displace the problem to Nigeria and Venezuela.

K: That doesn't bother me. You can make a deal with Saudi Arabia. If they want to _____ it has to be better.

G: That is an important note.

K: But it is a good problem to have and I haven't thought through how to play it and I would be more than anxious to get your views.

G: It has widespread ramifications with respect not only to OPEC

countries but the oil companies. I am only concerned that before it is done you feel confidant with the secondary effects.

*

K: I am anxious to discuss it with you. It may have to slip as late as Thursday.

G: There is no rush.

K: But this week. And we won't make a movement on that field unless we have had a talk.

G: Good.

K: In the section on Alliances, you know, say something about Europe.

L: Right.

K: And say the need to go beyond simply security. Then say something which is sort of a synopsis of what I said yesterday.

L: Right.

K: Incidentally, that speech is getting terrific play.

L: Fantastic play on the radio and TV as well as the TIMES.

K: And this evening Cronkite is going to do an eight-minute interview on it with me.

L: Really.

K: Yeah.

L: Oh, that's terrific. You could just tell by sitting there listening to it that it just felt good as I said last night.

K: It's really weird. You know, we do things that we think are terrific and they fall flat.

L: No, this one I was really confident. I knew it was going to be popular and I thought it would be treated thoughtfully in this country as well.

K: Well, it is a nuisance for you to do all these things but I think you are making a major impact.

L: I agree. I agree completely.

K: Because there is not going to be any alternative structurally.

L: I do rely on the substantive people on my staff on these things as well as the speechwriters. I don't know how much you are aware of the process but we do try to -- in addition to working with the bureau --

K: Win, don't press your luck. When I tell you are going a good job will you accept it without telling me how you are doing it.

L: All right. All right. I am puzzled sometime if you for example make the comment that Larry pulled the St. Louis speech together. With all great respect for Larry being so damned busy -- I don't expect him to do anything but he was very helpful for a few pages but I couldn't understand what the hell you were getting at on that.

K: No, no, but he did a good job on the end.

L: On the conclusion -- oh, terrific and given the time he has got it is amazing but you know I was just puzzled on whether you know how the process was.

K: No, no, I know that. Now listen, in that section on Alliances I think we should say something tough and let's say we should make one thing clear that Alliances must be reciprocal. That it is not tolerable that Allies blackmail us asking -- you know -- by their continued loyalty to the Alliance. You know we can use it as a slap against the Greeks, the Turks and others. And I think it will help us get the Turkish aid through.

L: Do you want that under the European aspect or as a general point.

K: As a general point after saying all of this. And then you can say but there are also a few other things that ought to be clear. It is clear we do no favor to countries by being their Allies. But they must understand they are doing no favor to us. And I want the Middle East part a little strong.

L: I've talked to Larry about what you told his yesterday and Will talk to Sisco. You say strong in the sense of determination to move ahead -- you mean.

K: Determination to move ahead and determination not to be pushed around by any of the parties.

L: Yeah. We are going to have a draft for you . . .

[redacted] There are a few problems. I think it would be better if I could sit down and talk to you. I want to give you all the nuances. I believe it may take a little longer to get the job done. It is doable. B6

K: I want to tell you something [redacted] There is a time to bargain and a time to move. The United States is a great power and while Israel is not a satellite of the U.S., we are not a satellite of Israel. B6

[redacted] I know that. From my discussion I put it on a different basis. I called it the moment of truth. I spent two long visits with Rabin. I just think you ought to know some of the basic feelings. Where I think a little pressure might be helpful too. B6

K: You saw Rabin?

[redacted] Yes, twice. B6

K: I think he has a total misconception of the American domestic situation.

[redacted] No, he does not. If he did, in my discussion I made it quite clear. My feeling is that when a policy changes in a big government, it does not reverse itself. Bureaucracy and everything else. You go down hill on changes and it does not reverse itself. B6

K: My own judgment is this [redacted] Whatever happend in March, we could have buried on the Rabin visit and we set the stage for it. If this is carried on for too long we will inevitably have to take decisions. B6

[redacted] There is no question about that. B6

K: It is very hard to know what the hell more we can do now. What if Sadat kicks us all in the teeth now? What if he says the hell with it?

[redacted] Then you have a real problem. B6

K: That's right.

[redacted] I think they should make a deal. Not only is it good for them, but it is good for America. They have to remember America's overall interests. I made it quite clear that if they do not want to hear my assessment, there is no use in my saying it. He said, no [redacted] I have too much confidence in you. B6 B6

K: I would love to talk to you. Can you come any day?

[redacted] Yes, I will come either Wednesday or Thursday. B6

K: We will call you first thing in the morning.

[redacted] The reason I want to sit down and talk to you is because I think (I had a long talk with Javits today and if it is possible I want to see Javits before I leave because I may need his help later) Rabin is the guy who has to stand up and be counted and take the responsibility on his own sholder whether it defeats him politically or not because the situation overrides his own political situation. B6

K: This is exactly my conviction.

[redacted] I had a long visit with Allon. B6

K: How is he?

[redacted] He strictly wants to make a deal. I am prepared to make another trip over there now. B6

K: I would not be surprised if the Egyptians kick everybody in the teeth and said they would not pursue this any more.

[redacted] I cannot help that. It would be poor policy on their part. B6

K: They have come quite a distance.

[redacted] I told him the President was very firm about this thing. Then I met with Allon and Rabin called me Thursday and we spent 1-1/2 hours together. I want to get the mood of the people which I think is better today than it was three months ago. I will show you the interviews of me by several papers. The people today want to see a step forward. B6

*

[redacted] - 3. B6

K: It sounds as if you really did a useful job there. I will call you in the morning.

[redacted] Ok. If you close off your bargaining position you are in real deep trouble. I am totally conviced you were right from the beginning on your course of action and you are right today. B6

K: Above all for the sake of Israel.

[redacted] That's right. Golda is in the hospital too. B6

K: Yes I heard. Do you want to come tomorrow at 5:30?

[redacted] Yes. B6

K: We've now also had a letter from Sadat through a separate channel, saying that he sticks by what he said in Aswan, but he had no other choice with his own people, to put forward this kind of proposal.

S: Oh, I see. He was putting something forward. I misunderstood you. He sticks by what he said at Aswan.

K: Well, you've seen the long cable from....

S: No, I have not. It has not reached my desk.

K: Well, get it from _____. It opened with a formal proposal, which is in effect the Gamasy plan to move the Egyptian line. They said if the Israelis can put forward something outrageous, so can they, which usually we should not transmit because the Israelis will use it only as a kind of Egyptian _____. But he said he will not renew the mandate on July 24th, if no progress is made. But he will not immediately ask removal of the troops, he'll just not renew the mandate.

S: In other words, the response is then we are right where we have been.

K: But I think what we should do now is tell him we won't present his proposal till it's a good position. The Israelis say we are one-sided. But we would like the Israelis to reconsider them within the framework of the Aswan negotiations.

S: Henry, are you going to see Kendall this morning sometime?

K: Yeah.

S: You know, I had a guy in here that Scott (?) sent to see me yesterday The heat is on from all these business people to get cracking on the legislation, mostly I guess because Flanigan has come back with a story that the Russians don't mind whether we win or lose as long as we are seen to do things. And I think that's a very bad idea.

K: It is out of the question.

S: Presumably, our interest is to try and get the legislation changed, not to be seen to do things. But we want the legislation, maybe not for Kendall's reasons but so we can control Kendall by having legislation.

K: Yeah.

S: So I think these people have to be restrained, and I think just told that they can do their missionary work but that they should hold back until they get a signal that we're actually ready to move on legislation.

K: What is your view, incidentally, Hal, as long as I've got you on the phone, on the Israeli situation?

S: Well, I haven't really been able to follow any of it. I saw this article in the Times this morning, which I assume is essentially accurate.

K: Well, it's not essentially -- the map is -- you know, it's essentially accurate except it gives a much misleading impression of what the Israelis are willing to do. Basically, their position has changed only in that -- you know, when you look at the map, you think the corridor to the oil fields is about 20 kilometers wide. In fact, it ranges in width from 200 meters to a kilometer.

S: Well, I don't see the Egyptians accepting any corridors to anything.

K: If, for example, the road they show in this may -- the Egyptian corridor is to the west of that road and the Egyptians would have to construct a road of 75 kilometers --

S: Do you think it is even politically feasible for Sadat to accept a corridor, which is obviously subject to severance any time the Israelis want to do that? And it may be a huge concession, which it probably is from the Israeli standpoint --

K: It is not a -- believe me, when you see the map, you will see all along that road the Israelis -- at three major points they want military outposts; at all points they want to be right next to the road; at three points they want to be on cliffs looking right down into the road.

S: Well, my very general impression from literally just reading about it in the press is that the Israelis are trying to take the heat off themselves by doing a few things, probably the ones that are politically just barely feasible for --

K: Yeah, but do we have any choice except to take them on?

S: I think they've got to be pressed to do more or there is going to be a stalemate. You know, these _____ changes may be heart-rendering for Rabin to make but I don't think they're going to get you moving.

K: Yeah.

S: You know, that's the best that I can tell from -- they obviously feel the heat. They probably are uncomfortable and so they are trying to do a few things. But I don't see that those change anything very much.

K: Have you had a chance to talk to Larry?

S: No, not yet.

K: Well, look, I am determined to work it out if I have to have blood flow with everybody else.

K: Yeah, but, Hal, that's no reason to leave because --

S: No, but it's a lack -- you know, it's totally impossible to establish any kind of authority here when one isn't seen to have it. If you know how the bureaucracy works, its -- it just flows wherever there is a vacuum.

K: Hal, I totally agree with you! I face this -- you face it -- but Ikle. I face it with Schlesinger and Simon who just go ahead making speeches as if we didn't have apolicy.

S: Well, I'll be glad to talk to Larry and see what --

K: Let Jackson take me on.

S: Yeah, but this way --

K: What do I know that he cannot get from every other witness. There are no secret talks going on.

K: Well, of course, it's again wrong. It doesn't extend over that far to the east and in the north. But it's basically correct.

S: The article is quite correct that's comes out -- the Terrence Smith article.

K: That's from Jerusalem.

S: Yeh, it's from Jerusalem.

K: They must be getting ready to put it to blow (?).

S: Either that or plus the fact that they want to be very sure that if there's a rejection from the other side that this has been presented in the most positive way and that it's been Israel that's been conciliatory which is another way of saying "getting ready to blow." But we'll see what the reaction is.

So I think it's really a logistics problem, Mr. Secretary. There are about, if I recall, about 50 or 60 miles from Alexandria.

But you know the comparative portrayal of this thing of these two pictures particularly up in the north, it really show a tremendous expansion particularly between the representative marks in the ~~xxxxxxxxxx~~ buffer zone as represented now is fantastic and that corridor makes it look like

K: Look that corridor on this scale looks 20 kilometers wide.

S: Well, it's at least that and moreover on the other side of the road in the _____ where the Israelis want to control it it makes it look as if it's all buffer of the road the Israelis were controling. You know darn well that's not the case.

K: It's not.

S: It's a helluva good public relations map.

K: No, with the passes they've given up pretending.

S: No, that I say you can't perceive any difference.

K: No, but I think that Bob Anderson should put out at the press briefing today that we will not compete in putting out confidential information but we want to state for the record that the map in the New York Times today is incorrect and does not reflect what the Israelis gave us.

S: The only hesitation I have is what if Sadat decides to come close to this.

K: It's still incorrect.

S: Yeah, but I mean if we come out....

K: Yeah, but the trouble is it's still incorrect.

K: No.

G: My understanding is that the FAA is likely to approve the Concord flight. There is some danger that the Port Authority will end up, because of political pressures working out a system to discriminate against it. This will have ramifications with the British and the French. The disposition of the members, the six members, and the New Jersey people is to go along with the FAA if they take the lead, which I expect they are going to do. They would come out first on the Dulles landing but the technical people are responding to the political pressures against it. I occurred to me that Bill can control that part of it.

K: I understand he has gone to the Congo. When will they have to make that decision?

G: Not until the fall. As I understood it, he was leaving the end of this week.

K: Well, that's true, but I didn't resist it. So I have no reason to complain. I thought it was a rather good idea, but I should have checked with you.

Two things, Jim, one on Panama. I've been trying to keep the thing calm, and to see how long we could stall, but that's very hard to do when you people are running around the Hill and making a big issue of it.

S: Who's running around the Hill?

K: Clements and Calloway.

S: Bill was going along with the prevailing tide here and then I made my little speech and now he's shifted 180 degrees. Calloway, I can't... I've got him for three more days, and now that he's becoming a politico again....

K: Well, that long article by Marilyn Berger, I've, my people are....

S: Was it in the paper today?

K: Yeah. You know, we keep getting asked why we don't give any positive briefings. I, basically, would like to stall this thing as long as we can.

S: You're quite right on that.

K: But the only way we can stall it is to keep it quiet.

S: I agree, couldn't agree more. I didn't know Bill was getting that enthusiastic. He was enthusiastic about the movement toward the agreement a while ago.

K: You know, we may not succeed in stalling, but I would like to have it from a posture of looking willing to negotiate.

S: Whatever, the policy, there is no need for this kind of thing. What is it that they're briefing that the....

K: Well, first of all they're briefing that there's a total disagreement between Defense and State which isn't exactly true.

S: That's totally unfair.

K: Which is in the newspapers. Secondly, that Defense is unwilling to make any concessions on land and water. Well, I'm not even going

into the merit of it because I think it's an ....

S: I tried to stay out of this one because I'm kind of unsympathetic to the general trend, but I got on board here, pretty much the policy is locked up and it's really not my desire....

K: I know you're not behind this. See if you can calm them down a bit.

S: Well, what is it... Are they going up there voluntarily.... I don't know what I can do about Bo.

K: Well, they're apparently going up there.... You take that amendment that was passed yesterday to the State Appropriations bill, prohibiting the use of funds for negotiation on Panamy, that's going to produce an explosion if it passes.

S: That's crazy, really crazy. You know if it weren't so serious, it would be funny. It is funny.

K: And our Congressional people say that the briefings of some of your people are partly to blame for it.

S: If there's anybody who's in the range of the Secretary of Defense, I will shut them up. But I cannot _____ the work in the bowels of the Army, and the Army, as you know, feels very strongly. about this.

K: Jim, I've just been called to the President. I want to call you on the second point which concerns Israel, a little later this morning. I'll do it on the Secure Line.

S: O.K. Bye.

K: I am talking to the Indian Ambassador about membership in the Security Council.

B: Fine.

K: He raises the question, what happens if there is no consensus only a majority vote in the regional convention.

B: That hasn't happened before. We would prefer the Pakistanis to the Indians but it is a hypothetical question and we can't foresee that situation developing.

K: We wouldn't start playing between the majority and the minority?

B: We would make a determination based on our own best interests. The Paks would be a better bet.

S: They have already issued a statement that says something like if you and the President had agreed to see Solzhenitsyn instead of cowering it would have been better for the country. It is a sad day when the chief spokesman of our foreign policy should side with the Soviets instead of on the side of freedom of speech. I gave them hell a nd told them it was totally impossible to conduct a rational debate this way.

K: Yes.

S: It is a bad show.

K: Well on the basis of the longer thing.....

S: At the very least they could have waited for the longer thing or asked the State Department for the text instead of flying off the handle. It was a bad way to deal with the issue.

K: Do you see anything wrong with it?

S: I told them you gave a statement on Solzhenitsyn's views translated into policy. I also said you weren't attacking him like Jackson is doing to you. They said if every time someone criticizes the administration, they get attacked that is extremely bad. Then I replied that this was no way for a responsible Presidential candidate to comment on any issues.

H: Well, ah...

K: Yes or no?

H: I can't tell you on the basis of what I've seen.

K: Are we doing anything on this crisis or are we clucking our tongues and thinking ... procedures

H: No, we are talking about giving public support

K: We are talking, what are we doing?

H: I don't know what we are doing. He's talking to them--

K But what is he saying?

H: He is saying that they should support the democratic elements

K: Meaning what?

H: Meaning Soares and the PPD and getting the moderate officers in and Gonzoles out. But he is doing it very quietly with whom he is talking to.

K: With whom is he talking to?

H: He's had one conversation with Antunes, he has talked to some of the people in the Cabinet with Antunes and

K:

H: Right.

K: But he isn't giving political science lectures all over town?

H: No, he is not.

K: He -- that isn't beyond him is it?

H: No, except--he's not really a political scientist [laughs]--he's an activist.

K: An activist, but for whom?

H: He's very practical fellow and I think he's--a little uncertain about some of these officers but I think Antunes is..

K: I agree, I think A---I am uncertain too. The one way to become certain is to let somebody win and see how he turns out.

H: There is a danger in there--if they should get rid of Gonzales right now, they are in dreadful economic straights.

K: And then we'll help them.

H: Yeh, but it is a very bad situation and

K: Art--if we can get rid of Goncalves, I'll take that problem.

H: Okay

K: I don't worry about that problem. If we can get rid of Goncalves and his crew, let me worry about the economic situation.

H: I agree, that's where we come out.
This group that will come in will have as wacky theories as Goncalves has but they'd be in a better political orientation.

K: Good, fine. At least the thing would be a little more fluid, then it will look as if someone has some muscle

H: And there will be less a less direct connection with the communists.

K: That's right. And if we can then trigger the communists into a move, we may get them smashed.

*

H: Well, they're all out on the streets now

K: Who the communists?

H: Both the communists, socialists--and that fellow Carvow is really- he distanced himself a little bit from Goncalves the other day which looks as though he may be helpful to the moderates in the end, but I think he wants power at some point

S: Good morning, Henry.

K: Joe, I have to run to a breakfast with the President. Could you get in touch fastest with Herman and say the Israelis have agreed to an August shuttle. If we can create the preconditions.

S: All right.

K: In the long memo Sadat asked him if the Israelis agreed to an August shuttle.

S: Yes.

S: Yes. All right. Let me send something right away right now.

K: Hello.

S: Two quick things, Mr. Secretary: Shalev just called and I just merely said that you were planning on calling.

K: Did you tell him we each had a conversation.

S: No, I said nothing. He said have you heard anything and I said the Secretary was about to call. If you want me to do it, I can do it very easily.

K: No, I will call him.

S: Secondly, we left a telegram overnight for you of instructions for Moynihan. I am ready to go ahead on it.

K: Well, what do you mean you left a telegram overnight. I mean that is an internal game. I wasn't in overnight. It wasn't sent to my house.

S: No, no, I left it to be shown to you this morning at your White House office. So it should be on your desk there in front of you somewhere, at this point.

K: I haven't seen it yet.

S: Let me tell you what it is because I have Moynihan coming in on the other line and there is a time bind because the consultations are going ahead. I think we are in pretty good shape as a matter of fact. Fahmy said that they wanted five points in this appeal. One, that the President be authorized to issue the appeal ~~in~~ by the Security Council -- in other words that the Council have some kind of a little formal meeting endorsing it. No problem on that. That the appeal express concern about the situation in the Middle East. No problem on that. That it express appreciation for the measures that President Sadat has taken towards peace. Now, this is a little problem, Henry. It ~~singles~~ singles out Sadat only. What I would like to do. . .

K: Will you repeat that?

S: That it express appreciation for the measures that President Sadat has taken towards peace. This is in the appeal. What I want to suggest to Moynihan is largely for the record so that we can tell the Israelis that we tried to get a little balancing language in this appeal.

K: Well, I think we have to do it more ~~for~~ than for the record.

UNITED STATES DEPARTMENT OF STATE

S: I think it ought to read express an appreciation for contribution of President and others are making to the negotiations.

K: Why not say all parties are making.

S: All right. Well, all parties. This is going to be an extremely difficult operation in this regard. In any event, I ~~we~~ will get a hold of Moynihan.

K: Why not drop it ~~all~~ /~~it~~/ altogether? I don't think Fahmy expects everything to get through.

S: Well, we . . .

K: So I can't possibly call both the Israelis and do this before I see the President in two minutes.

S: All right. Okay.

K: Why is it that I am not informed about these things in time?

S: Well, all I did was we got this late last night. We draft~~/~~ed the cable. My instructions were for you to be shown . . .

K: I don't even know where it is.

S: It should be on your desk in the White House because I asked that it be sent to the White House.

K: Yeah . . .

S: I can't make the schedules in New York. I mean I am sorry . . .

K: Okay. Well, what -- is it imperative -- I just feel it will ~~talk~~ make a lot of problems. The Israelis will never accept something that only praises Sadat.

S:; Yeah, but of course, it is not -- Henry, it is only an appeal to Sadat. This is not the resolution that we are talking about. That's the next stage.

K: Oh, I see.

S: This is only the appeal, Henry, by the Security Council.

K: Oh, well, then, of ~~that's~~ course.

S: But I want to go through the act anyway to try to get the balancing language. We are not going to get it but be as it may at least we are going to say to the Israelis we tried.

K: Right. Now, answer me this question since I've just been called to the President. Have you or have you not told the Israelis that ~~got~~ we got a response?

S: I said . . .

K: Yes or now.

S: No. Henry, I just told you . . .

K: But if I was going to call them in a minute, there must have been a response.

S: Well, all right. I suggest we have gotten something. I see what you mean. I have not told them anything about the response.

K: Why would Shalev call you?

S: Only to just say have you gotten anything. That's all. He called, have you gotten anything.

K: I cannot now call for an hour. Because I am now seeing the President.

S: Well, you know, I just said you would call at some point. That's all.

K: Okay. Thank you.

S: I have what is described as comments by the Ministers to the information that you passed on through me.

K: It is an orgy of toughness.

S: It is a reaction that I would like to pass on to you.

K: Can't we wait until we get the Egyptian reaction?

S: We have the first Egyptian reaction.

K: They were going to make a counter-proposal tonight.

S: This is just comments. They are reinforced by what is happening on the ground and it is questionable whether the Egyptians are ready to reach an agreement at all.

K: I haven't seen the evidence of what happened on the ground.

S: Well it says that the Egyptian reaction is disappointing and raises the question of further Egyptian interest in reaching an agreement. Israel made an effort, through the United States, to present proposals which would make an agreement possible. In the proposal Israel indicated a readiness to give up the oil fields. Israel was ready to give up 2/3rds of the shore and accept forward movement of Egyptian forces from line A to line B and to take into account any sensitivity by the Egyptians to the Gidda and Midla Passes. The Egyptian proposals were disappointing because the UNEF must be extended for as long as the agreement is in force. The subsequent violation of the undertaking and the location of the straights and the dismissal of the UN forces puts into question the Egyptian intentions. Israeli forces can defend their territory. In June the proposal that was made did not provide for U.S. presence. What the Egyptians have said now is not acceptable, because they are picking out the parts of the Israeli proposal they find most pleasing. Further more, the American presence was an important part of the package. What the main thrust of this is, is that there is a grave doubt about Egyptian intentions. We are not raising anything or changing anything, but expressing grave doubts.

K: Look, can you get this typed up and sent over here? You should wait until you get the counterproposal which I haven't seen yet. We don't share your view of Egyptian intentions. At least not until we get clearer evidence.

S: We don't have a view we only have grave doubts. We have some e vidence that we are taking into account on the ground. If they come up with a good proposal great.

K: There is nothing we can say until we see the Egyptian proposal. We appreciate your call and I will pass it on to the President.

S: I don't know whether you have to do that.

K: If you could get it typed up I would appreciate it.

S: One other point, I need to find out. The American presence, was that an Israeli proposal or an American proposal?

K: That was an Israeli proposal.

S: We had the impression that you might want to present on your own.

K: No, we agreed to do it, but it was an Israeli proposal.

S: Am I right in detecting doubts about the information I have given you.

K: We have gone to the Egyptians.....

S: No the military information.

K: If it has been sent, they haven't shown me. If it exists I haven't seen it. I was told it was on the way. You know where it is?

S: I checked. I was told it had arrived there.

K: I will ask for it immediately.

S: I think you should have a look at it.

K: What is in it -- give me a summary.

S: It is quite a story. It has all been done in a carefully planned manner. The army has gone into alert and leaves have been cancelled and also the regular training camps have been cancelled and there are indications that staff courses have been interrupted. Various units which were in training exercises a considerable distance from their usual points are returning. The artillery has returned to the Canal Zone and in addition 20 battalions have been located near the Canal. One batch of officers who were supposed to have been released on the 1st of October have been extended. We have located preparations on the East Bank and on the West Bank for the crossing of the Canal. We have the impression that the East Bank has been reinforced, including artillery in number beyond that permitted by the agreement. We have seen reconnaisance companies. There has been a marked increase of personnel.

K: Well, that gives me enough.

S: Also thereis a naval flotilla going down the Suez. All this became apparent at the time Fahmy made his statement on the non-extension of the UNEF.

K: Well if they do anything as stupid as this they will be in trouble with us.

S: You are aware we have taken measures.

K: I understand that.

S: We have not announced these measures -- if everything works out it will be as if nothing had happened.

K: O.K.

K: [redacted] He is pursuing it with great intensity -- getting depositions from Nixon, etc. B6

B: If I find the script interesting, I will send you excerpts from it.

K: While I have you on the line, may I make a suggestion. A lot of conservatives are screaming that the Security Conference is sanctifying the Soviet presence in Europe. The Conference wasn't our idea. It isn't something I am proud of. Our instructions to our men were to stay 1/2 a step behind the Europeans. Insofar as anything of substance in the conference is concerned, it should be looked at as a provision for peaceful change. The territorial integrity issue is something they have gone over for years. The French, British and Germans had already made their bilateral agreements. It is more in the direction of change than sanctification.

B: Do you think it is interpreted that way?

K: The Soviets started down a certain course and they are pursuing it. Heads of government shouldn't meet for something that isn't that important. It isn't in our interests to build up something that isn't that important.

B: Then why is the President going?

K: Because we were the last head of government to agree.

B: In terms of our allies?

K: Giscard, Wilson and Schmidt had agreed months before we had. I am not saying it won't be a great achievement. Look that isn't why I called you. I called because I was stung by your hard-written note.

A: Yes, Mr. Secretary.

K: Roy, I think you should take that cable from Hussein up on the Hill and show it to Javits, Case and Bingham and just tell them this is where we are. We think the consequences are grave.

A: Sir, I'll do that. Jerry is on his way over with a message for you to look at, if you want to.

K: I know that. I want you to go up on the Hill first because we can send a message to Hussein after you talk to these people. It's at the end of the day anyway there.

A: The House is going to make it's decision at 1:45 today.

K: Well, that's why I want you to go up on the Hill.

While I am conducting the Middle East and SALT negotiations everyone will wonder whether the latest scandle will bring me down. You don't have a thing but we will have eight weeks of speculation before that comes out.

T: I am sorry about that. I have been one of the advocates of the Congress leaving foreign policy to the executive.

K: You are doing an assassination hearing and you call the Secretary of State. The average citizen will perceive that I am involved in it.

T: I know you weren't. Would you like me to make a public statement to the effect that I don't think you are involved but that you were called to give an overview on policy?

K: That would be helpful.

T: There is no suggestion of your implication.

K: Hello.

A: Yes, Mr. Secretary.

K: Roy did you show Case the Hussein letter?

A: Yes.

K: Janka says he is furious -- what is he furious about?

A: Before I even had a chance to brief him he started out referring to the Amman broadcast this morning which said that Jordan couldn't compromise on the size of the defense package. And he said he didn't appreciate our putting Hussein up to making that kind of a public statement. As soon as I could get a word in I corrected him and said of course we hadn't done that and I described in general your letter to him. We had made an all-out bonafide effort to persuade the King to accept the compromise and then I showed him the reply. He cooled off a bit at that point but said that as far as he was concerned that they now had to go ahead and -- unless the King changed his mind. He and all the others including, particularly Morgan, Sparkman and Bloomfield all felt that if at all possible we ought to have another go at the King now that he has had a chance to sleep on this.

K: Yeah. What did Javits say?

A: Javits said that the King should understand better our system of government. That he did not think the military argument of only six batteries was -- that six batteries wouldn't do the trick was valid and that's . . .

K: Try that on the Israelis next time. When they ask for something give them something less than half.

A: Well put this kind of language in the next letter of offer with Israel. In any case, Javits said he was going to send a personal message to the King as well. But he said he urges that we ask the King again to reconsider. All of them are very uncomfortable as a result of this -- of being forced to vote a resolution killing the whole deal. But they are in a corner and they don't see any -- even the supporters we have are all saying that this is the best that can be achieved.

K: Okay. Well, I am bringing back this message with a few minor changes.

K: Well, what is in that message?

A: I thought you might want to review it. I will ask Jerry to have one ready for you to look at. I've looked it over and I frankly don't see any problem in letting him see it. It will probably help on the credibility sidebecause he is very suspicious of whether or not we are in effect playing the game, I think.

K: Okay.

A: So we will wait to hear from you when you get back. Oh, Mr. Secretary, on the timing, the Committee -- the House Committee -- is meeting now.

K: Well they better not vote anything before we have heard from Hussein.

A: Well I think if we can tell them that we are definitely going to go to Hussein again this will . . .

K: Hello.

D: Mr. Secretary, can I take a minute of your time? Whatever cables to the Ministers, that I understand, but I want to communicate, to Rabin only, the essence of our conversation, and I want to be as close to our understanding as possible. So I would read to you what I am trying to communicate to Rabin and you'll correct me if I'm wrong.

I would say that the strong recommendation of the Secretary is that we'll submit now the fallback position as it is -- that you can show it to the Egyptians. [redacted] B1

K: Right.

D: With regard to the shuttle itself, the Secretary states the following: He will support our fallback position in the north. He does not ask for any changes in the east. We will have to leave a sliver for a change in the south.

K: And you have to keep a certain flexibility in the north. But we are not talking here about a significant one.

D: Except certain...

K: You know, just for adjustments in the negotiations. But I'm not going to ask for a 5-kilometer withdrawal.

D: A few hundred meters.

K: Well, of that order. I don't want to tie myself. But I think I made my meaning clear on that.

D: This is only for Rabin so that he will -- well, I'll continue. We will have to leave a sliver for a change in the south. That's all in the framework of the shuttle. He will support our B-line, but may require a change of one or two kilometers during the shuttle. He sees no major problems with the southern corridor.

D: It is no major unsolvable problem.

K: No insoluble problem.

D: I'm learning from you the terminology as well, Mr. Secretary. In the southern corridor. We will fight to reinstate the Israeli-Egyptian warning stations operated by Israelis and Egyptians respectively.

[redacted] B1

That is what I want to transfer to Rabin.

[redacted] B1

K: Yeh.

D: That I think summarizes the essence of our conversation and that I want to pass to his eyes only, so that he will have his guidance, you know, of what is attainable.

K: I just think that it should be .... We should bring it now rapidly to a point where a decision can be made whether it is worthwhile to have a shuttle.

D: Yeh.

K: That's my pressure on you now. My pressure isn't to give in to all the Egyptian points.

D: Yeh, I understand. I did not go into the Egyptian early warning posts or the two companies because they will not appear on our map and I don't know what the reaction to the early warning that they want to put in the north. Maybe we will demand to put early warning on their side. I don't know. It is just a . . . .

K: Well, I just want you to study it. Maybe there is something in there that can be traded off. I don't even know what they have in mind -- the size of the unit or anything else.

D: The point that you added now is we should bring it rapidly to a point of decision as to whether a shuttle is ....

K: I'm not trying to maneuver you into a position -- Rabin should understand this -- in that you get blamed for the break up of the talks. That's not now the issue. I think we are now at a point where you can say serious efforts have been made and it's not a question now of reasonable or unreasonable; it's a question that a breakdown has certain inevitable consequences however reasonable you were.

D: Yeh.

K: And that's the context in which you should consider it, and not in the context of how much blame will be attached to you.

D: I understand. Yet it is important -- I mean we want agreement but it is also important for us that we don't break with the United States.

K: My advice is tactically we've got to get some lines accepted as a basis for negotiation. Otherwise we're just blowing smoke.

D: Yeh.

K: And if we can get the lines accepted at least as a basis for negotiation, that means you can vary a kilometer here or there, but it doesn't mean that you cannot, you know.

D: Yeh.

K: Then when I have that, I can come [redacted] to the Egyptians. B1

D: Have you thought -- it's just an idea of mine -- maybe you should also meet with Rabin while you are in Europe now. I don't know if it's possible or viable, I just tossing the idea out.

K: Also, in addition to an Egyptian?

D: Yeh.

K: That would have to be in Helsinki.

D: In Helsinki. I understand your schedule is to be in Helsinki on the 29th, 30th, 31st and first.

K: Yeh. I don't exclude that, and I would be free the morning of the 30th, for example.

D: By that time will you have the counteproposal of the Egyptians?

K: No, probably not. But I might have it. Why don't you talk to Rabin and then talk to me again?

D: Okay. I will do this.

B: We are getting out this afternoon our bi-weekly release on our estimate of the Russian situation. We are going to group the 10 million tons. It will be a bullish factor in the market. Our intelligence and CIA's concur almost exactly. The last was 15 million. This afternoon it will be about 185 tons. Perhaps the market is not closed yet. This means that what Dobrynin told you is probably an underestimate. They are going to have to buy at least another 10 million tons or cut back in consumption. They can cut back by liquidating livestock.

K: That would give them problems down the road.

B: Right. So far we think it is not likely that they would use liquidation this time. If they need 10 million more tons

we think the Canadians can spare another million tons; quarter million ton in Australia, another one or two tons in European Community. If they need grain ~~xxxx~~ of that magnitude the only place left to get it is here -- 5, 6, 7 tons.

K: Or 10.

B: I am sure we have the capability for that. I am telling you that we have moved enough that we will not be in price trouble.

K: Now are you going to cooperate with us.

B: This means now, ~~xxxx~~and I talked to the President a few minutes ago. It means now from a political point of view internally and economic point of view, we can get our price from the Russians. ~~xxx~~ If the chance comes up when you are with Brezhnev and Gromyko you might as well be frank and tell them if you play on the team you will get it otherwise we do not need you as a customer.

K: Terrific. If your situation is ~~xxxxxx~~ that way we can really do it.

B: Please don't misunderstand me.I want to sell it but I don't need to. We are at the point where they have to come to us.

K: Terrific, Earl.

B: Best of luck to you.

K: You sit on the companies now.

B: We have them under control now. They are not going in. Word is out that we have asked the companies not to sell. We are saying we have decided to wait until we get a hold on the upcoming crop. Best of luck to you my friend.

I am in hopes we can get the Turks to hold off until we get a chance on the Military Sales Bill. Perhaps if it is possible for somebody in the Turkish Government to say that they are holding off because we made great progress in the House that would help.

K: I have a call in to the Turkish Minister and I have called the Turkish Ambassador with a plea similar to this.

R: He didn't help the matter much. He talked to too many people up here. He is an emotional guy. Several people mentioned he was pushing pretty hard. He was saying that it isn't a matter of Cyprus but a matter of our bases.

K: He is not the most skillful man in town. Let's see if we can hold together till the Military Sales Bill comes up.

R: I feel vindictive about it particularly about the Republicans who weren't willing to take our word for what will happen. We can't indulge these feelings much longer.

K: Let's fix a date and announce it.

M: How about October?

K: Hello.

D: Mr. Secretary. I talked to Rabin's office and I give you the background. And I called to tell you exactly what he is intending to say. Yesterday and today there were full headlines in the Israeli papers, mostly by Dayan, that it is a castastrophe to have an interim agreement to the countries going to war if there is an interim agreement, etc, etc., etc. The purpose of Rabin's interview -- it is an interview of questions and answers on television at 7:30 tonight -- it is to set it in the proper framework where most of the interview is divided, is dedicated to argue the case why an interim agreement is good. On the specific point I will read you what is the question and answer and I think you will find it acceptable.

The question of the interview was this: It was published yesterday and today in the press attributed to political sources in Jerusalem that the hard Egyptian reply to the Israeli proposal should not be regarded as a final answer but a position that can be negotiated. On what do you people base this assumption?

The Prime Minister: First of all, the purpose of Israel is to arrive at an interim agreement with Egypt. But this does not mean at any price. We have received the Egyptian proposal. It is substantially not acceptable to Israel. But Israel does not merely reject but also sets forth its own positions. The process of negotiation therefore is continuing and no (surprise) can develop. And so the final conclusion should be expected within the next few days. This is the process of negotiation which must continue so that the best possible terms can be achieved for Israel which has as its purpose the attainment of an interim agreement acceptable to each.

K: That's not bad.

D: Therefore it continues, there is no reason to get excited either by newspaper headlines or by statements eminating from Cairo. I think this is a calming statement and one that sets the negotiations.

K: I would prefer if you didn't say "which is substantially not acceptable."

D: Well, but he used the words "substantially not acceptable" because he ...

K: No, I understand. Look, I'm not asking him to say it's acceptable.

D: No, I understand.

D: But you see the purpose of this interveiw was in order to keep the minds cool because especially Dayan - that I'm telling you. . .

K: It's a disgrace.

D: Yeh, well

K: I mean why does Dayan get into this?

D: Well, because Dayan is trying at the same time to topple the government so he has his own ax to grind.

K: Look, I have to run to a press conference. I'll see you at 2:30.

RK: I wonder what we should do about Turkey. Have you any thoughts. We had a fight here but I finally got it through. I think Ball swung around on the basis of what I said.

HK: It is a disaster.

RK: I agree.

HK: This is just a mindless disaster. The best thing you can do is to write a strong editorial that they should reverse themselves.

RK: Is there any chance of a vote before the fall?

HK: Well, some people think maybe next week. By the fall it will be hard to retrieve it.

RK: I wonder if it would help to hold the situation until the fall to unfreeze the 50 million.

HK: I don't know what you have been told, but the Greek Congressmen told us that we had to make concessions and then they would unfreeze it. Since the Turks have not been willing to make concessions then we would be in the same position as we are now. The Turks are willing to let us cut off MAP. What infuriates them is our embargoing already paid for equipment. They have rejected that compromise three times.

RK: I wonder in the present situation whether this shouldn't be kept open as a possibility.

HK: We would have to discuss it with the Turks first. We have two requirements: first the Turks have to accept it, of course; and second the Congress has to approve it.

RK: Rosenthal says the Congress wouldn't have to approve it.

HK: We need for the Congress to approve it so they can't say we have acted illegally. Rosenthal's position was that we need to get concessions from Turkey. We could have won the vote if we had done that.

RK: The statement put this forward as a preferred approach without mentioning concessions from the Turks.

HK: That is what Rosenthal insisted in two meetings with the President. It has been rejected by the Turks. When I first heard about it I was intrigued but the Turks have rejected it.

RK: I was looking at the figures and annual shipments in fiscal years 73 and 74 and they were larger than 50 in grant and there was hardly nothing but grant in those years. Since there is 87 in the pipeline now in this crisis I should think the President could move and nobody would challenge him. A number of people who voted against the bill said they would prefer that. They thought the President had that authority.

HK: Then MAP doesn't get them the items they want. We will put it to them when we see them in Helsinki.

RK: You don't think it would be a good idea to just do it.

HK: No, but I will talk to the President again.

And the Mayor of Syracuse is a Greek and he called Philadelphia and we lost all those votes. I have never seen such a pressure operation. Chairman Tom Foley of the Agriculture Committee came to me and said there was terrific pressure on him and when he saw it was switching we lost him. We lost Mel Price that way. It was up to 212 when it began to change.

K: Well, you know there is this hysterical press reaction. I think it is a useful step. It is not a monumental step and I think given the bilaterals plus the fact that we are touring Eastern Europe, I think it looks good but not spectacular. It's not intended to look spectacular.

EK: Does this reaction surprise you? I mean this is all just between the two of us?

K: Well, I think what we are seeing now is a combination of liberals and conservatives for tatally differenct reasons, and totally different motives -- the liberals are giving intellectual focus and respectability to the conservatives. And I think people have to ask themselves -- supposing we go back to cold war policies, where will we be five years from now. And aren't we going to replay the whole Vietnam domestic experience again.

EK: I think what took everyone by surprise was that this sudden focus on what are we getting out of this whole thing which I think hadn't been the focus of attention until what - ten days ago, two weeks ago or something like that.

K: And after all 35 nations were involved in this -- this was not primarily a U.S. enterprese.

K: Hello.

D: Good morning, Mr. Secretary.

K: I was going in to see the President so I told Larry. We did not discuss exact figures with the Egyptians about the demilitarized zone but my guess is that there will be no problem of having it substantially what it is. As I told the Prime Minister once, it might be that you have a few hundred or a thousand more -- might be a useful question [gesture] but we are not talking about 20,000 men.

D: You told it to me, not the Prime Minister.

K: I told it to somebody.

D: And the other question on Tito. Can I say to him something that will set his mind at peace?

K: On Tito? There is nothing to say on Tito.

D: No, what I mean is I don't want to talk much about the conversation.

K: There is nothing to report.

D: No, no, I said I don't want to report. But what happened was that Tito said, as you know, after the meeting that now after he talked with the President he has come to . . . .

K: Later on he explained that what he meant -- in the assessment of the situation.

D: I see. The point is there is no change there -- you know -- when Tito said he agrees with someone . . . .

K: There was no substantive conversation with Tito except Tito's repetition of his general view and our saying nothing that would give him anything to report to others.

D: Yeah. But there was no indication that the United States would accept -- I mean . . .

K: Absolutely not!

D: All right. Thank you very much.

K: Wait a minute, now. I have now seen what the Prime Minister told Toon.

D: Yeah.

K: And I don't want to get into game playing exercises again.

D: Yeah.

K: We understood you to say that you had granted this because you were out of the Passes and therefore the major political objective of Egypt was achieved. This we transmitted to Egypt.

D: Yeah.

K: Every report I read says you are two kilometers inside the Passes. These are reports in your papers and now in the Christian Science Monitor and that we cannot accept.

D: I understand.

K: Now, we have given you all the _____ around there. Now there is no way that a bicycle could move in the area without being under Israeli observation.

D: Mr. Secretary, I don't really know what is in the Christian Science Monitor and I would . . . .

K: No, no, I just want to make sure -- we are willing to agree to some objective determination. What is out of the Passes? It doesn't -- you know -- this cannot be impossible to determine.

D: Well, I have passed all these on to Rabin last night and I'll find out what the answer is -- I really don't know. Maybe the answer is to have a very big map -- you know -- where the thing can be shown very specifically where we stand and then there will be no problem.

K: You know you may have to adjust it. I mean we can't accept the proposition that important XXXXXX as your negotiating team is, everything they say is engarved in stone.

D: No, we don't even claim this -- surprisingly enough.

K: On the other things we have for all practical purposes supported your position.

D: I passed it on to Rabin and I will get his reaction.

K: And I think if we can get that settled the rest will be negotiating adjustments.

D: You know, if you will remember, when the Egyptians first saw the maps. .

K: Their first reaction was it was out. Then when they started it they said it is in. Now they are not sure. So we cannot be talking about a hell of a big distance.

D: That is what I am saying.

K: I mean we cannot be talking about a hugh distance here.

D: That is why I say we should not pay attention to what we read in the paper. What is basically on the ground. And I think that there is . . .

K: In my judgment -- at first it looked like it was out and then they said it is in and now they are saying they are willing to let us determine it.

D: Yeah.

K: You can't be -- you know -- you can't be talking about more than a kilometer.

D: I really have no idea. Whatever I will say here will not be . . . .

K: No, no, you are not supposed -- I just want you to know that . . .

D: No, no, I understand your problem and I passed it on last night. To Rabin. We will hear what they have to say on this. I -- I don't think this should be a problem.

A: I just wanted to double check with you on the Southern Governor's Conference. I thought a letter had gone out to you but I just got back and it had not goine out, but I wanted to touch base with you aga in on this. The Southern Governor's Conference, which is on the 15 and 16th ~~as~~ of September and it is my understand that the General Assembly of the U.N. opens on the 16th. Is that correct?

A: When do you anticipate they would reach a decision in the UN on expelling Israel.

K: That depends on wheter we get an Egyptian-Israeli agreement.

A: Let me do this. If your schedule is a little flexible -- I'm trying to get Bill Simon to come and speak and I think I'm going to talk to him shortly. I believ he will probably come on the 15th and Senator Mansfield, hopefully will come on the 15th and the 16th might be a better time for us.

C: How did the European trip go? Are you pleased?

K: Actually the European trip went well and as s-on as sanity returns to our national debate which may not happen before the election we will see it in perspective. When people say recognizing frontiers every single frontier in Europe has been recognized in peace treaties or bilateral agreements. There are no frontiers for us to recognize or not recognize. This is not why I called you. What worries me is the liberal intellectuals are moving to the position of Dulles in 1954. This is a total untenable position for any length of time.

C: I think that is right.

K: I know it is not your position.

C: I think we need a healthy debate but I agree with you that there may not be much chance of having one immediately before the election. That is a prob lem we have to grappel with.

K: You asked me how did it go. No one in the conference room would have had the idea that the Russians were on the attack and we were on the defensive. If you read the speeches the challenges all came from the West and not from the East. If you look at the President's trip through the East there is no doubt that the feelings there are in the direction of liberalization and easing of their trying to shake off Russian domination to some extent.

C: Tell me this. There are a couple of people who are trying to get out of the Soviet Union. They are ~~jxxx~~ Jews and they seem to have a very good case and they have been blocked. Is there any way that we can help particular people?

K: Sure.

C: Without just gumming up the works.

K: I think it can be done.

C: Can I send you a letter.

K: The way I have found to be effective is if I take up names with Dobrynin and say this is not a governmental request but it would make a good impression. In about 60 percent of the cases it ~~xxx~~ works.

C: I wrote a letter to Dobrynin and got a standard reply and I thought maybe if I approached you on it you might be able to be of some help.

K: The reason I called you was I ran into your press guy.

C: Spencer Davis.

K: He is a good fellow.

C: Yes, he called me and said he thought you might have misconstrued his remark that I was looking forward to hearing from you as a request for a telephone call today. He meant only your testimony.

K: I see. As long as I have you on the phone -- he made a reference to the fact that some of your staff people think that I have been talking to the press about the substance of the facts of this. I want you to know that I thought your staff people had been talking and I was a little outraged. I have not talked to the press. I will not talk to the press. I think this whole tendency of leaking fragmentary information is very ~~xxx~~ bad.

C: Very bad.

K: We have a difficult problem here of maintaing confidence in the government. I think from the record I can see that you would want to know what the procedures were. I don't see anything in the record about personal responsibility so I am very much at ease about appearing before you.

C: In that connection we have followed the practice that many of the witnesses have said ~~xxx~~ thought fair, if there are documents they which we want to question about, those documents are reviewed in advance. There is no entrapment.

K: You have sent me a list.

C: That's good. I think we will try and low-key your appearance as much as possible.

K: My concern is if I am going to go off now to the MIddle East that the thing -- that there be no implication of my personal...

C: There is nothing in the record that suggests that. We will be very careful about it.

K: If we could do that at the end of the meeting. I am going xx there to help. I am not going to be combative.

C: There is not going to be any combative mood in the Committee, I don't think.

K: I have not talked to the press nor has any member of my staff. No one knows anything about it.. The way the White House is playing this at the moment is xx never fully clear to me.

C: Nor to me.

K: You must not assume they are out to help me.

C: I know there have been a lot of leaks in this town. My Committee has been pretty good.

K: Honestly, when I saw these various Horouk or whatever his name is, I thought they came from your Committee.

C: That was my impression. We have looked into it closely. We have decided that it did not come from our Committee and we pretty well think we know where they came from.

K: If you know, you know they did not come from me. I was pretty outraged by them. They are substantively -- they are off the mark in real substance. In any event it is not a matter to be in the press while you are looking into it.

C: I think, Henry, after you appear it might be well for the two of us to appear before the press so I can make the point that you have come as we have called former Secretaries of State for the purpose of making certain that we have heard from the best witnesses available of what the national policy was at the time.

K: That would help me enormously.

C: I will be pleased to do that.

K: I think that would help matters greatly. Will you be in town all of next week.

C: I think so.

K: Would you like to have lunch after my xxxxxxxxxx testimony at some point.

C: Sure, let's plan to do that.

K: Not on that day but say Friday.

C: All right. Friday of next week.

K: I could bring you up to date on where we stand in the Middle East. I am really very concerned about the way the East-West debate is developing in this country. If we have another ten years of cold war where will we be at the end of it.

C: I would like to talk to you about that and anything else that you think would be helpful for me to know and as far as your detente policy goes, I am a strong supporter of it. I take issue with one or two aspects where it comes to natural gase and that kind of thing.

K: That is inevitable and it does not mean that you have to approve every individual move that is made.

C: Your over-all thrust of your effort is one that I approve and I would like to give some vocal support to it.

K: I would like to discuss it. What I really see is a worrisome situation. I think that John Kennedy got himself into a hell of a box by the sort of campaign that he ran in 1960. I know from him that he felt that. He did not really hit his stride until he had liberated himself from a rhetoric that he never really meant to sustain.

C: He managed to scare the Russians pretty badly.

K: Yes, but he really wanted reconcilliation.

C: We should avoid that in this coming campaign and I would really appreciate the chance to talk to you about it.

K: Let's have lunch on Friday.

C: I will put it down and we will see you on Tuesday .

K: I will be through by lunch.

C: I think so if we start promptly at 10:00. We will try to finish with you during the morning session.

K: Dobrynin says they cannot do 20% discount. That would be political incomprehensible in the world position and in their country. They can do a straight swap. They will do 5 to 12 or 8 to 18 -- do you see what I mean?

R: I understand.

K: With each side taking the chance on world prices.

R: That is a risk.

K; That way you enlist us in bringing down the oil prices he says.

R: That is right. He has a point there. I am not sure whether it is a position we can sell. In my opinion it makes sense.

K: How would we handle it?

R: Work out an arrangement.

K: Why shouldn't we be able to sell it?

R: There are those who think the price of grain is down in relation to oil and the price of grain is more likely to go up than oil. We should get a differential and if it is wise then we can sell it. Over the past 18 months grain is down in price. In a swap arrangement we get less oil for grain.

K: Where is the price of grain now?

R: It will go up in the morning if that announcement goes out that I told you about. It will change the ratio.

K: It wouldn't be 5 to 12 any more?

K: On this grain for oil deal, do we have to put down requirements of discount or 5 million against 10 million of the world price?

R: Yes, 5 million for 10 million of oil which is the price.

K: Supposing -- that's right. The way it works out, if you swap 5 million against 10 given what 5 million tons of grain costs it amounts to a discount.

R: We have to parallel deals. We need more oil if you get the 20% discount. We should have 12 million tons of oil. We are not really talking about a swap.

K: The 10 million would be at world prices. The discount for the oil would be 12 million.

R: If you take 12 million at 20% discount, it would be the same dollar amount on 5 million tons of grain at the market prices. If you get a discount on the grain, you need more oil...

K: Right.

R: to come out with the same thing.

K: 20% more oil or 20% off the price.

R: If you are working on a straight swap basis it should be 12 million tons.

K: Are we going to do this regardless of how the price develops over the years? Can we keep that ratio regardless of the prices?

R: You can only approximate the dollar amount on both sides of the equation. We are saying that we will let you in if you give us a discount. We don't know what the market prices for the grain will be or the price for the oil.

K: My understanding from Dobrynin is that it is easier to agree on a swap.

R: We can work that out. It makes it more complicated. However, it is a way they can avoid the political disadvantages of saying they are giving us a discount.

E: The German Government knows about it.

K: Since when?

E: The German Government was in to see me about two days ago on the subject on instructions and I told them very probably we would have to go ahead with this. The . . .

K: But look, the President has just gotten through talking to people who tell them that we are wrecking their economy or at least not doing enough to build it up. He gives them no advance warning. He is not back a week when we announce anti-dumping actions. Now, I will not accept the proposition that a _____ bureaucracy couldn't have found a way around it. I just don't accept it. What do you mean it couldn't be delayed beyond today? What would have happened if we had delayed it?

E: Well, if we had delayed it, beyond today, then the Treasury would have been subject to legal action by the interested parties.

K: Like who?

E: The UAW and Congressman Dent are the two main interested parties but the UAW is the most powerfulobviously.

K: And you don't think we could have gotten them to lay off for two weeks? Two or three weeks?

E: If you think it is that important?

K: Well, I sure as hell don't think we should the week the President's comes back from a trip, for God's sakes.

E: Let me get on the phone to Treasury to see whether I can just tell them that.

K: I mean it just makes it look as if he is kicking them in the teeth.

E: Okay. Let me see if I can get them to put it off for two weeks.

G: What is this group like?

K: It is the Southern Farm Producers Association.

G: You are talking with the city leaders though?

K: Yes.

G: There will be a local press?

K: Yes, except I never would have picked Birmingham to go to.

G: Why did you agree to do it?

K: For Sparkman who is the chairman of the Foreign Relations Committee. It is not going to be a good speech. I gave a major speech yesterday -- this one is a general review of foreign policy.

G: I am really interested in the aspects you and I talked about -- what is on those peoples' minds.

K: I have no feel for the Birmingham crowd. It is a pity you couldn't have been with me in Milwaukee or Minneapolis.

G: I take it you are not going to do any others for a while.

K: I don't think my schedule will permit me to do anything before October.

G: But you will be doing this again?

K: Yes.

G: You don't have any room in your aircraft for me do you?

K: I don't know. I am not trying to scare you off if you are free, come. For all I know Birmingham is a hot shot town. Normally, I pick towns in the center of some area. K: I am thinking of going to Cincinnati at some point.

G: You know it takes more than a day to get down and back from Birmingham so if you are going to do this again soon maybe it will be more representative city and I should go then.

K: Have you heard from the Chinese.

L: No.

K: Would you take a look at something that came from the White House and see if there is something we should do about it?

L: Yes.

K: The Chinese are saying that I am using them to manipulate with the Russians -- but what are they doing?

L: Is this an intelligence document?

K: You just take a look at it. Did you give them the new dates?

L: Yes, the 19th and 20th.

K: I didn't show any impatience with them.

F: No, you answered some very tough questions. It accomplished the purpose. I told Sisco I wanted this group to ventilate. I think they did.

K: O.K. You were terrific.

F: On the Turkish thing -- I lit into you and you picked it up. That was great. You go with my good wishes. You will have a tough time and one thing I told the group -- being a mediator is tough. Now when Sadat says he wants to make a deal the PLO is accussing him of being a traitor. Whenever you are a mediator you never satisfy anyone. What you are doing is right. You get this and it will be a great accomplishment. That meeting went very well.

S: And you want preconfirmation?

K: Then you can add what the text of that letter would look like. Can you do that tonight?

S: Yes.

K: I have made a minor change on the Sadat letter but I will handle it with Jerry.

S: O.K. Good.

K: Thank you.

Mr. Sisco/The Secretary

K: What's his name called me. He has another formulation for that last sentence. It says the U.S. will not push Israel to give up this position.

S: He tried that out on me.

K: I don't think it makes any difference.

S: I rejected it. It is not the language it is that they are insistent on this. We have to be equally firm. I told them they are better off to delete that and we accept their first two sentences.

K: How about the paragraphs before that?

S: Even there they are insisting on a veto.

UNITED STATES DEPARTMENT OF STATE

K: We cannot give them a veto in light of the letter we sent to Sadat.

S: Of course.

K: We can promise them the fullest consultations.

S: They will cave on both of these.

K: I have reached the point where if it doesn't work it was fate. They have screwed up the agreement by pretending that they were raped.

S: What they have lost is the benefit that could have been gotten by Sadat feeling that this is the beginning of a new chapter. Now he will just take what he can get and get ready for a showdown two or three years from now.

K: That is right. They should have done it in March. 90% of this they could have done before. What they are getting in addition they would have been better off not getting. The American presence in the passes will be a nightmare.

S: They want a veto over everything and us there as a trip wire. I hope they are now convinced that this will not be accepted by most of the country with enthusiasm. Swanson of Standard Oil called me and said that they are driving hols into the Suez on the West side of the median line. What he would like to do is further south of Abu Rudies to begin to drill holes on the east side. In that area where it begins a UN zone they can make holes anywhere. He wants 30 or 40 miles south of this. I didn't encourage it.

K: Right. Do you think we have an agreement?

S: I think we are as near as we can get. I think we will get a few 100 kilometers more on one of the passes. If Sadat decides it isn't enough it could fail, but I don't think he will be that foolish.

K: Should I raise the figure we are going to give them?

S: Hold it until you talk to Rabin. Everything you give to Dinitz you will be unable to give to Rabin. If you move to 2.3 then give it to Rabin.

K: I agree. Thankyou.

Your speech with the President's with a few veiled references. If I had one person there were one hundred that it was marvelous that each set of remarks dovetailed with everyone elses.

H: Excellent.

K: That's very helpful.

H: I will be back in Washington next Thursday. I have a meeting with the Black Caucus and the Jewish Caucus and I am sure this will come up.

K: That would be a big help.

H: It is being worked on. I think that we will get their estimate today -- the liberal side of the House -- on the face that we will be getting 2/3 of the vote. I think it would be useful if non-Jewish mail were stimulated. Do you have any suggestions?

K: I talked to the President of Boston University. He says he will talk to his alumni.

H: Maybe I will talk to Rovosky. He is chairman of my International Affairs Commission and I will talk to the Colburn people.

K: Good, it is about time.

D: They asked me regarding the presence and support. It is a good atmosphere, I got a good feeling.

D: That is the line I used.

K: There may not be any better cause than Israel's security for a long-term basis.

D: It is a function of the agreement but it is a function of keeping Israel in a defensive capacity. The additional aid cost is unimportant if you calculate what the cost of a war would be.

K: Excellent.

K: Can you not give it a try.

B: We are going to get him in trouble because he has a strong commitment.

K: I talked to Hays in Alabama who would run you for God if he could but he was bitching a little about the Soviet thing and when I explained it to him he became enthusiastic.

B: O.K. But these Eastern European countries are something else.

K: I don't want to tell you about the farmers but why should they complain because they are going to make the sells any way and probably at higher prices.

B: They see that it would be no export controls. I think I have this fixed up on the Soveits if it is extended beyond the Soviets we are in trouble.

K: If you had said it is not convenient for the Agriculture Minister to come over for a few weeks -- from Poland --

B: Yes, we could have done that.

K: If you could delay it a few weeks. They cannot just go ahead yby themselves.

B: I expressed myself rather stonrly yesterday chiefly because I said we should have a man besides Chuck.

K: I agree. The reason I am calling you is that you have really been tremendously cooperative and you are one of the few Cabinet members sho is interested in the subject.

B: I plan to be. But cooperation is a two-way street.

K: Hello.

V: Mr. Secretary.

K: Yes, how are you today, Dick?

V: Fine, how are you? I'm calling about that report on Sadat that you've probably seen.

K: I'll tell you what happened. This is how we finally got the agreement made. Joe Sisco threatened to assassinate him but didn't quite make it.

V: Is this off-the-record?

K: No, you can quote me. No, Dick, we don't know a damn thing about it.

V: OK. Another thing I wanted to ask you about -- there was a report I guess . . .

K: I mean we know no more about it than the ticker.

V: Than the ticker. Yeh, I guess the voice of Palestine is not reliable.

K: I wouldn't go. . .

V: Another thing I wanted to check with you is that there was a report circulating that Asad told you or told the President that he would make formal peace with Israel if Israel gave back all of the Golan Heights.

K: That isn't correct either.

V: That is not correct. OK. Fine. And did Bob Anderson talke to you about the show?

K: No.

V: The special. Well, I guess we'll get to it one day.

K: Oh, you mean for you and me to sit down?

V: Yeh, ~~kxdx~~ K: Let's aim for that. V: OK fine. K: Thank you.

S: I called you because of the AP bulletin of the attempted assassination of Sadat which . . .

K: I don't know anything about it to tell you the truth.

S: No, it lost ground as the day went on. It turned out to be a Baghdad report and a report of an attempt a week ago so I took it at face value initially when I placed the call. Do you know of any attempt by any chance?

K: We don't know anything other than the bulletins.

S: Certainly when we were there we didn't know of any attempt, did we?

K: No, absolutely none.

K: Because if the information is correct . . .

D: Yeah.

K: How do you that this guy there isn't . . .

D: That is the same question I asked the Prime Minister.

K: That's right.

D: You will do this in a formal and nice gesture on the part of Rabin; that your strong advice is that we don't do this in Geneva.

K: Besides berating Dinitz about some others things, he is saying that we are mishandling the HAWK missile thing. He says that Case was talked to by a minor official of the USG.

A: Nobody called him from my office.

K: Did anyone call him?

A: Well Joe is seeing him at 4:30 today. My country director talked to Bryan.

K: That is what they are complaining about.

A: He didn't talk to Case.

K: Why deal with him, he is our problem on this. Why talk to Bryan?

A: It wasn't to tell him anything.

K: He must have given him the assurances last night. What did he have to tell him?

A: Joe asked us to pass to Case the message that we were trying to work out assurances and that we weren't ignoring him. We didn't tell him what the assurances were. Case has been almost impossible to reach this week.

K: OK Fine.

K: How are you?

R: I am great. You did a fantastic job out there. I wanted to tell you it is thrilling and if anything could be done for peace it has been done and no one could do it but you.

K: I think if we can get the thing implemented quietly it really offers good prospects. Do you think there is a chance of the Senate acting within the next two weeks?

R: Yes. I don't know what will happen with Scoop. I was there today and he wants to look ~~at~~ into the secret documents.

K: On the secret documents -- so far as an American undertaking is concerned, there is no problem. But between Egypt and Israel, it is none of Scoop's business If the Israeli's are willing, why should it be any of his business. If you make this publci, Sadat will have to disavow it, turn against us and my role as a mediator will have to be stopped.

R: I think you should get a hold of Simcha Dinitz and lay it on the line. Tell him to get to Scoop and say he is talking as an emissary of Israel. Scoop says he just doesn't know what is going on. I think if Simcha tells him....

K: How is it Scoops' role to protect the Israeli government?

R: Don't ask me about Scoop. I agree with you, but I am telling you how to handle it. Tell Simcha to meet with Scoop and point out to him that there could be no greater triumph for the Israelis and Simcha would hope that a s a good friend of the Israelis, he would use discretion here. I would rather have Simcha do it than anybody else. ~~X~~ He is in an official position. He knows Scoop and talks to him and I think he should do it before Scoop goes too far.

R: You made it plain. You have your enemies but as I was telling David Brinkley on Sunday, and as I have said before,-- and I say it now: you are the most popular political figure in America. I say political not in the sense of Democrat or Republican. You have to forget the Washington papers and a few Senators. In Connecticut you are twice as popular as I am. It is almost unbelievable. You have great strength with the people of this country. They trust you viscerally, they don't understand you intellectually, but they trust you. You should get confidence from that.

K: This is not a question of my critics. We have showed Sparkman and Case every relmotely relevant document. We are not playing hanky-panky here. We have an excellent record but it is because of that that we cannot put it forward.

R: I agree with you completely and Stennis buys it. Bartlett and Scott, I don't know, but they are stupid.

K: Bartlett wasn't so bad but Scott is [redacted], I think. B6

R: I think so too.

K: If we can keep Sadat on this moderate course we would change the whole policy in the Middle East. I will look good if they publish this out but Sadat will be finished.

R: That is not good. Whoever replaces him has to be a mad man.

K: Right.

R: Call Simcha.

K: I will call him.

R: Yes, and if there is any question I can chat with him but I think it is important for Simcha to see Jackson soon and if there is any problem call me back.

Time: 4:05 p. m.

B: Good Afternoon. How are you, aside from the New York Times article?

K: What does the New York Times say? I don't read it until late afternoon.

B: We have been getting heat about the lead story.

K: There have been stories of the alleged agreement. If agreements can be killed, you will do it.

B: That is not the intention. The stuff is floating around--not from your shop.

K: Where is it coming from?

B: I don't know. And I couldn't tell you if I did.

K: You know, but you won't tell me.

B: I am calling about something quite different. I am told from the Defense Department that in the second week of August the White House sent out word to get all details and put together a presentation on Panama. I am told from another quarter that a whole series of exchanges are running from State Department to Defense to White House--going around in a circle. My Defense Department source, who is in the Panama business, and who did not go into great detail, said Ford personally sent a request along this line that Defense put together something in ten days on this matter.

K: That isn't true.

B: I am getting a little confused. What was roughly the consequence?

K: There were two NSC meetings in which a general agreement was made on how to proceed. One was in July and one in August, but I would have to check. And all the other stuff is just a melodramatic line.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 10 MAR 2003 200102979

B: Was Defense leaned hard on this? Are they making up something?

K: Defense was not leaned on. That is absolutely untrue.

B: Had Defense dragged their feet on that?

K: Since then?

B: Before that.

K: Before that there was some. There was no clear procedure. It developed as a consequence. There was no Presidential leaning.

B: That is helpful. What bothered me about this was General Brown's statement. He said he had been requested by the President to go down there.

K: That is not true. He may have said it, but it is not true. He volunteered after we developed the new position. Brown and Clements volunteered to go down there.

B: That's what I heard. Brown's statement was misleading.

K: To put it mildly. It is true the President approved their going down there.

B: Do you remember when the meeting was? Mid-August or early August.

K: Obviously before the President went to Vail--first half of August.

B: That was not since wrapping-up package went into implementation of negotiating procedures for Bunker. That clears up a lot of mystery for me. I thought it was important for me to have something about this from the Defense Department, saying how they got to this stage.

K: They were not ordered to do this.

B: I gather Clements did a lot of ball carrying on this.

One other question: Is the MBFR negotiation resuming the week after next? Is our delegation going with new instructions?

K: No, on the same basis.

B: OK, there is nothing startling they are taking out there.

K: Nothing startling.

B: Thanks very much.

K: I don't want to fight Treasury on this sort of thing.

M: The issue is basically whether we will undertake to preserve purchasing power. It is an issue of indexation and it is a very touch issue.

K: Can't we leave that open and say it requires further study and work.

M: We can leave with that but the others want more.

K: But if we don't agree, what can happen? Supposing we refuse, what happens?

M: That depends on how we negotiate. We have been hoping for a consensus statement and we may have to end up having reservations.

September 13, 1975
Time: 2:35 p.m.

W: This is Kurt Waldheim. I am sorry to disturb you. I want to inform you that the negotiations on these economic questions are serious again. I sent you a message yesterday, but I thought I should tell you quickly what is happening. I just talked with Krank, Chairman of the Committee dealing with practical _____. Three points are difficult. Mr. Enders is not a easy man to deal with. There is some criticism about him.

K: It is undoubtedly correct.

W: I wanted to mention three points which are difficult. The question of the purchasing power of the developing countries and their protection. Next, the establishment of the link between SDR and the developing assistance. And the third part is part played by 0.7% of developing assistance.

As far as the first part is concerned, the question of the purchasing power should be the object of the developing countries. This compromise would be acceptable to the 77 and EC countries, but it is not accepted by US delegation. The second point is the question of the link. Here is the Swedish proposal which is acceptable to the 77 and EC--the establishment of a link between SDR and developing assistance should form an integral part as and when they are created according to the needs of international equity. The third point is the target year. The 77 and EC have agreed that the target should be the end of the decade. The US has not accepted any target date.

K: The target date is what?

W: The end of the decade. Then we have the 0.7% of development assistance. The 0.7% of development assistance of the gross national product of what is to the developing countries. This is something on the agenda for Monday. The question is when can you accept the target date for implementing the 0.7%. This is not merely the main question. I was told if something can be achieved on it or maybe protection of purchasing power/the developing countries and in regard to the link between special rights and development assistance, then I think the target date wouldn't play such a role. The three points can be negotiated. Some concessions should be made. The EEC countries are more forthcoming than the U.S. They are starting to accuse the U.S. again. They (the U.S.) are too stiff

K: The question I wanted to ask you is this. I am not an energy expert. I can outline foreign policy not domestic side.

A: Bill Simon would have that. What might be interesting to us--anything you really want to say and just a general outline of trouble spots in the world and then close out on what you think the prospects for the Middle East are. To whatever extent you feel they are tied up with our ability to come to understanding with the oil nations. Just some of the international problems with oil. Specifics on decontrol would be partly domestic.

K: I will talk about their strategy with oil and a general view of international affairs in particular.

A: I think that would be excellent.

K: The question period could be more comprehensive than energy and more fun.

A: One of the questions in our minds as governors is whether or not stabilizing enough might have some impact on OPEC where they might mellow gauge us with an increase--the impact on national economic and states. Cover it to the extent you might like. Try to cover whatever you want. Will have you respond to any questions, even outside the immediate area, if you're agreeable.

A: I can have somebody maybe get a better idea of what Zumwalt is speaking on and call you back yet today. Bumper obviously speaking essentially on Senate side of oil problems.

K: I know the domestic side but I couldn't get into a debate of governors on domestic aspects of decontrol.

A: That can be made clear. That is why we asked Simon to come.

K: I can tell you about international strategy.

A: And how you think it obviously has to help stabilize situation and make the Arabs more moderate. It started out as effort to use as leverage. If the _____ can stabilize, it is now just price. This would have substantial impact. You would like to speak on oil prices and beyond that everyone would like the opportunity to ask you questions generally.

K: That would be the most fun for me.

A: I look forward to seeing you. They asked me to be at the airport 45 minutes before time.

K: For god's sake. I am suffering from the imperial stage of my incumbancy. I don't expect you to be there. If you want to be there and ride in with me there is absolutely no reason in the world for you to be there. 45 seconds ahead of time is more appropriate. Can we call you when I leave so you can have exact arrival time.

A: That would be helpful. I will be in contemporary. I will be in the building.

K: I will get them to call you when I have left. If you were there 2 minutes before my appreciation for your judgment would decline. Nancy is not coming down.

K: I have to go to Cincinnati tomorrow.

A: Is your meeting definitely set up in the morning with your network people?

K: I hope they haven't asked them to be there 30 minutes ahead of time.

A: We sent out an outline. I need a better schedule. We will play that by ear. If you can call me and let me know.

K: Does this session have to be an hour and a half?

A: It can be cut short. We will settle that tonight. If I know exactly your time schedule for your arrival in Cincinnati, we will do our best to work it out.

Zumwalt is going to talk about the shortage impact on the private sector.

K: Moynihan is driving me batty. He wants to agree to 0.7%. I personally feel for us to agree to something like that is truly cynical.

B: The formulation they are working on this morning is that all countries who are not committed would make their best efforts to try to arrive at something.

K: There is no possible way we can arrive at --

B: It is a phony.

K: Let it go through in reservation. We respect it as a noble call but the only reason we can't approve it is that we can't meet it with our domestic situation the way it is. That is a much more manly way of doing it.

B: Certainly. It is more honest. The only question to be raised there is whether the final document will be put in with the understanding that individual reservation can be stressed or whether we list deep reservation everyone can accept. One could have the understanding that we are of the consensus that the document really does reflect true agreement of all parties or we have a document where individuals agree they can put up with part of it, which puts us back to the 6th Session, which we hope to avoid.

K: I just don't see how the President can on one hand veto bills of a billion dollars and then promise to put forth efforts to quadruple aid.

B: The original reservation we put in when development target was established, we did not object to ultimate target. It was to get a timeframe and the schedule LDCs were calling for. Javits who handled it that time put a reservation in on the time factor which we could handle now.

K: But in this climate in America to say you are going to quadruple our aid, I think is cynical.

B: It is phony. We know we are not going to obtain it in the near future. It is a question of whether or not we can accept this as a un___ q___ in foreign assistance without a time limit and since has been accepted in development. This is a broad objective to which we can provide and we cannot say when we ourselves can arrive

at this objective. I think this would be understood in the UN and consistent with original reservation Javits stated in early 60s.

K: Yah. OK, I will talk to Moynihan again.

B: I am sorry he was bothering you so much. He is determined to pursue in a number of quarters.

K: He went to the White House and I am going to smash him. You tell him once more and we will have a new ambassador.

B: I already urged him not to come to you with bits and pieces.

K: Why is he in a hurry?

B: He just emerged from final negotiations. We have been resisting up to now. In the last round everyone runs for some kind of common denominator that we can live with for the sake of general consensus.

K: Well, I have to work on a speech.

A: Yes, sir.

K: ~~Have you got it? Have you got it?~~ Have you got the text?

A: Yes, sir. It is just . . .

K: Come on, just tell me what it is. It must be unpleasant or you would have told me by now.

A: It's pretty bad. I think it is . . .

K: What is Pickering doing at the other end? Or is this all part of the club!

A: No. Pickering, I think, is -- has done his best to get it watered down. He didn't get it watered down as much as we would want. From the Jordanian point of view it could be interpreted as something they needed for domestic consumption and that they might still be prepared to go ahead. I think our position simply ought to be that we stand on the commitments to Congress and Jordan . . .

K: Look, the God damn trouble however is if you had checked the letter we would know. We have now taken the Congress off the hook. I hope you realize also we have now opened it for Jackson to say none of the assurances we give to Israel mean a God damn thing because they will be disavowed if they become public.

A: Yeah.

K: And we have taken the Congress of the hook -- noboby can vote on the God damn thing now!!!! With any clarity of what the issues are anymore!!!

A: Well, that is between us and the Congress. They have our assurance that unless these understandings are . . . .

K: We are now part of cancelling the God damn HAWK deal instead of the Congress.

UNITED STATES DEPARTMENT OF STATE

A: Mr. Secretary, I think if it's cancelled it is the Jordanians' choice.

K: So you've put it on the God damn Jordanians.

A: Well, the Jordanians . . .

K: But everybody has covered his bloody asses!!!

A: The Jordanians have in effect had a second thought about what they agreed to . . .

K: They couldn't have had it if we had proceeded properly and if we had an ambassador there who was not half working for them. And whose major job [illegible] he thinks is to get along so he was fussing around all day long yesterday. I didn't have a [illegible] clear draft of the situation at any point!!!

A: Well, look, I am sorry, Mr. President -- we cleared and the King agreed -- reluctantly -- but he agreed to the language . . . .

K: But it is also true that if you read that letter -- in an Arab public opinion -- they don't know that four of these paragraphs are provisions of the law.

A: The Jordanians of course do. We've told them.

K: The Jordanians are living in the Arab World. The average Arab does not understand that this -- are the provision of the law and that this is standard. You could have at least made clear in the letter that in addition to the assurances here are standard provisions of the law which we feel of course familiar. That would have saved the King's prestige.

A: We can say that in any public statement.

K: You can any -- thousands of things now that we have been kicked in the teeth by the King. The whole point of using the HAWK thing is to get the King on a more moderate thing has been totally destroyed!!! Because, we are either going to grabble now and beg him to take the stinking things or we are in an endless fight with the Congress.

A: Well. I think, Frankly Mr. Secretary, that the Jordanians have . . .

K: I think frankly, that the Jordanians had to read this letter in terms of its cumulative impact and they are not part of the Foreign Service club -- he is not an FSO 5 whom you can push around. He has to live in the Arab World. We should have considered what the impact of this on the other Arabs would be!!!! And therefore we should at least have given him a chance to draft it in such a way that other people knew that there was only one paragraph that is a new assurance in this.

A: Right.

K: We ruined ourselves now in terms of our Congressional position!! If we can open up the issue of every assurance we give to anybody and what evidence we have for it. In the light of the Suez Canal thing, it is going to raise another set of issues. They have taken the Israelis off the hook. It's taken the Congress off the hook. It put Jordan and us on the hook!! This couldn't have been the point of the enterprise. Sure, we can now blame the King for it. We have a great way out. That's what everybody wanted!! Everybody's ass is covered but our position in the Middle East is further jeopardized. And you know that this is true! Certainly we can pin it on the King now and you know that this is the phony.

A: Well, the problem . . .

K: It would have been ten times better to get the ~~King~~ Congress to vote it down and have us not collaborate with it.

A: Yeah.

K: It would have been ten times better to get -- to go to Case and say he can't do this in a public document.

A: I was against a public document consistently, Mr. Secretary.

K: Yeah, but I've got assistant secretaries to tell me what the problems are!! Not to steamroller me into a temporary convenience. . . . took for granted that this letter had been cleared and that the King was aboard. And when Brent Scowcroft raised it with me yesterday I told him unbelievably the King has cleared this!.

A: Right. I am sorry for that if we misled you in that regard.

K: There was no hurry. We could have waited!! We could have waited a day and made sure. Have you called Case?

A: Joe called him. I was here in his office.

K: Yeah, but I want to make sure -- God damn sure -- that you guys don't pin it now on the King.

A: No, we haven't done anything now except tell him that we are trying to get to the bottom of this and asked that he not make any statements and we would be back in touch. And he said he agreed.

K: And now can we find out from Pickering, if he gets off weeping with Rifai, exactly what the Jordanians intend to do.

A: Yes. Yes, I am . . .

K: Can we get that within the next two or three hours?

A: Yes, sir. I will prepare something right away.

K: You were not happy? He gave me the impression this morning, I had breakfast with him, and I asked him how did it go and he said very well.

D: It went well because we talked for three hours about the situation in China and Portugal, as it effects the policy.

K: Whose fault was that?

D: Schlesinger's fault. In the last twenty minutes, he said all the items that need to be supplied to Israel that were not unfrozen by the reassessment, I mean, those that were frozen by reassessment and would be released -- but I already had that from you.

K: I told you that.

D: Yes, and those items that we agreed to -- can be ordered through the factories but not from the stocks, which in some cases is alright, except for two or three items. But all our regular items are under review of the NSC and therefore he and Ellsworth and his assistant could not give us any answers until the review was over, which freezes things like our HAWK (?) which we have ordered and on things like Fleur and Night Vision, they are under review and the production of 100 planes of the F-16 is with NSC. I am going to go over it in detail with Scowcroft.

K: Why don't you go over it with Scowcroft. You may not believe this but I can not find out what he tells anybody.

K: The International Relations Committee hasn't voted it out yet, neither has the Senate Foreign Relations Committee. They are just not moving with great speed. There is no one opposed to it.

D: I will see what I can do in these two Committees. Allon and Rabin talked to me about the following matter. On Gromyko, you remember you arranged for Eban...

K: Yes, I got a cable on that. I think Herzog ought to approach the Soviets.

D: You got a cable from Toon? Rabin said find out your opinion.

K: I have nothing against it.

D: He said if so, to ask you to do it.

K: What do you think?

D: I think it should be done through you so they don't think we are playing behind your back.

K: Why don't I mention to Gromyko and if he is willing they can approach you.

D: We would be prepared for such a meeting and wanted you to check.

K: Ok.

D: About Gromyko. We are concerned about what is happening in the Credentials Committee at the UN. Did Sisco tell you?

K: No.

D: There are nine members -- two Europeans, Costa Rica, Venezuela -- these four are alright with us, they were both against suspension. Then there is Libya and Mali, both negative, then there is the Soviet Union, Mongolia and China -- all of which means the Soviet Union has the tipping scale on the Committee and we thought you might say a word to Gromyko that could prevent Libyans, who are behind the move in the Credentials Committee on those voting against us .

K: Ok. I will do what I can. Good., se you at breakfast.

D: Alright.

K: What is it that the Panamanians object to? I thought I was supporting them.

R: This is another example of press distortion. "The United States must maintain the right, unilaterally, to defend the Panama Canal for an indefinite future, or for a long future." That was the sentence the press took out of what was otherwise a good statement. For example, this means Panama does not rule on defense of Canal. That is what has made them apprehensive.

K: Don't they understand anything? In the context of the Southern Governors' Conference, this was very tough support for them.

R: We are proposing another statement which is coming up to you in the next hour or two. We have been saying this to Torrijos that the thrust of the example was a good answer to Wallace and to watch out for guerrilla warfare. The way it got played in the press down there, to pick out one sentence and blow it out of proportion.

K: You can tell them what I am negotiating.

R: Sticking to the statement of principles.

K: Absolutely. I frankly had forgotten that the National Guard was supposed to participate in it.

R: We are trying to contain it.

K: Is it bad down there?

R: I called this morning. Everything is quiet. There was a quiet march into the Zone. Do you know Torrijos has been talking about the statement himself, about the progress of negotiations? I think we should get to Torrijos before he makes a statement.

K: There is no one -- I wasn't telling the Governors where we were heading.

R: He doesn't object to what you said. We are trying to get to him an accurate statement of what you said.

K: Does he know what I said?

R: We got the transcript to him. It is down there now.

K: Okay, it doesn't make any difference. Why do the Panamanians think negotiations are at a deadlock?

R: I talked with Bunker. He is convinced they don't understand the proposal. What is going to happen? (a) First we will send our Ambassador down to Panama to tell them what we have in mind so he can explain to Torrijos. Then their subgroup is coming up here to work for three weeks on the real proposals we are making. It will be a month before they can perceive what we are talking about. Basically, they wanted to go with little progress because of the press play at the Southern Governors.

K: I thought I was giving them a lot of support.

R: You were. Torrijos read it that way. It was the way the thing was picked up and played in the press down there. It poisoned the atmosphere that way.

K: Just make sure they get the right report.

R: I will make sure he got the statement. I will get back to you about getting a statement to Torrijos before tomorrow.

TK: That's right.

K: You are not supposed to agree with me.

TK: You promised me one time if anything came up on an oil/grain thing with the Soviets you would let me know. I have the distinct sense that it is in the works now.

K: Not in any direct way. And not immediately. But much closer than at the time you and I talked.

TK: What is Meany coming to talk about? Isn't this it?

K: No. Believe me I do not know what Meany wants to see me about.

TK: Oh, he asked to see you.

K: Yes.

TK: Where do we stand with the Soviets.

K: I testified to that before the Joint Economic Committee this morning. Robinson is going back at the end of next week. Nothing will happen before then.

TK: You are saying there is no direct trade involved. Indirectly it would amount to the same thing if they go back with grain and come back with oil. Isn't that the kind of thing being discussed.

K: Not that directly but I cannot go into what is being discussed. Up to now it is still being discussed. There is not shipping yet because there is no agreement.

TK: I find it difficult to draw the same distinction as you. If we sell them grain and we buy oil and it is part of the same deal it ends up being that doesn't it whether you talk about a separate grain or oil deal. The two will be linked in everybodies' mind except the legal theoriticians.

TK: I see. But isn't it a problem for use if we don't. The other way around-- it is good for use if we can link it.

K: In our case reality -- we don't have to say what it is. Everyone can draw their own conclusions.

TK: In the news report yesterday were you the unnamed official that said there was a positive mood with Gromyko.

K: It must have been Sonnenfeldt.

TK: I had the impression that everything was negative.

K: I think you are wrong. The press now is in a little bit of a negative mood. The mood was concillatory; the Mid-East things were moderate and SALT you could not tell because it was a generaly review of preliminary positions.

TK: Without SALT you don't get Brezhnev. Is it still your feeling you can get him this year.

K: Yes. My feeling is whenver one or both sides decide to settle this they could do it withinsix weeks.

TK: You have been saying that for a long time.

K: I cannot tell you when that point will be reached. It can happen tomorrow and two months from now.

TK: If the US was the one to make that decision you could tell me.

K: Right.

TK: So we are not the ones.

K: It is just not possible to tell. Really it is.

TK: I am trying to get a feel for tonight because obviously we have to do a piece.

K: Tonight as far as the mood is concerned I would describe as positive. As far as SALT I would be neither negative nor positive. Really we have not gone into that much detail. Sunday night I can tell you.

TK: What areyou talking about tonight -- will that be SALT.

K: Will include SALT but the bigger SALT discussion will be Sunday.

He said he would have tremendous difficulty -- I want you to understand that Shimon and Rabin are not exactly representing the same problem. They do not have the same problem. Shimon does not mind Rabin's having problems.

K: I did not note excessive loyalty.

D: The Egyptians could initial and while waiting for the Congress to sign you could get a date when the boat should pass. The date should then be after the signing -- the fullfilling but before the beginning of implementation. This is the maximum Rabin said he could stretch himself. Otherwise it will be voted out.

K: I have had the same idea which means-

D: Within two weeks after the signature.

K: That was exactly my idea. But I was not going to propose thise to the Egyptians yet. Let me propose it and say this is the maximum that can be done.

it in two bits but it is better to do it in one. If they do it within two weeks they will not say three weeks. It does not ease their problem.

D: All kidding aside the problems that the PM would have, he would not be able to get the thing ratified in the Knesset -- I mean the implementation part of it.

K: My instinct is that we can handle that.

D: O.K. I will tell him that you will proceed along this line -- on the initialing.

D: And we should get the Congress at the end of next week?

K: If you can dao anything on this. I will tell that son-of-a-bith at the Defense Department what he has done with these leaks.

D: I want to tell you that I have talked to Berger and Gwertzman and they are both going to take care of him and I am going to see the Defense Department gets the press that the Israelis expects them to get. It is so mean.

K: It is totally unconscionable.

D: They are doing two things. When we come to ask for something that is in stock they say we are weakening the American army. When we ask for something long range they say they have not been consulted.

K: Which is not true.

D: It is not true. We are damned if we do and damned if we don't. What is the nastiest part is it again starts a debate here.

K: Every American is in favor of not taking it out of stock. They don't have to elevate this into a principle. Sometimes perhaps we will want to take it out of stock. It would not start a debate if it is presented in the press in the same manner as to your people. We are only continuing the same policy. The Pentagon has been aware of this since 1974. All we are trying to do is give Israel a long-term security basis so we don't have to take them out of stock. If you can get it into the press, I will get out my statement of this morning.

D: I have already talked to Marilyn Berger and Gwertzman on this. I will talk to others.

K: I just talked to Moynihan and he says he does not have a new copy.

L: He is getting the one this morning.

K: Which is driving me to tears. What possible reason do we have to get the latest perfectionism when I need the comments today.

L: We have sent him both drafts and he has no comments.

K: He did not get the draft of last night.

L: It is on the thermofax now.

K: That means I will get nothing from him on it.

L: There are no major changes except on Korea. He has that and has had no comments. If he has any problem, I can include them this evening with my comments.

K: It would have helped me to have had them.

L: You are right I should have gotten it to him last night when it was first issued at 10:00.

K: This building is beginning to work for itself.

L: I should have thought of it last night. We will make sure we get his views.

K: He will comment on his views. He should have been told you must work on it and you must have your comments in by noon and then he would have done it. Don't just send it to him for views.

L: I will get back to him. Have you given him the urgency or should I call him.

K: You call him.

K: Pat, how are you.

M: Well, thank you. Taking a little beating about the heads and shoulders on things you are aware of .

K: Take it easy. Don't get too combative.

M: No. I spoke back last night. I had too.

K: On what.

M: On the Vietnam thing.

K: Oh, that's fine.

M: And on South Korea.

K: I think you are right there. I think you are being a little harsh on the Russians. They are doing their normal thing.

M: You know about the exchange.

M: No, I don't know about the exchange.

M: The Albanians made a great speech about the US and that we have been keeping countires out all the time. I said the Albanians were talking about the wrong super power. The one that was socialist and not the non-socialist. I went on to make a serious statement about what would happen to the UN if it ceases to be representative.

K: Did the Russians reply.

M: Malik replied this morning in some indignation re Dulles, etc. I said to him afterwards that he really must write his memoirs.

K: I would not respond to the Soviet attack.

M: It was very restrained.

K: I would not deliberately pick a fight with them.

M: Not with them but with the Albanians.

K: This is not why I am calling you. I mention it only because of your cable. The other day which is likely to

leak and for other reasons I don't want to heat up the temperatures with the Russians now.

M: Let me say that I don't perceive that in anyway around here.

K: That is not why I am calling. I am calling to find out if you have read the speech I am going to give.

M: Yes and also Len Garment. We like it and particularly the passages on human rights. We like it. I have heard there is going to be a third version coming up a little later.

K: It should be up now.

M: Buffum said it would be up this afternoon. It is being datafaxed.

K: If you can let me have your views as quickly as possible. I don't know why they didn't send it to you earlier. I am working on it and they aren't. Their version is finished. Your comments do me no good if you call me after tonight. Phone me your reactions.

M: I will. Let me tell you about the setting. This Vietnam thing is nasty. You read the Washington Post this morning.

K: No.

M: For what it is worth, we spent three heroic weeks on the Third World and economic matters. Never got on page 47 in the Washington Post. Vietnam comes up and we are on page 1 this morning. I guess I would have to say it is my sense that what the mood over there is that the Post reporter is right which is that ~~white~~ -- I got applause to my statement last night -- nobody believes us.

K: So what.

M: Well, I don't know.

K: They don't believe us because they don't want to.

M: O.K.

K: You mean on Vietnam.

M: Yes. Nobody believes us and the issue of Vietnam will come up again on Monday and the British last night were calling us to say that the Mauritanians might be trying to do something simultaneously with your speech in order to mar that impression.

K: How can they do it technically.

M: Mauritania is President of the Council. The British were being friendly in reporting this remor to us. The Mexicans were absolutely poisonnious about us. About how we got beaten in Vietnam and how we deserved it.

K: I think I will make a protest to Rabasa.

M: Well, do what you will. There is that situation. ON this point I need your advice and you are the only one who can give it. Which is I think the Koreans should resubmit their application the the Security Council on Monday because if they don't what I will be doing is vetoing the Vietnam while we vote for Papua New Guinea and I know it is all rather abstract. The fact is the case that we are keeping Vietnam out because we want Korea in but we are objecting to letting Communist countries in while keeping anti-communist in. My question is should we tell the Koreans to reapply.

K: As soon as we know there is a Security Council meeting.

M: There will be on on Monday. It will be on Papua New Guinea. Almost sure it will come up.

K: I suppose we should encourage them. Talk to Phil and Buffum and get back to them.

M: I will talk to them and let them get back to you.

RELEASED IN FULL

S: Sorry to bother you.

K: That's o.k.

S: On your remarks today. I have the text. The problem is that I don't recall any announcement that now Israel can have the F-15 Lancers, etc. And that is what you seem to be saying. You seem to be saying you don't want to go into general items but the items held up as stated publicly before. Perhaps I missed a step before.

K: Actually I don't know whether we announced it formally but the Israelis announced it.

S: The three of them.

K: I don't know whether we itemized them. We said the items held-up are being released. Rabin announced it about two weeks ago.

S: Part of my problem is that Schlesinger , a few days ago, was saying no new commitments have been made. I tend to think of Lancers as new.

K: He would have had in his mind that these were not new commitments.

S: O.K.

K: You see what I mean.

S: I do. And the Israelis are saying that there was always an agreement in principal on the F-15s.

K: That's right.

S: Which adds still another slight wrinkle. I have thought of these as new imtems waiting for the reassessment to be completed.

K: The F-15s were not withdrawn. We held up a visit of a training technical team.

S: Right. And a Lancer team that went whome which seemed to suggest a freeze.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER

K: I think they had completed their training.

S: I see. I did not remember anything from the Israeli end. I was watching here.

K: I don't know whether there was ever a formal statement here.

S: One more and last point. The F-16 -- your remarks on the F-16 I think were incorrectly interpreted by Reuters which put out a story from London saying you are acknowleding that they are to get F-16s. I don't think your words say that. Am I wrong?

K: I said the problem of the F-16 is that they are five years in the future. I was addressing these stories in the papers today that a lot of new things had been promised because of these agreements. I said that they were already on the list.

S: Indeed. Pershings. Also I see things that are in conflict with Schlesinger that I followed you on.

K: If there is a conflict he has never told me. I read the newspapers but we had an NSC meeting on Israeli supplies which would have been the time to make his points if he has any and he nver made any.

S: You know what I mean. He said late Thursday or Friday that there was no advance consultation before that list.

K: There was no need to have consultations. The list was before us and before them. All we need to do is pick up the study again and perhaps accelerate it a bit. This is all on background.

S: Completely. I did not know how to deal with the Pershing because I was confused on the F-15 and F-16.

K: On the 16s we are quite sympathetic.

S: Do these things work through 69-80. Did Peres leave here what amounts to a commitment for the future.

K: We agreed in principal to look into it and as the plane gets ready they can begin to start placing the order.

S: But we have no new things.

K: No. We will be fairly sympathetic on the 16's. It is a follow-on to the F-4. A better plane.

*

S: All the motion is being spent on the Pershing. I just watched CBS.

K: Tonight.

S: Yes.

K: What did Bernie say.

S: Bernie tread lightly on the Pershing thing. I think he mentioned the Lancer and F-15s. He did not make it a breakthrough day. Said something about further indications. Then switched to the Pentagon and they did the map of the Middle East and the population centers. A guy named Rangle said this would fuel an arms race. They would be able to hit population centers, and that a commitment does not mean anything.

K: When they ask for a battalion and it is a life and death thing they should hit something. A battalion is only four Pershings. People talk as if we are giving away hundreds of weapons.

S: Right. I don't do the Pentagon.

K: Is it your impression that all of this is being leaked out of the Pentagon.

S: Yes. It is my impression that the Pentagon is doing a job. I don't think it is the Hill. Laten yesterday -- why say there are no new commitments. Then the routine about the Pershings and no advance consultations. Sounds like a little antimosity there.

K: Yes. It stood to readon that we had to help Israel if we did his. This is one of the purposes of doing this. Never in was there a dispute about this. It will blow over I think.

S: I think so. ~~The major thing is to get this God-damned congressional vote.~~

K: The major thing is to get this God-damned congressional vote.

S: Have you changed or -- I suppose it is a technicality -- are you going for a current or joint.

K: I think joint. We will do whatever the Congress wants.

S: I would want the joint.

K: Joint means the President won't....

S: Some people think it has a standing that a current does not.

K: I think it will bea joint.

S: That is stronger and something to fall back on. All right, sir. Thank you. See you in New York.

J: I wanted you to know before you came up how strong the sentiment is here. It is very strong.

K: It is very strong here too. If it doesn't get better, we are not going to be able to conduct foreign policy and we may as well find out.

J: I think that is true.

K: I know you are with us but it cannot be that all of the accommodation must be made by the Executive Branch.

J: I think it is very important for you to come, knowing what the situation is.

K: What do you think I could do?

J: I think you should get down to detail of what there is in it that would be embarrassing. Not just the global thing. All of it is not embarrassing and would not be harmful to Sadat.

K: Jack, we are getting into the same position as we did before these committees that want to declassify an analysis of what went wrong in Cyprus--the intelligence paper. In itself we have no problem. If we ever have to ask for such a paper again, no one will ever tell us the truth again. How can anyone deal with us in mediation in light of what is going on now.

J: I believe the best approach is to start with particulars and then go to general rather than the other way around. You have to decide whether to take it or not. That is my advice. I would like to see particulars started with.

K: I have given up with it to tell you the truth.

B1, 1.5(D)

K: I think we are heading for a tragedy.

D: It was that bad?

K: Are your people work ing or going through the motions?

D: I was looking for Church because I understood he was the problem. I talked to Javits after I couldn't get ahold of Church. I told him our position. He said it is similar to Kissinger's position.

K: Let me give you my analysis of what is going on. It affects your survival. This is a fight where there is a massive public opinion against the technicians but the provisions are part of it, they want to debate what they mean. They said it.

D: They said they were against the techincians?

K: No, they said they are for them but all the mail is against it and therefore they are looking for an excuse by which they can vote against the technicians without inflamming the Jewish people. So they are hitting our secrecy.

D: Our people don't read it this way.

K: Well, how do they read it?

D: They read that it is a distrust by the Congress of the Administration.

K: Nonesense. If you report that to your government you are misleading your people.

D: I am not reporting anything to them yet. I am just trying to help.

K: Where is the Jewish community?

D: It is writing and approaching senators on the problems. Not the problem of secrecy, of course.

K: The issue has nothing to do with secrecy. Everyone who is talking about disclosing wants to debate the substance of the memo of agreement on the floor. There are provisions in which it refers to the Egyptian disengagement on the Canal. You know what that will do to Sadat. We might as well give the.....

D: I understand the problem.

K: The next time the Foreign Relations Committee meets is next Tuesday. That is September 30. October 5 the first thing is supposed to happen. It will now not happen on October 5. The whole time table is off.

D: I am just as concerned as you. We have had seven or eight people working on the Hill today. We have tried to mobilize the community behind it.

K: Unfortunately what frightens me is that you can't do anything about it.

D: I can appear before the committee and tell them that we are satisfied with the commitments and that we have no interest in making them public. I could tell them we are anxious for the thing to pass quickly because of the October 5 date. We want the resolution to pass without interference. But I might tell you what I heard. They said there was a tendency to go along with Case. Then Joe angered them by saying there was no need for anything to go public, not even a summary.

K: Joe thinks there should be a summary more than I do.

D: The sentiment was going toward the Case thing.

K: Joe wants a summary.

D: He didn't this morning. Check with him.

K: I have. A summary has problems in my view because it will be compared with the New York Times article.

D: I am telling you what your people reported to me today.

K: You had better face one fact, which is that something has happened to the Israeli support on the Hill in the last few weeks.

D: I don't think it is an Israeli issue that is involved.

K: If you report this you are misleading your government.

D: I am not reporting anything to them yet.

K: There is distrust of the executive but it wouldn't produce this reaction unless the public was massively against the technicians. Even Magee was supporting us but he was saying there was opposition to the technicians in Wyoming. He said every once and a while we have to disregard public opinion in the interests of statesmanship. Not a one said that the public opinion was for the technicians. Humphrey was marvelous.

D: The whole thing is complicated because of the technicians.

K: It makes it impossible. On top of this if you add [redacted] the B1

2 million, I just don't like this. I don't like it to become demonstrated that we can't put through an agreement.

D: If I can do anything specific to help, I will.

K: I don't know what you can do. If you tell me you don't know what to do, I think we are headed for a disaster. It will be a disaster totally when the first Egyptians can't get through to Sutra (sp). [redacted] B1

D: When is the next meeting of the Foreign Relations Committee?

K: Not before Tuesday. There isn't the beginning of a solution. They are handling this the way they handled the Vietnam appropriations. They don't care. There is public opinion on their side.

D: The only thing is to go on the Hill to talk to them personally.

K: I am in despair.

D: I completely agree with you on the consequences, maybe not the analysis.

K: There is distrust of the Administration, but it is the public opinion that is ruining this agreement.

D: There wasn't public opinion.....

K: It is against the agreement. McBundy called 10 senators.

D: About what?

K: To get everything out in the open which is the new way of blocking the agreement.

D: We don't want it open.

K: There wasn't one of them who didn't link it in the session. They say they are for it, but then they argue against it. Scott was good but Case has fallen off completely.

D: Church is for the agreement.

K: Church is positioning himself for the Presidency. He depends on Jewish money so he is making demands that have impractical consequences and thereby stalling the passage of the agreement. Church could have said we will work together until it is settled, but he hasn't. Javits or Percy had the idea of putting the New York Times article in the Congressional report but Church rejected it. He tells you he is for the agreement, but I don't know.

D: He tells you that too.

K: He knew about the technicians.

D: Of course, I remember.

K: I showed him everything.

D: That is why I think they are fighting other wars.

K: I would be delighted if you were right. Suppose they pass it on Monday, through both Houses, and the President signs off Tuesday. If I were you I would get the Jewish leaders together because the situation still leaves us much less time and it is serious. I am recognizing Vietnam symptoms.

D: I understand this.

K: We have two problems. The immediate problem of getting it through.

D: I understand this. I have mobilized the Jewish community.

K: Only Humphrey had good things to say about Israel. It was like before. The secrecy is just a peg on which they are hanging this agreement.

D: Also secrecy is big deal now.

K: If there were public support for it they would have voted it through so fast your head would be swimming. When they want to pass the defense budget the committee gets on the floor and says we have seen this thing and you should vote it through. And so it goes.

D: I will see what I can do between now and Tuesday.

K: You can do nothing for us on this agreement. If it isn't implemented on schedule we will have a foreign policy debacle.

D: We have said Geneva, if it isn't done by the 30th the schedule will move in accordance with the delay. We want it.

K: The prestige of the U.S. will plumit.

D: We are affected by it, and aware of this.

K: Well, I have to run to a White House dinner.

D: After you give me hell, you run away.

K: For once I am not giving you hell -- you are not doing anything wrong. I am trying to tell you, you don't have a minor problem. The immediate issue is the most trivial aspect of the thing.

D: I understand. We will see what we can do until Tuesday.

K: Mr. Chairman, I want to talk to you as a friend, to get your advice.

S: Yes, If I can, I will be glad to help.

K: Here is the problem. You have asked me for the documents which are background of this agreement and you asked for a list of the military equipment. That I can't give you because there is no list. I will have to write you that we haven't agreed on it.

My problem is this. I wanted your advice. I have no hesitation giving you anything you want. My concern is this. I feel we are going through a period of collapsing Executive authority of the foreign policy and if every Senate Committee can ask for every document on every negotiation, how are we ever going to have coherence in our foreign policy.

S: This is what I had in mind --

K: This is another question I wanted to ask you. McClellan also asked for the documents. He is one of the great men in the Senate. I am afraid if I give them to his Committee, then I will lose with all the Committees. But if I give it to one Committee, then I have some control over it.

S: In the first place, I didn't realize what it was going to get into. I thought it would strengthen the cause that I had heard you say already at the White House and other Committees. They got into this and I just held it up and said we wouldn't go any further than the Foreign Relations Committee. Whatever pattern they adopted I was going to hold my Committee at that. To stop it there and hold it there. I talked to Sparkman in the meantime and I thought we had an arrangement.

K: I don't care what they do with us. If they will give you the papers that is their problem.

S: Now that we have gotten into this thing they are calling on me to ask you to come back. This is not Jackson. It is spread on beyond that--Scott of Virginia. I just told them we would wait to see what developed with our two-man committee like the Foreign Relations Committee had. I asked Symington and Thurmond to confer about that. But it has gotten another turn now, as I understood. The Foreign Relations Committee--I don't know what they have decided. There is talk they may want an open hearing. I won't ask you about this.

K: They have talked about it but they haven't come to any conclusion yet. Now they are going away from it again.

S: I have been trying to hold it, as I told you, to whatever you did with the Senate Foreign Relations Committee and in there somewhere Sparkman said he had been prepared to be frank about this thing. I am afraid, Mr. Secretary, you are going to have more trouble. McClellan and I have worked together a long time. He asked me if our Committee had been given these documents and I told him "no, not yet". We are planning to follow whatever the Foreign Relations Committee pattern was. He is very interested in something along this line.

K: I am not against you. I am against the attack on executive authority that is now going on.

S: I am not a part of that.

K: If I spread every document all over the place--they have been in the newspaper. It is just the question how can any government trust us again if we spread secret documents all over the place. I would much rather just give them to your Committee.

I would like McClellan to understand what concerns me. There is no appropriations substance to this thing.

S: I know. He likes to know in advance about things. He is honest about that. I think a head to head talk with him by you would be good.

K: Why don't I go up and call on him again.

S: If we could just work something with the Foreign Relations Committee, I believe all other Committees could be held with that.

K: I am doing that.

S: There would be a minority and they won't --

K: I am on the way to working something out with the Foreign Relations Committee. I would like to keep it at one and not three different committees.

S: I couldn't promise that. It could hold the Armed Services Committee to that. Could we put it this way? Could you show the list to members of our Committee--as much as you show the Foreign Relations?

K: Absolutely. There is no question about it.

S: That would give me help. I think Symington and Thurmond would be a good pair.

K: The Foreign Relations has everything.

I will send Sisco next week. He can debrief Symington and Thurmond and I will personally call on McClellan.

S: That will be a start.

K: And I will show him the papers. There is no problem of keeping it from him.

S: That would be good. I certainly wish you well in that and I hope we can come out on something like that and next if it has to be taken up by Appropriations.

K: It doesn't have to be taken up by them.

S: Some didn't get to question you that day.

K: I will be back, maybe at the end of the week when I return from the UN.

S: I just said we would straighten out about the papers first and then you will come back. If we haven't worked out something before

the papers then you will be in there to be picked away at again.

J: I have thought this through and I have had conferences with McGee, Humphrey, Scott and Mansfield. And I come down with these two alternative propositions. One, if we went ahead with this resolution there is a good chance we can get it out of the Committee and Senate, if we agree to an Executive Session of the Senate at which everything will be revealed and if it leaks, it leaks; but you will not be leaking it. We think we can get the votes for it. We may be short one or two, but I think we can get them. I have a few uncertain ones. That is one alternative. That leaves frozen the question of whether these are or are not Executive Agreements.

K: The Congress doesn't have to approve Executive Agreements.

J: I understand that -- and that is your argument and we want to put that over. To lock that in we need you to file under the Case Resolution whatever you have got and secondly, there should be some certification that that is it and there will be nothing to come up that will plague us. The other way is for you to take all of your papers and throw them away and do a new memorandum with Egypt and Israel with all the changes and be willing to see them go public.

K: Negotiate a new paper?

J: Right.

K: That has occurred to me.

J: And then you don't care how public it gets and then it is out.

K: I like the first one better. In about 6 weeks from now I might be -- that is, once the Egyptians are in the oil fields and something has happened it will be better. J: You have to get either proposition. Either pass the second part of the strategy and lock in on the first -- submit them under the Case Resolution. Or scrubt it and have a new one.

K: Can I let you know?

J: Yes -- I will be away. I am go ing to a thing for Lady Bird Johnson, but I will be back and Monday night they can reach me. And the Executive is set for Tuesday morning. And the legislation I have drafted we will consilt with your men.

K: It will probably have to go the first proposition because I think the Israelis would be loathe to negotiate the document, but let me talk to him.

J: I will have my men take the legislation up with your people -- who should that be?

K: With McCloskey and Sisco.

J: One other thing. I had an Administrative Assistant named Jean McKee. Because her job got to be more than she could handle she left, but she is up before you for an appointment in John Richardons' office. She is one of three names.

K: I was aware of it. I was going to ask if you were genuinely interested.

J: I am. She worked on my campaign and she is a marvelous person. A very good worker and I'm interested in it.

Time: 4:36 p.m.

K: How are you Hubert?

H: Fine, but a little weary.

K: How did Robinson do, o.k.?

H: He was tops. It cleared every ones minds. We had Bellman, Dole, Young, Talmadge myself and Stone there. We were very pleased. Each of them said that this puts a different light on the subject. They realized that this was good for the farmers.

K: It is good for the farmers.

H: You were worried?

K: I am only worried about something you and I have to talk about now. I think we are in a nihilistic time when all the capacity to conduct foreign relations is being dismantled. My worry is that if every time we go out to negotiate, we have to put out a negotiating position before hand, we are helpless. I yielded to you on this because I was wrong when a friend like you is trying to help.

H: Talmadge is reliable. He gave instructions to everyone on that subject. He also said that everyone is to keep their mouths shut because the information, if it leaks, could only go out through them and they will be held accountable for it. I think they got the message. I know it isn't easy for you to have to do this.

K: Under those conditions it worked fine.

H: I know the precedent is for a mood of suspicion.

K: But today was more like it.

H: I get mad when the journalists tempt every senator to see who can give the biggest leak. Everyone asked today what happened. I said it was a good meeting. Then they said what did Robinson say. I told them to ask him. You know we voted to keep it in executive session. Stone raised the point, and they voted it.

K: What disturbs me in the session yesterday was that no one was talked about the national interest. They talked about documents that have already been published, and what good does that do anyone.

H: We had a meeting today of Magee, Javits, _____, and myself on this. Javits was to talk to anyone over here and we want to move on the belief that it will pass, of bringing up the simple resolution on 200 technicians and do what you heard him say yesterday — that we don't deny the linkage but we will deny having it linked on the floor. We will

cross the bridge of the documents at a later date.

K: It wouldn't be as dangerous at a later time.

H: Right, once the first decision is over everything difuses. They have a new horse and pony show every week there. With the exception of a few senators, most of them will evidence a lack of interest as time passes. Frank has the CIA think going on so it won't bother him; Stew is into the arms control thing, so you start to lose the advocates and you only have a few left to deal with. Park is a very bright man but everyone in the country who has a cause comes to him. I know how that goes, I was a carrier of causes once.

K: You still are a carrier of the really good causes. I heard from Dinitz that he is coming over to see you. I think the fellow is suffering from a misapprehension. I think the Israelis have to understand that there is an errosion of support for them in this country which is at the heart of all this.

H: I will make it clear to him.

K: Don't you think?

H: Yes. Very much so.

K: Your colleagues would find 50 reasons to vote for this if it were not so.

H: Exactly. You heard all of them say yesterday that this was not too popular.

K: I told him that but he said it was between me and the Congress.

H: I will help impress this on him as strongly as I can.

K: They don't know what they are up against. What really worries me now is that I will squeeze them in the national interest, but I don't want them destroyed. The Arabs are going to say if we won't even support 200 technicians over there, will Israel be able to depend on us for its survival.

H: I think you are right. I will try to get it across to him.

K: Many thanks.

H: I will help you wherever I can.

K: I will call you when I get back from the UN.

H: Good.

HAK: I tell you, by God, if you are --

K: You are going to have me feeling very sorry for you. But that is not why I called. At some point I would like to set up an appointment to talk to you on behalf of the network, as the pool producer for the China trip is an ABC producer. There are a number of things to be changed. They have been trying to go to the Chinese directly. But the Chinese say that is something to be settled by the State Department. That is in large part because you went off on a secret trip and you had worked out in advance what would and would not have been acceptable. It is the feeling of the network that things are now normalized enough that it should be done in a different way.

HAK: I don't know how they were done before.

K: The last time what happened essentially was that people went out on advance trips. If something happened that you or your colleagues had discussed with them they were told that it was agreed with Dr. Kissinger that such and such would be done, or this item was not discussed with Kissinger so it cannot be done. That would go for specific items like how many cables can go out of the window.

HAK: This was never discussed with them.

K: The technician did say to them that we will be needing two cables for the satellite. They are saying this was not discussed with Kissinger.

HAK: Why don't we get together to discuss your requirements?

K: Sometime maybe late next week. Whatever would be convenient for you. It would only take 15 minutes to discuss what our requests are and what they would like changed from last time. If you would like Win Lord in on it --

K: Cliff.

C: Yes, Henry.

K: Cliff, I don't know if you know what I want from you except to -- I wanted to talk to you to see whether there is anything we can do. I am really profoundly disturbed by where we are going as a country based on this debate yesterday. Had nothing to do with Executive prerogatives trying to keep things secret. Let me tell you the three areas where my concern is: One is a doctrine of Executive agreements was enunciated yesterday -- we really have to examine carefully together. I don't think you ever intended, or at least I didn't understand you to intend, that everything -- I understand that [redacted] everything has to be submitted but I do not understand that everything has to be public. I am not talking about this agreement. Take all our military supply agreements with Israel -- they have never been made public, for the reason that when they happen it's one thing -- when you make them public you have a phenominal international uproar. [redacted] B1

[redacted] I am just saying that this is something that requires prayerful consideration on which we are more than eager to let the Committee to share with us.

C: Right. Yes, I do understand.

K: This is the first point. The second point is I am profoundly worried about the impact on general diplomacy of this doctrine. Thirdly worried about what the release of these documents in an authenticated way will be to our future possibilities in the Middle East which depend on our authority -- [redacted] finely balanced now to maintain. And finally, I am worried, what all of this debate will do to Israel because if -- one of the things that we have managed to do up to know is the convince the Arabs and the Soviets that if they touch Israel we will get involved.

C: Right.

K: And if we are carrying on this way about two hundred volunteer civilians in an area where the Swedes have 1500 troops without any questions asked, I wonder what people will say about our general readiness.

K: I am more anxious to work it out with you -- I mean at least to try to work it out.

C: I appreciate that very much and certainly I will do my very best. I know that the people on the Committee -- maybe one or two exceptions -- but not many -- want to do the same thing. It may very well be that we will get with not too much difficulty some kind of a resolution. I do think on the present one -- which is our main immediate concern, there may still be some way to do it.

K: That's what I want to do: appeal to you as one of the statesmen on the Committee, our . . . I am out of ideas.

C: (Laughter) Bless your heart.

K: Well, you finally helped work out the HAWK deal.

C: Believe me, I want to help work out this one.

K: I know, Cliff, and there was no malice involved on anybody's part.

C: Not at all. The -- I think there may be a possibility. I had a brief chat with Humphrey. You did a good job with him.

K: It only proves that people that I din't talk to I do better with than those I do.

C: In any event, he has -- he has -- you said to me -- actually your approach is the right way. Let's see if we can get together on it. I said of course. I am going to be away two days. My brother-in-law died and Ihave to go up now to New York State for today and tomorrow and I left word with _____ and Mac on the staff to work with his people in working up ~~some~~ some ~~XXXXXXXXX~~ suggestions for the first of the week.

K: Wonderful.

C: And I think that -- I am not at all sure that we can't work this thing out. I rather think we can. We've got to.

K: In fact, we've got to next week because . . .

C: There is no disposition to drag it at all. It will involve something in the way of authentication. It may have to be a presentation of a document which someone in authority says is an accurate statement of the undertakings and assurances that were given.

XXX

K: . . . can eliminate some of them that are really for certain contingencies.

C: Yeah. We will have to see what . . .

K: But I don't want to say -- I . . .

C: I am not asking you to commit, Henry, I am just telling you that . . .

TELECON
Ambassador Dinitz/The Secretary
October 2, 1975
Time: 7:08 p.m.

K: We have two problems. One is a semi-problem. We have now an official world from Sadat that he will definitely be committed to a ship through the Canal on the 22 if you begin implementation of the Agreement on the 5th. If you don't begin he will delay it by the same amount of time. I would urge that you not go back to him right now because it is Ramadan.

D: I told you today that Rabin was told by Gamassy that they will be ready to send the technicians by the 10th or 12th. I can relay this back to Rabin. I think they are not ready on the 5. Gamassy said November 16 was the date for him.

K: All I can tell you is what I have had from Fahmy. Sadat has approved the 22 if you implement on schedule.

D: The 5th is the agreed schedule. What does he mean by agreed schedule -- is that what Gamassy wants?

K: If Israel goes through with the agreed schedule the GOE is ready to let cargo through the Canal on the 22. That is what it says.

D: He said why not the 20th. I thought Rabin was asking to make all the necessary arrangements either on time or otherwise. I will tell him you advised not to reopen the subject yet. In two days the boats will go.

K: I would strongly recommend this. The second problem is with Case. I think I have the whole committee lined up. I went through the documents, not completely, I have to go on tomorrow. Probably this may go on on Saturday. Basically what they may do is declassify the documents instead of asking for a summary. I may let that happen with a minor protest from me.

D: Did you say that Case got off the other things?

K: Case is saying unless we produce the letter to Rabin, he will speak about it on the floor of the Senate.

D: Did he say this this afternoon?

K: That is the way he ended.

D: I will try to get on this. His assistant said that he will advise him not to do this.

K: I am going up at 10:00 tomorrow. Church is really being supportive once we let him publish the documents. What they are forcing us to do is attach a legal document of what is binding and what is not. It is not helpful for Israel.

D: This is in addition to declassifying the documents -- to issue another document.

K: We are supposed to say -- we will have to say that this is not a technically legally binding document and it is a statement of intention.

D: On every item?

K: It is a disaster -- I do not want it. I guarantee you we will walk away from the Rabin letter.

D: You are talking to me as if.....

K: I know you are not doing this. I have never seen a guy as [redacted] Case. B6

D: I will work on Case tonight.

K: *If you get into his head the problem, you tell him you didn't rely on* that letter for anything.

D: I told him, or I mean I told his assistant this. He complained why didn't we show the letter to him. I said the Senator saw the letter. I said I didn't show the letter to anyone.

K: We have never shown anything like this before and we will never do it again. I figures that he would, after he saw it, say there were no commitments.

D: Right. I will get to him tonight through his assistant. I am in New York now.

K: Convey that this is not a trival business. Take the two paragraphs in the letter -- one refers to a conversation a year ago and one to a conversation six months ago. When we give him this letter he will want to see those conversations. We will not do it. If he says this is part of the documents, we will withdraw the letter and give you another letter three months from now. I think he is quite responsive to you. Maybe you can get Rabin to do something about this other thing.

D: I will cable him tonight from New York and I will have an answer by tomorrow.

K: Many thanks.

Senator Case/The Secretary
October 3, 1975
Time: 6:35 p. m.

C: You have talked to Roy haven't you?

K: I just talked to him. One thing, there is one assurance which was passed through in a different form which you saw originally which we kept in Sisco's Office which we should give you to look at. It is an assurance and our explanation of the understanding of the assurance.

C: I remember there was another paper.

K: The reason it wasn't in this package -- it is a verbal note initialled by Sisco and it was kept in his papers.

C: O. K. There was one thing that Roy told me that seemed troublesome. It was after Sparkman had left.

K: He gave it to me.

C: I have a further thought on it. It was curious, I thought....

K: About the flight down the Red Sea.

C: Ambassador Dinitz has wanted to see me for several days. He had been fussing about the thing in the letter which talked about the same thing that I was talking about. It was the Golan.

K: What do you mean fussing?

C: He wanted to alert me to the fact that the letter was promised during the Nixon time and it was never delivered. He said it wasn't an inducement for this agreement. I said how many people know about this letter? He said Rabin, Allon and me. He said this would never be claimed to be an inducement for entering into the agreement but a previous understanding.

K: Yes, that is right.

C: That may take care of the deal.

K: In order to keep you from having to certify something why can't we just settle on the certification that we make and then the Senate can vote that there are no additional understandings or whatever.

C: I think the way that McGovern put it in the Committee it will be necessary to give the colleagues on the Committee my assurances. I would be prepared to say that it contains legally a restatement of the positions in the material already given to the Committee and that it isn't necessary for them to look at it. It would only go for the Committee.

K: Good.

C: We can work that out quickly in a public hearing.

K: Good.

C: Let us be relaxed over the weekend? I want to talk to the Committee before I go public. I would appreciate it if you would wait to go public.

K: I just discussed that one question with Dinitz of what they were relying on. I will definitely wait.

C: He wanted to see me for a few days. I wanted to get my thoughts in order before I saw him, however. That assurance is touchy for the Israelis.

K: They didn't want to have any debate about it.

C: Or any questions raised now. O. K.

K: I want you to know that troublesome as you have been I have a high regard for what you are trying to do.

C: O. K. Take care now. Bye.

K: O. K.

K: Against our objections. Over our objections.

A: Uh- over our objections. Now, Barry Schweid and some of the others feel that -- they are speculating that maybe you sort of cooked up a deal which obviously from ~~XX~~ what you just said you didn't -- you know with the Committee that you felt that they were . . .

K: Just stick with that and give no further explanation.

A: Right. And one other question, sir, I've been asked do you consider this damaging to the US role as a mediator and to our diplomacy in general in terms of dealing with foreign governments in confidence. A question of how far you ought to go.

K: Well, when you can't print news, you make news.

G: (Laughter)

K: Don't you think you overdid it a bit though?

G: I went a long way, I tell you Henry.

K: I was thinking of you. It must be painful.

G: :You are nice to call in the middle of your troubles.

K: I don't know what the issues are, but I know you aren't a union buster.

G: It is a very complicated thing and one that takes too long to explain. You are right, we are trying to get the most modest control over things here. Through long years of mismanagement the whole thing got out from underneath us. They didn't give any reasons so they say we are union busting. The show that they did is so venal.

K: It isn't just a few people doing it?

G: It gave the sense that it was. However, it really was only about 25 out of 115.

K: They knew what they were doing.

G: They did it with great deception. They said they were going to go on negotiating. It has made me so paranoid, to the point where I have thought of everything including our ex-watergate friends. They just didn't want us to print a paper. This destroys their jobs and goes into millions of dollars.

K: They are trying to ruin the automation.

G: It is not the automation. It is totally incomprehensible.

K: I am beginning to think we are in a nihilistic age. You can't ask why they are destructive, they just are.

G: That may be one answer.

G: I don't think this is that kind of shooting at the President craziness. This was reasoned out and planned.

K: It was so destructive, you say it was planned?

G: I am not sure, but maybe it was the right wing forces.

K: You think it may be right wingers?

G: It helps him a lot, I thought maybe it was Albritton. However, it is to his interest to stick with us.

K: Of course.

G: I wonder about our Watergate friends.

K: When I read it I couldn't believe it.

G: When they called me, I couldn't believe it. It will take us months to fix those presses.

K: I just thought there was a little vandalism.

G: Well, but to destroy their jobs doesn't make much sense.

K: I feel for you because I know you would want to be cooperative.

G: We have lived with unions -- we have 12 in the plant.

K: It is inconceivable that the Washington Post would bust unions. It is inconceivable with what you stand for politically. What do the other unions say?

G: They are very shocked -- they came back to work. We got out the paper today. It was a miracle and very exciting.

K: It is a great success.

G: For our new baby, it is a miracle. We had helicopters flying copy and then we had to collect what we got and distribute it.

K: I don't know what I can do to help.

G: You are very kind. How are your troubles?

K: I have my own nihilists on the Hill.

G: I have concentrated so much on this.

K: We are in a ridiculous position. I will say something isn't a commitment but there are a bunch of senators who say something is a commitment, when I say it isn't. We will somehow get through that.

G: By the way, I love the pictures of you and Nancy in People.

K: They are nice. I hope to see you soon. I think I will see you next week at the Rockefeller thing.

G: Right. Very good to talk to you and thank you.

TELECON
Ambassador Dinitz/The Secretary
October 3, 1975
Time: 5:20 p. m.

D:Mr. Secretary.

K: Your agent Case is carrying on in a way that will endanger Israel. We will write to Rabin if he doesn't stop carrying on. We will say that since these letters have created such a mess the U. S. isn't bound by them and that they are withdrawn and that the whole subject must be redone. Everyone else is willing to abide by our decision that this isn't a commitment. I think that it is his staff man that is egging him on.

D: I am in his office waiting for him to return.

K: It would be a big help if you can convince him that what has been published is all that you relied on.

D: I will say that again to him. The point that makes it difficult, since he was privy to the letters, there is one to Sadat also.

K: The one to Sadat says that we will carry out Resolution 338. I will give you the relevant paragraphs.

D: That is not the point that disturbs me now. He feels that there is a conflict since he was privy to that letter and he has to say to the Committee that what was presented is all the documents.

K: He doesn't have to say anything. Let us make the certification that these are all the binding commitments. Let the Senate vote that no other commitments are binding. We will accept that. He can accept it. He can argue with us later about other binding commitments. If he pursues this, we will not have a public discussion.

D: I am doing everything in my power.

K: He has done more damage to Israel in the last few days by forcing me to go through everything and explain what it doesn't mean.

D: You suggest that.....

K: I am telling him to get out of the business of certification.

D: I should tell him to say on Monday that this is all the commi tments.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H MILLER
DATE/CASE ID: 05 APR 2004 200102979

K: What I will say is that this is all I will leave with the Committee. All the assurances have been submitted. Then the Committee can vote that nothing else is binding and that will be fine. He can get out of it, I don't ask for a certification from him. I would rather not have it -- it sets a dangerous precedent, that the Senate must certify all the documents from any particular negotiation. We will bring this about anyway. If he pursues this line, we will make everything inoperative. He will not achieve what he is after.

D: Also the letter for Sadat, the same thing?

K: There is nothing that Sadat has to withdraw.

D: Have you talked with Eagleburger this afternoon? I have given him some information that you should see. I will see what I can do and believe me, Mr. lSecretary, I am trying.

K: We will do it to Sadat, but it is senseless. You will just have to take my word for that. Sadat has things that I have said in public. I will give you the quotes for your information.

D: I am only concerned how to resolve this issue. Rabin has made a concession today.

K: Very much appreciated.

D: I don't want it to be dragged beyond this.

K: What I have been trying to tell the mad man of his staff is that these documents are unusable to you with this Administration anyway. They are a guide for the future. If we must make qualifications they lose significance. They shouldn't have legal significance anyway. They have the good will of the parties concerned, that is all. You never relied on it in the past with the LANCE. You have had the letter and never invoked it.

D: That is right.

K: These people are weakening what you have. They have weakened the Agreement. The best thing for you would have been a procedure like the House Committee wanted. The people who think they are friends are killing you. Like the coalition between Case and Percy where they were trying to weaken the documents. If he forces it further, we will make it inoperative and talk another way. I know you aren't behind it. The major thing is for us to get this under control.

D: I am missing the Hirohito reception because of this.

K: O. K. Call me after you have the meeting.

D: I will.

K: I have since then talked to Dinitz and Case, and Dinitz was more persuasive than you. I am being sarcastic.

M: Your confidence in me has been not the most uplifting thing this week.

K: If the guy is an Israeli agent, what can you do?

M: Well.... the Chicago Times is going to have a story this Sunday.

K: To say that I am on the way out?

M: No that you gave Sadat an assurance that during the life of the Sinai Agreement that you would push for an overall settlement that would include Israel going back to the '67 borders. Also that this assurance would include not only the Egyptian territory, but the Golan. That this assurance was made with Sadat with no diplomatic aides present.

K: Where did he get this?

M: The "diplomatic sources" are tracing it back to something Sadat said to the other Arabs.

K: It is a bogus story.

M: If you like, I will get back to him and try to talk him out of publication. It needs a denial anyway.

K: Exactly, o. k.

Let me tell you what I am bothering you about. On the 17th and 18th of October my American Bar Association is doing a two-day thing for law professors. Armitage and Polansky will be there.

1. Will you tell them how much I appreciate them for being there.

2. If you had any time during the 17th and 18th of October --

K: I will be out of the country.

L: Will you be sure that Armitage and Polansky know you approve.

K: I want to bring you up to day on what I have done this morning. I received a call at 6:00 this morning from Amb. Keating that he had been told there were these authentic reports and urging us to use our influence. I called first the Russians and tole them to use maximum restraint and we established communications for them to Moscow. I have called the Egyptian For. Min. and urged maximum restraint on him. We received a message from the Prime Min. through Amb. Keating in which she assured him the Israelis were taking no pre-emptive attacks. I passed this along to the Egyptians as well as to the Soviets and tole them this was our very urgent recommendation to the Israelis and we were happy to have these assurances and in these circumstances even greater restraint is needed. We set up communications for the Egyptian to Cairo. He has talked to Ismail. He tells me naval action in the Gulf of Suez. If that is the case it would be very unfortunate; it is inside Egyptian waters.

E: What is the naval action.

K: Shooting. Israelis -- air and naval attacks. Given the urgency of the situation, I thought I should talk to you about it. If your people are doing this they will know where it is. I must urge you strongly not to have any Israeli operations in these circumstances.

S: If you want to go for the oil deal we have to block until the crop estimates come out. They are counting on our farmers screaming. We should get a oil deal before we have a grain deal.

Get into questions. I am going to have to ask you to come back by here. We agree -- we will accommodate you on time any way we can. I thought before you came back we ought to try to dispose some way of this matter about those documents.

K: Well, they are all now being published.

S: Well, you mean they have all been published?

K: Well, what we have worked out with the Foreign Relations Committee, Mr. Chairman, is that all the documents that involve American commitments have been published. And that they are going to certify that that is all that involves a commitment.

S: I see.

K: And I in turn am going to certify that there aren't any other commitments.

S: I see. Well, that's -- I had taken the position that we couldn't go any further than the Foreign Relations Committee went.

K: Well, that's the Foreign Relations Committee position.

S: Yeah. But if you could let two of our members that I selected -- Thurmond and Symington -- I was willing to step aside myself if you could let them see what the Foreign Relations saw.

UNITED STATES DEPARTMENT OF STATE

K: Well, that is all the Foreign Relations saw. Now then, in addition, we showed Sparkman and Case those documents from which extracts were made so that they could see we were playing fair.

S: Yeah. Yeah. Well, . . .

K: And they are going to certify that no other -- that these did not contain any additional commitments.

S: Well, just putting it on the nailhead here, what about you showing Senator Thurmond and Senator Symington -- he's a member of Foreign Relations, too, just what you showed them and that will preclude anyone from saying that . . .

K: Yeah, but then on what ground can I prevent any other committee from doing the same thing?

S: Well, . . .

K: You know, I appeared before your committee as a courtesy.

S: Yeah, that's right.

K: Look, I have total confidence in you. I have total confidence in those two senators. . .

S: Yeah.

K: But I am afraid we are going to undermine any Executive authority if every document even those that don't contain commitments are going to be forestalled.

S: Yeah. Well, I recognize the problem all right, but . . .

K: I don't see how . . .

S: But I've gotten into a hole about it. It is going to toss some bolts -- I publicly said I would support your agreement about the technicians. I am committed. I wouldn't commit myself to any amount . . .

K: No, no, we are not asking you to do this.

S: I know you are not. Well, anyway, anyway, the least we can do is for you to come back now for the _____ committee and when we get to that point you can tell them if that's your final position what you have just told me about you have shown Sparkman and Case these matters and that they are going to make a certification and you are going to make a certification. We will have

to go that far -- asking you to appear. But my counsel with you is that if you possibly can, . . .

K: How can I then prevent the Appropriations Committee?

S: Well, I don't think you can, frankly.

K: And on that basis we won't have any governmental secrets left and then every thing that is an intention is out. And then the distinction between intention and commitment will be hopelessly garbled.

S: Well, just be sure we understand each other, Mr. Secretary, you are prepared to take that position before our committee?

K: Mr. Chairman, it is a position that the Foreign Relations Committee is supporting and your committee isn't being asked to pass on it as a committee.

S: Yeah. All right.

K: And when we talked last time I misunderstood it. I thought the issue was could your committee have those papers we gave on a classified basis to the Foreign Relations Committee.

S: Yes.

K: Which have now been declassified by the Foreign Relations Committee.

S: All right.

K: I never understood there were any other papers being discussed.

S: All right.

K: But I will be glad to come before your committee.

S: All right. Well, we will pick a time now -- I know you have already committed yourself no doubt to a good many things. If you could have your man pick out a time and we could set it now and get it certain.

K: Well, I am not in my State Department office, but you have to understand, Mr. Chairman, I have testified for three straight days.

S: Yeah, I know.

K: I just don't think we will have a foreign policy left if this thing keeps going like this.

S: All right. Well I am not going to fuss about that now. I want to get this thing settled, thought, and . . .

K: I will appear but if it opens up the whole issue again that it took me three days to settle with the Foreign Relations Committee with your committee and I have still not seen McClelland.

S: Yeah.

K: I was going to see him last week and I had to cancel it three times because the Foreign Relations Committee kept me for three days.

S: Well, . . .

K: I will let you see anything, Mr. Chairman. No problem.

S: If it is a fair question or comment at least, _____ _____ _____ sure enough if you go fussing with the Appropriations Committee than you do with the Armed Services Committee.

K: I won't go as far with them.

S: Beg your pardon?

K: I will not go as far with them.

S: Well, I am not trying to influence you.

K: No, no, but do you see -- our procedure had always been that my committee of jurisdiction is the Foreign Relations Committee.

S: ~~XXXX~~ Of course. And I believe . . .

K: And when I come before you, it is as a courtesy to keep you informed.

S: All right.

K: And I have worked out a procedure with them now where anything that is a commitment even if it is classified they have got. In addition, two of them have seen the letters ~~of~~ from which the other stuff was extracted.

S: Yeah. Yeah. That's right. All right. You let your folks look at your schedule there and let's pick a time as soon as we can this week for you to come before our committee.

K: Okay.

S: And we will have the declassified documents and all in the handsof the committee members and then you take any such position as you see fit. We have got to act, you know. Time has come to act.

K: I agree, Mr. Chairman.

R: Should I ask him again if he would prefer January or that weekend?

K: I had a plan to go to Africa in January, but I can change that.

R: I thought Genscher was not going to be around that much. Let me find out.

R: We have not made it an issue.

K: The proposal is we tell Congress Chile does not qualify because of 502B.

R: No. We do not disqualify Chile under that. But in terms of the overall military program zero credits for Chile. There is no official language in terms of the report to Congress.

K: How are you Joe?

JK: I am in good shape. It was nice to see you. How did the Dobrynin thing go?

HK: Inconclusive.

JK: Did he make a counter offer?

HK: Not yet. I didn't expect it that early. Gromyko didn't get back until a week ago.

JK: He wasn't outraged?

HK: What do you mean?

JK: I have a chance to write something about Schlesinger. He went over there and surfaced the whole Pentagon position. The Economist supports it. I was surprised and called them up. The last lines of piece say it is better to get the cruise missile thing straight than to have a bad SALT Agreement. What I planned to do tomorrow.....

HK: I knew he was talking all over Europe about this. It happened after we made the deal on the cruise with him.

JK: I have a theory about him. I would like to write something about him that will turn him around. I would like to show how he will go down in history with a bad reputation.

HK: I doubt you can do that.

JK: You really do? I am trying to show what is happening. Latin and Kalveman thought it would work.

HK: Kalvman is good -- Latin I don't know. The cruise is so ill assorted. There are so many confused things in there. Why do it with cruise when you have 1,000 airplanes. It could easily lead to our removal of our tactical airforces.

JK: Yes. But is there a new position to be taken?

HK: What I told you yesterday, that we are waiting.

JK: What I would be saying is that we are waiting but it would be probably helpful if the Russians could come back with a counter proposal rather than a flat turn down.

HK: That would be helpful.

JK: Their present proposal is one that limits the range to 300 miles?

HK: No to 600 kilometers. There is a compromise possible there.

JK: You mean add 1,000 -- is that the kind of compromise?

HK: Or a distinction between air-launched and ship-launched cruises.

JK: That takes you way out. Do they need to say something about conventions.

HK: That is the next issue, but they don't need to say anything about it now.

JK: Let me see what I can do.

N: Ah, I understood that, I certainly did not take it personally. I've been in too many court rooms to let anything like that get me, so don't worry about it.

K: But the problem is that it is easy to take a free ride on an accomplished agreement and to give the impression that one is opposing something that was never going to happen anyway and I've taken strong objection to that, but that has nothing to do with you.

N: My point is that I just think on these matters involving arms sales that there really is a lack of policy right now--

K: But that is a different issue and that doesn't really apply to Israel so much -- In Israel we have a document we've been working from and every once in a while we turn it off and on to meet our political needs. But that is a different--foreign policy needs I should say, which is a different problem from saying -- making a new sale to Abu Dhabi

N: Right, well I understand that and I agree with that--I do think that in some of these negotiations if there could be a better liaison between the State and Defense Departments that the country would be better off.

K: That may be true, but this one is not a good example of it. Because in this one I just assure you there was absolutely no weapons system discussed in Israel that wasn't already on the list.

To reopen this g. d. thing every six months with a front-page story really is g. d. -- You know I can't complain about it. You have every right to do it and he did say what he did say. K: Mr. Chairman, I will be up in 20 minutes.

S: All right, Sir.

K: I don't want you to misunderstand our conversation of the other day. To you personally I would be eager to show anything. I am very concerned about protecting the integrity of our foreign policy. The Foreign Relations Committee has certified they have seen all the documents relevant to their Committee. I don't see why I have to go beyond that.

S: I told the Committee members we couldn't get ahead of the Foreign Relations.

K: The Foreign Relations Committee has certified all of them but Sparkman and Case. They have seen those documents we have sent extracts of to show we aren't cheating.

S: They filed their report last night.

K: I am happy --

S: Are you, in addition to that, going to have a certificate or statement by Sparkman and Case.

K: Sparkman and Case have certified to the Committee already.

S: You can testify to that effect.

K: I want you to know, on a personal basis, that I would be glad to send up Sisco or anyone else to see you.

S: I don't demand that. I don't require that. But you have those Committee members there, you see, but I don't know what position some of them will take. But if you stand on the position you have gone as far as you can go and so forth. That is a just position.

K: I am through with the Committee. If they raise the secrecy --

S: You can't keep an individual Senator from raising it, but you can't make the Committee raise it against you. I want to get through with this thing without having you come back. If Sparkman and Case are going to file a statement publicly or one that you can bring with you that would be helpful. You know that they have reviewed these matters. But I haven't talked to them. Things went fast when they started moving. We will do the best we can. I am not in ill-humor or anything. On that basis you can handle it and we will see what happens. OK?

K: OK.

K: Have you talked to him?

S: Yes, on the phone.

K: If it gets out that we are hung up on the oil deal and we let it get out, it will cave in. Do we sign on Saturday -- the grain deal or hold it up?

S: My idea is that we sign but put out a notice that if they don't come through on the oil deal, it will fail.

K: Instead of initialing.

S: We could try to initial the thing.

K: I am afraid if we initial it we will have trouble. If we can't get the oil we will have problems anyway.

S: If we sign the oil thing and can't get the letter, then we are in trouble. The Russians don't object to initialing the letter of intent.

K: We don't gain anything by not signing it.

S: It is a letter of intent.

K: The only thing I wanted to tell you is that your press is screaming at me now for my statement before the Congress.

A: On what?

K: Defining our commitments. You have to understand that I am the only member of the Administration who is defending you. You can't turn on me. You would be crazy.

A: I haven't seen the press.

K: They asked me about a Palestinian state. There has always been some talk about greater autonomy. They were going to have an amendment. You have to watch what is going on here. You watched it. It is getting very difficult for you.

A: In case I am asked when I land, what should I say?

K: You get the text. I didn't say anything damaging about an independent state. I didn't say we would deal with the PLO. What I said was fine. I talked with Dinitz about it. My message for you is to have a good trip.

A: I saw this morning just for five minutes Waldheim when I came to the Assembly. I told him I talked to you about my conversation with the Secretary General and you asked to see him about the Syrian matter. He seemed pleased that you would talk to him.

K: Earle, could you tell Bell to shut up, please. He is now saying the grain deal is wrapped up but the oil deal--

B: Where was he saying that?

K: I don't know, he said it off-the-record to a number of people. An off-the-record statement by Bell -- it reaches me within hours. It is all over the country.

B: I haven't seen that. I asked my man this morning and the paper said if he was in London, he said "no comment".

K: But he's told a number of people off-the-record. We are going to be killed if we put it all on the oil deal and then if we--

B: I'm having somebody meet him at the airport this afternoon and bringing down here and keep him away from reporters--

K: And if we fall off it then it is going--what should be a success is going to turn into a failure.

B: Well, I'll do my best, but I was told this morning that he was just simply saying no comment.

K: I'm going to keep my people quiet too.

B: Well, we'll do the same thing here. Did you talk to the President about this Polish deal.

K: Yeh, I think we'll probably let you go ahead with that--I'd just like to have one more exchange with Robinson to find out what he is going to do--I mean to see how that Soviet negotiation is going on the oil.

B: Okay, but this--my critical time is tomorrow, Henry.

K: Yeh, I'll have an answer by tomorrow and we are leaning in the positive direction.

B: I think we have to because of the President's credibility on this deal --the roof will fall in on the farm belt out here.

B: I thought we had him just simply saying "no comment"

K: Well, we could have kept everybody there but my people made as many mistakes there as yours.
I understand my people left also, so...we can't yell at you. If theprofessionals behave like amateurs, we can't complain--~~look~~ at the Agriculture Department.

B: Who ~~stayed~~ stayed there--just a very small group with Charlie?

K: I've never seen a negotiation where we have a corner of the market, the Soviets are in demonstrated need to transform a negotiation where we hold all the cards into a pressure play against us. What we've now done is by pulling all the Agriculture people out and all the State Department experts out and leaving only the oil people there, we've made it clear that only oil is holding things up--we have lost the leverage on grain because the Russians know it is wrapped up so we can't reopen that and we are getting much too little for a corner on the market.

B: You pulled all your grain people out, partly.

K: Partly for that--you know you are an old pirate, Earle, we ought to leave the impression that they might not get any grain and since we know that they cannot do with out it, we had ~~x~~ it made. And now if it all goes on oil and if we don't then get the oil deal, they will turn what is a big success into a failure.

B: There's that possibility. Well, I'll play on the team as best I can, Henry.

K: earle, I'm one of your admirers. There are some other Cabinet members that I'm not an admirer of, but you are one my--

B: It's mutual Henry, but I do think we ought to do this Polish thing to keep the President's credibility.

K: I've just come from the President, I've supported you on that. I'll even let you sell a little to the Russians.

B: Well, no I don't want to at this point. Let's hold tight at this point, and I think what I'll do tomorrow when this crop report comes out, I think I'll be in there and Bell out of there. At thatpoint, I'll simply indicate that there are still some negotiations to be done on the grain deal.

B: And then I guess tomorrow we don't have this one-third shipping wrapped up yet, do we here?

K: No

B: And have they agreed to the freight rate?

K" I think so.

B: Well, there are some other things to be wrapped up and I'll simply indicate that...

K: We've done pretty well in the negotiation

B: I think we have, but I'll indicate that there are still some things to be wrapped up in this and the embargo stays on--

K: Is it true that you are going to get the Vice Presidential nomination?

B: [Laughs]--

K: You are going to carry the goddamn farm belt.

B: No, no, I won't. But I'd like at that point to indicate that we have released the Poles. Now the Polish ambassador-- a week ago--

K: Yeh, but don't tell the poles today.

B: No, I won't. But I ask him, if we do releas this, will you do it gradually, and he said we certainly will. We'll do that ourselves. And I think we just ought to free them dompletely.

K: I understand that the Russians have hired two more intelligence analysts to figure what you and Bell were talking about every evening.

B: Is that so--we tried to keep it under--

K: They got a hundred pages of notes on each meeting.

B: On each meeting?

K On each conversation.

B: There wasn't that much conversation.

W: The Sunday morning things -- I couldn't agree with you more. My request was triggered by People Magazine article. I talked to Nancy and I know you don't do these things but some day you might want to so why not do it on "60 Minutes". We want to do a piece patterned after the People thing. She said I will talk to Henry. She suggested that we talk last night, but I didn't think it was a particularly appropriate time so I am pursuing it today.

K: What sort of questions would you ask.

W: You have me out. I have not thought about it. There would be no difficulty at all in getting a fascinating bunch of questions which are really patterned after the kind of thing that was covered in People. And except that you people would be saying them yourselves and hopefully it would not be just an interview but we would have an opportunity to observe you a bit. A delightful way would be to follow you to China. Had there been a television camera on the Middle East trip it would have been perfect.

K: Let me think about it.

W: I don't think we would have any trouble working out an attractive and useful piece.

K: Let me talk to Nancy. She will overwhelm me if we both appear together.

W: I agree without a doubt.

K: I am too insecure for this. Why don't you interview Nancy alone [redacted] B6

W: You know something, that would make a fascinating piece. People have no idea about this woman.

K: About Nancy. We will talk next week. It was good to see you again.

W: It was good to see you again. Lorainne was very happy to see you.

H: Henry!!

K: Hubert, I tried to call you last evening and couldn't find you.

H: Well, I was over fiddling with the Senate for a while and then went out and had dinner.

K: Well, I wanted to tell you that this is a great tribute to you.

H: Well, I told you we would bring them through unscathed and we did.

K: Well, you did a tremendous job and a patriotic job.

H: Well, thank you, Henry.

K: And it is a privilege to work with you.

H: Well, I wanted to do a good job for you. I thought you had gone through enough misery on this business and I thought the country needed it.

K: I think it worked out well and I think it is . . .

H: I do too, and I believe that we -- uh, the main thing is that there are a lot of things said in debates that you kind of wished weren't always said but the main thing is what the resolution said and I think we established very well a couple of things. Namely, that the assurances and understandings that we had taken were taken in good faith and that we were -- we felt morally bound and committed to carry them out. I didn't think we ought to downgrade them.

K: I agree with you.

H: And secondly, that if the circumstances changed and therewas a . . . .

K: I had said that myself.

H: Yes, of course! Exactly right. Well, you know, we had a few people there that were just determined to change the course of handling foreign policy and I just didn't think this was the place to do that. And we changed it enough, for Christ's sake.

K: Well, I tell you, at least I still have prestige and reputation so I am not as handicapped but a new Secretary coming in and a new President, whenever that happens, if all these new procedures stay in effect, they are going to have one hell of a time.

H: Well, one of the great advantages is that with time some of this stuff subsides. You see, they are still in the _____ of the period of suspicion and doubt and when fellows get up there in the Senate I don't trust anybody. I don't trust this person, I can't trust the President, I can't trust the Secretary of State. I don't trust anybody! When you have got that kind of_____ attitude, you know, you've got to keep in mind that that's a minority and it doesn't really . . .

K: And it is not the country.

H: No, it is not.

K: There is no reason. What we need is to restore some faith and authority.

H: Exactly right.

K: In this country because these people don't realize to what extent we are the key to stability and progress in the world.

H: They do not. They have underestimated our country. They have underestimated our role in the world. They keep thinking that somehow or another because things went bad in Vietnam that this means that we tossed in the towel. I don't buy all that crap. Just between us I have figured that my role in this Senate is to at least have some sense. That's all -- I mean, I don't need anything and really don't want a damn thing so I just, I just do it the way I . . .

K: Well, I tell you, I have really been tremendously moved by your conduct and inspired and I wanted you to know that.

H: Henry, thank you very much. That was a very fine tribute and I appreciate it.

K: Are you going to get some rest?

H: Yeah, I am going home today. We've got King Olav from Norway out there and we are going to spend a couple of days with him and then I will be out there towards the uh, Thursday and get back here.

K: I am going to be in China, but as soon as I come back let's have lunch.

H: All right, you bet. I look forward to it. When are you taking off for China?

K: On Friday.

H: Uh-huh. Well, good uh my best to you friend. Have a good trip.

K: You won't be back on Thursday, will you?

H: Uh, yeah. I'm in here -- I come in Thursday -- yes, as a matter of fact . . .

K: Do you watt to have lunch on Thursday?

H: I think somebody called over from your office whether we could have on that day.

K: On that paper I have which we are probably going to be bouncing around until Robinson is back in this country -- what is the recommendation?

S: On the oil or the grain thing?

K: The grain thing -- my view is he should sign it.

S: The main consideration is whether that is alright in the Congress. We should make phone calls before he does it.

K: You know that better than the President, who wants to sign it?

S: I can only give you the issues -- if you want to sign it, sign it.

K: I don't think the Congressional argument is the important one.

S: Both Case and Long say they want to be consulted before it is signed. On balance, however, I think it is better to sign it.

K: The oil is of a complexity that I can't comprehend.

S: There is a letter of intent which would be signed by Robinson and Potolichev. In that letter it contains a letter on pricing.

K: What about the side letter?

S: That states the follow on negotiations in which the letter of intent would concur. The one letter says we assume the Soviets would continue the negotiations with a price break. One goes through the various gimmicks the other one comes out and tells the difference between the world price and the price we are asking.

K: That is 15% again?

S: Roughly.

K: What would we give to Dobrynin?

S: Any one of those three and they would have to say that is the basis on which the negotiations would continue. The soft letter would give us some additional statements from the Soviets that they would be helpful in the follow-on negotiations. We won't get what we want anyway now.

K: Not now. I thought I would call Dobrynin and tell them what we have in mind.

K: I wouldn't think we should do that.

S: Either you give it to him ahead of time or tell him in Moscow.

K: I would like it somewhere between/three and two. What the best approach would be is to let the Russians know what we want and let Robinson try to work it out.

S: It comes down to the same thing because you have to tell Dobrynin ahead of time.

K: I plan to tell Dobrynin, in fact I will try to reach him now.

S: He had the four areas where we wanted some breaks before. They are not likely to produce anything in writing from the Soviets, hence the third letter you have there.

K: I hate to give them something else that they will reject and then cave again.

S: There is likely in the first to.....

The statement they made said they have decided to issue their statement because we haven't responded or we have the issue under advisement. They raised the Cyris Vance thing -- even Dun Shou Pin (sp) was in on it.

K: What if we didn't answer?

H: They have forced the issue with a public statement. We can answer it in terms of stating that we have the matter under consideration. Roy Atherton and I think it would be best if we could duck this issue. There is one thing which we can do if pressed -- that is as far as our policy is concerned nothing is based on the idea that Tibet is still a part of China. It has always been under the suzerainty of China according to our policy in the past. I think we should try to slide it off, but we should say nothing if they will let it lie. We have prepared something -- the crucial question is one of territorial integrity; if we conceive Tibet as part of China. We have before accepted that Tibet is under Chinese control but that isn't acceptable to them now. Our relationship with the Dali Lama makes it hard. We are phasing out of that now thought.

B: Yes. I have to. Someone made a recording up there and it is being broadcast all over the place.

K: Is there more?

B: Do you want to hear what we have?

K: Is it worth it.

B: It starts with Kennedy at the time of his death you said he had not done any substantial work. I want to make clear that I liked him as a President -- I thought he was a disaster for the first two years in office and he didn't know where he was going. What did he accomplish? That is what we have for him. On the Nixon thing, he was very good on foreign policy but he was a very ordered man. He was decisive, but unpleasant. It was an effort for him to be on TV. When he met someone, he thought it out very carefully and that meant he didn't enjoy people. He hated to meet new people. That sort of thing. There is more about Jackie.

K: Are you going to run the whole thing.

B: I am afraid we have to.

K: Oh really.

H: Apparently that is on the heels of the Middle East business plus what you have been able to do in demonstrating that you can work with the Congress.

K: That was the weakest.....

H: I might say thatthe desire to get on with the China business has gone up too. It is inversely in relations to their trust of the Russians. There is a growing skeptism with the Russians. People are worried about high prices relating to the wheat deal. There is quite a lot of irritation on Portugal also.

K: Yes.

H: But on the other hand the desire for SALT II is high, and this proves there is still a desire for an accord with the Soviet Union.

K: What is the rating on SALT II?

H: You get 71 % who want it.

K: How many against?

H: Only 12 % -- that is overwhelming. They are willi ng to take the chances -- it is an article of faith in you that they want to do it.

K: How about my relations with Congress?

H: That has turned around -- you get 54 % positive on that.

K: It had begun to turn around last time.

H: It is now increasing. The President doesn't seem to go up much on this but that maybe because he has been campaigning out around the country.

K: Earl.

B: Yeah, Henry.

K: Earl, I am a little upset about -- first of all, about the Washington Post story yesterday.

B: There was some truth to it.

K: Well, there may be some truth to it, but you know, if every Goddamn Cabinet member thinks he is the President.

B: I understand that.

K: We have an impossible situation. There is such a thing . . . .

B: As I told you earlier, Henry, I am playing on your team but you never . . . . I said I was tired of being treated like a cross-eyed step-child and this morning we had that economic board over there and Dean Hinton was there and at that point Dunlop made an impassioned plea that food policy has got to be a general policy here and I said I quite agree with that. Part of that general policy should be the Department of Agriculture, too.

K: Oh, I couldn't agree more, but the thing that really upsets me isn't so much the news story. But I was talking to Dobrynin the other day and Dobrynin says he was told by both you and Bell that the President and I are the ones that are embargoing food.

B: Listen, I haven't even talked to Dobrynin in three or four months. And I am sure that Bell hasn't talked to Dobrynin either. As a matter of fact . . .

K: If it wasn't Dobrynin then it was told to the Russians in Moscow. The point is, if that is the game they are going to play that means the President has to pay for _____ _____ for one week. Which is all we were talking about.

B: Listen, Henry, there is a hell of a lot of loose talk taking place around this place. Now you know -- you called me about not breaking the discussions taking place in Moscow and not relating oil to grain and we have been scrupulously careful.

K: No, you -- no, that came out of . . . .

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H MILLER
DATE/CASE ID: 31 MAR 2004 200102979

B: That came out in the Times and I don't know who the hell the Times . . . .

K: That came out of . . . I am really in despair. How -- we are hanging on by our fingernails as a country, Earl.

B: Yeah.

K: We have lost a President, we've had Vietnam. We are in deep trouble and if -- the few assets we have we squander. Now, you ask the President, I have been one of your big boosters here.

B: I know you have and frankly I have been one of yours, too, Henry.

K: That's right. I've always . . . .

B: News leaks on this thing and frankly we have been extremely careful.

K: But what concerns me is this.

B: On Sunday, I don't know where the hell they got that.

K: They got it out of Zarb's shop and it is an outrage.

B: Some of it may have come from National Security -- I don't know but I . . . .

K: I don't think so -- I don't think anyone here knew enough about it.

B: Anyway, where ever they got it, I don't know but I just want to tell you that I think that our people have been remarkably careful in this situation.

K: But what we need is -- you know, when we ask you to do something, you are to carry the can on technical grounds. Once it is in the paper that Kissinger wanted to -- and Ford wanted to have an embargo on Poland in order to keep the heat on Russia, that creates unbelievable resentments in Moscow. It is a lot easier to have them sore at you than at us.

B: Well, I agree with you but then -- listen, this is putting two and two together -- they didn't get that from us, Henry.

K: No, it is a direct quote.

B: In where, this morning's paper?

K: In the Washington Post, either this morning or yesterday.

B: Direct quote? Who are they quoting?

K: Agriculture official.

B: Oh, hell, that is just like when they quote State Department officials -- they make it up and they quote somebody, Henry. Now, you talk about Dobrynin saying that -- I haven't talked to Dobrynin in three months. Nor has Bell. I suppose contacts have been made at lower levels -- I don't know. Was invited to this Russian reception Monday night for the astronauts and I purposely didn't go because it is best not to . . . .

K: Look, you can -- I have always felt that you and I -- you have constituency and within the limits that are set you have go to please them and basically I want you -- I want to please them -- but you know for our policy it helps -- it is easier to say Butz is a son-of-a-bitch than to say we are the sons-of-bitches. You are not responsible for foreign policy but if we say we have tried to squeeze Russia and that goes to Brezhnev, then we pay all across the board.

B: Yeah.

K: That's our problem on this.

B: Oh, I hope none of our people said that.

K: They have got the Polish thing very right in the newspaper -- that I wanted it and in fact that Ford and I wanted it in order to keep the heat on Russia.

B: But that quote on that was not new -- that's been in stories around hither and yonder for two or three weeks, Henry.

K: Okay. Well, let me raise another question with you. You are fighting very hard for that 7 million tons. I prefer six million and let them come back for more.

B: Well, Henry, we discussed this Tuesday morning very fully in the economic policy board over there and the decision at that point was unanimous on this deal.

K: Yeah, but none of these guys has any foreign policy sense.

B: Well, I think there is very considerable question if they will even buy six. Our best intelligence is they have now bought about 22 to 23 million tons around the world some place and our own estimate was that they were going to need 25. Now they may need more than that but in the meantime there is evidence that they are cutting back in feeding rates and that they are going to take less than originally contemplated and I think what we have done, Henry, is make ourselves once again the residual supplier in the world market -- all of our competition has cleaned out their warehouses and bins.

K: Yeah, but there isn't . . . .

B: And we said here now that we take what we can get. And I suspect that we are going to end this year with a substantial increase in _____. So my sticking with seven was that we had a full discussion of this Tuesday and the facts were on the table. I don't know if 1 million tons makes that much difference.

K: But if they cleaned out all the bins then it means for sure if they want more than _____ they have got to come to us.

B: If they want more than six -- it is a very considerable question. I guess your instructions to Chuck are that we would like to have the Russians say our intentions are to buy so much. I don't think you are going to get the Russians to say that because if they openly say--for publication--our intentions are, that weakens their position at the bargaining table vis-a-vis our grain export.

K: No, no, our instructions were that -- unless they were changed -- we would tell them privately they couldn't go above the figure.

B: We would monitor that very carefully.

K: But they didn't have to announce what they were going to do.

B: They will ask us what we think they will buy, and at that point I think that Dick Bell or somebody could say, well, our best analysis is their needs may be this much.

K: I would prefer to say you can buy 6 million now and come back to us if you want more and not say you can't buy more than six.

B: Why do you pick the six?

K: Because that's what is the other agreement. .... frankly to have a figure where they have to come back to us.

B: These are two separate things. [Missed a sentence or two] I discussed this with Bill Seidman. His initial instructions were going to be that they could buy 6 million tons starting next October 1, but the wheat crop is going to be available in June, you see, and therefore I suggested that we

make the language that they could buy X million tons, whatever it was, out of the 1975 crop. Which means they can begin buying over -- they can buy for delivery out of the '76 crop, too. Just as a year ago in October they purchased some for delivery out of the 1975 crop.

K: You know, in fact, Earl, for a variety of reasons including total indiscipline in the government, we have not gotten out of this grain situation what we should have.

B: I kind of agree with that. We are coming out of it with nothing except a long term agreement. I guess that's right. And, frankly, from my point of view it would be awfully nice to have some kind of petroleum agreement. A part of my problem, Henry, is to diffuse this knee-jerk emotional reaction against selling anything to the Russians.

K: That's right.

B: And if we had a petroleum agreement it would make it a hell of a lot easier from my point of view and yours too.

K: Exactly.

B: And if it was just a cosmetic agreement.

K: Well, that's why I want it.

B: Well, I am for you, as you know, if we can get it.

K: But it isn't only the petroleum. We've just gotten ourselves over a barrel and really, you know, as far as I personally am concerned, in the seventh year of being in Washington, I don't give a damn anymore what people say.

B: I am getting that way myself.

K: Because my record is, for better or worse, now fixed.

B: It is a good record, Henry. Listen, why don't we go now on these instructions to Chuck. I understand that he is going to be in Moscow tonight. He is probably there right now. That he can talk in terms of seven, and we will watch this very, very carefully as we did before.

K: But the problem is then we have no leverage if....

B: They may want to go beyond that. I doubt if they will go to 7.

K: Yeah.

B: But we will watch this very carefully. As you know, on that prior sale of 9.8 million tons there wasn't a ton sold without our prior approval over here. When it approached 10 we put our brakes on it.

K: Yeah.

B: Why don't we go at this and we'll watch it very carefully.

K: That doesn't help me if they buy more than 6. What I would like is something we could hold them up to.

B: Why don't you pick 5 then? If you arbitrarily picked 6....

K: Well, I picked 6 only because it was consistent with the other -- I will be happy to pick 5.

B: Of course, this isn't consistent -- because the other is a minimum of 6 and maximum of 7. We have already sold them 9.8 and we are talking about some on top of this.

K: But you will scream even more if I say 5.

B: Well, obviously.

K: I had it five and, in fact, I increased it by one.

B: Well, the group yesterday, based on the....

K: Yeah, but that group, Earl, with all due respect -- there isn't one man in that group who has the slightest foreign policy sense.

B: Uh-huh. You have your man there.

K: Yeah, I don't know -- who is the guy?

B: Well, you had Dean Hinton there this morning. I don't know -- there was nobody there Tuesday, I guess. Well, we discussed it again this morning. Have you talked to Hinton since our meeting this morning?

K: Hinton is working for me and, by God, he does what I tell him to.

B: Well....

K: We haven't reached that point yet.

B: Well, he was there this morning. He can report back to you. Again the discussion this morning was let's stick at seven. And that was the consensus of the group there this morning as it was Tuesday.

K: Okay. Well, let me talk to Hinton.

K: You can tell them if they are willing to have the South Koreans present, I accept immediately.

W: But to have parallel talks--because their explanation is we wanted to discuss the peace treaty which should replace the armistic agreement and future of the American forces--with the Americans alone--as far as their future of the two Koreans is concerned, this should be discussed in parallel meetings between North and South Korea--this is about the position.

*

K: Oh they want to discuss with us about the future of the armistice

W: Right, right.

K: Hello Anatoyl.

D: How are you Henry. Thank you very much. How was your trip?

K: I am just leaving.

D: I mean your trip to Canada.

K: Didn't lyou read about it in the newspapers? It is getting to be like the Kremlin.

D; It is no problem. You are covered -- it is an open door policy.

K: Two things, three things really. Patolichev is acting too nasty. We are trying to get this thing settled and a little more conciliation on his part would be helpful.

D: I don't understand.

K: His behavior is getting to be too tough. I understand your problem but your analysis is not exactly correct -- the one you gave me the other day.

D: It is our analysis.

K: I think you are wrong. If I want compensation I want it in the political field, I don't give a damn about the economic thing.

D: Sure, like...

K: That is ridiculous. That is not the issue. I think we can settle it in turn. I think we can settle it in terms agreeable to you if you can -- well, first of all, I think the behavior is too rough.

D: I don't have any information on this.

K: I want to tell you this privately and if we make this agreement I think we should do it in a way that we are pleased with each other. Those are the instructions Robinson has.

D: The real....

K: Those are exactly his instructions and you will have to help us a little bit in not pressing things to the absolute limit. I am meeting your basic point.

D: I will pass on the points you mentioned since I don't have any information yet.

K: Ok. The second thing is the date that looks best to meet Gromyko is the 14th.

D: The 14th of November. Late November you couldn't do it.

K: No becuase I have to visit your allies.

D: Yes, you have a political problem. Ok. I will check with him while you are there and when you come back, tell you.

K: Yes, and I wanted to tell you I am taking Sonnenfeldt to China. This has nothing to do with you. It is to give him some experience and satisfy his ego. He is not along for any substantive purpose. I have him along for his education and his ego. I wanted you to know this from me -- it has nothing to do with you.

D: I understand.

K: I know we have an occasional reason to be irritated with each other, but I think this thing will come out alright. We should have a serious talk sometime soon when we can on where we should go in our relationship.

D: What about SALT?

K: I am waiting for your response. I can't do any more til I have a reply from you.

D: I understand. Will there be anything new when Sadat will be here. You promised to tell me.

K: We are giving them B-52s but that wouldn't affect you -- they are aimed at Israel.

D: Otherwise, there is nothing interest.

K: There won't be anything spectacular that I foresee.

D: Do you take him to Disney World?

K: I won't , no.

D: What about the beginning of this building of our apartment house in the complex of our embassy?

K: Let me get you an answer when I get back. I have to catch a plane.

D: Ok.

K: And you'll let me know about the 14th?

D: Yes.

K: We'll meet the 13th

D: What do you mena?

K: I will arrive the evening of the 13th and we'll meet on the 14th.

D: Ok. You will be in Paris.

K: I will be in Paris afterwards.

D: Ok. Have a nice trip.

K: Thank you.

K: I am talking to you off the record.

V: Good There is no problem about your being there.

K: I am at the margin by being there.

V: No, there is no problem with that. If you are there and you don't speak you make it clear you are there out of friendship but my advice is not to speak.

K: That is what I wanted you judgment on.

V: It is not a place to talk about the Middle East -- you could be humorous, but you do that best in a serious situation.

K: I think people would wonder what I was doing making a speech at a testimonial for Evans when I have refused some people who were -- on the surface -- much more deserving. What is this award?

V: It is an award for a man who is outstanding in the visual field. It is a prestigious award in that field. There will be television executives and people in the theatre there. It is a legitimate award and worthy. I have been to others -- one where Schlosser and Lemon received it.

K: They had me on the program for a 10 minute speech. I really would have trouble knowing what to say.

V: My firm instinct is that you shouldn't speak.

K: Are you afraid that I would get a few democrats on my side?

V: No, it is just showing support for him if you are there.

K: You can say my being there shows the many friends he has. You confirm my judgment. I will tell Bob there are other senior guys that have asked me to speak at things like this and I have turned them down.

V: Just being present is a great gift you have given Bob. It was a wonderful lunch today. I was touched by Sadat.

K: And then the way they played it in the newspapers. As you know it was a two sided conversation, but they only printed my side. I was favorable to Nixon. That lady sitting next to me asked if he was such a good president then why was he disliked. I answered then that he was a cold man.

V: You were very complementary. I must say no one around Nixon could deny that statement.

K: No, not even his wife probably.

K: Hello.

W: Yeh, good morning, Henry.

K: Good. I am sorry I couldn't get back to you last night.

W: That's all right. Don't worry. Henry, I just wanted to tell you what my impressions are on the Sahara. The emotions in Morocco are going very high and involves some difficulties to discuss quietly the situation. The emotions are so high there including the King himself. He wants to continue the march and only if Spain agrees to cede the Sahara to him and to Mauritania, he is ready to step up the march.

Now the reaction by President Boumedienne is serious. I never saw him so furious and rather uncontrolled than on that occasion. I had several meetings with him and he was always very much controlled.

K: He's always very controlled.

W: He wants to do that and that means fire in the area. I'm definitely not ready to tolerate this. He made a quick reference to the resistance of Polisario (sp. ?), but he said this is not the worst. If it comes to such a solution then it will have repercussions not only on the neighboring states but those on the Middle East. He asked me to tell you that he cannot tolerate such a development. In other words, he means between Morocco and Spain and he asked me to convey to you his request that you make a suggestion to the Moroccans to stop the march and to start reasonable negotiations on the basis of existing resolutions; in other words, a self-examination for the people of the Sahara. But I want to stress that the mood of Boumedienne is very serious and he seems to be decided to do whatever is in his means to block any solution worked out between Spain and the Moroccans.

I then had, in Madrid, extensive talks with the Prime Minister. It seems to be that the Prime Minister is more _____ than the Foreign Minister. But we discussed a compromise solution inasmuch as I suggested that they should work out a plan that Spain is making a declaration to restore everything in two or three months. That then to establish an interim administration of let's say, six months or so and during this interim administration Moroccans, Mauritanians and representatives of the population of the Spanish Sahara could participate already in that interim administration to work out the conditions of the referendum or consultations -- of course a referendum will be difficult with _____ there.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H. MILLER
DATE/CASE ID: 12 MAY 2003 200102979

W: (con't) I was mentioning an agreement which was reached in '62 between the Netherlands and Indonesia. It was a very similar procedure. The Indonesians were already involved in their interim administration before the Finns (?) turned over their territory to the Indonesians. So in this way maybe a resolution could be found. I have mentioned this to King Hassan when I was there. He did not reject it but he didn't accept it either because he said, "Well, ~~xxxxxxxx~~ firstly we have to get a direct transfer of the power from the Spaniards to us." Actually when I mentioned this same idea to Boumedienne he was in favor of it and thought that it would, at any rate, be a compromise one could discuss. And Spain was rather enthusiastic about it. Both of them -- I put these ideas on paper and both of them, the Prime Minister and the Foreign Minister, are rather enthusiastic about it saying "Well, if they ~~xxxx~~ are agreed, that would of course, get them basically out of the dilemma.

K: What do you suggest we do?

W: Sorry?

K: How do you suggest we proceed?

W: I think that certainly, Henry, it is important to send a message to the King to stop that march because the real danger is that if he is crossing the border that the real resistance is not by the Spaniards. The Spaniards, I think, are not so ready to fight. They don't want a colonial war, but the whole area is full of mines. The Spanish government has told me this. Also the mines are marked by the Spaniards. It is easy to see that there could be an incident and this would create some serious problem. And then, of course, Ricarios (?) supported by _____ by a shooting incident, guerilla warfare, etc. I must repeat, however, I was that much impressed by the extremely tough and rather emotional way in which Boumedienne reacted. He said if it comes to such a solution, this is the beginning of a fire in the whole area and I shall not fail to do whatever I can to fight against such a solution. So I was quite impressed because normally, you know, he is always rather quiet, but he was extremely tough and rather emotional. Complaining bitterly, not only about King Hassan saying it is the end of our relations but also about President Ould Daddah calling him a hypocrite. I said, well I try to defend Ould Daddah saying my impression was that he was a little embarrassed, that he would rather prefer a solution which maintains the friendship with _____. He said, "Oh no, he is a hypocrite." He could help in talking the King out of this whole thing but he doesn't do it, he is just going along and supporting him. He is extremely bitter and I'm afraid he will react in one way and the other. He didn't elaborate.

K: Who did he say was a hypocrite?

W: (Apparently the Secretary General did not hear the question.) He could not tolerate this and that he would have to react. And he asked me repeatedly to convey this position to you asking you to help in avoiding such a bilateral deal with Spain because it would have consequences, not only for the region directly concerned but also for the neighboring regions and he mentions the Middle East especially.

K: OK, well, I'll keep that very much in mind. And I'll let you know what we plan to do.

W: Yeh. I just wanted to -- I wish to repeat that I consider the situation very serious. If you could perhaps _____ or if you think that I could talk to Sisco this morning, he's coming for the lunch that I'm giving for President Sadat.

K: Yeh, I will tell them to talk to you.

W: Sorry.

K: I will urge one of them to call on you.

W: Yeh. Because I could then give you more in regard to this compromise plan which I have just mentioned and which could perhaps be a way out of the dilemma. For your information, after having been in Madrid I then sent one of my closest colaborators, the Frenchman, I sent him to the King. He was received by the King yesterday afternoon and he sent me a cable saying that he got the impression that although the King did not immediately agree to this compromise he was giving not a positive answer but he thought that there is a possibility to do something about it and he will fly on to Boumedienne this morning to see how he reacts finally and if there is anything new I'll let you know.

K: OK. And I'll send Sisco or Atherton to see you.

W: Yeh, I would appreciate that because I could give them all the details especially in regard to this compromise idea.

K: I'll do it immediately. OK, thank you.

TK: Mr. Secretary I have a couple of questions. First, on Lebanon -- are you able to give me any guidance on what the US is doing -- what we are getting from Bob is just a bland statement urging restraint on the neighbors.

K: The basic situation is caused by the fact that the real balance between the Moslems and Christians has been altered partly as a result of the PLO. Our major concern is to keep the Syrian military out and to prevent this thing from escalating into a general conflict.

TK: Any indication that the Syrians want to bring their military in.

K: No. If they did there intention might be to prevent a total overturn of the balance by the PLO.

TK: Would the Israelis have to respond then.

K: Yes. It would be hard for them not to.

TK: Why in fact have you ordered all Americans out of there.

K: It is physically too dangerous.

TK: The other embassies have not other than the British.

K: This is a decision that is usually left to the local Ambassador.

TK: And Godley recommended it.

K: Yes. We did not take the initiative.

TK: One question about the event night before last.

K: Where was I.

TK: At the White House dinner -- this may seem like a frivolous question but I am serious. When Pearl Bailey danced with Sadat-- I am interested in doing a piece on how the perceptions of different cultures can lead to different audiences . I know that to Americans it looks friendly and innocuous but as I understand it, particularly the MOslems are upset.

K: I don't think it will play well in Riyahd.

TK: Is it your understanding that any kind of dancing is forbidden -- not just public.

K: That I don't know. But certainly public dancing is forbidden.

TK: Any feedback from Arab capitals.

K: No, but I would not be amazed that the reaction/we are talking on deep background - - I would not be amazed if the reaction would be roughly what you expect. To say sort of pained but the mere fact of having to explain it gets you into difficulties.

TK: Why is he going to heavy on the Zionism thing. That csn be explained too but the mere fact that ...

K: Our press I think is getting to be unconscionable. You get a lot of Jewish people on the press hacking at thim.

TK: If he had just limited himself to the Zionism quote when he starts talking about the Jewish (boycott.

K: Whether it is true or not it is stupidity. It is also probably untrue. I am sure this is a great story in Cairo.

TK: What's a good story.

K: That is a good answer to give in Cairo.

TK: Yes.

K: It will take a while to make the cultural adjustment.

K: Senator, I got your friendly letter yesterday. I did not know what you were talking about frankly. Let me tell you what happenend. One of those stupidities. First my apolicies. I had no idea what had been going on.

I: I figured you didn't. We had sent 4(?) letter I think.

K: I called on Senator McClellan before it was passed and explained to him that all the documents that the Foreign Relations had, had been released and I left one additional document with him which represents the legal analysies of the other document. I will be glad to send you that documentation but I have two concerns which I want to raise with you. One, is the concern that I do not want to raise the proposition that whatever assistance request we submit derives from the Sinai agreement. I think it derives from the nature of our relationships with the parties and I think we will get into a very bad situation if we imply that we buying these agreements.

I: That is far from it.

K: This is my concern. You did not say this but I want you to know my concerns. The second concern I have which I hope you can understand is that I am, in principle -- I have no hesitation to showing you anything but I have some concern establishing the principle that any Committee could ask for any document that really should gro properly to the Foreign Relations Committee. We have to protect these documents or we want have a foreign policy left. I am not worried about your leaking.

I: Youwill never have leaks from my place.

K: If we agree that any Committee can ask for documents -- I had the same problem withthe Armed Servcies Committee. I think the Foreign Relations Committee leaks more than others. I had rather do it on the basis of showing them to you. Although we have nothing to show.

I: If that is the case, let's just have a copy in our files.

K: Of what has been published. I will send it over to you. You certainly did not rate such an answer. The answer should have been that they have already been published and these are the official documents from which you can work. I would like to send my Legal Advisoer up to go over the legal document with you. You can use it as you see fit but use it as your personal document rather than the official document. My apologies. A: Yes.

K: And that they do not reflect our policy.

A: Yes. All right, sir.

K: And you send a copy of that to Toon.

A: Okay.

K: And you tell Toon that he is not in business for himself.

A: Yeah. The message that went out last night I think made clear that he was to stick to lines that have been approved -- approved guidance -- not free will and his response, uh, it doesn't really explain what I think was an incredible performance but it does say that he regrets and will be more careful in the future. He does however add that -- he says, I [redacted] stand on what I said.

K: Well, you reply to that and say if he wants to stand on what he said he better do it back here and not as Ambassador. Have you seen our suggested press guidance on this? For today -- because there will be questions ϕ about what we have -- we said yesterday that we were asking Toon for the transcript and we've got it now. I gave Bob Anderson . . .

K: Yeah, that's fine.

A: Okay. Mr. Secretary, can I ask you one other thing -- I've just had a call from Dinitz on the second boat and he said he has had a very strong reply from . . .

K: The answer is no and we will ~~XXX~~ side with the Egyptians.

A: What they have said is they want us -- they want this to become routine and they don't think they ought to even have to go through us. They were doing it the first few times to be sure there weren't any foul ups.

K: It cannot be done while Sadat and Fahmy are here.

A: Yeah, that's what I would like to go back and say.

K: And you tell them after that they can make it as routine as they want.

A: Exactly. That is exactly what I would like to say. We don't want to be in the middle of this.

K: And we don't say they have to do it through us every time but this God dammit can't be done while Fahmy and Sadat are traveling through the country and we have next to no effective means of communication and their meamsn of communication are poor.

A: Right. This is what I said yesterday. Rabin's reponse is that they can't accept this reasoning. That's exactly how Dinitz put it to me.

K: Tell them if they proceed we will have to ~~stay~~/ state our views publicly. We consider this a provocation.

A: All right, well this is what I wanted to reply and I . . .

K: You tell them that it has been taken up at the White House and we consider it a provocation and not an exercise to -- to put this to the Egyptians at a time when they are in grave -- when they are travelling in this country. Let them give us a date after Sadat has been here and after he is back.

A: After he is back in Egypt.

K: After he is back in Egypt. Then they can make it as routine as they want.

A: Right, that's precisely the line I would like to take.

RELEASED IN FULL

K: Hello.

J: Hi, this is Julie. How are you.

K: Fine. I was very moved by your letter, which I got yesterday. And I want you to know that this story came out on the day I left for China, and I called your father immediately and it is an absolutely outrageous story. The whole conversation was in the context of my explaining to that lady who was the Speaker of the Parliament that I consider your father.....the whole conversation started when she asked me to list the outstanding President's of the post-war period.....and I said Truman and your father. And she listed a whole lot of criticisms and said how can he be an outstanding President? That's when this other quote came. I said, even if all of this is true, and he was all these things.....Then I did say to her that you have to understand what a tremendous effort of discipline this man made ---- who was not a natural politician -- who was really quite shy, and extremely sensitive -- to make himself a politician.

J: Right.

K: So, I wanted you to know that I called the newspapers and tried to get this story killed. I never made these statements. This was answering questions -- and they just took isolated sentences.....and strung them all together into one coherent speech....and there was absolutd y nothing I could do about it. If you read carefully, you will see that I said, for example, Kennedy was a bastard.....they could hav e put that on the headline.

J: Oh, I know, well. You know it must be Tricia who wrote you, I didn't write.

K: Oh, was it Tricia?

J: It must have been Tricia. But I think you are so nice to call and I'll call Tricia this afternoon, and .....

K: Hello.

A: Mr. Secretary.

K: Yes.

A: I just want to report on my talk with Joe last night. By the time I got back to him he had -- he and Herman had already seen Fahmy. This is on the seabird.

K: And of course they did what I had told you I didn't want done. Right?

A: Well he said that they just put it to him in a very flat non-pressure . . .

K: I told you that this shouldn't be done and you did it anyway.

A: Well, I . . .

K: No, I had said all week long it shouldn't be done that way -- did I not? You just went ahead.

A: No, the last I knew, Mr. Secretary, you had said you were going to take it up over the weekend.

K: That is right and I told Sisco on the way out and I told Herman not to take it up and nothing had changed on that.

A: That's exactly what they did . . .

K: No you did not! You simply carried a message for the Israelis which I told you not to do.

A: Well I am sorry. Larry had called Joe and Joe was already acting on the basis of that call which I gather was that -- as I understood it from Larry -- that he should . . .

K: Joe should take up what I ordered him to do. All right. What is the answer?

A: Fahmy said that they have no problem with the ship going northbound empty. When it picks up its load and starts back, then he said that they would like it to delay for about a month. But he said as far as the first transit is concerned he sees no problem. My recommendation would be that we not tell the Israelis this until Wednesday.

K: All right, tell them on Wednesday that I've taken it up and they can move it north.

A: And then I think we just have to get out of this business because they are planning to send ships through very frequently. There are three they announced in the ticker today that they play to send through in the next few weeks. And I think we ought to stay out of it.

K: Yeah. They are unbelievable [redacted]! B1

A: Except when we do tell them about this one I think we ought to say they ought to stop putting out a press release everytime there is a ship scheduled to go and go quietly.

K: Okay. I've got to go into a meeting.

A: All right. Fine. Thank you.

Time: 4:35 p.m.

K: Tricia?

C: Hello, this is Tricia Nixon.

K: How are you?

C: Fine.

K: I received your letter last week. I first thought it was from Julie but I called her and found out it was from you. I wanted to tell you that I was moved by it and that I think you are right. What you couldn't have known was that these news stories came out when I left for China and therefore I could do nothing about counteracting them but call your father. It was a vicious story. I never said any of these things in a coherent conversation. The whole conversation developed out of a conversation with the lady from Parliament ask ing me to name two outstanding Presidents, post-war Presidents. I said Truman and your father. Then she asked me questions criticising him. All of the comments were not representative of the questions she made. Then what I said about your father was really in the context of the fact that I was amazed that he had entered political life because he is a sensitive man.

C: We have all been misquoted.

K: This was a dinner conversation.

C: I read something that was sent to me from one of the Chicago papers. It was an editorial about what you were alleged to have said. The press were in another room so they must have gotten it garbled.

K: There was one girl who put a tape recorder on it. This was a two and a half hour dinner conversation they took out all the things that sounded critical of your father and printed them. They didn't put in anything where I contrasted your father favorably with Kennedy. Only the New York Times printed that.

C: I can't say that I am surprised.

K: One half of the things that were ascribed to me the lady said. They all admitted that you could barely understand what was said. I feel very strongly about the point you made.

C: Which one?

K: That your father did me the honor of appointing me Secretary of State, and that I should stand by him.

C: He still sticks by you.

K: I have tried to stick by him and I call him regularly and try to help him with my colleagues here. I feel strongly that you should know I have not forgotten him.

C: That is all I care about. I said that our whole family really supports everything you are trying to do and we are proud that Daddy appointed you and that you are making a great representative for our country.

K: Your father designed the foreign policy that we are carrying out now.

C: Our country really needs you.

K: Above all I want you and your family to know that I have not forgotten your father and that I am sticking with your father also.

C: He is staying with you too.

K: It was a touching letter that you wrote me.

C: It was a letter of concern because even knowing how the press distorts things and gets them wrong I felt the letter was necessary.

K: I wanted to let you know that it made an impression. I hope to see you again.

C: Good. Bye.

K: Bye.

B: He said he did not think the resolution would pass anyway and he would want a chance to discuss with you personally. Nowe we cannot be sure that it would pass and probably not in the present form. He felt that perhaps it could be put off until next year at a minimum. The disadvantages that you saw, I think, would really exist for us whether or not the resolution was adopted as long as we have taken the initiative to put it into this catatory.

B: Henry Kissinger, this is Brosselette, how are you?

K: How are you.

B: I won't take much of your time but the President, who is in Tansania has asked me to call you about the Rambouillet meeting. There are three points. First, Shultz and the others have planned a new meeting in London next week. We understand you do not favor very much this meeting.

K: We don't see much sense in it.

B: We think it would do no harm.

K: Let me look at it again.

B: We won't press the matter. We want you to know we favor this meeting because they could look at the subjects that will be discussed and many other subjects will be discussed. Since the Heads of Government will not have much time, on the economic matters, maybe it would be better to have this group go over these things and agree to say what could be in an agreed communique. And after the meeting there could be an agreed communique and it would be better to work out beforehand what would be in the communique. But if you have a problem, it is ok.

K: Alright.

B: The second point is that we have organized the meeting so that sometimes the other Ministers would not have access to their Chiefs....

K: It is not a question of sometimes. Sometimes I think it is desirable but we get the impression that at no meals could any Minister w be with their Chief.

B: We have organized ~~it~~ it so that Ministers can participate in all meals at Rambouillet.

K: But our understanding is that they are in different rooms from the others.

UNITED STATES DEPARTMENT OF STATE

B: That can be decided at the last moment. My understanding is that meals will be taken monstly together and the President is aware of your views and asked me to tell you he is going to help as much as he can.

K: It is not so much important for me as for Simon.

B: You and the others too. But we are going to be flexible and follow your lead at the meeting, when we discuss these matters. The third point -- we are worried, you see, Rambouillet is a small place and your people are asking for far to much for your delegation to get in and out of the castle. We decided only 15 people from each country would be able to get in.

K: How many have we asked for?

B: Your requirements are different from Schmidt and Wilson, so we will be more flexible with you, but we will not be able to meet all your needs.

K: Don't worry about it.

B: We will discuss it with your embassy, so you don't feel too cramped.

K: They will understand, or we will understand it here. Will I see you there?

B: I don't think so. We planned this meeting as rather secluded and only a small group of people. I will be in Paris, but I don't think I will go to Rambouillet, unless they need me.

K: I may be able to see you then in Paris.

B: If you stay in Paris, or arrive a bit beforehand. I will see you with pleasure.

K: Good.

S: It reminds me of Lyndon Johnson when he was getting a flowery introduction he said it was just a shame his father could not be here. My father would have enjoyed it and my mother would have believed it. Again, this is just a mood peace here casting you as the man of long duration. It would say and I quote you in talking about the bitterness that accumulates around a man who hasbeen in the office this long it is inevitable, says Kissinger, when you live at that level of power for seven years you gain criticism and few supporters. There are no exceptions -- Acheson, Dulles, Rusk. His relations remain as close an as popular with Ford as have ever been. It says you are still doing the White House briefings although the routine may change. Then I quoted this. Agains, this is your talking to friends or otherpeople. The news story around town is that Richardson is being brought back to take my place. If he is I know nothing about it but maybe some Sunday morning I will be called to the White HOuse and fired. and in the midst of some of his worst trouble he carries along the concern of the national interest. Do they think I want another upheaval after Watergate, Vietnam, the Middle East. What seems to hang in the balance now is whether we will go back to the days of cold war and unlimited arms build-up and bitter confrontation with the Soviet Union or whether we can keep the new relationship alive. Then we go on talking about this strange city of Washington which makes the effort to dismantle so much. Kissinger, hwn he is not protecting his flanks is still looking into the future. So many people seem to have the belief that God has been giving the United States the right to experiment with no penalty. The time has run out. If there is no accommodation with the Soviet Union now and no _____established for peaceful causes, we may slide back to the cold war. It wouldn't be like the 50s. If there is confrontation with the Soviet Union and we mobilize and take a stand it will be possible only if the people know we did all we could to prevent it. We have a great opportunity now .

K: Can you say will be sustainable rather than possible.

S: I see. O.K. We have a great opportunity now. The Soviet leaders have gotten older and tired. We are going the only way left. In a single matter of pursuit like the Soviets, Kissinger sometimes says he does look at times like a ruthless power grabber. Many friends have urged him to get out now. They believe that a man who staysssso long can only harbor more bi-terness. But the Secretary has said in conversations that someone has to stay in an pick up the pieces and fight the same battles. I go on about my views. Despite Congress and despite a cynical country he intends to stay as long as he can. He has found a personal reserve of enthusiasm in the middle lands. It amuses but gratifies him. They want Russian markets for grain and common sense says it is the only --accommodation. Also a peculiar thing now but thc Secretary has some support in Congress. He has gained a little yardage with the Pike Committee and a long with the Turkish miltiary embargo.

K: Could you avoid saying amuses but gratifies me. Amuses sounds too patronizing.

S: We can take it out.

K: I don't want it to seem as if I am looking down on these people whom I respect enormously.

S: I know that and I see your point. The survival is routed in the rightness of the goal even if sometimes his methods have been questioned. His chief worry is that politics will turn debate to personalities--his mainly-- and he may have to leave before he wants to. He is still armed with a sense of humor and sensitivity of what will matter around the world. Two

K: That is a very good point.

K: It hasn't crystallized yet. Let me get Atherton to call your after he sees ~~whether~~ where the hard cases are.

M: Right. One last thing. The question of Chile comes up tomorrow. The Department say we should vote with this resolution. Bill Rogers thinks it. Bill Buffum thinks it. We think it. I hope you will sign off on that because it will make things follow.

K: What resolution is that?

M: It says the practice of human rights in Chile -- it says you haven't done very good and to do better.

K: We are experts at undermining our friends.

M: Can I make this point? It has merit. I think the resolution is marginally justified. If we get this resolution passed I propose to make a speech on Thursday in the General Assembly. I will start off with how come the only thing the UN ... about is Chile and South Africa and then make a case for Chile. Chile is the first country to consider letting the Human Rights Commission come. The Latin Americans will probably split about 7-7-7. The Western Europeans are solidly for it. If we arent' for it I am afraid we will have problems with Fraser.

K: I will probably go along with it but I don't like it.

K: The Brazilian recognition of the MPLA -- why is that necessary?

R: I analyze it this way. I find it consistent with Silveira's general policy of ignoring ideology and trying to improve relations with everyone.

K: Well, then, why not improved relations with Unita?

R: He is doing it in part to seek out a position of leadership and a relationship with Portugal. And he feels he moved too slowly on the Mozambique thing and was cut out. And he is talking out of both sides -- it is for personal reasons. I am having -- we don't have any major guidance from Brazilia yet on why he has done it. These are reasons I worked out myself.

P: I know you were there before you assumed your public responsibilities.

K: I was. I was there before I resumed my public responsibilities. I will make it a point to come on one of my visits. I appreciate what you are doing and I enjoyed our talks.

Let me take this occasion to welcome you to this country and let me express my regrets that we weren't quicker in getting together.

P: May I add that I hope the meeting in Paris will be successful. May I say for my small country two things. We assess great importance to the fact that some vitality is brought into Europe; that they really try to create the spirit of a little more optimism than the gloom hanging over Europe; and the meeting could be very helpful.

K: I consider that in many ways its most important function. The problem of many industrial democracies is psychological problem.

P: The problems of industrial countries are difficult but not insolvable. We have attached very great importance to this dialogue that you are discussing because I think it may turn out to leave you in a calm atmosphere in the whole host of problems in the third world and developed nations.

K: That, of course, will be taken up primarily in the meeting in Paris the following month, don't you think? It will be taken up by the heads of government but they have such a full agenda that they might not be able to spend too much time on it. I will be getting together with the Foreign Ministers to spend time on it. It is one of the key problems.

P: I am sitting here at the luncheon with a number of UN Ambassadors of the third world. I am criticizing them heavily on the Zionism issue.

K: They have made our domestic situation very much more difficult for no purpose I can see.

P: No purpose whatsoever. The problem now is to calm down the atmosphere and to be brought down without increasing confrontation.

K: I agree absolutely.

P: No one can define properly what Zionism is.

K: We will attempt to build on what we submitted to the Special Session and to the dialogue in September and make some additional proposals.

P: I think they basically feel somewhat bad about it.

K: It was a senseless matter to bring to an issue. No one knows what Zionism is. It raises many profound moral issues.

P: Exactly. It does a terrible mistake of pointing out the Jewish community of the world instead of speaking of the proper role of the State of Israel.

K: To attach a stigma to the State of Israel on Jewish grounds makes the problem insolvable. If it were on national grounds it would be much more possible to solve and easier for people here trying to solve it.

P: Exactly.

K: I hope you have a good trip back to Sweden and a pleasant stay the remainder of time you are here.

P: Thank you for calling me.

The only reason for this call was to tell you that despite all appearances to the contrary in this city you still have some friends. I count myself among them.

K: I appreciate that.

MK: I think there is a terrible viciousness around these days. Even if 20 per cent justified, the 80 per cent is not.

K: I cannot tell you how much I appreciate that.

MK: There are a bunch of bastards running around town, not taking anything into account but personal ambitions. They don't think from one day to the next. They have no idea where they want to go -- anything malicious is glorified. I was reading the papers. You do have friends around town and I hope that you will stick with the long picture and not the short one.

K: Don't do that to me. I will be in prison before you do it. Clements tells me on our side there is no problem. I admire the Shah -- he is one of the few outstanding leaders we have left in the world.

Z: The problem was with the gentleman who left. I was rather nasty to him the night in Chevy Chase -- another party you weren't there. I told him if I want to see him it was because the Shah says so and my understanding is as Ambassador I have to go through the State Department and if there is anything I have to bring to the attention of the President I will go through the Department. But from the State Department we have wonderful cooperation. I am not cross with you any more.

S: Ugh. That may mean you have to come back first. You don't want to spend that much time if the Paris thing doesn't work.

K: If it doesn't I will be back on the 19th. My present thinking based on nothing but superficial -- if we can reduce the total to 23 -- if we then say cruise missiles and SLCMs -- I think range of more than 600 count in the total but not to exceed 200 that heavy bombers with ALCMs are counted as MIRV'd then we have countered their backfires or used cruise as an offset to backfires. They won't be able to put up SLCMs or backfires.

S: It is to reduce their throwweight.

K: Could you work something like this out. How do we handle the bureaucracy?

S: I have worried about this too. There is a story that the President has been given a proposal already.

K: Not that I am aware of. Will you think about it and let me know tomorrow morning?

K: I have no idea.

TK: It is up to him now?

K: I have made it as clear as possible that from my side that the thought that he might resign did not cross my mind. There were no real disputes. We have to take out some sentences in a speech but you have read the speeches. They are certainly aggressive enough even with the deletions that are made.

TK: Yes. All the speeches thathe has made these past couple of weeks have had the approval of the State Department.

K: Except the one in San Francisco. In that one I disassociated us from the OAU part but not from the Amin part. Hell if you know the excuses between the UN and the State Department it is minor league stuff.

TK: O.K. Thatis very helpful and I will put that in tonight. Are you doing any traveling next week other than Detroit.

K: No.

TK: May I come and seen you.

K: Is is urgent.

*

TK: Not at all. For some strange reason we get to see you 2-3 times a day and when we are back here I do not have the opportunity

K: I will make an effort.

TK: I will call.

K: There was no dispute. I was stunned when this thing happend. In any normal period no one would believe for 30 seconds that the U.S. Govt would get a foreign ambassador to attack its own ambassador that the foreign government would do it.

TK: When is Moynihan coming down-tomorrow?

K: I have no idea. I think Monday or Tuesday.

TK: Is he seeing you and the President.

K: Certainly together. Now you know there was no dispute between Moynihan and me. If you had asked me at 11:29 on Friday morning I would have said to you Moynihan is a close friend of mind as indeed I said to a whole group of press guys on Thursday evening at11:30. He said he was thinking of resigning. I talked him out of resigning. This was on Friday. The next thing I know it is in the newspaper that there has been a mortal struggle with the State Department. On what. Let him name one issue on which there has been a mortal struggle.

TK: Why did he not whole the newspaper conference.

K: Because I talked him out of it.

TK: Andit was left that he would come down and talk to you next week.

K: That's right. It is now anybody who wants a little publicity can -- it is now the fashion to start attacking me.

TK: After a while it is going to become counter-productive. You arealmost due to come around to the other end of the trend now.

K: It is a total outrageous absurdity.

This is for your guidance not for quotation.

TK: No quotation but for information.

K: Don't say I am complaining about it.

TK: O.K.

A: They are suspicious that Moynihan called a press conference and 10 minutes before it he cancelled it and they want to know what happened.

K: He is a good man.

P: Excellent man -- very dedicated to his job. It is a difficult circumstance. They had a meeting for some anniversary there -- there were 200,000 youths that past by the Embassy. They were not hostile just stoped for a while. I understand I just give you this for your information -- that the 230 is going to be reduced.

K: What 230?

P: That we were going to loan to Greece.

Our relationship with China depends above all on the degree to which we can bring our foreign policy perceptives into some sort of alignment with theirs. This depends upon their perception of us and our leaders. This meeting could be very important although a great deal cannot come out of it.

I opposed it not because we didn't get on but because it wouldn't solve any of the problems. If there was a motive for leaking it, it was to freeze the decision lest I change his mind. If any of my people did it, which I tell you is almost inconceivable, since they knew my views, they did something absolutely outrageously against my desires. But do you know this as a fact? This is for my own information and not to criticize you. Have you heard one of my people do this?

S: I can't go into that. I am not a careless person. I just avoid printing a lot of these things even if they are true. I have no doubt about this.

One or two confidants that I had who knew about it would respect this decision. There were no victories gained in this thing and on the Moynihan thing there was no debate between him and me except on an adjective here and there. But that is a different matter. That was your opinion. I don't protest about that.

S: Well, Henry, I don't know what to do about these things. It is my birthday today. What a way to start the day.

M: It will work out alright. I have no instinct for this place, however. (to Joe Lorenz: What is your instinct?) The Syrians are on the phone to Damascus -- he thinks it is pretty good.

K: My instinct is they will go for it because they have gone this far. We will have to have a talk about January 12 session. I wnat it in February, but let's not worry about that (to Sisco: suppose it says 12 January, can we get it delayed a week?) D on't worry about that now, who will be the chairman in January?

M: In January -- Maritania? (who is the chairman in January?) Tanzania -- that is not the worst.

K: Why don't you proceed on those lines and keep Joe informed the rest of the evening.

M: Oh, yes. We will also call you tomorrow.

K: You can get the plane -- we also have rapid communications.

D: Missed first sentence

K: It makes us feel your government is really interested in great solutions,

D: That is not quite the case. I had a long talk with Sisco and we had talked about it before you left for Detroit. I am calling you now aboutthe proposal Waldheim is putting before our Ambassador.

K: Which is what?

D: He said that the text that would be agreeable to the Syrians has a paragraph to reconvene the Security Council on January 12 to debate the Syrian question and to invite the PLO according to Resolution 335 of the Assembly. That is unacceptable to us.

K: I already made clear that we would oppose it.

D: What I am really trying to ask you is that if it is possible for the text to be parallel to the one of last year.

K: That may be impossible now. We cannot prevent debate on the Middle East. Any members of the Council has the right to ask for it. We can prevent an invitation to the PLO as part of the resolution.

D: Even in the original text, there is urgent consideration of 338 in the report of the Secretary General, why do they have to put it as part of the resolution. To tie it into that is_____.

K: Are you asking us to veto the UNDOF if it has any reference to the Middle East discussions at all? I agree that we should not have anything in there inviting the PLO.

D: Or for that matter any specific date.

K: Why?

D: Because it ties the extension to a date of the Security Council.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT H MILLER
DATE/CASE ID: 09 JUN 2003 200102979

K: Do you want us to veto on that ground?

D: I am asking you to try to change it.

K: That we are trying to do. I have asked Buffum to find out from Jerusalem if you want us to veto, the UNDOF extension if we can't get everything.

D: I don't have specific instructions on this. I will have my Counselor talk to Sisco about it. I want you to stick to the original text. If you would put out your views, they will agree to it. You don't think so?

K: No. I know it is impossible to get this from Jerusalem but I think we have done very well to eliminate all the issues we have. Now we will get them to eliminate the invitation to the PLO, we hope. To cut out the discussion, that I would question.

D: I will try to get from Jerusalem their position on it and I will have it passed on to Sisco.

K: We agreed that the reference to the other resolutions should be out.

D: You do think that if we have no choice we should leave the question of reconvening of the Security Council on debate.

K: Yes. I am not looking forward to the debate. It will not be the most edifying thing to happen.

D: No, as you said, though, any member can convene a debate.

K: Right. On the other hand, it is hard to veto a debate which is in the Soviet's ability to convene anyway.

D: It is the same logic anyhow. Why do they need it then.

K: They need it as a minimal facesaver.

D: Besides a facesaver, I think they want to tie it to the Palestinian question.

K: That they want to do eventually.

D: If there is a debate, they will invite the PLO. Then, we will face that problem. If we could cut if off in the beginning, it would be better.

K: There is no question it would be better if we can cut it out. The question is, must we veto it if we can't cut it out.

D: I will try to get a direct answer to you, Mr. Secretary. When are you leaving for China?

K: Tomorrow morning.

D: I will get back to your people today on this. I want to tell you I heard your speech in Detroit which I thought was very good. I am here in San Francisco because I made a commitment some time ago to speak to a large group of Jews.

K: Did you hear the full text?

D: Yes, from this and talking to some people here, they received it very well, expecially the part on Russia and Cuba. I will try to get to Sisco before you leave. Buffum is not the greatest enthusiast.

K: Sisco will be with me.

D: That's what I mean.

K: But Sisco is with me sothat together we can handle anything that comes up.

D: I will be in touch with Sisco later and if no other difficulty I will call you later.

K: How are you?

S: Just fine. I appreciate your returning my call. I am sorry I missed you before Christmas.

K: I called about the operation in Zaire, and to urge you to delay any final decision til we see what the World Bank is doing because in this situation where everything is so shaky we don't want to add any more to it.

S: Our problemx is we are spending 20 million a month and the cost was originally estimated at 400 million and now it looks like 900 million. The original plan involved ban k financing of 230 million and 150 (?) million of financing from other banks around the world. In view of the economic situation in Zaire where Mobutu is in deficit, the banks have indicated they will not disperse any more money for our project. So it is a project which has doubled in cost and it is at an uncertain stage so it may come to the stockholders putting up the equity...

K: When are you going to make your decision?

S: We are at the point of advising Mobutu now.

K: Can you wait for a week til after the OAU meeting.

S: There is no way to meet til after that. We hope to meet the 12th or 13th next week. What we would propose to tell his is that the cost of this project has gone out of sight. The cost of the power line which the World Bank and IMF is financing has gone out of line and will be delayed. We have to make a reassessment of the project. We do not wish to abandon it but reassess it as to the time frame and cost and it may mean refinancing the deal. The government has a 20% interest in it. We haxexx may have to ask the government to forego it. After we advise the Zaire government of our situation, at best it will take 4 to 6 months to decide on a course of action to take from here.

UNITED STATES DEPARTMENT OF STATE

K: My problem is how much bad news we inflict on them in one week.

S: Right. And that is why I wanted to talk to you. I have talked to McNamara but not for about ten days. His group is making a study as to whether they can participate in the project as an equity. But they will not have a answer on this, in my opinion, before the end of January. But even if they say they are willing to participate, they will have a lengthy negotiation to effect that in terms of contractual matters. I don't think we can continue to pour 20 million a month into this when we are not sure we can secure the money necessary to see it to completion. I am aware of the situation in Angola and do not wish to do anything that would have a crucial impact on that but I have my stockholders money to look after.

K: I understand the situation and the more delay you can have the better -- even a week would help us.

S: What kind of a date?

K: The 19th.

S: Can I relay that to my partners on this. We only have a third interest. The other is the Oppenheimer Group from Johannesburg. Mitsui has a 6th and the other is French. Can I relay to them we would delay a contact with Mobutu til the 19th.

K: If it doesn't get to be a public event.

S: I would not be.

K: Ok, then you may.

S: I will take this matter up with my partners and see if I can persuade them to delay til the week of the 19th.

K: OK, that would give us a week.

S: Have you any indication from McNamara as to the World Bank's participation?

K: No, but I have talked to him and urged him to give it sympathetic consideration.

S: Ok. I will proceed and advise your office as to our decision.

D: Hello?

K: Yes.

D: I would like to tell you now about the Middle East Security Council. I received a telegram. I will give you a summary of this and then I could come to you. I could do it through Eagleburger. Two points, the instruction I have is to see you. It goes to all the members of the Security Co-ncil. It is a statement of our position in connection with the Security Council business. Main point, the Soviet Government believes that when discussing the Middle East situation the Security Council must lean on its resolutions after the 1967 war and the 1973 war respectively, relying on 242 and 338. The main result of discussions in the Security Council must be the creation of the necessary conditions for the resumption and working of the Geneva Conference. Now I have something to add in this connection. We don't want to change Resolution 242 or 338. What we are trying for is the end of the discussions should be a resumption as soon as possible of theGeneva Conference.

K : If you do it on the basis of 242 and 338 we will support you.

D: I understand that the question is really about the Conference and participation. We don't want to change 242. We don't have a specific position but our representatives should be talking about how to deal with it.

K: We had better not do that in New York.

D: As of now we don't intend to propose any new resolutions.

K: I mean the contact between our representatives. Let me look at the document. When am I going to have it?

D: In 1 1/2 hours.

K: Do you want to come in tomorrow morning?

D: At 10:00?

K: How about 9:30.

D: Good.

K: See you then.

D: I will give you what is here. 9:30 I will come to you as usual.

K: O.K. Good.

A. Insert before the last two paragraphs:

My government is not prepared to acquiesce in an action which will undermine the negotiation process, which is the only process that can lead to peace, for the representatives of the PLO have repeatedly told the General Assembly of their disdain for systematicalegotiations. They have openly declared their hostility -- indeed their contempt -- for the work of this Council. They categorically rejected Security Council Resolution 242 which for years has served, and continues to serve as the only agreed basis for serious negotiation. If I may use a judicial analogy, not inappropriate here, the PLo is in contempt of this Council. The only purpose for which it could be appropriately before this Council would be to purge itself of this contempt.

B.

To conclude, the United States remains committed to the "Balanced whole" achieved by Resolution 242 and we are more convinced than ever that any any effort to tip this balance by altering the subject matter of the debate or the identify of the parties participating could jeopardize the possibility of achieving a just and lasting peace in the Middle East.

J: That was my impression. That side of it is very hot. Torrijos guarantees tranquility for six months but I told him that it was absolutely impossible in my judgment. I am speaking of a little. It would take even more time for what is necessary to do the job. That may have been rhetoric, but I don't think so. Your presence is very very much desired and commented on, etc.

On some of the ideas I gave you as my own you know, don't phrase them into these exact numbers I gave you. Where I said to train off some backfire against ship launched Missiles. How we work out the numbers we have to have a little flexibility in Moscow. The difference between the first and second -- outside the counting. In the second one you don't count the _____ as MIRVs and there may be one other wrinkle. In the second one we would probably ask that the overall totals be reduced to 2300 by '80.

K: Scotty how areyou?

R: You are off are you?

K: That's right.

R: To what purpose -- is there something useful that can be said about this.

K: I am in despair. I am going knowing full well everyone will shout at me. The thing to do would have been to say I am not going under these conditions. The strategic arms limitation ismore important than the ups and downs of our domestic debate and I think we should give it one more try. If we fail at least we will have known we have done everything we could.

R: You must have some reason for believing.....

K: I believe since the Soviets were the ones that asked for this trip -- since we told them they have to modify their position -- we have changed the date three times and they have accepted that -- they must have a strong reason for wanting an agreement and they must realize that with Angola and the mood in this country another failure would be a significant setback. If we mortgage everything to secure debating points we will be in bad shape.

R: It is worth a try and you do the best you can against the historical problem. It is a hell of a problem. I don't think they would want you to come and fail.

K: If I go and fail because of their intragence they will have one hell of responsibility.

R: Is that the kind of thing you can talk to Dobrynin about in advance and have some indication of where you are going?

K: You can be sure I have talked to him in advance.

R: They must be more worried about this decline of trust in this country it is not in their long-term interests.

K: That is true, but you and I know that a year into a confrontation with the Russians many of the most vocal attackers of detente today would be screaming for more peace moves. We would be where we are today but with less favorable positions for us. It is hard to conduct negotiations over a period of time.

R: Angola can't be that important to them.

K: They may not know how to get out of it. It is a serious matter now there are 8,000 Cuban troops. We can't even send money to friendly governments who want to help Angola and the Cubans can send in 8,000 troops.

R: What is the alternative?

K: There is no alternative. Without SALT the gaps will be larger against us. It is too bad that the intellectual community is turned off, because they could explode these charges if they wanted to with some analysis.

R: I had a funny point I wanted to put to you. When you first came here I said I thought there was a role the press could play if there was an understanding.

K: Yes.

R: What has been going through my mind was that if in the spring we had had enough trust so that you could have told us what the Soviets were doing in Angola there were many views that would have been printed. Congress would then have implored you to go into Angola.

K: We couldn't have done it before this summer. We didn't know at before July.

K: We started briefing the Congress in August. We briefed eight Committees 25 times.

K: What do you think we can do?

W: It isn't easy. The Christians and the Moslems are not ready to accept any international intervention or action by the Security Council. The Moslems don't want to i nternalize the problem and the Christians are interested in doing so. The other day a member of their parliament came to see me. He was all in favor of some sort of action by the international community. I told him that it was difficult as long as the government is not ready.

K: Why don't you let me get in touch with a few countries to see what they will be willing to do and get back to you.

W: If Karami maintains his resignation it will be a serious situation. If Lebanon is disintegrating, it will creat a terrible situation in the Middle East as a whole.

K: I will have Sisco get in touch with you as soon as we hear from the parties.

W: I though we should have an exchange of views.

K: I appreciate your concern.

W: I am in contact with a number of delegates here. We cannot request a meeting of the Security Council in this regard. It won't resolve the problem. Some bi-lateral action in Lebanon would help.

K: We will see what we can do.

W: As far as the debate on the Middle East you have been informed the Arabs have agreed on a resolution that contains the three elements -- the self-determination, the right to return, etc. I have read the statement of Moynihan this afternoon and I was talking with Sisco last week. I think they want to get something out of that debate.

K: I looks like that to me. We are taking a look at it but I am not optimistic.

W: We have to see how we proceed further. One last thing, Cyprus after some trouble we have had it looks better. There seems to be an agreement that we start on the 17th of February. Clerides withdrew his resignation. They want to set up only two committees which should go to Cyprus and discuss this. I told the Turkish Ambassador that we should discuss the package deal -- we should have some substantive discussions here.

G: You spoke briefly last year.

K: In about one-half hour.

G: It did not seem that long, Henry.

K: That's because I was so brilliant.

G: I will check with them. The thing I have in front of me says one speaker, Secretary Kissinger. Status is you have been invited, but it has not been confirmed.

K: Ok. I will confirm it.

G: Can we settle on opening remarks and then questions?

K: About 10-15 minutes?

G: Yes. It is better than asking you to make a major policy pronouncement.

K: It is easier for me. Because on a speech I spend days. I am now working on the statement for the Clark Committee tomorrow.

G: When do you speak?

K: Tomorrow morning.

G: You said you wanted to talk about unity.

K: That's right.

G: You did not argue the case either. Is this a public statement?

K: It will be. It is hard to do first class writing under Secretary of Stateship conditions.

G: I will drop you a letter confirming the time and date.

K: Ok.

G: Thank you Henry.

K: How are you?

Q: Fine. I am sure you are crazy to do this.

K: I think it is suicidal to talk to you.

Q: I had one question. Everyone is saying that they don't believe you didn't know about Joan's job.

K: I would have approved it if I had known. It happens I didn't know about it.

Q: Tell me why you like Joan?

K: She is always cheerful and extremely loyal, warm hearted and very steady friend besides being very intelligent.

Q: Were you surprised at the outcry of rage when she got the job.

K: I don't think I would call it rage.

Q: I don't know.

K: I think the town is very poisonous right now.

Q: Why?

K: I don't have many reasons -- it is a vicious town. I told Joan that I wouldn't help her get a job but if she could get one on her own I would approve. She applied for a job a few years ago but it feel through. But with this job, since I had already approved the other, Robinson felt he had the authority to hire her. I feel he was right.

Q: I talked to Ms. Hobby today and she was very complimentary about Joan.

K: We are lucky to have her. I told her I would not get her a job -- she got it on her own merits. She shouldn't be disqualified because she is a friend of mine.

Q: Do you think this appointment could hurt you or her or Tom in any way?

K: It certainly hurts her feelings. There has to be a little generosity to make life bareable. Joan has done favors to lots of people but one doesn't have to assume there is a pay off for everything.

K: Was it more or less favorable?

Q: Yes it was. I don't want to write powder puff pieces.

K: Write a puff piece and they will put it on the front page.

Q: Since people have found out that I am doing this piece, I have had a lot of calls saying I hope you will stick it to her.

K: What do they say against her?

Q: That she is a social climber.

K: That is all. That is unusual in this town. Listen I am unfortunately 15 minutes late to a dinner I am giving. If you want to call me with some specific questions that's fine. What are you going to do with what I said. Will you check every quote with me before you print.

Q: If you wish.

H: We are wrestling over here with a problem. We have a budget committee that demands that in '76 authorizations that we provide for the interim quarter. This thing came up originally on the Israeli thing but that is only secondary even though that is the _____. We are not supposed to take Fiscal '77 , bonafide for the interim of all '76 authorizations on everything whether State Department, economic assistance. It must provide authority for the three months that is not provided for because of the change of the fiscal year. At this point we will have to do something like that and either that or there is no authority for the three months. What is your view?

K: The logical thing in my view would be to take existing figures and extend them three months.

H: And not add anything?

K: No.

H: What we were contemplating doing is take the existing figures of the Bill. And simply authorize a prorata part for the three months.

K: That is what I would recommend. I may get into trouble doing that so if you will do it on your own, I will support that.

H: Because this bill is/a substantial amount, and because it is composed in the diplomatic way, I ~~don't~~ want to be sure we are not getting out of line.

He says to you (Koppel reads exchange which goes something like: "You certainly won't object to us using money to permit commitment abroad, hundreds of millions of dollars" and then you came and said you would check with Congress.) The implication of Clark's question is you might go beyond money and you do not knock that down.

SP: I didn't understand what I read anyway. Mansfield called me -- he was very disturbed. It was supposed to quote Sadat as having said something.

K: Right. Our problem is this -- Sadat is in trouble. He is overstating and exaggerating, but we don't want to slap him around -- we don't want to call him a liar.

S: I agree with you. I knew of nothing but someone told me that the New York Times wrote a story and what it was about. I didn't read it in the paper. However, Mansfield called me and asked me if I would check on it.

K: Maybe I will call him too. I want you to know there is nothing -- no documentation that you haven't seen.

S: How did that get in the Times?

K: I think Sadat exaggerated what he has.

S: There are people drawing conclusions?

K: No, he claimed these things, but he went beyond what is true. But if we called him a liar that makes it worse. We are going to say that the documentation was given to the Congress and we can't go on a conversation.

S: Mike will be pleased if you call him. He hadn't read the article but the news paper reporters were calling him.

K: I will call him.

K: How are you Mike?

M: Surviving.

K: It is a difficult period for everyone. Two things: first, I just talked to Sparkman about the story in the New York Times. Here is the problem -- all the documentation has been given to the committee and it doesn't support what Sadat is saying. Sadat is saying these things because he is in trouble and we don't want to call him a liar. We will probably say all the documentation is before the committee without going into a long explanation. There are no commitments that you don't know about. I can't be sure what conclusions he will draw from any conversations. In terms of the written record and actually the verbal record there is nothing to support this.

M: I used the word alleged.

K: I didn't even know you had made a statement.

M: Sparkman is looking into it for me.

K: I will call Case also. I wanted you to know because Sparkman told me you were worried about it. If we could have a lunch or breakfast sometime because the last thing I want is a debate between the Congress and the Executive on foreign policy if it is under my control.

I have not looked at all of the oral conversations that may have taken place . You have seen everything that is connected with the Sinai agreement. There have been no other agreements. Some assurances have been transmitted back and forth. I do want to say it is extremely trickey. He is obviously doing this because he feels under enormous heat. We don't want to take him on too much. You see.

J: It seems to me the formulation that everything material has been disclosed and often people, based upon oral conversations and impressions that they have of certain impressions, and that there is no use in arguing about those. They are not precise enough to base a statement on one way or another.

K: I have looked through the entire written record and there is nothing that he can have that is in any way supportive of what he is saying. I don't doubt -- you take -- we no doubt at various points said we would keep the interests of the Palestinians in mind. And at some point they can enter the negotiations.

J: What I would do if I were you, now that I have asked you to look at it, is to call Case and Sparkman as for the House side you have to decide that.

K: How are you?

V. Fine. How was your testimony?

K: You know most of the time they say we are cooperating too much with you . This morning they were complaining that you and we should cooperate to get the Europeans out of the nuclear business. I can't win.

V: It is difficult to please a big crowd. About Gromyko's cable. He wants to remind you that in January you were talking with him about this item that we suggested for the discussion the banning of the new systems of weapons of destruction. You agreed in January to have the exchange of opinions between the representatives of the Soviet Union and the US. Tentatively, it was agreed that the exchange of opinions should be started in February in Moscow. Until today there is no reply from the American side.

K: O.K. Let me call you before the end of the week.

V: He mentions as well that in Geneva in the Disarmament Cmte they should start discussing together with the experts the text of the agreement to that effect according to theUN Resolution but the American representatives there said the US did not intend to send their experts to Geneva to work on this in the spring on this question. Gromyko said we don't qute understand why all of this footdragging on this item. That is in short what he wants to tell you.

K: O.K. Good, thank you.

V: Fine. Thank you. Buy.

M: (missed first part) . . . Fine, how are you today? I am sorry to have to other you on a constituent matter.

K: Listen, when I get phone calls from the Church Committee members the best thing you can raise with me is a constituent matter. You were very nice by the way. I have no complaint -- in fact, I don't have so many complaints against the Church Committee

M: In some areas we fought over . . .

K: I think the whole enterprize was dangerous but that wasn't your fault. I thought you were a little bit one sided.

M: They were obsessed with that. We neglected almost everything else because for some reason our chairman was obsessed on that. Mr. Secretary, I don't know whether anyone mentioned the Tanzania question to you or not. . . Nello Teir Construction Co. of North Carolina did several million dollars worth of work in Tanzania. When they went in, the engineering wasn't proper so they had to stop and wait for proper engineering. They waited until they got a road really built. The Tanzanian government agreed to a settlement of $7 million but they don't have the money to pay it. If they apply to AID we might loan them enough money to pay it. They finally applied and I think it has gone through AID - Mr. Murphy, I don't know if you know him. And he can't come to the Congress without your approval. If you take $7 million out of a North Carolina Construction Co. cash flow and you could very well make it soft. I have been told for several weeks that it was a question of getting your approval so that it could come to the Appropriations Committee Chairman.

K: Well, frankly I know nothing about it. Can I check on it and call you back.

M: If you could I certainly would appreciate it.

Koppel: The kind of scenario that I could see building, if you had any indication that SALT was alive and well what is possible for political issues to get tough and once the primaries are over we revive the move toward detente.

K: We made this move 2 3 weeks ago. It is a serious move.

Koppel: It was never/ linked 3 weeks ago to Angola.

K: That is correct but we were positive they would figure it out for themselves what the reason was. I think we are living in that time now where everybody talks. This was not a high-level decision to figure this out.

Koppel: You were not intending this to be taken as a slap against SALT.

K: No. I wanted it to be taken as a sign the Angolans are not free.

when it would have done him a hell of a lot more good. He did not need it in the primaries.

K: The time to put it out would have been before Florida. This decision was made in the middle of February.

Koppel: As far as SALT is concerned, nothing . . . you know the Russians and how talkative they are in town. Today they are being extremely talkative. Unless you call up, you are lucky to get a good morning out of them. Today they are being very helpful.

K: Good. I consider that to be a good sign. It also means we are getting through to them. The fact they say we are helpless and emotional, that is not the worst thing they could say.

Koppel: That is right. What they find interesting is that they find Jackson particularly interesting as a candidate. He has never openly opposed detente, just you. They say he attacks you, not detente.

K: That is not true but lately he has been shifting on that. I don't think it is true he has never attacked detente but he has lately shifted on that which indicates something on the public mood.

K: On this UN debate on Israel. I would like to know what we are going to say. The talking points you put down are so vague.

L: We have those pretty well shaped up into a draft of them but not in a complete statement.

K: Well, I would like to see it because I think we should be very careful that that is at least a strong statement.

L: Yes. All right. When would you like to look at that. The statement as it is presently being drafted is just an elaboration of the points.

K: But it depends a lot on how we put it. I don't want to be in the position as the Israeli lawyer.

L: I think our impression is that the Israelis will take some _____ and will _____ some of the points here. We were not planning to get into that position. We want to restate our position and essentially say what we made in '69 and '70.

K: Can I just see this.

L: Surely. We were not planning to go much beyond the points.

K: But I want to know what it is we said. I will not object to Scranton telling the Europeans that if they can come up with something we would take a look at it. We do not want to participate in the delivery of it.

L: What the British want us to do is help n_____ it. You could cut out some of that language if we could say we might consider ~~xxx~~ not vetoing it and once we start that we are committed, coming out with something we will abstain on. I talked to Bill Scranton today and he is perfectly prepared to veto and he is always understandably anxious not to look as the Israeli lawyer either.

K: Let's see whether Bill could _____ it.

K: I was under the firm impression that no speech yesterday was necessary and would not be given afterwards. That it would be delivered shortly before the vote if we had finally decided to veto.

L: My understanding with you was we would give it toward the end of the debate and that was yesterday. This morning they are having informal consultations on the draft and this afternoon leading up to a vote late tonight.

K: This miscommunication. The first idea was to use it as we vetod.

L: Right.

K: Which meant after the vote. Then rather than have an explanation of it, the vote, either we could have it after the vote . .

L: Yes.

K: But this is not . .

L: At the time they spoke it looked like there would be a vote.

K: I decided they would speak shortly before the vote. I did not decide they had the right to speak.

L: That is some failure of communication between you and me.

K: I thought it was a technical point whether we speak two minutes before the vote or two hours after the vote. But I did not think we would make a speech 2 days before the vote. Now it looks as though our veto is a price we pay to the Israelis for the speech.

L: Well, I don't think that impression would be much different if we spoke this afternoon.

K: I had a slight preference to speak right before the vote. That endless battle between you, Sisco and USUN must stop. I insist on being in on the policy decision. How did he get it off?

K: An informal contact by Scranton with the PLO is a major policy.

L: He talked to Sisco and said he went into detail and Sisco tried to get it down in writing and he accepted and took out the sensitive points.

K: Scranton has no ability to withstand anything, so if I had known, I would have stopped him.

L: The informal remarks he made to me were helpful.

K: He said he is prepared to talk to the PLO in the corridors.

L: He said anybody.

K: Including the PLO. He doesn't have to name them. Does he have to say I am going to speak to the British Ambassador in the corridors. Does that make history.

L: My understanding was he felt by saying something like that he could reestablish communication with the other council members.

K: Well, it is your job to get our policy carried out and I am going to get it carried out and there is not going to be this free-wheeling. When you speak of informal consultations in the corridors, a professional ought to know what it means. Not argue with me like a lawyer. That just is not possible. Scranton is a reasonable man and would have listened on this.

L: That comment he did not tell me he was going to make.

J: If you wish, we can take a further look at it -- the three of us -- that is Case, Humphrey and Myself. If you can do it some time today I will try to line them up. Case issued yesterday some kind of a generalized statement of his worries. I believe that what we do could have an effect on the committee and the Senate. Before we finally say nothing can be done, I think we ought to discuss it once more.

K: Are you saying that you would vote against it?

J: I am not saying that. All I am saying is that the statement that I suggested to you last night would assure our getting it through with no problems. If that cannot be done then I suggest the three of us talk further to see if there is any formula that you can work -- but not the FMS. I can't tell you that I will vote against it.

K: I had some further word from the Syrians which sort of worries us and I was wondering whether you could ask your foreign minister in light of what I told you this morning and in light of what I sent him yesterday, what you would think of calling a Security Council meeting which either France or France and Britain could call. We are open-minded. We will take your lead on this. We have not approached anyone else on it so we will not go to the British until we have heard from you. But the Egyptians for your information, we asked the Egyptians what they thought and the Egyptians told us they thought the best solution was a security council meeting called by France.

M: I will convey the message as soon as possible.

K: Could you let us know as soon as possible.

M: Yes.

K: Okay.

M: You have serious fear about this . . .

K: Not in the next 24 hours but maybe over the weekend. We have no conclusive proof but there are an accumulation of signals and also some of the questions we are being asked are direct Syrian suggestions to us they may be quite serious this time.

K: Can you do a cable to Eilts again on that FMS thing to tell him we are putting up the letter of authority today. Wecondly, this is likely to lead either to a package or letters of at least a testimony and I would like to get his reaction: 1, how they would feel in response to their letter we said we have been told by the Egyptians they do not plan to make any further sales this year and under those orders we therefore to not plan or intend to submit any further request to the Congress this year. Therefore it is not us but the Egyptians saying it. Do you see what I mean.

A: Yes. I am not too optimistic about the reply.

K: Tell them if they don't want it in a letter tell them something like that is likely to appear in a testimony. If they do not want that, we can still go the commercial route.

A: Is it our judgment we say something we cannot get it through.

K: There is no way. We screwed this up by saying we would open up a supply relationship which served no useful purpose in an election year.

A: Okay. I will put something up for your approval.

K: There is no peace. What are we going to say if they ask us in a hearing, "Do you plan to sell anything in this present year?"

A: We can say we have no plans.

K: Then it will be decided.

K: I have just had a conversation with our Ambassador in Syria who is here to see how much of the X Golan we can take away from you.

D: (laughs)

K: Seriously, he thinks going through the French would to him would indicate it is less ominous than the Hussein conversation looked because they to me -- Hussein came there not to see whether peace -- he was with our message that said we would help on political conditions if that was enough.

D: Right.

K: Hussein is not a messenger. He got into the act. I am just giving this to you for you to evaluate. The Syrians only approached the French and their approach to the French was to get us to withdraw our opposition which I suppose means to _____. From that I would assume that there is a chance they will wait until they have our answer through the French.

D: I understand.

5:54 p.m.

K: I want to read you what we had from Asad which is now a message. Let me read the whole thing to you. I note incidentally we get no information from you at all.

D: I have asked in Israel and we have no diplomatic exchanges and we are sending to you daily what there is.

K: We don't want to get into a position as in '73 where we were not fully kept up.

D: I asked about it, if we have any intelligence information.

K: King received your message receptively. He called Asad who told him : it is very bad . King refused all proposals and Asad , he now has to go in. He told King over phone he must send in a division. Will stay our of the South of Damascus.

D: I better take this verbatim.

K: (Asks, "Can we have Saunders?")
Asad's assessment is that forces opposing Left badly demoralized. Only Syrians can operate them. Asad asked King to inform us and to ask for US support in restraining Israel.

D: That is basically what they told the French.

K: Asad insists he is getting pressure from Frangie and other leaders he cannot ignore. Asad says there is only a matter of ~~xxxx~~ hours before he must move. King says Asad sounds very demoralized.

D: They talked on the phone?

K: Yes. ~~XXXXXXXXXXXXXX~~ They have told Asad to get in touch with us. in Damascus. Asad and King standing by for word and reaction from US. That is the text of the message.

D: That is the same message that you gave me just before.

K: That was passed on the telephone. This is the full message. Just to complete our information, it is that Asad is having major domestic difficulties over the Lebanon problem.

D: You mean there is pressure for him to move domestically.

K: That is right. And we would also appreciate it if in your reply you could address the question of whatever any international guarantees you would consider acceptable. Because that question has been put to us.

D: Yes. By the French.

K: By the French. We are drafting some holding replies which I will communicate to you when we get them.

D: Yes. Because right now I am instructed to say we are standing by.

K: I understand and this is what we are communicating to them. But we have to communicate something to them.

K: We have just had some word from the French that they have been called in to Syria and that the Syrians have told them that the Jumblatt visit failed and that they are thinking or planning to move. They have asked the French to ask us to withdraw our opposition because we had told them 4 times in the last 2 days we were opposed which the French have now done asking which guarantees were acceptable. We told them last night what we told you 2 nights ago about the limits -- not about your actions -- but what kind of moves by them were in our view almost certain to trigger an Israeli reaction. We gave it as our view the issue was heavy equipment -- what you told us.

D: Yes. I understand.

K: It's Saturday. You can't write it down?

D: I am writing as we went. As you speak.

What will constitute in your estimate in the eyes of the Israelis.

K: I have got a rewritten version of what you told us on whatever the first evening of this crisis was. Essentially what you told us. That is just so I don't have to sum it up again. To that they have never replied. We also sent a message to Hussein this morning to tell him we were prepared to help with a political solution so that the Syrians would hear something positive. (Secretary reads body of phone call.) Hussein had gotten in touch with him right away and said what companies he should talk to to bring about a political situation. He was very pleased that you had called Asad.

D: Hussein was.

K: Yes. But the Syrians told him apparently also it was too late or ~~nearly~~ too late. So we have had 2 reports. We have not yet heard from the Syrians. I still would urge you to do nothing.

D: I will pass this on.

K: We are meeting now and I will tell you what we are going to say to the French which has to be our next move. We do not see any sense in getting in touch with the Syrians until they get in touch with you.

K: Hold on and let me check. (Secretary confers with Atherton/Day/Murphy). Yes. They got it before the Jumblatt visit and this was after the Jordan visit.

D: Okay. I will pass it on.

K: The French also say that Frangie is urging the Syrian move and other Christian leaders.

D: That is saying it in their name.

K: They are saying it apparently in their name. The French have asked us what international guarantees could be worked out to eliminate a Syrian move to make us withdraw our opposition. We just got that message like 5 minutes ago.

D: Yes. To satisfy you to withdraw your opposition.

K: Right.

D: Yes.

K: Can you get us a reaction as quickly as possible?

D: Yes. I will get it on to Israel. Now we have in Israel about 1 a.m. I guess first thing in the morning we will read it. I will get an answer by tomorrow morning.

K: Okay.
(confers with Atherton/Murphy/Day)
My associates think that they may actually move within hours so we better get an answer fast. The impression is that the move might happen tomorrow morning local time.

D: Before they even answer you.

K: That seems to be Pickering's view, our Ambassador in Jordan who talked to Hussein. We have heard nothing from the Syrians since our delivery of our message this morning in which they complain about our limited influence on Israel.

D: That is in Jordan.

K: Pickering is reporting of Hussein's conversation with Asad. He did it on the telephone he considered it so urgent.

D: I see. What we have is 2 indications -- the French and Jordan.

K: Here is what I am doing just to get some holding action. We are calling the French Charge. The Ambassador is not in town. And we are telling him roughly since they are going to go to the Syrians we thought the best thing was to tell them what we are doing with the Syrians like last night so they have the same courtesy from everybody. First on the basis of present messages we are saying that a quickly declared move of Syrian military forces into Lebanon would almost certainly result in Israeli military intervention. They feel through the various categories you give us -- then we would say the pace of Israeli intervention will increase if Syrian military intervention were in. We say we are in contact with the Israeli government.

D: With regard to the second point. The South of the Damascus access . They say we would not allow . . . you to confine ourselves to the limit.

K: No, I understand. I was trying to give them a sense. . it is perfectly clear from this.

D: I understand. I did not want you to have a misunderstanding.

K: I understand. If it is at the borderline, it would be more serious.

D: Absolutely.

K: They proposed international guarantees so we asked them what they have in mind and what they would recommend to the _____ of the Syrian 3 forces, general modalities and length of stay. In _____ the same/we have already asked the Syrians and we are asking French to ascertain from the Syrians what their intention might be. It is basically a combination of the 2 messages they already sent the Syrians.

D: Yes.

K: We are sending messages to Hussein in which we say we must say in all frankness to promise to -- that on the basis of the message, we can only say a move on categories described to us by Jordan would bring very harsh response on an Israeli countermove.

D: Yes.

K: Then we also said we are in touch but it will take at least 24 hours to get any additional ideas. We are urging him to explore once again with Asad the possibility of a political solution achieved with American cooperation. Without military moves. That is all.

D: Yes. I got through. I woke him up. I gave him the jist of the whole message. And he said our immediate reaction is our position does not change and asmed me to keep our cables going with all the information.

K: I did not expect it to change.

D: I understand.

K: I want your people to consider as they reflect on this so that we do/only do it as muscle-flapping on both sides. If the PLO prevails in Lebanon and/Asad gets overthrown by radicals, they will stay. Then the end result may still be that Lebanon will become part of the Syrian system except for a different route. I think this should be considered by your people.

D: Well.

K: You might then have a more radical Lebanon and a radicalized Syria. We can do nothing now until we have everybody's reaction. Our guess is the chances are 55-45 that he will not move before he has had an answer from us and that he cannot move on the basis of this answer either.

D: Okay. I will pass it on. I presume within a few hours everybody will wake up to a new dawn and I will get a message probably during the night.

K: We would appreciate it no later than first thing in the morning. A considerate analysis of the problem. Not just 3 _____ in the form of ultimatums.

D: No. No. That is not an ultimatum. Our answers were short but not ultimatums.

K: I mean the very last one.

D: As far as our people do not see any good can come out of Syrian intervention. Even if it forestalls battle for a while. Syria will create a process of elimination and will swallow on.

K: What if the Left wingers do the same thing.

D: Maybe that can be fixed by events and by threatening the Christian forces and diplomatic or political activities. We have definitely felt Syrian intervention is a very very bad thing.

K: You know, an analysis. .

D: I have asked them to be more elaborate.

K: You know exactly what we have done. I am assuming you have no quarrel with that.

D: No.

K: They have no encouragement from us. Well, they would not come through the French if they were encouraging.

D: Okay. He was much too sleepy to be intelligible.

K: What the hell is he going to do when we have a real crisis.

D: He will wake up. I asked if we should inform Yigal. He said go give it to them in a cable in a few hours.

K: I think you should take Lebanon back.

S: We just got back from skiing for about 5 days. I was quite happy in the mountains and when I came back I heard of this Lebanon problem. We were just wondering about the possibility of showing some kind of international guarantee and . were wondering what could be done about that. Do you think that the 4 power members could do something to ensure that here intervention would be limited in cause and time.

K: I believe it is best to keep the Syrians out. It is only if the Syrians absolutely decide to go in. I am against . . we should consider these guarantees question.

S: At present your feeling is that it would be better to keep them out.

K: Yes. I think if the Israelis move it would have grave consequences.

S: On Israel.

K: On everybody. If the Syrians move, the Israelis may move.

S: My first reaction was when I came back if things really get out of hand, the only . . . possibility of military intervention is Syrian intervention.

K: I agree but my view is we should all make a national effort to keep the Syrians out and only if . that fails should we look for 4 power guarantees.

S: I am very hesitant myself.

K: Because we ask . for 4 power guarantees and we will get ourselves into a hell of a situation.

S: I would say 4 power caution of the limited Syrian intervention.

K: Why don't you send what that would look like and sent us the text.

S: Of course. I wanted to have your first-hand reaction on that.

K: My first-hand reaction is it is best to keep the Syrians out. If they do go in we should consider a guarantee or assurance.

S: Security Council force for a limited period.

S: Syrians? The Egyptians . .

K: Let me think about this. I don't want to do it off the top of my head. I will get a message to you before the end of the day.

We are thinking of Dean Brown, but he is associated with the Black September so I don't know. If he doesn't go we will bring Bill Porter up from Jidda. But we need an assessment of the situation. If the Christians can hold out you are right. If not, you are wrong. If we can engineer a ceasefire without Syria, it is the best solution, but we can't do that with what we have in place there now.

Where a country that has put 15,000 troops in and imposed its political solutions and another country that has withdrawn, although it was previously involved, and is now being condemned while the first country isn't being condemned. It only means unsuccessful interventions get condemned. We are abstaining because of our general concern for the feelings of others. Do you see what I mean?

S: Yes, I think it is mostly there, Henry, but I will take another good look at it. I have seen what the British are going to say and the French and we are the strongest by far.

I think that at least from the calls I have had and they certainly are no survey, but most of them didn't believe what he said. Most felt, about 3/4ths of them felt, how could Regean say such things without quoting some authority.

K: Yes, it is a lie. I have put out today that it is a lie.

S: I know that it seems to me that you -- I don't know what Ford wants you to do. Henry Salador said you should call a press conference and say that you never said it, but that you have said all along that the Congress of the U.S. would not support the the military to the extent necessary and that if the failure to support continued we could wind up a secondrate power.

K: I haven't even said that.

S: Do you remember when you said we have a no-win policy and at that time you indicated that if Congress didn't turn around it could be serious for our country and that Congress wouldn't support the needs that were necessary for you to take another position. Generally the people are not at all for Regean. They think he has hurt himself, but maybe in North Carolina some people want to hear those tough words. The people that I have talked to didn't think it would work plus the fact that he said we would have a lousy economy after the election isn't necessary. It helps to be optimistic. Are you going to do any more or just put out your statement?

K: I will leave it at that.

Moscow paid attention to the news agencies reports that 7 American naval ships are steaming towards the shores of Lebanon. These reports cannot but cause some concern. If they are true then such a step by the United States can only complicate even more the situation in Lebanon and around it.

The Soviet Union strictly adheres to the principle of non-interference into the events in Lebanon which are its internal matter. We have the right to expect the same from the United States and the other nations.

We believed and continue to believe that the people of Lebanon - and only they themselves - can and should decide all the questions concerning the internal life of their country.

The US interference into the internal affairs of Lebanon would - quite obviously - not only aggravate even more the situation in Lebanon proper, but would inevitably lead to a new sharp aggravation of the situation in the Middle East in general and not only there.

Moscow would like to hope that the Government of the United States will treat with understanding this message of ours and will not allow any actions to occur which could transfer the internal crisis in Lebanon into a serious international conflict.

D: I read about it.

K: The Soviets have picked it up so it should stay in the same channel. They sent us a note complaining. We are going to send them back a rather sharp reply. We do not accept the proposition that intervention is only from outside forces and those who send in supplies.

M: I have been working on that matter we discussed yesterday afternoon. I have a suggestion for you. Namely, that you refer any questions that you get here on the matter. We are prepared to say in checking our files through the news bureau and public affairs bureau that our information is that you did not personally intervene in this matter in any way and in '75 no corrective action was recommended by the Civil Service Commission. That seems to me to end the issue.

K: Okay, what we can say is that. This information seems to you incorrect but for elaboration . . .

M: That is right.

K: I frankly don't know what did happen. Do you know?

M: Yes. I have the full report and I will send it over from the Civil Service Commission if you like.

K: Yes. Because all I remember is that David Maginnes had applied, that he had not heard for a few months. Then I asked General Haig to look into it, he made one phone call but can't remember to whom.

M: It is one of those things that kind of grows with innuendo and inflection. The conclusion spoke of the Civil Service Commission saying there is a contradiction in testimony regarding the appointment. There is evidence, says the report, in the form of foreign testimony that this individual was to a competitative appt. a must hire and he was given preferential treatment in appointment to the to position. That allowed the violation of Executive Order 1_____ but no correction action was taken and there is a contradiction in the testimony. The man says he can't remember who told me to do this but I had the impression I was to do it. That is fairly inconclusive evidence. It is the reason they could make no conclusive evidence. My own instinct is that somebody is trying to make a story here and the less opportunity they have the better.

K: What is it you will say?

M: Our press bureau will say that we have no evidence that you have personally intervened in this matter whatsoever and secondly, we will point out that the Civil Service Commission after reviewing the matter made the statement no corrective action is required in this case. End of quote.

If Haig doesn't remember and you don't then it is bullshit. I think we should say no comment unless HEW can flatly deny it. Why don't I give them a call this morning and see what they can do.

K: All I know is that I asked Haig to look into an application he submitted to see where it stood. Haid said he made one phone call but he doesn't remember anything else or exactly what he did.

E: HEW is the answer.

K: But can the Civil Service Commission publish a god damn report without asking me? What is the Civil Service Commission anyway?

E: Obviously. It is an administration outfit. I don't know who heads it. But it makes a claim that you influence it. The only thing to do is to get the Secretary of HEW to issue a denial. The Civil Service Commission is outside, is supposed to be outside influence.

K: But in decency they should call me.

I am tol you consider my remarks to our Ambassadors as showing softness and I am interested in what way they show softness.

B: I said nothing about softness. Not yours but Sonnenfeldt's. I believe the summary referred to in the Economist suggested that a policy of the US is to say yes to a greater degree of autonomy of countires within the Soviet hegemony but to do nothing to encourage their escape from that relationship.

K: But you had no objections to the remarks of mine. I understood you had objections to those.

B: The letter you sent me...

K: There is a cable in which I object to communist participation -- it is in the press today and it says you had a copy of it too.

B: I pay no attention to that. My thing was only addressed to the Sonnenfeldt thing. I am sore as hell at the NY Times. I pride myself on never slipping documents to anybody.

K: Frankly, they told us they got it from your office.

B: That is an absolute lie.

K: I know you well enough to know you would not do that. Only on the Sonnenfeldt thing. The trouble is I spent two weeks preparing what I thought was authoritarian policy and it was printed in the San Francisco newspaper and the NY Times did not put it out. They get a su-mary of someone else's extemporaneous remarks that is somewhat garbled and that becomes an authoritarian document. Our policy has to be, of course we try to encourage escape from the Soviets but they have to get greater autonomy before we can talk about the next step.

B: I was commenting only on the summary that led me to believe that there was quite a shift from what our Eastern European policy.

K: Sonnenfeldt is one of the hardest liners we have around. Our policy is to get first autonomy and then to see whether we can win them away but to talk now in grand, eloquent terms when they don't have autonomy is -- maybe it is good for ones morale but this did not represent a change in our policy what Sonnenfeldt said.

B: I am glad to hear that but surely the summary could be fairly read that there is to be resistance in escape from the Soviet authority.

K: I have been raising hell about putting out the summary. It is misleading. No one cleared it properly. Even if there are 25 initials -- no one is going over a four page document word for word. These were introductary remarks with a group of Ambassadors. I want to assure you it is not a new statement of policy and I would think -- if you talk to Sonnenfeldt you would consider him one of the toughest people we have here.

B: I appreciate hearing that.

K: Second, I read that you found what I said objectionable.

L: I would like to go along for extraneous events based on our conversation of a few days ago, but there is somthing to be said for my going in that our delegation there makes us a little nervous. Jules and I want to get them under control. And maybe I could be of help to you.

K: Do you think Robinson can give a good briefing?

L: Yes, but he is slated to go up on the hill with Simon and Richardson on corrupt practices. I asked Funseth if the briefing could be done in New York and piped down here.

K: I don't think so. Everyone knew I needed Robinson here for the briefing.

L: That has been set for sometime. I think that Jules Katz would be as good as Chuck Robinson in this kind of briefing as long as you have someone with him, like myself, on a political level. On this issue, Jules knows this better than Chuck. And he and I will be in New York, if you let me go. Funseth does feel it is better done here than up there.

K: I agree with him.

L: What -- to do it here?

K: Yes. Why don't you do it and then come up to New York and then come back with me. You could still be there in time for the lunch.

L: We will work something out. You think it should be done here as well.

K: Let me think about it.

K: How are you?

R: I am fine. How are you?

K: It is going the way my friends predicted.

R: It is getting a little rough but you anticipated that.

K: Nothing unexpected.

R: The thing that worries me about it is what the reaction will be in Peking and elsewhere -- the Soviet Union. This is all perceived over there.

K: The biggest foreign policy problem we have is the foreign perception of where the United States is going because this debate on foreign policy isn't discussing any real issues. The margin available for change isn't that great and therefore to the extent that people believe there could be a major change here it is bound to be unsettling.

R: I can't make out the Peking thing at all Henry.

K: I think it is 75% domestic in the sense that the radicals -- that Teng went too dramatically towards -- to far towards -- he is a Chou en-lai disciple but he stressed economic progress too much. He could have survived that except for the fact that he moved the armed forces commanders out of their fiefdoms. When it came down to it -- he had no friends left. He became more dispensable as the Chinese perception of their need for us declined. This is for your information only, but I had the distinct impression that he was going to be kept on as a symbol of their continuity with us, this is an impression I gathered when I was there last. The fact that they could dispense with him is indicative that they are prepared to give themselves the option of moving away from us. That hasn't happened yet.

R: Do you see any reaction, besides the Jews in New York, out of Moscow.

K: Moscow has restrained themselves in this period -- detente has essentially worked. The anti-communist movement is as strong now as it was at the height of the war. They might conclude that it is just hopeless.

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 02 JUN 2003 200102979

R: Which would be silly.

K: Right.

R: That would be confusing policy and public opinion with campaign rhetoric.

K: There is a great unanimity among the candidates that detente has been a one-way street. I could make a strong case that it has been. It has been a one-way street in our direction rather than theirs.

R: That is an argument you can't make.

K: It doesn't help them to make that argument.

R: How do you proceed?

K: I believe the basic elements of our foreign policy are sound. I think if the democrats come in to office they will pursue them. I think the most useful thing I can do is keep the basic structure of our foreign policy alive.

R: But basically you don't really see any serious lurch from either Peking or Moscow.

K: No. I think they are both giving themselves the option of pulling away. We are beginning to use up our fat. The point will be reached where it won't take much more to push them over the edge. We are not there yet. For example, there could be a Middle East crisis where detente will be less restraining than it would have been a year ago.

R: The Carter thing is picking up some considerable steam.

K: It looks that way.

R: Up here at the Pulitzer Board today when people were asked who would be the candidates about three to one thought it would be Humphrey.

K: Not knowing much about domestic politics, I personally would say it depends on the Pennsylvania primary. If Jackson wins Hubert will probably get the nomination. If Carter wins the vote I don't know how they could stop him.

R: If he took that and they were to broker it the nomination wouldn't be worth much.

K: I have to go to a ceremony for Peter.

R: On the Peter thing, the whole thing looks very bad, but Pete is taking the view that it is an incident.

K: I have made it a longer speech than I planned and I am making it about the

press and the government rather than totally about Peter alone.

R: Is Nancy back?

K: She will be back Monday.

R: Oh, sorry about tomorrow.

K: How are you?

G: Fine. I thought your speech was very thoughtful last night. I could hardly hear you with that loud speaker system they had.

K: Really.

G: The tone was wrong. You sounded very hoarse. It was a good evening. Listen, the reason I was calling is I am doing an analysis on where Soviet-American relations stand today and it seems everyone I have spoken to thinks the outcome on SALT looks unpromising.

K: Let me do this on deep background for your understanding only. The outcome depends on when we are willing to spill bureaucratic blood. We have this thing in a frame where it takes one or two decisions to conclude it.

G: When we came back from Moscow you were encouraged...

K: Don't ascribe this to me because it will unleash a flood of leaks again.

G: The Pentagon thinks they can dig their heels in...

K: There is an inevitability about it when you realize the problem of setting levels in the absence of an agreement. We have never had to do this with such a formidable enemy.

G: I can foresee a situation where you can run into way after the election.

K: If we don't have any bad setbacks on SALT over the year if there should not be an agreement -- I still think there is a chance -- but assuming we don't -- basically it is at a level to which an agreement shouldn't be too difficult. This is really for your own guidance. Most of this stuff will get itself sorted out as soon as the mad-men are out of the race.

G: Has the President said let's not talk about it until after the primaries.

K: No we are having Verification Panels. The blood spilling will settle itself. It is my judgment that the range within which an agreement is possible is very finite and that we are very close to that. We shouldn't get confused by the extraordinary hysteria around now. What have the Soviets done except Angola that is so irresponsible?

UNITED STATES DEPARTMENT OF STATE
REVIEW AUTHORITY: ROBERT L FUNSETH
DATE/CASE ID: 02 JUN 2003 200102979

G: The Administration has drawn the publics attention to Angola.

K: We have to call attention to Angola because if it isn't challenged it could be a major problem.

G: Are the Russians saying that they might as well sit back and see what happens and that in the end they will have to compromise too.

K: In all fairness, they have made more compromises than we have.

G: However, you are still on the same issues have have been on for some time. Everyone says they don't want the surface missiles.

K: That is right.

G: That is what is so crazy. I know people at the Pentagon think that we will do the Russians a great favor by having a SALT agreement.

K: It will all straighten itself out.

G: You have to wait until the election is over?

K: I don't think so, necessarily. We are doing the intellectual work now and we can pick up the pace.

G: The odds are eight to two against?

K: It is really dependent on how much time the President has physically available to give to it.

G: Once there is any movement the opponents start screaming.

K: Yes, and screaming for stupid issues. The Pentagon is trying to protect programs on SALT that they cannot protect on a unilateral budget. They won't submit them to Congress as part of their five-year program.

G: It seems at some point the Chiefs will have to decide what they really want and stick by it.

K: That is right.

G: If there wasn't an election in November, we would be talking about a small time frame?

K: Yes and if the liberals hadn't abdicated -- don't forget that -- we could get an agreement in two months time.

G: Don't you have the feeling that now in the Senate they can't get it through this summer?

K: I have the sense when I go up on the Hill that the animosity -- the problems that I have with it aren't so much on the Hill any more.

G: Not on SALT anyway. I think the liberals recognize your dilemma. They should have checked before they issued that statement on the cruise missiles. Your problem with the Hill will focus on Turkey.

K: That will be massive.

G: Are you going to try to push that one?

K: Probably.

G: Brademus is practically salivating now.

K: To do what -- screw the United States?

G: His view is he is defending the U. S.

K: In what way?

G: He has a view of the morality...

K: Oh come on Bernie.

G: I agree on his intentions, but I am giving you his rhetoric.

K: Oh, I know his rhetoric.

G: On SALT it is a question of really when both sides want to put the political force behind it, and...

K: That it is relatively achieveable.

G: You have been saying that for some time.

K: But I am right. I have written down what agreement is achieveable -- maybe I will seal it up and put it away and open it up when we get a final agreement to see how close the final terms are or whether they are better or worse.

G: In January you discussed it in broad terms with us -- you were talking about one of the options like reducing the 2400 level -- and the ALCM thing was on the way to being settled. Then you made a proposal back to the Russians...

K: We went to another conception -- the one I came back with hasn't been tested.

G: Just to put the contested issues aside -- that was the easiest thing and get together what the President could agree on.

K: Basically.

G: The Russians then decided to stick on their previous position?

K: More or less.

G: They are so upset about cruise even though they would get a free ride on backfires it isn't worth it to them?

K: Not necessarily. Bernie I have to run.

Their really major significant mistakes both as to sources and as to context and sometimes as to part that concerns me. On the other hand, for me to get in a debate with them in which I repeat charges I cannot then explain. They will get their source who are self-serving guys to repeat it. It is a useless exercise. K: You will not send any substantive cables that I don't clear.

S: No, no. I wanted to talk to you about what you want to tell them in advance.

K: Not a newspaper.

S: No, this would go to the President's office. The newspaper did an article on some points that they thought you should...

K: What are they -- can I know them?

S: You haven't gotten those yet. I will get them to you right away.

K: Have you send the cable out to (McFel)? Is the language clear or is it cream puff language?

S: It is fairly straightforward.

K : Can I see about Victoria Falls. I have no interest in going there -- I want a clear cut answer -- has that gone out?

S: Just a minute. No it hasn't gone out.

K: Has it been drafted?

S: Since we tried to get a hold of both of them I thought if we invited just one the other would find out.

K: O.K. What is your idea about a press conference?

S: The embassy suggested you do one on your arrival.

K: It is out of the question.

S: It should be when you come back for the UNCTAD thing. There is a certain amount of logic in having completed the bilateral portion of your trip and then giving a press conference.

K: In Lusaka, the speech I would put in fairly strongly the idea of closing borders as an idea that we would support.

S: That is fine. That is good. I think we will just strengthen that general language that we had at the noon meeting.

K: Right. It turns out that I don't have to go to the NSC meeting in the morning could I have some of the drafts.

K: Oh, maybe Jack could put -- he can't insist on it I know.

H: You are not coming down because it isn't serving your purposes. If he would go to Rhodes...

K: Right, it is odd for us to try and understand why he would go to Rhodes and not Suda Bay. It is odd for us to normalize relations under these conditions. It doesn't seem to have affected the Turks as much as we thought.

H: No, they are concentrating on their domestic politics.

K: I have promised Bsitsios that we would make an effort to initiate a Turkish reply.

S: Thank you for calling back. I don't know whether Larry has given you an idea of what I am looking for.

K: Well, you haven't written about my resignation in five months, so it must be about time.

S: It isn't that one. The theme of the piece we are doing says that in the what appears or what is the last six months of the Ford Administration you are showing an enormous amount of energy and doing a great deal of travelling and that you are concentrating on areas of concern you skipped in the past.

K: Like what?

S: Economic ones...

K: I have been talking about those since the Energy Conference.

S: Also geographical ones such as Latin America and Africa and the third thing is a heavier and stronger moral tone in the speeches you are making. You make more appeals to America's special position in the world and its role in the world. We have a number of people in the foreign affairs department who are talking about your creating a legacy...

K: Well, but...

S: Those are the main notions and I wondered how you react to these?

K: You have to consider the conditions in which I have to conduct foreign policy -- we are speaking on background now.

S: As you like.

K: We had first to wind up the Vietnam war which people seem to forget today and then we had Watergate. Itwasn't until Ford came in that we could begin to build up the architecture again. If you look on the economic side starting in early 1974 with the Energy Conference there has been a series of proposals in the energy field and in the general field for underdeveloped countries. I hate the word legacy. I think you are right in saying we are trying to outline a structure for our foreign policy, but that is the job of the Secretary of State. I am not doing it for myself. It isn't a legacy. The problem we face as a nation is we have gone from peace marches to war marches in four years with the pendulum swinging with enormous emotionality. What we need is some conception of the world toward which we are heading which is sufficiently complicated so that it takes account of reality and serves as an anchor and a compass point.

S: There is a friendly and unfriendly way to put that. Some of the people suggest that you are seeking to limit the options of a successor to lay down lines that are strict and from which the next person can't swerve.

K: Why shouldn't he be able to swerve — just because of some speeches.

S: Take Rhodesia -- it would be difficult to take the opposite option.

K: The opposite option was used up — it isn't has if it hadn't been tried.

S: Yes. One point that I suggested that you haven't addressed is the sense of urgency that I think appears with your very heavy travelling and your working very hard on the economic problems and SALT, for instance. Do you feel...

K: I think it is comperable to my annual travel schedule.

S: Except for the shuttle period it looks like more.

K: I haven't compared it. The OAS meeting last year took place in Washington so I didn't have to travel for that, but I attended the NATO, OECD and CENTO meetings and these are normal activities.

S: Yes. There is one very good sentence that I have taken note of and I wonder if you would put that on the record -- that we need some conception of the world that deals with thecomplexity of the situation.

K: Which takes accound of the complexities. O.K. I don't think you are that far off the mark. However don't make it look as if I am on a big ego trip. Of course if that is what you feel...

S: There are a couple of thepeople who will end up being quoted who put that construct on it, but there are others who treat it more seriously and this one quote from you gives it a touch of class.

K: O.K.

S: Thank you very much.

K: John Wallach called my wife and told her that one of the Hearst people wants to come on the trip.

F: I just now got the note. I don't see why we can't accommodate one more. I think it would be good.

K: O.K.

F: I am going over the transcript now and will have it for you this afternoon.

K: As they edited it?

F: No, they are now editing it. It looks alright in general. I don't want to bother you with it until I know what they want to say.

K: I would like to condense that answer about how the trip was planned. I don't mind giving them the substantive reasons.

F: I have braketed that section and will give them only the minimum.

K: Don't you do anything without my approval. You don't edit with my seeing this.

F: I have a preliminary indication that they may drop out the Q's and A's on the Sheehan thing.

K: That would suit my marvelously.

F: They are going to talk to me and tell me what they propose at 4:00.

K: O.K. Fine.

A: I have sent a suggested reply to you summarizing the language because the telegram is a little undecipherable unless you have the outgoing to refer to.

K: What conclusions do you draw?

A: Maybe I am listening in the dark but I think we have evoked a little interest. I am encouraged that Daoud is showing this interest.

K: On paragraph twoB I would not only say it is clearly understaood by Rabin but I would say it is accepted by him because that is the truth. I think for their own internal position it would help if they could say that.

A: I understand.

K: Now what is this paragraph two C what does that refer to?

A: We want your advice about the readiness of the Palestinians. We will welcome a dialogue as soon as we know it will be helpful to the peace process. They want to know does the both mean we and the Syrians or the Syrians and the Palestinians.

K: We have to change that to unofficial.

A: That is what we meant, yes.

K: I would say preferably through one of your emmissaries or through a trusted nonofficial. I find it interesting. Now probably Lebanon will blow up tomorrow morning.

A: It blows up a little every day, but I think the most important thing coming up is the meeting with the Syrians and the Egyptians. The fact that this will happen.

K: It is better for us if they don't get together before the end of the year. If they agree on a common strategy, we can't respond to them this summer.

A: I don't think there is much danger of that Mr. Secretary.

O: Basically as a couple of the pressures being married and not being married -- it will be a little like the McCall's thing. How life changes -- Nancy has mentioned her difficulties in finding time to see her friends. About her career and trying to find time for that being the wife of the Secretary of State.

J: No, I got it from others.

K: Let me get to another phone. Speaking as a friend, it depresses me a little to have heard that the President was hurt in Texas by my speech.

J: I can't conceive of it. What I plan to do today is beat the hell out of the New York delegation, although it may hurt Rockefeller. It is very clear and manyothers feel the same way, that it is inconceivable.

K: That is the only thing that bothers me. Connolly and people who know Texas tell me that it didn't matter.

J: It doesn't mean a thing. And that committee gave you a vote of confidence the other day.

K: I wanted to tell you how much I appreciated what you said among the moderates. We have strengthened ourselves.

J: I wish you had read this speech in advance. I don't see how we can do anything else. I really went to town at the Rippon Society. I went to town on this guy.

K: He appeals to every base instinct we have. You notice that Carter isn't picking any of itup.

HK: What happened.

JK: I was writing something about the Giscard visit and look ing for guidance. I thought he might ask something on non-proliferation in Pakistan.

HK: Did you write that?

JK: I said he ought to.

HK: That is not unhelpful and he might.

JK: I gather that the last time he read things off a card.

HK: Who?

JK: The President.

HK: In talk ing to him?

JK: Yes.

HK: No, that he never does.

JK: They did not have the impression it was him they thought it was the aides.

HK: You mean about non-proliferation?

JK: They didn't specify the subject. They said one of the problems was that if you are going to talk to the Presdient you have to talk by yourself not from notes. Do you think there is a possibility of it being raised?

HK: There is a possibility of it being raised just because of the general policy.

JK: What else might be talked about?

HK: East/West relations. North/South relations. The issue you mentioned might come up. European/American relations and of course you write that on your own but the situation in Europe with respect to the communists.

JK: I gather that from accounts because I have been in the far west that you had a good chat about north/south relations in Paris.

HK: I had a good talk with him. His proposals on Africa are very creative. The basic approach for the industrial countries is to see where they are going and what they want to achieve -- that is very creative and it is a policy we can support.

JK: And that we have already supported.

HK: Yes.

JK: On East/West is there much business to be done.

K: Don't ask me.

JK: Yes, one of the reasons proliferation is interesting is that it brings you back to the subject of East/West.

HK: Yes.

JK: Right. In European/ American relations he seemed very irritable about statements being made here. Here they released views by him I mean Giscard.

HK: I think that we and he substantially agree. You may not have noticed in Europe but very few statements were volunteered here. One was when Brazinsky well when it was implied that it was just as well for the communists to come to power in Italy because of the corruption in the Christian Democrat party.

JK: Giscard referred to that in certain terms. It seems that he is being needled by your ambassador in Paris.

HK: But so am I.

JK: Really by your ambassador -- at least that is my impression.

HK: Oh really, on what grounds?

JK: On the grounds that you talk to much. He professed to be horrified at the London statements.

HK: Well in London he was among the most vocal congratulating me on my statements. These are fragments of a discussion that doesn't list everything we talked about.

JK: I asked him why he didn't say anything. He said it was the end of the day...

HK: That isn't true. I spoke at 9:00 in the morning. Did he express displeasure to you too.

JK: Yes.

HK: It is a happy house.

JK: I am sure this is not a surprise to you.

HK: No, I didn't thing he would carry it to this extreme.

JK: When you say there is a good feeling about the European/American end -- what is the consensus.

HK: I would think that some of what you had in your columns about playing it hard until one had a decision to make is correct. We don't disagree on that.

JK: I see. Yes. He seemed to be sort of -- I can see that. He seemed to be annoyed by Haig's declarations.

HK: He was annoyed on the principle that the NATO Commander shouldn't give political instructions.

JK: What is this I hear about you giving speeches in California?

HK: I have an invitation to the World Affairs Council so I will be giving one speech there.

JK: When would that be?

HK: On June 4th.

JK: You will just go out and come right back?

HK: I might stay over there until the next morning. I might follow the same procedure which you have seen in Dallas.

JK: You mean have a lot of meetings.

HK: Yes.

JK: You will be going to Latin America?

HK: Yes.

JK: And then to NATO at the end of May?

HK: Wednesday I am going to NATO and I will be attending OECD at the end of June.

JK: This Wednesday is NATO?

HK: Yes.

JK: I will see you at some point tomorrow. I hope things go well with you. I think this is your best time.

HK: I appreciated the column you wrote the only minor quarrel I have with it is that I am doing it because I think it is necessary not to further my own self-image.

JK: Perhaps that may be a little unfair. I assume you don't mind waiting down guidance for the future.

HK: It would be helpful for my successor not to have to make all these tough decisions while taking the heat for them all.

JK: Do you have any indications from them that they intend to do things in a hurry.

HK: Who?

JK: The democrats.

HK: I don't think they have any idea of what is going on.

JK: You have no Russian or Chinese plans?

HK: No.

JK: Is it your impression that the Russians want to do a SALT agreement?

HK: Yes, it is.

JK: What about Michigan?

HK: We will have to face that later this week. Joe I have to get dressed for that dinner tonight.

JK: O.K. I will see you tomorrow. Is there a chance of seeing you Wednesday?

K: No, I am returning your call.

D: Alright. I received a response from Allon with regard to the question from our last meeting about the possibility of sending French forces into Lebanon. Our opinion is it is negative. And the reason is that should France even send a token force to Lebanon that more than it would be peace keeping, it would be a cover up for massive Syrian intervention which could not be broken. But if a situation could develop of an international force which could be composed under the auspices of the UN, this could be a worth while suggestion to examine. The reason I called you is you wanted our reaction to this.

A: Is she somebody you would like to have?

K: Yes.

A: She entertained us last week because of her friendship for you.

K: She gave a great party for me the last time.

A: Politicians, academicians, a few of the Bank of London types.

K: You can have a few editors and publishers.

A: We counted on that. We will have a cross-section. I will go a little heavy on editors and publishers.

K: I would really like to find out what they are thinking. You can have a little more of the editors and publishers than of the other types.

A: Okay. You are coming in from Belgium that afternoon so would 8:00 be okay.

K: Yes. You can make it stag or not.

A: Let me line up some names. If it looks like a good balance, we might. I will not make any moves until I have talked to Larry. Shall I let him know about your schedule with Callaghan?

K: Yes. It is that Callaghan realizes I would come to him first. Don't you think that is important?

A: Yes, I do. Just so he knows he is number one. You have been asked by these other 2 people and want to do it, in concert with him afterwards or anytime if he doesn't care.

O: I didn't know what you were doing. The only thing was the thing about the resignation. Everything else is in keeping with what we said. Exactly as we said.

K: I would not have particularly agreed to come on this Thursday.

O: I am only under fire because of what happened. I didn't know there would be anything to do.

K: There is probably nothing, Meg, to do.

O: I called the White House at 6:15 this morning and asked them to let me know when you got up so I was the one. They said how can we quote NBC if we have it.

K: If i had thought anything like this could happen, I would have said I will not go into that. Then you would not have had anything.

O: If I had thought this was going to happen I would have done it 2 weeks from now. You know me well enough to know this is the last thing I have wanted to do. I have wanted to do Nancy.

K: I talked Nancy into it. She doesn't like to go on TV.

O: I have wanted to do it for a long time. I have tried not to be aggressive about it. I had no idea there would be anything intervening to create any problem. You have got to believe it.

K: I think it is bad for us to put on a long tape that is about 2 minutes.

O: It is no 2-minutes clip.

K: You are doing a whole question and answer thing tonight.

O: It is 40 seconds. It is not 2 minutes. I put on 30 seconds this morning. That is all. It is not 2 minutes. I would have done anything for this not to have happened. I have always trusted you and one of the foundations of our relationship is that you have always trusted me.

K: I would never have done it if I was not very fond of you.

O: You can understand the position I am in.

K: I would not have done it if it was going to be on the evening news. It is not fair to Barbara. You are knocking Barbara.

O: I am not.

K: Tonight NBC I suppose will run Barbara Walters and you will run Meg Osmer. The American public will think I am straining to get out. Except for CBS which is climbing the walls.

O: I will tell you all I can do.

K: It doesn't make any difference if you cut it.

O: You are saying don't put it on at all.

K: That is my view but I know you can't sell your people.

O: I fought them not to put the whole thing on this morning. I have done nothing but fight battles all day. When you left yesterday I said I don't know if I can hold it. You said could you try to hold it until Thursday. The argument was let us use a piece of it on the evening news.

K: I think it is a gd outrage. NBC and ABC tonight are going to have clips talking about my resignation. You are both killing me. If Ford wins tomorrow all of the Yahoos are going to say it is because of my policy of resignation.

O: Do you think it is going to make a substantive difference if we just talk about the story. Barbara released it last night.

K: She had every right to.

O: If she puts that on and has her interview, if by some stroke of generosity I can convince them to keep our clip off, do you think that will make a substantial difference? Can I put this on Thursday?

K: Yes. It is a strictly different story then.

O: This Thursday.

K: Yes.

O: If I can get this commitment from them, they say you are going to do another interview.

K: I will not give another interview. But I will promise CBS something after you.

O: Believe me I didn't ever think you would do a substantive interview and I have wanted to do Nancy for a long time. I asked in terms I felt in good faith. I have never told you that was not the reason and my intentions.

K: There is no question about your intentions. I did it because you said it would be a nice human piece because it was my birthday. If you take the significant thing out it looks as if some one talked this way saying in effect what Rogers Morton said. It is giving 2 interviews to 2 different networks saying slightly different things.

O: In a way if we put the whole thing on tomorrow it takes the curse off.

K: If you put the whole thing on Thursday it is not what we agreed to do but I can live with that.

O: You have got to appreciate the facts. I did not know all the facts then that I do now. Now did the brass.

K: Only because I have talked to you. You would be in an even more untenable position if I had not talked to you. Why would I have given an interview yesterday if I had not believed in good faith it would not have been showed until the 27th. How could it serve my purpose to be on 2 shows in the same week. If you had done it on my birthday you could have said look today is Henry Kissinger's birthday and showed him and Nancy together. Now it looks like Kissinger is pushing it like a book of _____. But if the price is not to have something tonight, I am willing to accept it. To have 2 people talking about my resignation totally out of context it will look as though this guy panicked and got every girl to interview him this weekend.

O: If I could sit on it I will. They think they have been burned.

K: They have been burned. Except for you they would not have one square inch of film.

O: I agree with you. You leave on Wednesday. When do you come back?

K: A week from Thursday.

O: I will check and see what I can do. Can I call you back? Are you going to be there?

K: Yes. You got them a gd interview with Nancy which nobody has gotten.

O: It is lovely and charming and she looks delightful.

*

K: All of these make perfect sense if it doesn't get sensationalized.

O: I have been arguing your point of view. It is delightful and I think we should let it be and stop getting caught in Barbara Walters' backwater. I am trying to give you some idea of what I am up against.

K: You tell them I will never go on ABC again if they are going to _____ on this. You have to tell them what you told me. There must be a minimum of honor.

O: I will call you right back.

D: Henry, Good morning.

K: How are you Fred.

D: I am just back yesterday evening from Helsinki and on Sat. afternoon Ambassador Austad and I mentioned to Pres. Kekkoken -- the Amb. had been authorized to mention his visit forthcoming to Washington in early August. The President reacted so spontaneously about it.

K: He is a hell of a guy.

D: He certainly is. The other thing I was in Gotenburg making a speech. I saw the cable that came advising of expected demonstrations on your forthcoming visit. I wanted to suggest that you get a strong evaluation that if it is going to take place it would certainly be disruptive to relationships there where we are planning on opening a Consulate General in Gotenburg. The cable was from Stockholm. If there is a nasty mess in Stockholm I think it would be unfortunate for you naturally and for over-all US-Swedish relationship and unnecessary as far as you are personally concerned. I wanted to suggest you get a good strong evaluation.

K: It will remind me of Washington. I do agree with you.

D: I think on the whole, it is on the up and up. I met with Volvo and SKS(?). They have a problem with the Fed. Trade Commission. I will call Calvin(?) over there and talk with him about it.

K: I appreciate your saying this and I will take a look at it.

D: Fine. Thanks for returning the call.

K: I didn't agree with it then but Inever gave my permission.

O: I have told them to get me offof it. I have told them I think this is incorrect and I would notdo it.

K: George, how are you?

S: Pretty well, You looked well last night and Nancy. I thought your answer to the question on your possible continuance in office next year was very artfully done and I think that was just right. I think you hit it just right.

K: Good.

S: On that paper. I have a plus and minus about it. I don't think it has enough focus to satisfy Giscard and I would say first that the initial part about Italy is good and the way it is described is the way to handle it and it is important and he will understand that all right. But I think that this north-south business is something that the conference out to focus on and I think this reflected one of your earlier views that it is time to sort of fish or cut bait on this issue. There are just a hundred balls in the air now that various people have thrown up there. Seems to me in this kind of conference in a very brass tacks sort of way the leaders should say now we have to stop indulging in ideas nd see what operation we are willing to do and agree on it and try to get behind it and that requires some good staff work. It is possible for anyone to say can you possibly get prepared by that time. I think with intensive effort if they work in good faith if they are told they will. Something could be produced that would be useful.

K: On north-south.

S: On north-South. I would be inclined to wrap Africa into that package. I understand that Giscard has a special interest the re but after all the Japanese have a special interest in Asia. We have a special interest in Latin America. Why single out Africa. I would just include Africa in there and say so and work with Giscard on that. He wants to be the chief African. Fine. Let him be. I think it is an important focus of attention and that hard staff work, and I have some optimism on that because there are so many ideas in there. Which means that everbody has been thinking about it. The ideas are different but not all that different. It seems to me there is a lot to work with. Itis not virgin territory by a long shot. I would be inclined to put a lot of emphasis on that.

K: O.K.

S: Beyond thatit seems to me that the Rambouillet group can take a little credit for the wrodl economic expansion that is

going on. It probably cannot over do that but that was the purpose of the first one and things have gotten a lot better practically everywhere since then. And there is the inflation question to be concerned about and one could register on that. The other possibility is in the trade area and you and Hal arethe only people that I have mentioned this idea of Schmidt's to. Whether some version of that of joining the United States and the Common Market is something you would want to put forward here I don't know.

K: I think it should come from the Germans.

S: It is a potentially exciting outcome in the sense of the idea being put forward. I would not go into this little section on European Community. I don't know whether Brent caught up with the fact that I brought that subject off my little piece of paper after you and I talked. I think Giscard might find that offensive. I did not bring that to my discussions with Shmidt and Callaghan.

K: That I have styled the Lebanese affair to try to keep it going. I am trying to raise some hell about Mozambique.

G: ~~Can't~~ You want to raise hell about that?

K: Yes.

G: Why?

K: The money was appropriated by Congress last year. Secondly, the money is being given in order to help Mozambique as a result of the cutoffs of its rail lines to Rhodesia. It is given in food aid, not in cash, and some other commodities. Third, we are desperately attempting to get some handle and by getting the moderates like Nyerere and Kaunda to deal with the Mozambiques so they don't permit the Cubans and foreign countries to deal with them directly, we have to show some signs of good faith. If the U.S. cops out the Rhodesians are going to get slaughtered. Arnold de Borgrave was worried and I said go down and he says they can't last 3 months. I think that is exagerrated. I think we should give the moderates something they can argue with. If it wants to go with the Soviets and Cubans $12 1/2 million is chicken feed.

R: I will be sure to get them to you within the half hour.

K: I hope we can avoid the Panama issue.

R: I have no sense that it will come up. There may be a proposal for a resolution which we may be able to join.

K: Like what?

R: That negotiations are going forward.

K: Even that may be too strong. It doesn't accomplish anything.

R: It makes them feel better and reminds us, which is its purpose.

K: We don't need to be reminded of Panama.

R: As far as I can tell no one has a chip on their shoulder.

K: Can we do a cable to Silvera and a few others asking them to help us have a conciliatory session.

K: How are you?

E: I have an upset stomach today. I must have eaten something yesterday.

K: Larry, that African paper looks like the usual crap they give me.

E: I haven't had a chance to read it.

K: It looks like they are hustling their normal rotation off on me.

E: You remember some weeks ago you told Schaufele to clean it out.

K: Yes, but he is only moving people around in the African Bureau.

E: That is unacceptable.

K: I want new people brought in there.

E: It will change on Monday. If they are just moving them within the Bureau that is unacceptable.

K: How much of this is routine. I think 80% of it is. And then all they are doing is moving people around in the bureau.

E: I will take care of it first thing Monday, Henry. Not all of it is routine.

K: And I want all the Ambassadorial recommendations by Tuesday.

E: O.K. I have them but I want to goover them. They are on my desk.

K: I want them by Tuesday.

E: You will have them.

K: They are only showing me percentages and I am sure that 80to 90% of it is routine.

E: I will have to check the figures they gave me. They were going to have a 45 % shift.

K: O.K. Make sure it is within the Bureau.

E: It isn't acceptable any other way.

K: I have two requests.

B: Of course.

K: One is, I would like to write a letter to your brother but I don't want to send it to his office. Can I send it through you?

B: Of course. Mark it personal and send it to my office.

K: Good, I will send it next week some time. It isn't unfriendly but I want to make one or two personal points. Tell him I will still support him for Senator.

B: Have you seen what Pat has said lately?

K: Yes, Pat has said a lot of right things [redacted] B6

[redacted] B6

B: Did you see the letter in the Times yesterday in answer to the 65 graduates from Yale?

K: That I rather agreed with.

B: He wasn't criticizing you.

K: Pat won't attack me personally and I won't do anything against Pat personally. When I say I will support your brother I mean he wouldn't want public support from me.

The second thing is Parade is publishing an article saying that I am challenging Reagan to a debate and I want to tell you what I am doing about it. When I was on the West Coast Parade said they wanted to take pictures for a layout. While he was taking the pictures he was bantering around and I might have said I would be willing. I never intended it to be an interview. This thing won't be published until tomorrow. I am issuing a statement this afternoon saying I am not challenging Reagan; that I consider my office non-political and also that I have cancelled two speeches I planned to give in California as being too close to theprimary dates. I am sending a copy to Reagan.

B: By letter or cable?

K: By cable. I would not like to get into a political debate with

Reagan. I have cooled all my political activities.

B: You would like him to ignore the Parade episode?

K: Yes. I would like that. I will issue a statement. Let me read it to you. (READS STATEMENT CONTAINED IN SCOWCROFT TELECON)

B: That is well worded. It gives nothing away while maintaining a formal position.

K: It isn't challenging him and he doesn't have to give anything away by ignoring it either.

B: The Parade person isn't acting as his agent?

K: If he were to challenge me himself I might have to change my mind -- but no he isn't acting as an agent.

B: Brenan asked me to ask you if you would be willing to appear with him on Firing Line. I thought I would ask you, however I felt you might decline. He will be talking about strategic weapons.

K: I would say no. I don't consider Brenan a political person. I don't think it is appropriate for my office however. I resent the situation that I am being maneuvered into a position that I am in favor of a low Defense budget however. I have been pushing high Defense budgets -- I never cut a Schlesinger budget. In fact I kept some things in that he wanted to cut out.

B: What would you do if you were Foreign Secretary in Great Britain having to mix it up with the gang.

K: Right now I feel I would rather be Foreign Secretary any place than in a country where people condemn a man for supporting things they support.

B: Preferably in Athens.

K: I don't know enough about Athens and Sparta to make a comment. I have done some research however, and found that Athens lost its wars through over-extension.

B: Don't tell the Vietnamese gang that argument Henry. Bless you.

K: If you could get word to Reagan ...

B: I will get word to him this afternoon.

K: Tell him I am issuing the statement and sending him the text in about 1/2 an hour.

B: If I need to get ahold of you?

K: You can call me through the White House.

R: I saw the George Gallop poll -- it says you can stay around.

K: I haven't seen that.

R: He says the latest nationwide survey says Secretary Kissinger is much more of an asset than a liability to President Ford.... (Reston reads article). A large number of Democrats as well as Republicans want him to remain in office.

K: What are the percentages?

R: (reads percentages)... 50 percent approval.

K: That is amazing.

R: Why?

K: Well, after 6 months of assault it is about constant.

R: I told you nobody reads the papers.

K: It has been between 50 and 52d percent almost constantly.

R: When we talked last, you mentioned the possiblity for a compromise in the Middle East. Are you putting forth any such compromise to both sides?

K: Yes.

R: How far along is it?

K: It hasn't moved. This is on deep background -- because the Arabs are so preoccupied with Lebanon.

R: What is new about it?

K: Whether something less than total peace can be negotiated for less than total return of the territories -- but on all three fronts simultaneously.

R: What about Geneva?

K: I don't see much chance for Geneva -- certainly before the election.

R: Yes.

K: Why don't we have lunch or breakfast?

R: Sure. How long will you be there?

K: I am leaving Sunday. There is an OAS meeting.

R: And then you go to Europe.

K: Yes, for the OECD meeting.

R: And Puerto Rico.

K: Yes.

R: That takes you to the end of June.

K: Yes, but with a week in between.

R: And what are you going to do in July?

K: I will be here.

R: I thought you would be going to the convention. How do you see this thing working out politically? Do you have any feel?

K: I was bothered by the Carter phenomenon but he gives you the sense that he is using the forces but not part of it. Jerry Brown gives the feeling that is he part of it.

R: It is outrageous. He has said not a god damn thing.

K: And REagan has said plenty but it is all outrageous.

R: When you have finished it will be Ford and Carter. The risks of dumping either are too great. I don't think they can do it.

K: I don't either.

R: I have never seen such opposition among the Jews for a leading candidate as Carter. It is evangelism.

K: Almost irrational.

R: Have you seen the statements from the American Jewish Community? The ones about the Jews and Carter?

K: That is stupid.

R: I think so.

K: I don't know Carter's views but I don't think the Jews should oppose people because they are Christians.

R: He is an odd fundamentalist.

K: What worries me is the cold-blooded opportunism. His evangelism will be put into whatever he considers opportune. If religion has any role it is to give him the opportunity to do what is expedient.

R: Yes. When you get back I will give you a shout.

K: Good. I would love to see you Scotty.

K: In your briefing yesterday I thought you were too tough on the Rhodesians. Instead of saying never, never is there a _____ _____. why not just say if it leads to a reasonable conclusion we are willing to consider it.

S: I didn't say that -- they all reported that.

K: If everybody reports that, then the presumption is that is what we said. It doesn't make any sense. S: That is right and I carefully refrained from saying that.

K: What did you say?

S: I said we are not planning to meet with the Rhodesians. Then they asked whether it doesn't make sense if we didn't meet with the Rhodesians. I said well it may be done in the future and it depends on the meeting with Vorster and future developments.

K: I have no quarrel with ~~that~~ this. But just loosen it up a little bit and say if it is helpful but we don't want to talk just to talk. If it leads to and if of course is practical and if all parties agree to it, we may consider it.

K: On that Giscard appointment, is there any chance of having them do it in the afternoon?

S: I can check it. They are leaving sometime in the late afternoon.

K: I see.

S: But I can check.

K: Or early in the morning.

S: I can call and see.

K: At any rate I will do it and chance my schedule.

S: I understand. Let's see if I can reach him.

K: Or at 12:00, on the meeting with Giscard.

S: I had a call from Kinkles. Schmidt has ruled out Hamburg. They cannot take the security risks because it is in the middle of town and surveying hotel space and will get back to us. It was a complete surprise to Genscher but he would meet over the weekend and they decided they could not take the chance.

K: That sounds hard.

S: I cannot figure it out. I did you a memo but I don't see what we can do.

K: I can't believe that.

S: Very strange. It is no more of a security risk than Munich was a couple of times you were there.

K: And they were going to give a social function, weren't they?

S: Yes. They have you more tightly locked up wherever they are looking now then if you were in Hamburg. I asked if they reached the conclusion Hamburg is out and they said absolutely.

K: That is humiliating.

S: We never mentioned Hamburg.

K: They said Breman or Hamburg.

S: They said Breman instead of Hamburg because it was in a large park and best from the security standpoint. But would have to be Hamburg if they could not accommodate our people.

K: Maybe we should do it in Paris.

S: I don't know what to do. Genscher is traveling. We will have to wait.

2:50 p.m.

S: They will do it at 9:30 or 3:00, but let me know.

K: Three would be the best by far. Will you tell him 3:00 is the best.

S: Yes. I told him later is better.

K: This just looks ridiculous to me. They knew it was Hamburg all along. I cannot believe they made up their mind only at the last minute or Schmidt did not know it.

S: It is all very baffling. I could try to call Schuler but it was kind of unusual in that Kinkles himself is travling with Genscher but his assistant was saying categorically as though they had been given a word from the Chancery.

K: Do you think it is due to the fact I insist the meeting be in the consular.

S: I cannot believe they are that petty.

K: How would the security be different since we were in the same downtown hotels.

S: They always said it was right in the center of town and it had some problems whereas in Breman it would have been in the park. You have gone to Berlin.

K: I am not going to Berlin.

S: I mean you have been in Berlin.

K: The second question is how did anyone in this building change it -- why was this still open.

S: Somebody had the impression you wanted to wait.

K: I didn't give a damn whether they proposed the Imperial Palace in Brunswick.

S: This is what I told these people. Then there was a memo from Schaufele to you to hold the thing open.

K: It is going to be mortifying to us to chance our travel. When are they coming back to you?

S: As quickly as they have a place [redacted] nailed down.

K: I don't want to be in the same hotel with Vorster.

S: Yes. I can say if it is such a problem maybe we ought to do it in Paris. It is awkward since it was announced. I can try and call Schuler.

K: Mr. Ambassador

V: Good morning Mr. Secretary.

K: I just have an AP announcement from Germany which sayd because of the intensity of the proposed talks as well as the importance of achieving results . . . the government has seen the need to meet in a quieter atmosphere. . . (Secretary reads ticker item). I don't normally call you but I would like to make an official protest against such outrageous behavior. The idea of meeting was first raised by me with Genscher in NATO -- saying if there was any embarrassment I would not raise it. He told me on Sunday in Bonn that he had discussed it with Schmidt and they wanted to do it. He then said to help the Social Democrats we should hold it in Hamburg or Bremen and Bremen would be best. But we could not find two hotels (I don't want to be in the same hotel as Vorster) in Bremen so we moved it to Hamburg. Your government even designated the hotel we should use. The first hesitancy I heard is in this announcement and now your government is announcing we are moving it before we have discussed it.

V: The difficulty I have -- it is difficult for me to react immediately. I was told by Mr. Rufus that a lot of telephoning had been going on between himself and the Foreign Ministry and Sonnenfeldt as far as the location was concerned.

K: But it never occurred to me that you would make an announcement before we discussed or decided on it.

V: I have to check what really happened. Could you tell me if you have the number of the AP.

K: Number 19.

V: From today.

K: Right.

V: I am going to inquire immediately.

K: I am seriously considering moving the thing out of the Federal Republic.

V: That would be very grave. Let me try to get the facts together.

K: I was told Schmidt or Genscher wanted to give some social event for the delegations. I don't give a damn -- but this sudden change in signals... I am not going to have our foreign policy caught up in your signals.

V: The last sentence about the reluctance -- that was a piece comment.

K: Yes.

V: It was not part of the official statement.

K: No, but the official announcement about the results -- I don't appreciate being put on the spot. There can't be any results in the first meeting.

V: I will go and look into this immediately and hope to be able to give you a reaction.

K: You can tell them I am ~~not~~ going to put out the sequence of events if this keeps up -- thought not the part about the party in Hamburg. ~~But~~ Buton how the sequence took place.

V: I will be back to you and I consider this most regrettable but we will have to see what the government sources really said.

K: They had no business saying anything without our approval.

V: It depends on the details of how it came out -- whether it was a statement or a reaction to a question.

K: It could have been said that for security reasons, your government has considered another location rather than because of the intensity and importance of the meeting. You know we can't achieve results in Hamburg as well as anywhere else -- the site makes no difference. They now have us between Nuremburg and Munich and I can't imagine what hotel they could use.

V: They told me they had solved it.

K: How about Furth? They have some great hotels. We can meet at the Rad House.

V: I don't think they are up to that.

K: I don't think so. Suendorf (sp?) is another metropolis.

V: I don't even know that one. It is too bad and I was glad we had the opportunity to offer the facilities for this meeting. But sometimes it is just bad luck that something comes out in this way.

K: Get in touch with me or Sonnenfeldt later. But tell them I am not a bit amused.

You and I talked about this some months ago, but Herbie Jones who probably you don't know, went to Cuba with Mancowitz and they got interviews with Castro. He went on television and said Pepsi would soon be in Cuba. He said he was working through an Italian company to get them into Cuba. Austin was watching this and then these other things happened a few weeks afterwards.

C: I think you will be surprised on the foreign policy thing aside from an over-simplification of the defense debate and isolated issues that may explode over the Middle East, etc. I don't think foreign policy will be a major issue.

K: If they keep it to that platform I don't have to rush out to defend our foreign policy. Why on Africa?

C: Just a problem -- it can always explode there or in the Middle East.

We worked out the thing on Chile permitting/Export-Import Bank and providing for spare parts.

K: How about the pipeline?

H: What did we do -- we left the pipeline in and took out spare parts. The big issue is on the Symington one.

K: Yes.

H: One of the people from the NSC came over. You understand that what we have provides only the kind of discipline the IEA would impose -- that the recipients sign up with them or some multinational organization when available. We have been told by the NSC that if we keep this provision in he will recommend a veto of thebill.

K: I haven't seen the actuall text of the Symington thing. I have a note here that says the Congress/adopt the Symington amendment in a form which would deny assistance to Brazil and Pakistan.

H: Only if they didn't sign up for the IEA inspection or if they didn't have a reprocessing plant.

K: That they would do.

H: They don't have to ratify the nuclear non-proliferation agreement. It says a recipient country wouldlose its economic assistance and all of its assistance if it received nuclear materials and reprocessing equipment and didn't join a multilateral organization or come under the aegis of the IEA. We thought that there should be some emphasis on bringing these countries into the framework of multilateral organizations.

K: Yes.

G: We had lunch with this guy -- very bright -- and he told us that they were being sued because they printed something about the Government torturing someone. We talked to Praga (sp) about it. At the same time there were two silly issues that got them into trouble -- one was the travelling King and the other was a cartoon of him dancing. You couldn't understand what the issues were. We had lunch with Praga (sp) and suddenly there was a meeting and a suspension of this guys magazine for four months. He called me and said he wishes I could do something because this is unprecedented. I said has it happened under Franco? He said once for three weeks because of the violence issue. The background is that the Minister of Information is threatening to resign over the issue. He is baffled and said maybe Arias was nervous because of the King's visit. Howeverthe Council of Minister's decision took a neutral stand. The Foreign Minister and Justice and Commerce ministers are their only friends. I said I didn't know what I should do but I can get our people to write an editorial so I called home and there is a story by Stringer in the Post yesterday about the matter so I really thought I would ask you if there was anything else that I could do or that you could do.

K: Let me look into it and call you tomorrow night where will you be?

G: I will be here.

K: Let me call you at a more reasonable hour tomorrow night.

G: I will be out from 11:00 to 12:00 to dinner, but leave a message.

K: O.K. Are you having a good time?

G: Depressing and alarming. Alarmed about the state of democracy over here. We have been to Spain, Portugal and Italy and now here it is alarming also, isn't it.

K: It is not good.

G: But it is interesting and we have had a good time.

K: I am glad.

G: I gather in between a succession of trips.

S: I don't know what we can do.

K: I almost certainly will move it. Have we heard from the French?

S: They have still not called back. I am sure it is going to be all right.

K: If we move to _____ or _____ it would be another blow.

S: I don't think that will be much of a problem. We have had one run thru on the communique. They think the text is much too combative and the French have a text on no confrontation, very positive about Nairobi. There is going to be a bracketted text.

V: Good afternoon Mr. Secretary. I am calling you because I got a message from Bonn and a second message from Helsinki where Foreign Minister Genscher is at this time. He was informed of our conversation this morning. I will read you a statement which was issued by the Government and a personal message from Genscher.

K: Yes, please.

V: I will read the Government statement which says: The Government of the Federal Republic of Germany welcomes the meeting between the American Secretary of State Henry A. Kissinger and Prime Minister Vorster of South Africa. The Federal Republic of Germany considers these talks a useful contribution to a peaceful solution of the problem. It has been informed of the meeting and has rendered its assistance for a meeting in the Federal Republic of Germany. A suitable location will be confirmed and published in joint agreement. Minister Genscher adds these thoughts which I would like to read to you in German. I am not sure of my translation into English.

K: The danger of your not being precise is practically zero, Mr. Ambassador.

V: Thank you, Mr. Secretary, you are very kind. The Foreign Minister had instructed the State Secretary to call you but he wasn't able to get through (reads statement in German). The translation is: As from the beginning, he welcomes the scheduled meeting and assumes it will take place in Germany as previously discussed. It isn't for us to determine our own role in this context.

K: We will get a report tomorrow about the location and we can make a decision after that. It would have been easily settled if we had been in contact earlier.

V: I only learned this morning in my conversation with the Chancellor's Foreign Policy Advisor from contacts that took place yesterday evening with regard to the location. It was my understanding and I talked to him before you called me that it was only security considerations which played a role here. I still don't understand how this formulation...

K: The security considerations we can understand, because we can not afford to look as if great results will happen there.

V: This is understood. The statement which the speaker made said with regard to the location that it will be confirmed and published in joint agreement.

K: Why don't we make the final decision tomorrow. I have to tell you we are now looking at Geneva because the whole setup -- 70 kilometers apart, 30 kilometers -- we are having someone look at the place tomorrow.

V: From what I learned from these to messages and from the telephone conversations which we had they are most anxious to have it as previously discussed in Germany and I think I would miss my duties if I did not say it probably would cause a great disappointment.

K: I appreciate this very much and we won't do it friviously, but we will be in

K: First I want to get a report about the location and what our people think of the location of these places.

V: I understand.

K: Then we can make a final decision.

V: It was my feeling and I think the Chancellor shares this that we were most anxious to have it in the Federal Republic.

K: We will not change it lightly.

R: You have been through your Embassy.

K: Yes.

R: The announcement is the one we agreed upon?

K: It is almost the same as yours. We are telling our people to come to the Embassy -- your Embassy -- not really, I just wanted to give you a heart attack.

R: Yes, I will try to expedite the broadcast of the message. Is the airport open?

K: We don't think so.

K: I am late for a meeting with the President so we have to make it quick.

D: One minute. Did Hyland mention to you I called you?

K: Yes.

D: I saw two telegrams. First for the President and Secretary of State to be informed confidentially and in advance of this in Lebanon in connection with the assassination of the Ambassador and to proceed under the assurance that the United States does not intend to take any military actions. This is the first message. The second is that they were in early contact with the PLO during the night. This may be belated but I think this may be of interest to you. Gromyko asked that we tell this personally for the President. The leadership of the PLO in Lebanon investigated the killing of the American Ambassador. The investigation proved the abduction was made in the neutral zone in the National Museum area. The leadership states the method is an apparent provocation of those forces which do not strive for peace but further aggravation. The PLO asked the Soviet Union to inform the United States Government of the above said. Secondly, in confidence they cannot ask for specifics to the American side but tell us in their own reply. It is important for you to know what they tell us. They have assured us that they are not going to have anything to do with what happened to the United States ambassador but condemn those senseless acts. The Lebanese are taking most urgent measures to find and punish the criminals. One of these indications was it was not the intention of the Palestinians and that during the entire war no damage or harm has ever been done to your embassy or created in the western part of Beirut. PLO leaders reassure us the assassination of the United States ambassador was by those who have nothing in common with the PLO. We would like to say we have no doubt as to the reliability of the information received from the PLO leaders.

K: Good. I appreciate this very much. And express my appreciation to your leadership.

There is no one for whom I would rather speak and no organization for whom I would rather speak than this. I was originally told weeks ago that I shouldn't speak at anything that would cause political trouble during this period. I got scheduled then with the Prime Minister of Japan and several other people and it wasn't possible to cancel them. I am proud of our African policy and would like to discuss it with a group such as yours. I wanted you to know -- I have to trust you won't repeat this -- that this has much more to do with internal politics than anything else.

W: I understand -- I understand completely.

K: And frankly just for your information I told them all to hell with it and I tried to change what I had done, but by then I couldn't change it. The concerns had to do with the Mississippi delegation, and I am not proud of it.

W: I well appreciate, Mr. Secretary, the position you are in and you can depend upon me to treat it...

K: You have been a friend of mine for long before I was in public service. I wanted you to know that I am pursuing this policy that I announced in Lusaka with great energy and not always with great support from certain segments of the Republican Party. W: That is a possibility. We will turn that over in our minds about having a luncheon meeting that would prevent to many people from knowing what about.

K: Yes, if it is a little later I think the sensitivities here would be a lot less.

W: Well probably as late as September?

K: That would be very possible for me. And then you can have as many people as you want.

I called Roy Wilkins, to make your job easier, I talked to him and told him I am ashamed but that it wasn't a something I could do when these guys are hunting for Mississippi delegates. What they don't understand is that if Ford looks like he is getting inroads to the Negros he might get more delegates. He will never get the Reagan people anyway.

K: Did we tell them we were going to the Christians?

D: Yes.

K: They are bound to consider that intervention.

D: They know we have been keeping in touch with the factions. We tried to put it in terms of intervening as we have before -- to put it in terms of a cease-fire. In going to the Christians, we have to ~~explain~~ expect that if we go to them it will get to the Syrians.

K: I wonder if we should hold up.

M: I wanted to check with you. I am going to Israel to get an honorary degree at Hebrew University.

K: Good.

M: It couldn't be nicer but last night I learned my schedule and it starts with a meeting with Peres when I get off the plane. This is also a governmental thing. I wanted you to know that and hear anything you wanted me to be careful about. I am going to give the Commencement Address for the foreign recipients of... the most distinguished is Andrei Sakharov, who, of course, can't come. After Brezhnev's speech, enough is enough, -- but I wanted to talk to you to see if you have anything for me or any cautions for me.

K: With the Israeli government we are on a parallel strategy. There isn't anything we want them to do that they are not doing in any policy sense. In the immediate future there are no problems. In the middle term there aren't any governmental problems but they ought to think through with more precision of how they see the thing evolving. They can't count on us to be more precise as a nation.

M: About their future?

K: Right. But now there are no disagreements between them and us on the issues before us. On the PLO I am in agreement with them, though some may not agree with me here. I don't see why they should deal with them (PLO) til the PLO recognizes their existence. We have a proposal which we put before the Arabs -- it was developed by me and Rabin, when he was here. It has not been accepted by any Arabs but has not been rejected either. We want to get a formal Arab response. I would prefer it if you didn't highlight this. I wouldn't demand an Arab response because then it is apt to be negative and then, of course, we have to face what do we do then. On Sakharov, I have two problems with Berlin. I don't believe in the _____ of their common posture. I don't deny that there aren't tactical disagrements but the problem has not been affected by the Berlin decision and I have no problem with you pointing out the hypocrisy of this.

M: From a distance I was umbraged by the behavior in Nairobi when the Eastern bloc decided what can or can not be gotten from theWest.

K: And make no contribution of their own.

M: Right.

K: One has to have understood the two levels -- one on which a vote is acted by 1/2 of the Communists and they aren't even studying the proposals. The abstaining of the delegates was less scandalous than the negative vote of the Communists.

M: You don't mind my raising that?

K: No. Can I say two other things. I keep hearing from the press that you are saying I put Reston up to that column wanting you to resign. I had not talked or communicated with Reston for 3 weeks prior to that, nor had Eagleburger. I did have breakfast with him on that day, but it was the day the column appeared.

M: There were 25 at that breakfast and only one man got that story. What I said was the Reston column, no matter what the truth was, there was no way tp pressure a foreign diplomat...

K: I disagreed with you then and regretted it that you left. We don't have to debate that decision.

M: I have not said that and went out of my way....

K: My major concern is that whatever we might have clashed on and whatever happened -- let's face it, you are the last person I want to have a disagreement with.

M: Did you get a note from me? I sent you some clippings and told you I thought you had every right to make the statements you have been making. And that it is appropriate for you to makes these statements.

*

K: They didn't bring it to my attention.

M: Well, too many were written from hotel rooms.

K: How does the campaign look?

M: If I am nominated I will win.

K: You think you will win.

M: If I am nominated. With 5 people in the race and a low primary turn out it becomes statistically random. Last time we elected a Democratic Senator was in 1950.

K: I think it would be a good thing for the country if you were elected. Nobody will be happier than I.

M: I thank you and I will give your regards to the King David.

K: You are seeing Peres -- you might see Rabin.

M: I am seeing them all and Golda too.

K: How long will you stay?

M: Til Thursday.

K: Have you been in Israel?

M: Never.

K: They are exhausting.

M: The last word on Lebanon-- what is it?

K: I think in Lebanon it is fair to say our policy and the Israelis is fairly synchronized and we are not pressuring them. Why should they interview? At some point we have to be x carefulx that the whole band doesn't turn on us -- the band of warring Arabs . But the Israelis have played it cool and will.

*

M: They haven't been storming about the bottom half.

K: That was their first reaction. The Syrians screwed this up. They are in there now, but they don't dare tackle the PLO. If they leave it will fall to the PLO. It is a god damn mess.

K: Which?

D: Brzezinski.

K: Zbig?

D: Yes. He was pressing Israel and so on but I was on the show in Washington and Quandt was there and there was a three-way debate. What they all say is that would be a possibility for the real moderates to show they are moderates. If Egypt is going to use this opportunity . . .

K: Let's see what is going to happen. I am sure there will be a debate.

D: I am talking about from your own point of view and ours -- we are interested in keeping the Egyptians on a fairly moderate _____. The purpose of my request is whatever can be done to help Kenya, Kenyatta was not in the picture.

K: We have seen him a few times and if I can keep our ambassador from peeing in his pants . . .

D: You have one of those there?

K: Yes. You are going to come out ahead on this and there will be no playing around.

D: I am not worried.

K: We will not let Kenya get _____ for this.

D: Good. We are very appreciative. I want you to know your and the President's reactions were very helpful to set the tone and that is helpful. You can't imagine what is happening in the embassy. Hundreds and hundreds of calls -- we had 70 operators working yesterday. People are bringing cases of champagne and letters.

K: It was a terrific thing.

D: You have restored confidence in international order.

K: It was a terrific thing to do.

D: We should try to capitalize on this. You had some State Department officials for whom it was very difficult to swallow.

K: I am not going to be accused by Rosenthal. . . As you know it has nothing to do with the merits of the case. The law has to be upheld.

D: You could have more than 24 hours of pure satisfaction. You have to send me harpoon if you don't know -- and I feel you do -- all the work we have done.

K: For once I give you total support in something.

D: I know. You know I nearly . . .

Kalb: Is it going to be difficult to get a general expression of concern on that?

K: We are not yet sure.

Kalb: Really.

K: Yeah, that is why we are trying not to be too specific about it. We may nail ourselves too much into a position too early.

Kalb: But I can't understand why the Europeans would be hurt by a strong statement on terrorism

K: Well heroism is not one of their main attributes.

Kalb: What is between the lines? What we are talking about in general [redacted] terms is a strong statement of condemnation of hijackers and terrorism and not to confuse that with the "legality" of the Israeli raid.

K: That is right.

Kalb: One other thing is I might. About a conference for Lebanon. No one else has picked up on it but I have heard you mention it several times. Is that conference in your mind to include the Lebanese parties and outside major and minor arab parties?

K: It could be either but I think it might be best to keep it to the Arab parties.

Kalb: How does that look?

K: My estimate is that over a period of weeks it is going to crystalize.

Kalb: A little more blood-letting?

K: You have to look at the long-term situation and what emerges out of that is not all that bad

Kalb: What are you doing this weekend? Are you going to have any fun?

K: I am going up for my third dinner in 4 evenings with the Queen.

Okay, Marvin are you going to be in New York next week?

K: When Fahd tells us we have to do this we almost have no choice.

A: The British Ambassador has made this recommendation too.

K: You can tell the British that we have this report and ask them what do they think. And send it to Seelye and get his advice. Ask him in the light of these circumstances what does he think.

A: In fact I wonder if we ought to do it bit by bit and get the British views before going to Seelye. If we do it I think it ought to be an international movement with the British and others that are still left there -- what few there are.

K: Are the French still there?

A: Yes.

K: I want Seelye to reduce the Embassy staff immediately.

A: We have a message prepared telling him that when he leaves we want him to reduce. Most of the people left there are security people and they will of course leave when he leaves.

K: But Fahd thinks we ought to close the Embassy totally. What do you think?

A: Well, I thought about it all weekend and my view is that we should. But I think we ought to do it in concurrence with the British and others. We can't leave while others still stay. The risks are increasing and we may have a situation where we couldn't to id without putting in a landing party.

K: And that might not work against opposition. The PLO might be so desperate that they might be delighed to kill a few hundred Americans.

The only conceivably interpretations could be that either you tried to get me to approve it and I didn't or I didn't want it in a formal statement and got you to make it under the guise of a personal statement. It doesn't make us look very good.

I just assume everybody has agreed and I just change those things that bother me. In retrospect I agree but I would certainly have been able to agree to the human suffering involved of innocent people. Well, what was the reaction to it?

S: I really don't know. I just came from there and so far I think the reaction is tremendous.

K: What was the reaction to the other speeches?

S: You're asking a non-objective observer but everybody seemed impressed about what Richard said about Mrs. Bloch but were disappointed on the rest of the speech.

K: That is what I expected.

S: The German, which is the first time he has ever spoken, was fine and I think it will get some play because it was the first time. But I will be blunt with you under the circumstances it didn't seem very strong but I think it will get some play because of the novelty.

K: What I am trying to do is make a strong position which doesn't raise rip it with the Arabs and the Africans. YOu know we are negotiating on the South African things with Schaufele.

S: I am sure it did not rip it up here with the Arabs or the Africans because I talked with an Arab and an African after the speech.

K: No, no, that won't rip it. Well, listen when you have a concern give me a call in the future. Really my admiration for the way you have conducted yourself is . . .

K: Are we in contact with the PLO or are we doing it through the Egyptians?

A: Both. The security man at the embassy -- their security man in Beirut. We have a report in this morning on the talk they had.

K: I don't get those reports. It is ridiculous.

A: It is.

K: This place has disintegrated.

A: I can't believe the press don't know.

K: What does the PLO say about evacuation?

A: They say they will cooperate fully if we want to use the airport and if we want to use the road.

K: Let's use the road.

A: We have the problem with Seelye. He has had some reservations about the road and he also had some on the airport. We are going to talk to him about the road on the secure phone today. Once he gets into the Syrian area there is no problem.

A: Seelyee sent a long message which went around to a lot of places. This was the Tel Aviv comment on that.

K: Why do we do it knowing it will leak and knowing it will just raise hell.

A: I can't explain that. I agree it was not a message we needed. It was mostly a message about what the positive elements. were.

K: But why send it around. We have enough troubles.

A: I am not disagreeing.

K: Well, who sent it around?

A: He did. He sent it out from there with a number of addressees.

K: Does every Ambassador have the right? So he determines how much leaking there will be in effect?

A: I am sure he wasn't thinking of it as something that would be leaked.

K: Couldn't he have sent it here and asked if he could send it around?

A: That would have been a much safer thing to do.

K: Can you make sure that happens in the future.

A: The only way we can do it is to issue a directive saying that an Ambassador should not give lateral transmission of messages unless authorized.

K: Well, let me think about it. Roy, how was it possible to have this deal cooked up with Saudi Arabia without my ever knowing about it.

A: What deal?

A: Well, circumstances have changed since we started planning the evacuation.

K: That scheme may be good for Guatemala in an earthquake but it is really difficult to do it in this mechanical way.

A: The situation in which it is happening has changed since we made the decision.

K: What is our interest in the other foreigners?

A: Well our interest is basically in our people and we didn't make a big thing out of all of this. We simply said we would be doing this and that others would be welcome to join.

K: But you don't know what Seelye is saying.

K: Why don't you call Baron (BAR-ON) and say that if the Christians play around with us, we will have to change our attitude toward them.

K: That cable which I finally got to, they sent not only to Korea but Puerto Rico. In the aide memoir.

H: In the aide memoir.

K: It went to practically everybody.

H: Some of them it is only for info not for action and some of the countries were hard core.

K: But they are also,in the usual incompetence of this Department, being sent to addressees that had already been addressed in my letter.

H: Those were for info only.

K: Like who?

H: Botswana, Dar es Salaam. No, they took that into account. It is all being handled.

K: Do you think the Department of State knows that Korea sent fighter pilots to Cairo?

H: Cairo is not all that bad. There is a Consulate General in Cairo and there is some indication that they have got some good economic relations going. They have been doing rather well in the Middle East lately.

K: Okay.

H: Can I ask you another question?

K: What is it?

H: When are you going to let me send that execute message?

K: Maybe never.

H: Well, the problem is the thing already went out and alot of them have already done it -- it went out on the 27th.

K: Nobody had a right to sent this thing out. Since I cannot get discipline, I can at leat make your life as difficutl as possible. Don't give me this nonsense. They are sending out this as a verbatim of the letter and it includes all of the countries that I disapproved for the letter. They used my speech to circumvent my instructions.

K: Like Damascus?

H: Damascus is on for info.

K: Like Mobutu?

H: That is the one I would have taken off if I had had a chance to look at it before. In para 2, it says "Beirut, you are not to present the aide memoir."

K: Phil, you will not be able to lift this restriction. Either this Department will get organized or we will each go our separate ways.

H: In this case, we are following up on your speech.

K: Then why are they putting in the Puerto Rico stuff as much as the other? I had explicitly rejected this approach in a letter. It is total lack of discipline. If they wanted to appeal it, they should have.

H: Ididn't know you had rejected it. What I knew was that you didn't want it to go to hard core countries. All right now Iunderstand. I understand a little more why you are so angry about it. Well, give me a ring tomorrow.

K: Maybe.

H: I would really ask your own feelings. Do you really want to have a last fling before the elections with these people? Would it be useful? They would be delighted for you to come for however short a time. You have had long-standing invitations. Now EA doesn't think you ought to go to the Philippines because there is nothing to do there and Marcos has not been treating his own people in the best way lately. He's got some trials coming up and you would not want to be there on the day he sentences a bunch of guts to life imprisonment. My view is it would be useful.

K: I am not so sure it is but I really can't be in the position that I must make my trips dependent on the domestic situation.

H: No, but you don't want to arrive when he is sentencing his leading opposition guys to live imprisonment. There is no progress on the base negotiations. My feeling however is that you don't want to stay long enough to do something anyway. It might be useful to lay some things out with the Base agreement.

K: Like what?

H: There is no question that they are being unreasonable. Remember since you have seen Marcos, he has been to China, the Soviet Union, he's headed the G-77.

K: Couldn't we condemn the raid and have a session as to who did it?

S: Let's see what we can work out up here and I will get back to you on it.

K: I have told Botha about what we are trying to do there and that he can be in touch with you and you will do your best to come up with something that isn't too offensive but I didn't make any promises as to what that would be. We did say we don't agree to Chapter 7.

S: Ok. I'll see what we can do.

K: How was your visit to Italy?

S: I got the impression that everyone is looking at this as an interim thing and the DC will have to go it alone and the real crisis will come in about 4 or 5 or 6 months.

K: If Carter gets to be President it will be a lulu. He has given them all the wrong signals.

S: I think Andreotti is pretty good but he is not a new face.

S: One other inquiry. Did you see Ambassador Trucco and that emissary from Chile on human rights?

K: No. I saw him last week when he brought in a group of boy scouts to sing for my wife.

S: (laughter). We get the damnest stories back here. I am going to call ARA.

K: He told me they were going to promulgate a new Constitution but there was no emissary with him. It is getting hard to conduct foreign policy in secret from you with your intelligence. I am inclined to feel we should take a look at that human rights thing up there.

S: We can make this a real confrontation.

K: I feel that Chile is no great bargain. The whole thrust of human rights is always directed at our friends or people who want to be friendly. We don't have to settle it now.

S: I have to come down to Washington on Thursday for the President's meeting with the Pennsylvania delegation. Are you going to be there Thursday morning? I would like to see you.

K: Good.

S: I will get that arranged.

K: I want to. Do you want to have breakfast?

K: I have not seen it.

S: I thought IO people showed it to you. It is very, very strong. It is not something we could probably go along with. The British, French and Italians and Japanese want to have a meeting at noon today and have asked for our participation in it because they object to this resolution also but their present tendency is to try and revise the resolution so they could accept it or at the most abstain. Shall we participate in this talk with them.

K: My instinct is yes. What is yours?

S: Mine is too but that leaves us with two options or maybe more. One is we try to persuade them to come up with a resolution which would be all or ours. The Swedes are unhappy too. We are the most unhappy as usual.

K: I don't know what it is about IO that makes them think I may not see resolutions that are being debated. I have never seen the stupid thing.

S: I will call them.

K: My instinct is to have you meet with these peopls and to see whether we can get a resolution we can support. [illegible]

S: The only thing, I don't want to be left with the US left alone vetoing it.

K: I would be very reluctant to veto. I would tend towards abstension. If there is chapter 7 language, then we would have to veto.

S: There is some very bad language at the moment.

K: Like what?

S: It condemns South Africa for everything -- their racist business and it has the two final paragraphs which are operative declaring that the liberation of South Africa is a prerequisite for lasting peace in the region. In the event of South Africa committing further acts of aggression against Zambia, the Security Council would meet again to consider measures including actions under chapter 7 of the UN Charter.

K: We would probably have to veto saying that the liberation of South Africa is a prerequisite for lasting peace -- that we would have to veto, if they don't take that out.

B: I had a call this morning from Jack Smith in the embassy up there. He has been dealing with Jules Katz. I was not completely filled in on the details last night, as you were not. I thought we were getting progress on this $20 million. Apparently we had some legal snags. I am told the lawyers in State stopped it.

K: BS. I will get the lawyers in State to change. We'll do whatever we can to help our foreign policy.
B: One is the free trade zone border.

K: They are willing to agree nothing should come in through that loophole if you will make an adjustment in their quota.

B: They are asking us to increase the quota to 60 million pounds. If we do that, if a beef goes from 65 -- we have quarterly to estimate the beef control and make a report to the President. If it exceeds the quota the President has to impose a quota. In the absence we have voluntary quotas in shipments. They have been negotiating and Jules Katz has been doing a good job and they have been difficult negotiations. He has this year's all done. Only yesterday I was talking with my people who are responsible for these reports and they indicate there is a strong likelihood in the next quarter they will exceed the quota which will require the President to impose quotas. That would be bad. I said if there is some way -- don't do it before the election. It would raise hell with 15-20 nations.

K: I don't understand the issue enough.

R: That's news to me. I sent you a note saying that Rollins wanted to see me. That's all I know about it.

K: All you should discuss is the economic plan. The political strategy I want to discuss.The next day I am sending Schaufele over. You and Bill together ought to discuss prior to a breakfast I am having with Callaghan on Thursday morning some of the strategy. Then I would like you to join that breakfast unless the Prime Minister wants to see me alone, which I doubt. Will you do that?

R: Yes.

That Israel would not put up with a settlement which meant resumption of guerilla attacks and stationing a large number of Syrian troops along Lebanon's border with Israel.

K: I absolutely will not respond...

F: Do you want to hear the rest of it?

K: Yes.

F: According to Dinitz you understood Israel's position and did not expect any Middle East peace initiatives until Lebanon fighting ends.

K: Why don't you call Dinitz on my behalf and ask him...

F: Wait a minute...there is more. Dinitz said that you hasd expressed understanding of Israel's concern, but had reservations about the agreement being implemented.

K: Simply say we do not make it a practice...

F: Wait a minute. I want you to hear the rest of it.

K: ok, go ahead.

F: That you said there were no changes in the U.S. attitude toward PLO. That you told Dinitz that the contacts with the PLO had been only technical in nature as the American Embassy is situated in an area of Beirut controlled by Palestinian fighters. That you said that new political moves aimed at bringing about a settlement in the Middle East could not be undertaken at present. Fresh initiatives to restart negotiations were impossible while fighting continued in Lebanon.

K: Simply say we do not make it a practice to discuss private meetings between Israeli Ambassador and we speak for American policy not he. Give that as an answer and then call him and ask him what the explanation of this is.

We can move up with prices -- we can be flexible with future price increases and then we would be able to make a very meaningful outfront payment. They will have to give up some price increased further down the line.

K: Yes.

Z: We want a price discount that is more than what he has been talking about. We want to come out with something like a $1.00 increase. I want him to come back and negotiate down to it.

K: When EA returns from the toilet will you tell them...

H: I have already told them.

K: I want retalitory action.

H: They understand.

K: What is their definition of retalitory action.

H: They were told to consider what military actions there could be.

K: Are there fishing boats we could shoot-up or capture.

H: Yes there are fishing boats. There are things that we or the South Koreans could do. There are means of retaliating along the DMP itself. All of these though are facing two very strong arms of camps along the line. Fishing ships are vulnerable, because there are more South Korean fishing boats. There are not so many military vessels.

K: We cannot have Americans killed. I hope that is clear.

H: I have made that very clear to them. I have impressed on them the seriousness of these and that you want to impress this on them.

K: How could it happen that there were no Americans there.

H: I have many suspicions about that. The account from the Embassy has gaps. For example say when they went there they talked to the North Korean who said O.k. trim the trees. Then he told them to stop. A while later 30 North Koreans came. How much later; why are they not talking abou it.; where was our action team.

K: Why trim trees there at all.

H: These things go on all the time there. Tourists go there, press go there. Meetings are held there. It is the only spot where the two sides or sort of face to face. It is supposed to be a special de= militarized area. The only things to be carried are small arms but where were our action teams. We have a whole team trained the minute anything lookis like it is going to happen. Where were they; why weren't they called.

K: Are they getting me answers by 12:00.

Y: Fine. I wanted to call you to see if you wanted any further description of the Mexican situation.

K: What Mexican situation?

Y: Mexico is practically broke.

K: Is it Mexico or Brazil.

Y: It is Mexico.

K: He told me it was Brazil.

Y: The...

K: What he discussed with me is that we are trying to bail out...

Y: We are attempting to ehlp...

K: No, no, the only reason I am confused Ed is because he told me in Kansas City that he was -- that Brazil was broke.

Y: Well, the ...

K: Are those...

Y: In the first instance it involves Mexico and the jist is that they have about $23-25 billion in debt and they have $150 million in reserves. They are losing $150 million a week.

K: Then the question is do we want to bail out Echeverria?

Y: There are two questions. The first instance is there is a question of whether it is even bailable. There is a question of whether we get the IMF, which I have done, there is a question of whether the situation can be saved in the financial sense or whether they will have to reschedule the debt. If they do that we will have a bunch of badly bent bankers. Our people have $10 billion down there. The shock of this would badly affect Brazil -- the financial shock.

K: I see.

Y: Because in reality the Mexican situation is one of the greates financial con jobs of all time. They concealed their numbers -- there is no one in the financial community that has any idea of the situation.

K: Can this wait until Monday morning.

Y: Yes, it certainly can.

Y: I wanted you to know about it now because Echeverria is under tremendous pressure.

K: To do what?

Y: If he decides to save the situation he has to accept a brutal devaluation.

K: Which he said he would never do.

Y: But he has to because of the line up of events, not because of what we are telling him. By reducing the budget deficit he has to reverse everything he has done to save it. People are telling him about the realities of the situation -- not realities manfactured by us.

K: He could turn on us.

Y: That is the second alternative. He could declare a debt moratorium, impose controls and turn on us.

K: I think that is more likely. What do we do then?

Y: Well, I think there are a number of things we could do to prepare the way. There is one final thing -- he would join OPEC in wxchange for some money.

K: He will do that in practice if not in name. That knocks him off the GSP.

Y: He is sitting under enormous pressure -- facing great humiliation.

K: Can I propose this -- can I get my people to work over the weekend and we get together at 9:30 on Monday morning or is that too late?

Y: No, no. I will be here this weekend working. The only thing I have had a very limited group in the Treasury working on this for fear it will leak out. If it does that then rather than make it through the next week it wouldn't make it through Monday afternoon.

K: Let me put to work here Rogers and Shlaudemann and tell them not to have more than one other person working on it, if that is possible in this organization. Whom should they get in touch with, you?

After that there are some additional things that we will have to ask of them.

K: Do you interpret this to mean the French are absolutely determined to go ahead or a repetition of their existing position?

H: I asked my fellows how it might have happened and what usually happens after vacation is over the foreign minister makes a list of events that happened during that period and then announces the results in his briefing. It could be that the spokesman, who is a Gallist, decided to give this another twist at a time when Chirac was leaving and they might have trouble with the Gallist. Who can tell whether it is new and they have changed. All I have seen is this AFP ticker and they very often twist things. The other thing is I don't think there has been any review because there is no time and Giscard has been vacstioning during this period.

I would like to suggest the following. I cannot accept the principle that all confidential exchanges have to be shown to the Congress but I would be glad to send McCloskey up to let you see it. It is not a question of keeping it from you.

R: We are right in the middle right now of that Arab boycott provision -- the tax bill. The letter was drafted by Bingham and I could not refuse to sign it. I have been taking the lead in this thing.

K: It was not an excessively friendly letter either on your side. I just want you to understand my position. I cannot have governments believe that every confidential exchanges published by us but I would be glad -- actually as it happens in this case there are no commitments. It is simply a statement of our policy that had always existed and I will be glad to let you and Bingham see the letter. You can show it to me to satisfy Bingham. I don't know whether any of it has to be used. It has never been made public to anybody.

R: I don't want to have it used.

K: This is my problem but I don't want you to hink we are hiding something.

R: I am here at the House WAys and Means Committee. If he shows it to Bingham and comes downstairs at the Longworth Building. We will be here in the morning and coming back at 2:00 in the afternoon but I think the problem that has been put to the Treasury and the State Department by the conference on the Arab boycott provisions in the tax bill is both by Long and Ulman -- does the State Dept and Treasury Dept have an alternative proposal. It is in the bill and to go to the floor on this issue at this time, both the House and the Senate will certainly uphold it. It is a question of whether anybody has an alternative. Ulman has talked to someone. I don't know whether at State or not and Long has but no one has seen an alternative.

K: Frankly, I have not either .

R: Yes. As it was put last night and put this morning that the responsibility is on State and Treasury to come up with an alternative.

K: You know it would not be the first time that I did not know what is going on.

R: I know that the tragedy is on big issues that get in the public domain that you take the rap on that those are often things that no one has talked to you about. You have [redacted] with this thing. B6
He has been meeting with people. He brought the Saudi Min. of Planning to meet with Ulman and others and members of my staff. I was not here. I did not meet with him. He wanted to meet with me. As I get it he was very, very heavy handed. You know in how he handled everything--warning everybody that America's economic future depended on this claus and that there is no give on what he is going to do on the Arab boycott. Everybody has a right to a boycott. Some boycotts have gone all along the line what you sell to somebody who sells to the Arabs. This is not acceptable

K: I will look into that.

R: If McCloskey comes up I will be more than pleased to talk to him. Why don't you keep the letter in your pocket. If you satisfy Bingham and me let it die. Get McCloskey to get hold of Bingham and then get hold of me. I can get out of here and he can catch me on the Senate Floor or the Ways and Means Comittee meeting--in the Longworth Building. I: Did he talk while you were there?

K: He was invited but it was obvious that there was some pre-arrangement...

I: Not to my knowledge.

K: I know it was cooked up between Case's staff member and Lehman.

I: He asked for someone to come which we can't turn down.

K: Don't you have any foreign policy responsibilities -- don't you think?

I: That is what we talked about on Monday.

K: Do you think that cutting a few 100 mavericks from Saudi Arabia is worth the risk of having the Saudis decide that the U.S. is too unstable to deal with and going to Europe?

I: I was worried about this kind of thing occurring. I wanted to minimize this. There are two factors. One is what position we can take. I would like to hear from you on a working ACDA position which doesn't become an untenable one in relation to our foreign policy. I will turn it off. The second is Congressional testimony.

K: I can't prevent you from testifying but here this fellow shows up and I never got any indication that he was going to be there.

I: We have been trying to get from H some coordination about when you testify, but so far we haven't had any results. I was trying to get someone there to find out about your reasoning...

K: I don't know enough about these individual items. I put my case on foreign policy grouns. It seems an unusual risk however to go up there now. They want to cut it in half. I don't know whether 700 mavericks makes any difference but going to the Saudis after we have made a deal with them and cutting it in half -- well we will lose them as a stabilizing force in the Middle East.

I: Well, whenthe C-130's came up for Egypt I wrote a memo and I personally walked it up to Sisco, myself. I like to get involved in these important issues. I think we have to avoid doing an analysis which looks at it from just the arms control side.

I: Do you think some trimming of the numbers would be very bad in our relationship?

K: On the sidewinders we have trimmed them by half before we submitted them. Now another trimming would make all the sidewinders go for training. They estimate that they need 600 for training alone.

I: I think some of these numbers are large.

K: They started with 4500 and we went down to 1000. On the mavericks I think they are large. I am willing to cut the mavericks a bit.

I: I am in agreement with you that foreign policy has an overriding concern. Whom sould we work with on this? I can make a statement on Monday...

K: Have you talked to Genscher about Tuesday.

S: They are working on it because he is travelling on Tuesday and that was not a good day but they are going to try to fix it.

K: But shouldn't we offer it then to Schmidt too? If it is in Bonn, it doesn't look good.

S: We discussed that. Genscher will be in the south of Germany campaining.

K: If it's in Bonn it doesn't have to be in the god damn airport.

S: It was either the Bonn airport or the Frankfurt airport. But Genscher is not in Bonn. He is travelling in the south on Tuesday. On MOnday, it would have been better.

K: The trouble on Monday is I would have to leave Zurich early.

S: They are trying to get back to me with a suggestion of Frankfurt, or Stuggart, or Munich.

K: I can't go to Munich!

S: They will probably suggest Frankfurt. They have to see if they can somehow change his schedule.

K: Would somebody please explain to them if they would like to meet in some castle on some mountain top hanging from trapezes it doesn't matter to me.

S: I . . .

K: I am not blaming you, I am blaming those fools who work for me.

S: How much time do you have?

K: If I go to Africa, it will be tight. If I don't go to Africa, I don't care.

S: I told them you were flexible. I told them you would go wherever they wanted. If it is Bonn, it would be difficult for you to just be at the airport. And they agree with that. Tuesday is a bad day for GEnscher. They will get to him as quickly as they can and come back with a proposal.

S: It is awkward to do it now because it is Genscher's initiative.

K: But I am just wondering from Schmidt's position now since I will see Callaghan and Giscard but not Schmidt in Germany. But wouldn't you think it would be better to drop a word to Schmidt's Assistant that this is cooking?

S: I can tell them that. I don't know whether Schmidt would want to travel for it.

K: Look, if Genscher can come to Frankfurt, he can come to Bonn. I am just concerned as to how it looks to Schmidt. It may be that Schmidt will want the same publicity that Genscher wants. How will it look in Germany? Now, if Schmidt says he can't do it -- fine.

S: I can call and tell them that . . .

K: Just tell him I just wanted Schmidt to get the message. I didn't want him to get the wrong idea.

S: I will call him and tell him that on Tuesday you could stop somewhere in Germany.

K: Yeah, but only in that time frame. I think it is the only decent thing to do. And Schmidt is an old friend of mine.

K: No, that is no problem [redacted] B1

S: No, none of that. (reads from article)

K: I made nine trips to China if you want to be correct.

S: Where did we get six? Oh, I see -- you made six visits with Mao. (continues reading from article)

K: No, you cannot ascribe the physical appearance to me.

S: Okay, we will just take that out.

K: Or say you got that from others.

S: Okay, on down -- what about this quote you gave me? "Mao gave me the most cold blooded analysis of the world balance of power that I have ever heard. He analyzed countries and their leaders in terms of power."

K: This I would not do. That is an attack on him.

S: Is it?

K: Just say when speaking of the balance of power that despite his strong ideological convictions he analyzed the balance of power with amazing acuteness.

S: Okay. Then it says Mao's capacity to admire people was severely limited. Is that too much of a knock.

K: Yes. The Chinese don't like you to say anything about their leaders. Don't ascribe any of that to me.

S: But then we say he seemed to admire Richard Nixon.

K: "respect" but don't ascribe that to me.

S: He grilled Kissinger about American politics.

K: I would say he grilled visitors. The less you can ascribe to me the better off I am.

*

S: Okay. Mao was frank that he wanted to see Nixon re-elected and McGovern defeated. Then he did not understand why we pulled out of Vietnam with only a loss of 50,000 men. If Vietnam was a mystery -- Watergate was also one. He thought that any government that allowed such a thing to happen must be soft.

K: But I think on the whole you can bring me in a few times but don't center it around me. It is just too dangerous.

S: Okay. His talk about the Soviets was uncompromising.

K: AGain, don't ascribe that to me.

S: Mao believed that there will be ultimately a world war. The Chinese with their small farms would emerge a dominant power. Mao never talked like an imperialist. He expressed no material vision of China's future. What about this one - - Mao was a divinity - I don't believe he had any personal friends.

K: You can say he was treated live a divinity.

S: Okay. In all the hours of talk he never mentioned his wife.

K: I think you should write this as if its a composite of various views. Because the Chinese may be very nervous right now.

S: Okay. Then in his last meeting with you Mao talked about being called by God. I think we printed that before.

K: We did?

S: Yeah and then you kidded him that if the two ever got together -- Mao and God -- that would be too difficult a combination.

DR: The situation is the same as it was yesterday. I am not a spokesman for Jimmy Carter. I did talk with him and I can tell you that I think there is a good chance things could work out if things develop favorably in Africa. The importance as I see it of having some representative African leaders on board and also you are keepin- inclose touch with some of the Congressional leaders?

HAK: He can be absolutely sure both of those conditions will be met. We will not proceed without full support from African leaders. And we will fully brief the members of Congress you mentioned to me yesterday.

DR: Jimmy Carter will not talk to his staff about it.

Well now they are passing a resolution cancelling it. You probably can get away with it because of the election but next year people are going to ask who is responsible for the high oil prices. I don't see how this can be in the Jewish interest.

C: I want to congratulate you for the superb job you did in South Africa and offer you a couple of suggestions if you want to hear them. Suggestion number one is I think in connection with your briefing the people you ought to make a special point to brief Young, Diggs and Jordan. Make it confidential and off-the-record. Secondly, I know part of your program is that if it doesn't work in southern Rhodesia and the whites have to pull out that there be some method with a trust fund where they can be reimbursed for their property. I hope for the blacks that they will be taken care of.

K: The whole idea of the trust fund is to build up Rhodesia's economy.

C: That point had not come up.

K: Diggs cannot go around slaughtering us.

C: I said you are being irresponsible as hell. This is the first Secretary of State and I have known every one since 1945 and no one had the guts to go and work it out. Here is a guy who goes and tries and you guys better stop politics and if you get Diggs, Young and Jordan, they are the most responsible. Diggs is chairman of the subcommittee. Diggs and Young are very responsible. If you want me to be there I would love to do it. I think the plan is brilliant. Diggs is saying the real problem is they are giving the money to the whites to get out. But what about the blacks.

K: Absolutely untrue.

K: How are you?

A: I am fine. You have been sneaking out for more candlelight dinners with Crosland without me.

K: We were watching the debate together with mounting horror.

A: When he brought in the Vatican and then the eastern Europe thing...

K: The Vatican he could have handled if he had explained properly what Helsinki was. The problem is that he was on the defensive. Carter could have been destroyed. His facts were wrong and his arguments tawdry.

A: Right.

K: The first question was the best speech in our behalf that was made and then instead of rushing into the Defense budget, as his advisors had told him, he had said "What is non-substantive about what Mr. Frankel said?"

A: That was really bad.

K: Look, I am concerned in this mindless place of mine -- to ease pressure on the Labor people I thought it would be a good idea if Rogers briefed Mrs. Thatcher - - to get her off Crosland's back.

A: He did.

K: I thought he would do it after he saw Crosland and now I am afraid they will think we are playing politics because he saw her first.

A: What can I do?

K: I told Crosland I thought Rogers should see Margaret Thatcher and Crosland said that might not be a bad idea but I will talk to Bill about it first. And then I put in a call to Margartet Thatcher to say probably he would call on her. And then I had to leave town and didn't get to talk to her... If you could explain this to Crosland and -- how did the meeting go?

A: didn't feel too good about it. She is adamant that the 5 points be the basis and that they are non-negotiable. She was upset about Crosland's remarks which implied that they were.

K: Rogers is not the toughest man that we have got. Tell me, did he get across the scheme we are following?

A: Yes. And that it was in everybody's interest not to debate but to get them to the conference table.

K: Did he explain what document we are trying to produce at the conference?

A: Yes, but I am not sure she understands. The argument was not in dealing but was in principles. Now she wants Crosland to say the British Government supports the 5 points.

K: He can't say that and maintain his position.

A: If I had been Rogers I wouldn't have felt too comfortable coming out of that meeting.

K: Did Rogers do a good job in explaining it?

A: I would give him a B plus. He went there under very tough circumstances. Labor is having terrible problems. We don't want this to be political and I don't think Thatcher does. She said that would be horrible for the free world.

K: If she blows it up that is what will happen.

A: I know that.

K: Did Rogers get that across to her.

A: I think he tokk did. But there was no sense of commitment out of that meeting and then Mawdling left early.

K: He is no strength.

A: But he pops off and could say he didn't hear the end of it.

K: They are not going to announce anything.

A: Yes, but next Wednesday the government has called for a debate on Rhodesia and after that they are calling for a review of sanctions. Thatcher hopes they can get it on a basis of 3 months instead of per annum so they can get the conference going. She argued that putting off the conference for a week or two doesn't matter. She is afraid that if Crosland and the laborites are not firm enough on standing behind the 5 points it will drive Smith out.

K: I agree with her partly but the time to do that is when the conference is going -- but not now before the conference. She may play into the hands of the radicals.

A: Right. The problem is the debate. I think she needs talking to before then. Unless Bill got something out of the meeting that I didn't. Some nuance that I didn't pick up. Will Bill come back?

K: You will talk to her. Why don't you come here and let me talk to you and then go home again.

A: Ok.

K: We can't do it on the phone.

A: I was planning to come on Monday.

K: You better talk to her before then.

A: When will you talk to Bill again. I think you should get a read out.

K: He is in France but there is no sense in sending him.

A: I would like you to talk to him.

K: I don't care about a commitment. I want her to understand the problem. Let's both think about it and talk in a couple of hours. Will Bill see Crosland?

H: Not from us. I will reinforce what we have already said repeatedly.

K: You are to say nothing.

H: Yes, sir. Everybody understands that.

K: Most of what is said is wrong anyway. I don't know whether it will increase trade. Sombody told Schweid that this means trade will increase with China.

H: Could not have been anyone in the EA Bureau. I will touch base with the China experts in EA and, INR and CIA

H: We are trying to get one. The situation changes every hour.

K: What is the latest.

H: Nothing other than the latest telegram this morning. Students arrested at Ching-Hua University -- about 30. We think there is a high level meeting because there are VIP aircraft arriving which indicates a probable high-level meeting.

K: They did not waste any time after the morning period was over.

H: Right. I think they have been restraining themselves during that time. Now it has blown open. It makes us all think again about their political processes and reliability and the maturity of their government.

A: I have been thinking this over and I will go anywhere, bear any burden, etc. I will come to Washington if you think that is best. I have been thining about -- we have here a lobbying problem. Our immedicate crisis is next Wednesday. There will be others after that. We have to handle this now. We have the conservative back-benchers in arms.

K: Remember they are probably listening in.

A: I was thinking it might be more useful if you could send Schaufele or Wisner over here to do this job. If I come there, get back Sunday night, have to leave again Monday, who is left in charge of getting the job done of talking to the MPs and really to the press.

K: We don't want -- first we cannot do any lobbying that the British Government does not want us to do. Point two, we certainly cannot send people from her to do it.

A: No. But I meant it seems to me that what we want is not a big blow-up next Wednesday.

K: I would like to discuss what I want with you in a way that I cannot do on the telephone.

A: I see.

K: It is clear that I don't want a big blow-up but on the other hand -- the British have to handle their own domestic politicis but I want everybody to understand what the limits are. In other words -- you way you don't want to come.

A: No. I will come. What worries me is I get back here on Sunday and leave again on Monday.

K: There are two solutions. ONe, you come and you don't go back on Monday or on Monday we can still send somebody over there. You come and give me your advice . I cannot put to you the subtleties of this on the phone.

DK: Henry, on the 22nd of October, I am taking agroup of 13 chief executives to Mexico to meet with Portillo. Murphy from General Motors, Sears and Robuck, Arco, and some others. It will be about 13 or 14. I have been working on it since last June and Portillo asked if I would put such a group together. He wanted to make a serious effort to try to get American investments back in Mexico. He was very serious. He has told us that he plans on spending the entire day with us. They have requested no government involvement. Whether he is serious or not only time will tell but some people are beginning to find out about this and I wanted you to know it in case there is any message you would like to get across at the meeting. And I wanted you to know so you won't wonder why I didn't tell you.

K: Well, I think it is a good idea. We have had an opportunity to have a long talk with Lopez Portillo recently. Except you might get across that it is awfully hard to do business with them when there is this constant harrassment publically. He has to chang the tone a little bit.

DK: I think he already knows that. He has also asked me to put put together a list of people in the business and academic communities for the inauguration.

K: Do you want us to have our Ambassador alerted?

DK: I would just as soon not. I think the less information that is out about it the better. But I leave it up to you. Once it gets into that -- you sending communications down there -- then too many people know about it.

K: Your Grace.

S: Your Worship. How are you?

K: Pretty good. We are having an African strategy meeting and I want to get your latest input. I know you are in a tough spot. We have a lousy connection. I can hardly hear you.

S: I can't hear you very well.

K: They probably put it in via London to let the British get a look. I once called Crosland from Zurich and they put it through Washington and it was one of the times I got some points with Crosland.

(hangs up & call is replaced)

K: I know the Africans also are telling you we ought to put these things forward more specifically.

S: Yes.

K: I think that is a trick.

S: So do I.

K: I think it is going along strangely enough quite well. We have an intelligence report of which I asked them to send you a text that shows that since this comes from a SWAPO official and since it is not written by an ambassador who knows anything about our proposal so it doesn't have any English. Our people might have known it hurt me. I think we have to -- the Zambian foreign minister understands; Salim cannot fail to understand this. Nyerere understands us. Nyerere never responded to my letter from which I am assuming he is working to implement it. Kaunda understands it. We have told the Angolans what we are doing. I have told Waldheim. It is one of the worst kept secrets I have. I think we have to sit tight and if necessary veto.

S: There are only two things that bother me. One is that there is actually a lack of information on the part of the SWAPO people that are here. That doesn't mean Waldheim doesn't know.

K: That is the problem -- even that I have trouble believing. Because the Zambians know; the Angolans know; the Tanzanians know.

S: No, he doesn't.

K: If he has seen my letter to Nyerere, he knows.

S: Right but Nyerere will not let him really tell the SWAPO people because Nyerere is playing this very careful game of where he is insisting that either we or the South Africans make some statement here which puts the ball in our court which is where it should not be. We are not going to make any statement.

K: My worry is that if they don't want to put it up to SWAPO, why should we.

S: I agree.
great
K: The/danger is that if we put it up we will find ourselves in the same position as Rhodesia and I am willing to do this eventually when the Rhodesians convene the conference and it is under way before I ling the two things together.

S: In view of the facts of what I find here is what I have been doing over and over again. I have been saying Nkomo is not here. How are you going to do anything dramatically or what you want to do and expect us to help unless or until he will return and then if he so desires see the Secretary.

K: That is fine with me. The only thing I do not want is a tramatic confrontation where he comes out and says I have told the Secretary the ideas are unacceptable. My strategy which is not heroic is to keep the thing sufficiently confused to exhaust them a bit and since they are all such tough operators I am beginning to think they understand this.

S: I think some of them do and some do not.

K: Right but the key ones do. I also tell you now I am going to keep it confused until somebody 's nerves go. Maybe it will be mine.

S: No it won't.

K: I want the Rhodesian conference well launched. Because suppose they come up with an interim government in Rhodesia. I think we are then home free on Namibia. Then every African will know this is the road to power. Elementary if you look at that intelligence report. If this is correct and I find it almost impossible to conceive that it was invented because it had to come from somebody who did not know the debate here. If it is correct, SWAPO has hurt this and is moving in our direction.

S: I will get that.

K: I have the strong impression that Kaunda is working on these guys.

S: The other caveat I want to put to you is this. When it comes down to brass tacks, if there is a veto, there is a veto. Tactically it doesn't bother me at all. But I want you to know I think we ought to give you a very thorough analyzing of what that means to us at the UN because whether we like it or not on the Namibia thing the UN is involved. It is different on Rhodesia.

K: Yes.

S: Playing these guys here is a different game than playing Kaunda and Nyerere and company. I want you to know before it gets down to that what we believe this would do personality wise and substantive wise when that event comes.

K: You ought to send it in a way it doesn't get leaked. I know it would not be you. As a letter to me or hand-delivered memo.

S: Are you going to be there Monday?

K: Yes. I will be in New York Tuesday.

S: I may come down Monday and if I do I would like to see you.

K: And if not I will see you in New York Tuesday.

S: Okay.

K: If there is something I ought to do on Tuesday, for example talk to Salim. .

S: Okay. Thank you.

K: There was one other thing. If it comes to me I will call you back.

S: Do give orders to get that intelligence thing to me.

K: That will come right away.

S: Thanks, boss.

K: Right.

(a few minutes later)

K: I am seeing that [redacted] tonight and I am doing it only because I think he is [redacted] in a key position. Somebody tells me you feel he has not been helpful? B1 B1

S: He is helpful in doing what you are trying to do which is confuse. That is all right. I want you to be alerted to one thing.

*

K: What is he saying?

S: He came up here yesterday and he is a flambouyant character as you may know.

K: Yes. Be easy because he calls me by my first name.

S: You are running the world.

K: I have met him for an hour and we have become great friends.

S: He is now a kingpin and is throwing his weight around.

K: They will all get mad at him.

S: Our own friends on the Security Council are really irritated by this but even more important he now is having a special meeting with the Africans this morning, which is exactly what you want and which will be fine if they believe him.

K: He is doing my work. I figure they will not believe him but I figure it cannot do us any harm.

S: No. At the present time it cannot. Where it can is if he really turns off our friends on the Security Council.

K: I have not asked him to do anything. I have told him what is available.

S: I understand that thoroughly and got the idea right away. I said yesterday afternoon when the Britishman was causing me trouble I said look. All it is doing is causing confusion and the more the better.

K: It is confusion but I also am getting Africa to put forward -- althought that is a courteous title for the [redacted] B1
basically our program, if he understands it.

S: Just be wary of this character because we have had all kinds of problems with him in the past and secondly, remember all our friends don't trust him a foot.

K: Remember the saying of Metternich. The easiest people to deal with are vane people. The only ones harder to deal with are perfect or honest ones.

S: I am not surprised.

K: He admits he misrepresented it. He took poetic license because he said the gap between our position and what he wants was so small. He thought he could take the liberty to do this. Do you think there is total confusion in the instructions?

S: As far as we can make out there is. Either he or his representative here -- his name is [redacted] have you met him? B1

K: Is he the Ambassador here in Washington? No he is the one you made the comments in rebuttal on, right?

S: Yes. [redacted] I thought that was the best comment. Either he or Walter is to appear before the African meeting this morning. At that time he will tell them of these five points that he made yesterday. He will say there is some difference from what he indicated with regard to political prisoners. B1

K: Well that is alright. He never told him in a straight fashion that the South Africans would be represented there. Reinhardt told them that the South Africans would be in Geneva for negotiations. That is all.

S: I know what you did. I worry about this guy. He said to me last night that the ball is in our court because we have to make an announcement. Reinhardt has told me about your instructions to him.

K: The worst judgment is for the U.S. to put forward a proposal and give the Africans an opportunity to jump all over it.

S: Right.

K: All the intelligence we have says Nyerere is trying to move this thing.

S: Well...

K: Whether he is or not, he hasn't rejected anything. Nor has Kuanda.

S: As I understand it you told Reinhardt to tell Walter that there would be no statement until there was an agreement with the Africans in New York as to the text of the statement.

K: I don't want to offend you with respect to your colleagues, but the group I am least eager to negotiate with is those in New York. So he will not make a statement until I get the agreement of the Africans in New York.

S: Reinhardt told them it was the Africans in New York.

K: Then he misunderstood me.

S: Then I suggest...

K: Can you get that straightened out.

S: I think it would be better if he called Walter. He won't be in New York for long.

K: He is changing his mind about going back -- he might be here until this afternoon. I -- say I am not interested in negotiating this with the delegates in New York -- I am trying to get it out of New York and into responsible hands.

S: That is what I thought.

K: If the Africans tell me what they want then I will make a statement.

S: What threw me off was his statement.

K: I think he misunderstood that. Just a minute Jack is here -- let me ask him. (Speaks to Reinhardt) No, Jack says Walter was supposed to go back to the permreps to give them that news, but not to negotiate with them. Couldn't you just try to run him down and tell him this.

S: I will. O.K.

K: O.K. I never told you it wouldn't be complicated.

S: When you have this many people involved it is a mess -- just keep us confused -- it is the best thing you can do.

K: As long as you are not confused -- you know everything we know.

S: See you Monday.

K: It is inconceivable.

A: I know but I thought I would use all my female wiles and soothe him but I guess I didn't do so good.

A: I don't see why you have to call Callaghan. I would call Crosland.

A: From Duff. We called our Embassy to find out whether Thatcher . . .

K: You better not see Thatcher again.

A: Well, remember I left it with you that I would see whether Thatcher would be available. But I was trying to find out what their whereabouts would be Sunday and Monday in case you wanted me to see them. Now the other thing I wanted to tell you is that the President's asked to see me here on Monday but I know he will understand if you decide for me to go back there.

L: How was your trip?

K: It was a tremendous success in Boston and I have talked to the Business Council before and it was also very, very good.

L: The Chinese were extremely friendly. They made a point. This was the first time since the mourning and they have a new chef and the guy next to me started talking about Chou en Lai.

K: Really.

L: Yes. The Ambassador made some suggestions he may be leaving next spring. He was saying he has been there four years.

K: You notice they hit us in the charts about the fallout.

L: It is not in the charts. It is in Washington.

K: They delivered a second message from Peking.

L: Today?

L: I think it is a good idea.

K: November 1 or the Friday before the election and tell them where I think this thing can go.

L: Tell them what you see for . . .

K: Yes.

L: It was the old mood for the first time in some time.

L: They made an effort and we reworked it. I realize it is too long and it was not lack of effort.

K: I am not saying it was a lack of effort. It should have a little touch of humor. That bothers me most. At the concert all you can give in two or three minutes is give a little uplift.

L: I agree they are both too heavy. Particularly for a dinner audience.

K: At the dinner the audience will want to feel they heard something significant, even if we restate what we've said hundreds of times what we feel the world is like. To say the UN . . . . on this, it is too heavy.

L: There is a section on that.

K: It is burried in paragraphs of praise.

L: We did try some new twist on that.

K: I have the following problem. You remember when you were under secretary the North Koreans were driving us crazy through David Rockefeller. They used to have some contact with us.

S: Yes.

K: We cannot have any official contact with them but wondered whether David Rockefeller invited them to his house and he would have you there. He wondered just if you would just listen to what he had to say.

S: Absolutely. I would give you a report just as I did when I was under secretary. I would get any guidance.

K: That is not what I want you to have.

S: I would go in cold in other words.

K: I will talk to you.

S: Fine. When would it be?

K: I will tell David to get in touch with you.

S: Okay.

K: I will tell David if this gets out I will disavow it. He did it on his own.

M: Does he have you on the point of conceding that the black leaders cleared their demands.

I don't want to be too precise.
K: /I have told you that we have given him our judgment of what we thought he could add. At any rate, I don't think it would really be a very fruitful thing to pursue -- to go into this as a legal issue.

M: There was a Reuters item earlier today in which they were posing it as the crux of the dispute that would wreck the conference.

K: I don't believe that. Nothing I have seen of the discussions sustains this.

M: It also says that when this was presented to the black leaders they raised no objections to it.

K: Well, I don't want to go any further because I gave you the correct version earlier. They can nit pick it to death now.

M: I am going to stick primarily to what you said on Face the Nation.

K: Okay, I just wanted to tell you that reading over the cable sustains what I have said.

K: I understand you want to be straightened out on Africa.

M: A little bit.

K: You are determined to make hash out of it.

M: We are determined to keep it in balance if we can.

K: This is on deep background. O.K.?

M: Yes.

K: O.K.

M: It is the Smith statement about the message he is evidently holding it in the belief that he can use it as a defensive instrument.

K: For your understanding -- the 5 points in Pretoria did not include the white chairman and the two ministers. He said when you go out there do your best. I did. It was my impression that it had possibilities. As you can judge yourself from what Nyerer said. He did not say unaceptable proposals.

M: Said he would not go into details.

K: O.K. Then we had the choice of telling Smith either put forth the five points from Pretoria or to tell him to put in what he wanted. Our concern if we did not ask him to put it in and he surfaced them at the Conference and said we had told him to surface it at the Conference there would be all sorts of stories of secret deals. You see, so we told him to put it in.

M: Right.

UNITED STATES DEPARTMENT OF STATE

K: That is the long and short of it.

M: What he says is the message said that the points had been conceded and cleared.

K: That goes much too far. Although given the pressure under which he was working he might well have thought as we thought that they might well be acceptable and I am telling you for your guidance it may well turn out that they will be acceptable with minor modifications.

M: Right. I follow that. What I, without seeing the message of course, wonder -- I have no way nor does anyone.

K: I have not looked at the message.

M: I have no way of knowing if it will be embarrassing.

K: I have not looked at the message b ut I doubt it. Not in the context of all that has happened. These messages were not drafted on the basis of legal documents but on the basis of conversations that we had. I would have to look at the messages. He cannot derive a contract from them. That is no way to conduct a negotiation anyway.

M: I don't know how it is turning. It may be that.

K: It looks better on the basis of the consultations by far than tl the public statement.

M: It is simply at this time the points keep coming up and the office asked me to resolve it. I said their is no way. It is a difference of interpretation that is being put on a message. He says it was cleared. The Secretary says on Face the Nation....

K: I would have to say Murry for your guidance it was certainly greater cohersion on the part of Kaunda and Nyerere as I have publicly stated. It does not do me any good to get this into a debate with them on what they have accepted if they don't want to back it up. I do not want to call them liers. Moreover they could not speak for the other two.

M: I am aware of that. Therefore the language could come into question as to whether we had no specific objection to that or what has to be taken up with the others.

K: They don't deal in that position.

M: The point is, is the message in that position that if it blows and he presents it does he then have you in a position where l he says you are holding back on the message.

K: I doubt it seriously. I have to look at the message. I have never considered it that way. I will look at the message.

M: You have no intention of putting out the message.

K: No. Now that message was sent on the Thursday before the speech and at that time he had already pretty much accepted the hold five points and my real concern was do I get him to put these two ministries into his message or to put it forward at the conference.

M: I follow that.

K: Given all the histories that we go through with secret agreements here I decided to let him put it in his five points. On balance that will not work out tactically so badly. It gives everyone something to argue about.

M: Having decided to do that does he have you over a barrel on that point.

K: I doubt it.

M: We are not making a major issue out of it but simply trying...

K: Frankly, I have not looked at the message. None of my associates thought we were making a legal commitment or giving a legal assurance . We were giving our judgment of the state of discussions.

K: That is the essence that we wanted to explain here as well as we could. I appreciate it.

M: O.K., Murry. Thank you.

K: On that Soviet non-use of force proposal I am not very clear what it is.

S: It is a resolution which is coming up for debate in the first committee which in effect would endorse it but proposes some kind of a polling by the Secretary General next year but phrased in a way it predetermines the outcome. We have all sorts of problems because of the implicit mention of the Brezhnev document so it is pretty clear we would want to try to change it or kill it and there is a committee of contact.

K: Scranton is seeing the Russians this afternoon.

S: Bennett called me after Scranton talked with you.

K: I told him I did not want to make a judgment until I talked with you.

S: In the first place they have the vote no matter what. We have to be careful and not believe too much what the Russians are saying which is they would prefer to do it jointly with us because they will do it without us since they have 95% of the votes. He ought to make clear we have strong reservations on the text and we cannot support it as it is now but if appropriate amendments were made, we would not object having a study next year. That way we have a chance to have some amendments and we can abstain and we can keep the Europeans in mind and the Chinese who are extremely opposed to it.

K: I would like to be on the side of those opposing it.

S: I told him to be clear to oppose this text right now and unless there is sudden changes in it, we would have to oppose it. Hold open what we would and would not do. I guess that is the line he will take.

R: How are you?

K: Okay. Only four more days.

R: I don't think we will make it.

K: And our long national nightmare will be over.

R: That was our friend, wasn't it. Mr. Ford, our long national nightmare. Is there anything we can do about the British? Can't we think in revolutionary terms about them. We could let them join our empire.

K: I will tell you we can on November 3. And I think it is under control until then. Don't ascribe this to me but I don't know what can be done but I think it can not be done as a purely economic matter and it is not a matter of informing them. It is a question of maintaining its self confidence because we will realize how important they are to us phychologically. Even now in the midst of their crisis on Africa they are if we don't agree with everything they do a tower of strength.

R: One of the great tragedies of our time. Chris_____ once said one of our great misjudgments at the end of the war was we did not realize the whole system that rested on the western powers had been broken.

K: Yes.

R: I did not understand when C_____ came into B_____ and said we cannot carry on now in Greece and Turkey.

K: That is true. The fact we thought we could mediate between the British empire and the Soviet Union.

R: It is fascinating to look back over this period to realize that in these thirty-two years since Roosevelt's last term both bodies have been in the White House exactly 16 years. I think of it as being a period of Democrats which it hasn't.

K: I have often wondered whether the tragedy was not the Truman victory in '48. If Dewey had won--even though I prefer Truman--the Republicans really have not had a President who was a Republican. They had a war hero and an oddball. Nobody has made the Republican party a responsible one of government. Even when they do they behave like the opposition.

R: This is strange. They have had these people in office and have done nothing about bringing up young people. They don't know how to act.

K: Eisenhower acted as above; Nixon separated himself from the party in every campaign so they have had the White House and never really the government.

R: That is right. I have one point after this thing if over next week. I would like to do a piece on your thoughts about the world as it has changed 35 years after Pearl Harbor which comes up shortly after the election.

K: Why don't we have lunch.

R: Yes, let's do.

K: It is an interesting thing to think about.

R: Have you got any feeling about this or are you as confused as all the rest of us.

K: I have done some thinking about it but I am sure that -- it certainly is a good topic.

R: I have switched topics on you. About the election.

K: My head tells me it is Carter -- my gut tells me we may all be surprised but I don't know why I say this. Only because Carter should be much further ahead.

R: But people hate to vote against their President.

K: That is why I think when they finally get into the booths they may not vote for Carter.

R: I think that is quite possible. I would bet it the other way.

K: If I had to bet it, I would too. Have you been around the country?

R: Yes, but it is a different country. I could remember when the old populous rhetoric worked and for a simple reason. They could go around comforting the afflicted and it worked because a majority of the people were not all well off. Now whatever you say a majority of the people are fairly well off. They don't particularly give a damn about the people left behind.

K: Yes.

R: They act like all important people.

K: I don't know whether Carter comes across to the people as genuine.

R: That is the problem. He is unfamiliar. Even many in the South I find. Well, we will see.

K: Let's get together next week.

R: I will call you as soon as it is over and we will chat about that thing.

S: Depending upon what you think the ultimate objection of the Soviet Union is in this other than propaganda, we are -- due to Tap Bennett primarily who is standing here -- relatively well off. We have got quite a number of abstentions, particularly from countries that count. We have China voting against.

K: Are you saying he is standing well or he is doing well.

S: Relatively speaking, I think it is in pretty good shape. We are putting in a practical campaign but we are talking to a number of our Latins and Africans.

K: To maximize the abstentions not to vote against.

S: That is it exactly.

K: You should make a brief explanatory statement that as it stands now we are not for the resolution but we do not oppose the study of it.

F: UPI has -- from some congressional source that legislative group leaving Friday doesn't have your permission to go to Moscow.

K: (Talking to someone in his office) Have we forbidden executive people to come with that commission through Eastern Europe? Yes. I would just let them go to Western Europe.

F: Fine, I appreciate you calling me right back.

F: I don't want to attack you.

K: But Mr. Chairman, I really have high regard for you but to be accused of colluding with the Soviets to keep you from doing your work the day before an election where we have been accused of being soft in Eastern Europe. , . . .

F: I understand thoroughly and I apologize for that. I am not attacking you, I am not in anyway trying to influence the election.

K: Well, when I looked into it, our people weren't very smart either. They led you to believe one thing . . .

F: See, I thought it was game playing. We thought the release was moderate but that was wrong. But then when I got jumped on with both feet -- I thought I am really not playing games.

K: I was very much impressed with our breakfast. My concern is that you can have anybody you want as an advisor but if they sit on the committee and they are people who also have to deal with foreign governments . . .

F: I hear you. There is absolutely no question, reservation, or doubt in my mind about the need for you to be able to instruct the appointees anyway you want. We don't want to get them into a bind. We do need their help and advice. It is not going to be easy.

K: You can count on that.

F: Here is the thing that I see we can do. The action we are taking is not an official meeting in any sense requiring a vote. Nor is it official in a sense of a report to any government.

K: But I will bet that a lot of these governments will consider it provocative.

F: I don't know why. We are not going to be holding meetings in their towns.

K: Well, what do you want us to do?

F: What I am simply suggesting is that the whole context of this trip is -- I think -- fairly low key and fairly legitimate.

K: And I am strongly supporting the trip.

F: I am asking you to consider that executive people can go ahead and go on and act under any instructions you give them.

K: Suppose they went to advise you but not go to any meetings?

F: Let's say I go to Romania and the congressional guys decide they want to meet with the high level people in the Romanian government. If there is an executive commissioner, he can decide whether he should go to the meeting.

K: I just basically don't want our guys to go to any meeting in any country where testimony will be taken. I don't mind anybody going along with you giving advice.

F: Let's say I get lucky and I get to go to Moscow -- which I doubt -- well obviously I would like to be able to meet with high officials in the Russian government to discuss everything. Well, I think it would be extremely useful if I went to those meetings -- if the executive commissioner were with me. We are not planning formal public meetings or hearings.

K: My instinct would be that it would be better for somebody from the Embassy to go along as a notetaker. If the other guy goes, who dies the foreign government think he is or who he represents.

F: Well, why don't they both go if there would be any doubt about it.

K: I would have no hesitation of sending the Ambassador along.

F: Now we are talking the same language.

K: Everybody knows the Ambassador is under us and not under you. If we set this precedent, the next thing I know Scoop Jackson is going to hold SALT negotiations in Moscow.

F: I got that. I think that just psychologically and perhaps from a useful standpoint, I think there is some benefit in them going along under whatever instructions you would give them.

K: My inclination is to say they should go with you as advisors. They should not participate in the meetings but they are available to you for advice and consultation. The Ambassador goes to any meetings with you.

F: That would be extremely useful to us. They would then be as fully informed as the rest of us.

K: Well, that is my strong inclination. Let me sleep on it.

F: That would be fine. I am not issuing any statements to the press at all.

K: No, and I will put out a statement tomorrow saying that you and I have talked and that as always we have had a good meeting of the minds.

F: I have not told the press at all that I am talking with you. All I am saying is that we have had nothing but the finest cooperation and and it just caught me by surprise at the last minute. There is no question in my mind that you ought to have the right to instruct the commissioners if you want to.

K: When are you leaving?

F: Thursday morning bright and early.

K: Why don't I talk to you tomorrow afternoon because I am going to be in New York tonight and I will be back around noon tomorrow. How does it look to you?

F: I don't know. It is going to be so damn close. I think Carter is going to carry Florida. The weather's been good -- that should be in Carter's favor. I have never seen an election like this. I have about concluded that all of the uncertain, questionable people who have reservations are probably Carter people. The Ford people have no touble making up their minds. It could be a big swing. Either way, I am just going to be happy it is over.

K: And we will be friends as far as I am concerned.

F: I don't think anybody could come close to doing what you have done.

K: Are you going there?

MK: (His wife) and I have been there almost ten years and I thought I would try it. But I thought I don't want to surprise him.

K: We may not go. It depends a little on the transition. I am going to take a few months or a week off after January 20.

MK: You should. You could certainly use a little bit of a rest.

K: How is your book coming?

MK: The mystery is coming along very well. The best parts always relate between the Secretary of State and this extraordinary television reporter.

K: I saw your publisher and he thinks it is terrific.

MK: Marshal and Porter?

K: I forget who it is. Somebody who said he is head of Simon and Shuster.

MK: You were very much in my mind through Tuesday evening of last week and I told you once at the birthday party something that is true and no matter who replaces you, it cannot be the same and you were in this job in a fairly unique position for a reporter.

K: I am touched. I considered you and Bernie good friends as far as the adversary relationship permits it and I will continue to consider it that.

MK: I learned a lot and from that if someone is wise or foolish enough to put me into a government job, what I learned will be put to use.

K: I have always believed you and Ted and some of the others ought to spend a year or two in the government to round your perspectives.

MK: I was at the State Department for two years in '56 in Moscow at the Embassy.

K: If the new people ask my opinion and you don't prohibit it, will you permit me to mention you as a possibility?

MK: Yes.

K: They may not have enough imagination to think of it themselves.

MK: You know my area of interest and passion. The fundamental thing is to carry on a policy that gives Israel the best chance of surviving and maintains a strong, growing, viable American position in the Arab world. It has been your position.

K: And which reduced the Soviet influence to do mischief.

MK: Since Tuesday they are suddenly getting very cosy. They feel there is an opportunity for them.

K: Oh, yes. There is a hiatus now. I think Carter has to move quickly to make clear that he is in charge in the Middle East.

MK: I hope he does because there is too much sweat and too many miles that went into getting us where we are now. We had a line in the book that we put in as a joke that when Kissinger leaves he is going to set up an international corporation called Kissinger, Inc. and whenever a government needed a negotiator, it would turn to Kissinger, Inc.

K: (Laughter)

MK: Well, will you allow several of us to have a quiet dinner for you and Nancy?

K: I would love it.

MK: I would like to proceed on that and I will check with Jane to see what evening you might be free.

S: I would very much like to see you to do a farewell interview piece.

K: Barry, that is what I have been trying to avoid. I don't think it is a good idea for me from a lame duck status to say either perspectives for my successors or to evaluate my own policy.

S: I understand and agree with you in the first point and half on the second but I think we could restrict it and narrow it to the sort of personal things that would not have any problem. I know quite what you are talking about. Such things as are you going to write a book -- where do you plan to live. If you look back, that sort of gets into the second thing.

K: My problem about the past is this. As long as I was an active Secretary of State I had responsibility to mobolize those points of my policy. Now my policy is a matter of public record. Whether I say it was good or bad doesn't add anything to it and is self-serving. I have turned down 15 interview requests to do retrospectives. Whether I can talk to you about what my plans are -- that I am willing to consider.

S: Good. I agree with you but I think interview by somebody who knew and understands what you are saying could still record it without saying good or bad. I think we could say what is important and pressing. Personal is what I am interested in.

K: Personal I would consider, but the other I would not do. Not talking to the press is not my more normal attitude.

S: No, I understand. Perhaps we can do the personal.

K: Let me think about that.

S: Would you have me call back in a few days?

K: It is not true.

MK: You didn't meet with them on Monday?

We keep getting enormous amounts of intelligence reports that the Israelis have been meeting with the POL.[b7] Usual they are in Paris. I don't want to have a denial that they met in Paris. The report sometimes concerns semi-private Israelis like _____, the new Dir. General. We have now had it from other sources. Secondly, I was told by Sen. Javits that his office had been approached by two PLO representatives who claimed meeting with Gen. Pellet somewhere. late on original

B: Mr. Secretary, I will of course check this but I give you one thing which I do know. Four Israelis belonging to the left wing -- one who is Gen. Pellet have apparently met with some PLO people in Paris. The Knesset is demanding that they be prosecuted according to the law and I have seen an announcement saying that the legal problem will be checked. Otherwise if there is no legal basis on which one can prosecute they will not be prosecuted. This I know. This is what you have just mentioned Sen. Javits said. It is true that Pellet who is an Arabist-- for the past five or six years has been meeting with four people who have met them.

K: O.K. That is good to know and I take it this was not in any way authorized by the Government.

B: Not at all. The Govt. has strongly condemned it and went out of its way and as I said they are checking to see if it is contrary to any law.

K: Has there been any other contact.

B: Not as far as I know but I will make sure and I will ask very explicitly. I doubt it very much indeed.

He sent what he got and he has a confidential cable which Stoessel reports to State on my visit. He's got a memo which was circulated around the State Department saying that I haven't looked after US interests and I have only been interested in myself and we just can't have things like that that are not being controlled by the Department. Listen, I don't give a damn about this because I have had so many stories one more doesn't hurt, but before you leave that organization if there is some gd way this can be used. So many business people are not going near embassies because of these cables. Up until Stoessel I always told the embassy what I was doing but I had an understanding thatit would not be sent in cables. I thought I had an understanding with Stoessel but he quoted one part of the conversation that he shouldn't have put in the cable. If we are going to expect the embassies to blend with the business community, we have got to have some way that this can be controlled.

K: I agree with you completely.

K: Have you gotten Bar-On?

A: Yes.

K: What did he want?

A: He had a reply on something you had given him whether they had information on these reports between the PLO and Israelis. He sent over a piece of paper which he got from Jerusalem which I was going to attach and sent up to you in a memo. I gave him your message on the other and he said he would convey it.

K: I think it is an outrage.

A: Toon says the foreign minister denies Allon said it. But we have Toon's report which quotes him.

K: Yes. Okay.

A: It is some confusion.

K: I am worndering if we should send Toon in to see Rabin. One, to protest against Allon's behavior. Second, to point that what we agreed to is exactly what we agreed to in May. Third, with the debate on Syria, it gives us a much better platform to resist pressures on Israel and fourth, this is unacceptable behavior and I am calling Toon back for consultations.

D: Do we want to build it up to that big a thing — calling Toon back? This is a typical Allon reaction.

K: We kept them closely informed and we had nothing from them. Would you draft a cable like that. Put in the Toon recall and I may take that out. Would you send it up?

K: You had no inclination?

M: We couldn't believe it.

K: Well, it is a great loss to the country.

M: One of the nicest things that happened to Lorrie and me when we were on the road, President Nixon called us one morning and we had a very nice long visit saying much the same thing.

K: Well, I want you to know that among the contacts I have had in Washington that I cherish most, is yours. It is an unbelievable loss to the nation.

M: You are great to sy that. Lorrie remarked when we were flying back here on Friday that you know the really nice thing about this is we are getting the flowers while we can still smell them. But it takes a great philosopher to look at it like that.

K: What are you going to do now?

M: I don't know what I am going to do. I know that I am going to read a few books for a change. Dean Rusk and I had a little chat but I don't know how hard up they are. You know with some of these young upstarts they have. I desperately hope that he can work at it. But we will keep our fingers crossed. I will have to look around for something.

K: I don't know what it is that I could do for you but if you have any idea where a word from me might be hlepful, I hope that you will consider that you are doing me a favor if you let me do it.

M: Well, as I said, I've mentioned it to Dean Rusk -- maybe the UN.

K: If there is a chance, I will certainly mention it -- I am going down there on Friday. But I will certainly express my views.

M: I would be very appreciative of that. But I must say I still feel very uneasy about your not being at the helm there.

K: Well, many thanks.

M: And thank you very much.

K: I hope we stay in touch with each other. We were allies for a long time and as far as I am concerned, I hope we will stay that way.

He feels that rather than going to UNESCO every time and fight defensive battles on specific issues whether we couldn't put forward at the conference at least as an American decision something which would go to the general assembly so there is a general rule adopted at the end of the conference which ends these battles and we should do these in other instances. I wonder when I am through you can see him and he can see Reinhardt.

L: Sure.

K: I think it would be good if we made a strong case for it.

L: I would be delighted.

K: Why don't you come up in ten minutes and take him off. And work out something with Reinhardt that he could take down with him Friday with a speech in which we say we have gone through six weeks of debate on issues which should not have been here to begin with. How can we get a constructive position. It might help the Africans who don't have to vote every time.

L: Right. We have been pushing something in IO. The occupied issue is being delat with in UNESCO simultaneously. The resolution they are trying to adopt is unacceptable in light of a lot of things besides the basic position we took in New York. We are going to want to vote and be against it. They are trying to condemn Israel before we see a mission there.

K: I think we should oppose it. First, it is not proper for UNESCO and second, on the merits.

S: I will indeed. I did tell him about the Allon statement.

K: They wanted us to stand up on UNDOF and on the general assembly debate and when we make one tactical move, they carry on as if we had sold out Jerusalem.

S: You don't need to tell it to me. He knows this. Hertzog is different. He says he reported to the Israelis over a week ago that this was going to happen and that the United States could do nothing else because of the Egyptians who were going to give in on all the language. He says this report came out of Bar-On xxx at the DCM in Washington. The reason the Israelis were not alerted on what we were doing is Dinitz met with the Cabinet and said don't worry -- the United States has not changed and the United States is not going to do this.

K: It is an outrage.

S: I thought you ought to know this because if you are dealing with Dinitz on this subject . . . . .

We thought maybe right after the election you would do something. The President asked me to tell you if we don't get a reply within the next two days we will have to make a public statement and we would have to have contact with you here only at the DCM level and prevent any further contact with you. I had to do this.

D: Why me.

K: Because we cannot have an ambassador in Moscow—why should the Soviet Union have an ambassador here.

D: I don't know what they are doing.

K: It is not dimplomatic custom for a — you have nothing against Toon except that there are newspaper stories that he is opposed.

D: You understand that perfectly well. It is not for me to say. They didn't answer so it is definitely a sign that they obviously are not very happy about it.

K: Gromyko told me when he was here there would be no problem — it would happen fairly soon. I don't want to have a public rumpus with the Soviet Union in the last two months in office but we cannot accept the position that when we send somebody as Ambassador to the Soviet Union that agrement is simply withheld for 6 weeks without any word at all. Nearly two months now.

D: I understand that.

K: How would you react if you sent somebody over here.

D: You say there may be another one. I am sure about it. It is a question about the administration, as you are now presenting your case. It has nothing to do with the Secretary of State or with the President or the Administration. As I understand the situation it is a question of diplomacy.

He said that the Soviet Ambassador acting under instructions came to see him and told him that the Egyptian For. Min. which would have been about 10 days go from now, was in Bulgaria and met with Gromyko and made two points. 1. He apologized for the UAR's past behavior and added they had been beseiged by you. He did not put much weight on it.

K: Does he believe it.

M: He believes it in effect it is Sadat's duplicity approach to foreign policy. He doesn't think the UAR is moving into strong relations.

K: He believes he actually said that?

M: He believes it. Fahmy said that was right. To me it is important because I have seen him since. Sadat's power is limited in dealing with his own internal and external problems. We are having a hell of a problem with him. That is really the only reason for passing it own to you. I think it is a sign of weakness.

K: Listen, Bob, I will tell you one thing, no matter how much you prepare yourself--I don't know whether you went through it, but when you finally separate yourself it is sort of a shock but I was in that state of shock until we made that UN vote and the Jews started unleashing on me. The Pentagon Papers were to allow scholars to look over the past and see what the lessons were and the stupied NY Times and the rest have drown the wrong conclusions.

K: Because they were using it for political reasons.

M: Or to sell newspapers.

K: I don't know whether it will happen but when I write my recollections of that period I will have to go back to '67. Even if I write about 69. I will have to have a flashback to "67 which you handled practically alone.

M: I don't know whether I told you but in the beginning of that, someday I will tell you how that happened. Because I was alone. The rest of the people were not interested in it. They thought it was not worth pursuing.

D: They are at this point. That is true. Even is he gets to see Allon tomorrow they have made such an issue of it and with Allon making another statement, there is no excuse for another statement. They said it over and over again. They are prolonging it. I don't know what the purpose is unless to signal the new administration that they cannot be handled with impunity. It is counter productive.

K: And they know our diplomacy.

D: Which is the reason Allon has not been willing to see Toon. I think that is reason in itself not to see Yaacobi as well as seeing Dinitz. It makes more graphic our own feeling.

K: What is the explanation in your view for his making and continuing to make these statements?

D: I think there are probably three. One, he has made a public statement before a Cabinet committee and he probably was asked and he had to say something, and he said the same thing and it was under circumstances that required him to say something. That is just a guess until we get the cable. Two, I think they are

trying to make a point partly for the new administration that they react very strongly when we do things that they do not like. It is a typical Israeli way of lashing back. Third, they do as you mentioned in referring back to their reaction to the UNDOF last year, this is the way Israel reacts. They get overwrought and it takes a week for them to calm down. All three of them would be the reason.

K: Yes.

D: I think we have to be displeased. I will tell the embassy you cannot see Yaacobi and Dinitz this afternoon. I think that is the right response and I think that is what Toon thinks we should do.

K: Okay.

D: And we will wait until . . .

K: You will take care of calling the embassy and saying unfortunately my schedule does not permit me to see him.

The Panamanian President of the Council tried to find out some time ago but they gave him a dilatory answer and he is dealing but has not gotten the final answer. D: I think that is appropriate.

D: That puzzles me too. He may not have. It was a bad thing to do.

K: Will you explain all of this to Toon?

D: Yes. I will send him a cable.

K: Tell him he should not emphasize at his meeting with Rabin he is not too polite.

D: Okay.

K: You see what I mean?

D: Yes.

K: Okay.

2:40 pm

K: Have you seen that Allon statement?

D: Yes, I have. It came a while ago. It is more amazing than his previous statements.

K: His statement is that this resolution was worse than the May resolution. Is there any possible basis for that?

D: The only one is this — the May one did not contain any reference to Jerusalem. This one did which was in agreement with our long-standing position on the problem and consequently we were able to go along with it. From the Israeli point of view it would be something of a negative factor. It doesn't alter it.

K: Will you do additional instructions to Toon for when he sees Rabin to add the strongest protest to the characterization as weak as if we owed them something.

D: Right. It would be useful to make the point to Rabin who has not before been a party to these complaints that what we did in New York does not have the effect of sticking the irresponsible elements in the Arab world. Quite the contrary and we consider that to be a total misinterpretation of the political

K: I doubt it. I don't see how he can.

Kalb: You have not talked with him about it.

K: No.

Kalb: It would be almost too fast.

K: If it had been somebody totally new but most of these governments know him in one way or another.

Kalb: I had a private feeling when the idea came up, a lot of my colleagues got excited but there was one thing that gnawed at me. That was the sense I don't think you should look like the Hirak of international diplomacy.

K: It should not look like my successor needs me.

Kalb: That is why I think Vance is a good selection and your judgment is excellent. I thank you. I am glad you had a good time in Mexico. Bernie told me he got a word in with you.

D: Really. We were quite a little surprised about the whole thing. It wasn't intentional.

K: I never thought there was any such intention.

D: That is the point. It wasn't intentional. But it was done so it would clear the way out. Henry, there is a letter from Mr. Brezhnev to the President on the subject of a letter which was sent from the President to Mr. Brezhnev. This is the answer saying that it is a good idea and he hopes that we will keep our relations on a equal basis. So how to do it?

K: Why don't you send it over to Scowcroft. Can you send me a copy?

D: Maybe I will send my assistant and he will give it to your secretary.

K: Yes. Send your assistant to my secretary. Anatol, I am so glad that you are following channels religiously in my last four weeks in office.

D: Do you know Vance very well?

K: Very well. I worked with him for many years. He is very judicious and very fail minded and I think on the policies on which you and I are interested, he will pursue lines very parallel to what we are doing. He will be coming down here and why don't I invite you to lunch for the three of us.

D: That would be good.

K: He is coming down on Monday and we will then work out arrangements. And I think he will come down permanently about the 15th of December.

D: Anytime after Monday, I will be available.

D: I just talked to Habib and I understand the mixup that you are extremely upset.

K: There is no mixup. We are just not going to be blackmailed all the time.

D: It is not a question of blackmail. When I called to Sam Lewis I told him our delegation was having a resolution. It was not a fete accompli. This morning I heard from Hertzog that last night he talked to Scranton about it. He was not committing Scranton to anything. I heard it this morning together with you.

K: You know as well as I did you wanted to get us on record on an anti-PLO vote.

D: We wanted a clear resolution that indicates our willingness for Geneva and resolutions 224 and 338. That was the purpose of the exercise. And we wanted your support of it. There was no intent to blackmail you. There was no previous consultation.

K: To put this in without informing us was not proper.

D: I agree but it was not done deliberately. Hertzog was so (headstrong?) even before I had a chance to talk to Lewis.

K: We will probably abstain on the Egyptian resolution.

D: I understand from Habib it was amended.

K: Yes and we will vote against the amendment.

D: I will too and that means the whole resolution because it will probably be accepted by the others.

K: Of course.

D: My suggestion and don't think for a minute we were trying to do anything improper.

K: I had sent a cable to Fahmy urging him to . ...

D: But we didn't know it. I had no idea and I am not saying that I should have known. It is completely within your right to do it and we would of course welcome it but we had no idea.

D: My feeling was to withdraw. Then you don't have to vote. It was not our purpose to bring it to a vote against the PLO.

K: If you can get them to withdraw it, we will see about the other vote. You cannot ask us to vote twice in two days .

He was on Walter Cronkite tonight and said beautiful things about you. It was a taped interview of about 20 minutes but he really was full of praise — I think well deserved. Two things — first of all — I wanted to tell you that for the last few days we are conducting a level control of the area around _____ with regard to boats — not who are exiting but boats who are coming in. Suspicious vessels we are veering away to other ports. This has been working now for a number of days.

K: As long as the Syrians don't object, why don't you keep it going?

D: The Prime Minister wanted you to know about it since you had been out of town for the last few days.

K: Bill, how are you today? That was a nice party last night.

P: We enjoyed having you. I wanted to correct something I said last night -- that is the understanding we had in Moscow was a proposal put forward on my part and accepted verbally but not signed by them. I think I said that the agreement had been signed by both parties but this was the modus operanda in which we would pay so much money and certain conditions were lined out that he accepted in principle and we proceeded accordingly. Regarding that arrangement we would have had a preferred arrangement. When my people got there they said forget about that and started with new figures which was beyond what they decussed with me. Our people have been ordered to come back and now I have a cable reconfirming the first figures he gave to me.

K: I figured that once you pulled out they would run for cover.

P: We have to stick together now -- the three of us. I just did not want you to believe that I had this in writing on both sides. It was a dirty runout.

K: I will tell Dobrynin that it is G-D stupidity.

P: I did not mention this before, but I mentioned his name and they said as far as they are concerned they think of him as an American.

K: I have hard that they say this.

P: I had not mentioned his name but obviously as a result of the lunch you had arranged they gave me VIP treatment. They could not have been nicer. I got a long beautifully. It was a great surprise to me when they pulled away.

K: I wish I had known about that. It was probably some idiot at a lower level. You should have gone to Dobrynin.

P: They are coming back now and we have permission from the Dept. of Justice we will go back as a group and divide up events which can be done easily and they won't have us over the barrell. O.K., Henry, we will see you soon.

K: O.K. Good.

K: That he is in office permanetly.

D: So now it is a transitional government. And probably either tomorrow or the day after the Prime Minister will submit to the Knesset a bill asking for the fixing of a date for the new election.

K: Is there a constitutional limit of time in which the election must take place?

D: It cannot take place before 90 days.

K: It cannot take place before 90 days?

D: Yeah.

K: How can it take 2-1/2 million people 90 days to make up their minds?

D: 3-1/2 million. We would just make noise if we were 2-1/2 million.

K: No, no, you would make noise if you were 35. When will the election be?

D: Around May. The bill has not been drafted yet but the Prime Minister intends to have it sometime in May. Early May or middle May or late May, I do not know. While I have you on the line, I got a message from the Prime Minister that the Lebanese roads are muddy so they have asked us to help them pave these roads with pebble. We are not going to send our people to do the work, but we are supplying them with gravel and pebble.

K: We are backing the British proposal. Also we think their tactics were lousy and I think that he is inclined to go ahead with that. A lot depends on what his perception of the new administration is. If he thinks you are out to do him in he is less likely to support it. You don't have to give him any assurances on South Africa -- we haven't. I think that it would be helpful just to tell him what I have just told you.
